#	ARTICLE	IF	CITATIONS
1	Predicting obesity in early adulthood from childhood and parental obesity. <i>International Journal of Obesity</i> , 2003, 27, 505-513.	1.6	406
2	Twelve-Month Effectiveness of a Parent-led, Family-Focused Weight-Management Program for Prepubertal Children: A Randomized, Controlled Trial. <i>Pediatrics</i> , 2007, 119, 517-525.	1.0	204
3	The NOURISH randomised control trial: Positive feeding practices and food preferences in early childhood - a primary prevention program for childhood obesity. <i>BMC Public Health</i> , 2009, 9, 387.	1.2	173
4	Assessing dietary intake in children and adolescents: Considerations and recommendations for obesity research. <i>Pediatric Obesity</i> , 2011, 6, 2-11.	3.2	149
5	Evaluation of an intervention to promote protective infant feeding practices to prevent childhood obesity: outcomes of the NOURISH RCT at 14 months of age and 6 months post the first of two intervention modules. <i>International Journal of Obesity</i> , 2012, 36, 1292-1298.	1.6	145
6	Outcomes of an Early Feeding Practices Intervention to Prevent Childhood Obesity. <i>Pediatrics</i> , 2013, 132, e109-e118.	1.0	136
7	Determinants of rapid weight gain during infancy: baseline results from the NOURISH randomised controlled trial. <i>BMC Pediatrics</i> , 2011, 11, 99.	0.7	132
8	Reliability and validity of the Children's Dietary Questionnaire; A new tool to measure children's dietary patterns. <i>Pediatric Obesity</i> , 2009, 4, 257-265.	3.2	123
9	An Early Feeding Practices Intervention for Obesity Prevention. <i>Pediatrics</i> , 2015, 136, e40-e49.	1.0	120
10	Toddlers' food preferences. The impact of novel food exposure, maternal preferences and food neophobia. <i>Appetite</i> , 2012, 59, 818-825.	1.8	112
11	A Parent-Led Family-Focused Treatment Program for Overweight Children Aged 5 to 9 Years: The PEACH RCT. <i>Pediatrics</i> , 2011, 127, 214-222.	1.0	108
12	Comparison of metabolic syndrome prevalence using six different definitions in overweight pre-pubertal children enrolled in a weight management study. <i>International Journal of Obesity</i> , 2006, 30, 853-860.	1.6	99
13	BMI, Health Behaviors, and Quality of Life in Children and Adolescents: A School-Based Study. <i>Pediatrics</i> , 2014, 133, e868-e874.	1.0	95
14	Child eating behavior outcomes of an early feeding intervention to reduce risk indicators for child obesity: The NOURISH RCT. <i>Obesity</i> , 2014, 22, E104-11.	1.5	87
15	Maternal report of young children's eating styles. Validation of the Children's Eating Behaviour Questionnaire in three ethnically diverse Australian samples. <i>Appetite</i> , 2013, 64, 48-55.	1.8	81
16	Food neophobia and its association with diet quality and weight in children aged 24 months: a cross sectional study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 13.	2.0	75
17	Fruit and vegetable intakes of Australians aged 2-18 years: an evaluation of the 1995 National Nutrition Survey data. <i>Australian and New Zealand Journal of Public Health</i> , 2001, 25, 155-161.	0.8	72
18	Associations between infant temperament and early feeding practices. A cross-sectional study of Australian mother-infant dyads from the NOURISH randomised controlled trial. <i>Appetite</i> , 2013, 60, 239-245.	1.8	64

#	ARTICLE	IF	CITATIONS
19	Recognition and management of childhood overweight and obesity by clinicians. <i>Journal of Paediatrics and Child Health</i> , 2006, 42, 411-418.	0.4	59
20	Randomised controlled trials in overweight children: Practicalities and realities. <i>Pediatric Obesity</i> , 2007, 2, 73-85.	3.2	57
21	Dietary patterns of Australian children aged 14 and 24 months, and associations with socio-demographic factors and adiposity. <i>European Journal of Clinical Nutrition</i> , 2013, 67, 638-645.	1.3	57
22	Child dietary and eating behavior outcomes up to 3.5 years after an early feeding intervention: The NOURISH RCT. <i>Obesity</i> , 2016, 24, 1537-1545.	1.5	56
23	Relationship between the home environment and fruit and vegetable consumption in children aged 6â€“12 years: a systematic review. <i>Public Health Nutrition</i> , 2017, 20, 464-480.	1.1	56
24	Double disadvantage: the influence of ethnicity over socioeconomic position on childhood overweight and obesity: findings from an inner urban population of primary school children. <i>Pediatric Obesity</i> , 2008, 3, 196-204.	3.2	52
25	Cluster randomised trial of a school-community child health promotion and obesity prevention intervention: findings from the evaluation of fun â€“n healthy in Moreland!. <i>BMC Public Health</i> , 2018, 18, 92.	1.2	51
26	The importance of long-term follow-up in child and adolescent obesity prevention interventions. <i>Pediatric Obesity</i> , 2011, 6, 178-181.	3.2	50
27	Food and beverage intake in Australian children aged 12â€“16 months participating in the NOURISH and SAIDI studies. <i>Australian and New Zealand Journal of Public Health</i> , 2014, 38, 326-331.	0.8	50
28	Interventions commenced by early infancy to prevent childhood obesityâ€”The EPOCH Collaboration: An individual participant data prospective metaâ€“analysis of four randomized controlled trials. <i>Pediatric Obesity</i> , 2020, 15, e12618.	1.4	50
29	The quality of dietary intake methodology and reporting in child and adolescent obesity intervention trials: a systematic review. <i>Obesity Reviews</i> , 2012, 13, 1125-1138.	3.1	48
30	Recruiting and engaging new mothers in nutrition research studies: lessons from the Australian NOURISH randomised controlled trial. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012, 9, 129.	2.0	46
31	Obesity prevention programs demand highâ€“quality evaluations. <i>Australian and New Zealand Journal of Public Health</i> , 2007, 31, 305-307.	0.8	45
32	The Early Prevention of Obesity in Children (EPOCH) Collaboration - an Individual Patient Data Prospective Meta-Analysis. <i>BMC Public Health</i> , 2010, 10, 728.	1.2	43
33	Dietary intake, physical activity and TV viewing as mediators of the association of socioeconomic status with body composition: a cross-sectional analysis of Australian youth. <i>International Journal of Obesity</i> , 2007, 31, 45-52.	1.6	38
34	Evaluation of fruit and vegetable intakes of Australian adults: the National Nutrition Survey 1995. <i>Australian and New Zealand Journal of Public Health</i> , 2006, 30, 32-37.	0.8	34
35	A short food-group-based dietary questionnaire is reliable and valid for assessing toddlers' dietary risk in relatively advantaged samples. <i>British Journal of Nutrition</i> , 2014, 112, 627-637.	1.2	31
36	The Influence of Home and School Environments on Childrenâ€™s Diet and Physical Activity, and Body Mass Index: A Structural Equation Modelling Approach. <i>Maternal and Child Health Journal</i> , 2018, 22, 364-375.	0.7	28

#	ARTICLE	IF	CITATIONS
37	Food-based recommendations to reduce fat intake: An evidence-based approach to the development of a family-focused child weight management programme. <i>Journal of Paediatrics and Child Health</i> , 2005, 41, 112-118.	0.4	27
38	Australian children's views about food advertising on television. <i>Appetite</i> , 2010, 55, 49-55.	1.8	27
39	Family-focused weight management program for five- to nine-year-olds incorporating parenting skills training with healthy lifestyle information to support behaviour modification. <i>Nutrition and Dietetics</i> , 2007, 64, 144-150.	0.9	26
40	Improving weight status in childhood: results from the eat well be active community programs. <i>International Journal of Public Health</i> , 2014, 59, 43-50.	1.0	25
41	Working at the interface in Aboriginal and Torres Strait Islander health: focussing on the individual health professional and their organisation as a means to address health equity. <i>International Journal for Equity in Health</i> , 2016, 15, 187.	1.5	24
42	Feeding Mode of Australian Infants in the First 12 Months of Life. <i>Journal of Human Lactation</i> , 2016, 32, NP95-NP104.	0.8	21
43	Children's food and activity patterns following a six-month child weight management program. <i>Pediatric Obesity</i> , 2011, 6, 409-414.	3.2	19
44	Prevalence and socio-economic distribution of eating, physical activity and sedentary behaviour among South Australian children in urban and rural communities: baseline findings from the OPAL evaluation. <i>Public Health</i> , 2016, 140, 196-205.	1.4	18
45	Practicalities and Research Considerations for Conducting Childhood Obesity Prevention Interventions with Families. <i>Children</i> , 2016, 3, 24.	0.6	17
46	Parent engagement and attendance in PEACH, QLD – an up-scaled parent-led childhood obesity program. <i>BMC Public Health</i> , 2017, 17, 559.	1.2	16
47	A narrative account of implementation lessons learnt from the dissemination of an up-scaled state-wide child obesity management program in Australia: PEACH (Parenting, Eating and Activity for) Tj ETQq11z0.784314 rgBT / Dv	1.4	16
48	Working together in Aboriginal health: a framework to guide health professional practice. <i>BMC Health Services Research</i> , 2020, 20, 601.	0.9	16
49	Relative validation of a short food frequency questionnaire to assess calcium intake in older adults. <i>Australian and New Zealand Journal of Public Health</i> , 2007, 31, 450-458.	0.8	10
50	Prevalence of overweight, obesity and underweight in Western Australian school-aged children; 2008 compared with 2003. <i>Public Health Nutrition</i> , 2014, 17, 2687-2691.	1.1	10
51	Evaluation of tools used to measure calcium and/or dairy consumption in adults. <i>Public Health Nutrition</i> , 2015, 18, 1225-1236.	1.1	9
52	A longitudinal investigation of overweight children's body perception and satisfaction during a weight management program. <i>Appetite</i> , 2015, 85, 48-51.	1.8	9
53	Beverage intake of Australian children and relationship with intake of fruit, vegetables, milk and body weight at 2, 3.7 and 5 years of age. <i>Nutrition and Dietetics</i> , 2018, 75, 159-166.	0.9	9
54	Reliability of Questionnaires to Assess the Healthy Eating and Activity Environment of a Child's Home and School. <i>Journal of Obesity</i> , 2013, 2013, 1-11.	1.1	8

#	ARTICLE	IF	CITATIONS
55	Minimal change in children's lifestyle behaviours and adiposity following a home-based obesity intervention: results from a pilot study. BMC Research Notes, 2016, 9, 26.	0.6	8
56	Is higher formula intake and limited dietary diversity in Australian children at 14 months of age associated with dietary quality at 24 months?. Appetite, 2018, 120, 240-245.	1.8	8
57	Changes in weight status, quality of life and behaviours of South Australian primary school children: results from the Obesity Prevention and Lifestyle (OPAL) community intervention program. BMC Public Health, 2019, 19, 1338.	1.2	8
58	Positive influences of home food environment on primary-school children's diet and weight status: a structural equation model approach. Public Health Nutrition, 2016, 19, 2525-2534.	1.1	7
59	Evaluation of tools used to measure calcium and/or dairy consumption in children and adolescents. Public Health Nutrition, 2014, 17, 1745-1756.	1.1	6
60	Dietary risk scores of toddlers are associated with nutrient intakes and socio-demographic factors, but not weight status. Nutrition and Dietetics, 2016, 73, 73-80.	0.9	5
61	Maternal perception of weight status in first-born Australian toddlers aged 12-16 months: the NOURISH and SAIDI cohorts. Child: Care, Health and Development, 2016, 42, 375-381.	0.8	5
62	Serve sizes and frequency of food consumption in Australian children aged 14 and 24 months. Australian and New Zealand Journal of Public Health, 2017, 41, 38-44.	0.8	5
63	Reliability and validity of the Children's Dietary Questionnaire; A new tool to measure children's dietary patterns. Pediatric Obesity, 0, , 1-9.	3.2	5
64	Impact of a 6-month family-based weight management programme on child food and activity behaviours: short-term and long-term outcomes of the PEACH intervention. Pediatric Obesity, 2018, 13, 744-751.	1.4	4
65	Community-based obesity prevention initiatives in aboriginal communities: The experience of the eat well be active community programs in South Australia. Health, 2012, 04, 1500-1508.	0.1	4
66	Childhood obesity epidemic: further evidence but it's action that we need. Nutrition and Dietetics, 2008, 65, 190-191.	0.9	3
67	Australasian nutrition research for prevention and management of child obesity: innovation and progress in the last decade. Pediatric Obesity, 2014, 9, e132-6.	1.4	3
68	A guide to undertaking a literature review. Australian Family Physician, 2001, 30, 1013-5.	0.5	3
69	Repeatability of a Short Food Frequency Questionnaire to Assess Calcium Intake in Older Australians. Journal of Aging Research, 2010, 2010, 1-5.	0.4	2
70	Swinburn right of reply. Australian and New Zealand Journal of Public Health, 2008, 32, 86.	0.8	0
71	Lecture in honour of Karen Cashel. Nutrition and Dietetics, 2011, 68, 231-235.	0.9	0
72	Six-month interventions: parent-centred dietary modification alone or in combination with child-centred physical activity may reduce child BMI at 2 years. Evidence-Based Medicine, 2012, 17, 11-12.	0.6	0

#	ARTICLE	IF	CITATIONS
73	The problem just keeps getting bigger. Medical Journal of Australia, 2012, 196, 152-153.	0.8	0
74	Nutrition and oral health in early childhood: associations with formal and informal childcare. Public Health Nutrition, 2021, 24, 1438-1448.	1.1	0
