#	ARTICLE	IF	CITATIONS
1	Performance and dynamics of active greywater heat recovery in buildings. <i>Applied Energy</i> , 2022, 305, 117677.	10.1	8
2	Cross flow frequency determines the physical structure and cohesion of membrane biofilms developed during gravity-driven membrane ultrafiltration of river water: Implication for hydraulic resistance. <i>Journal of Membrane Science</i> , 2022, 643, 120079.	8.2	9
3	Low maintenance gravity-driven membrane filtration using hollow fibers: Effect of reducing space for biofilm growth and control strategies on permeate flux. <i>Science of the Total Environment</i> , 2022, 811, 152307.	8.0	11
4	Microbial conversion pathways of particulate organic substrate conversion in aerobic granular sludge systems: limited anaerobic conversion and the essential role of flocs. <i>Environmental Science: Water Research and Technology</i> , 2022, 8, 1236-1251.	2.4	2
5	Tracing N ₂ O formation in full-scale wastewater treatment with natural abundance isotopes indicates control by organic substrate and process settings. <i>Water Research X</i> , 2022, 15, 100130.	6.1	12
6	How to get your feet wet: Integrating urban water and building engineering for low-energy domestic hot water systems. <i>Energy and Buildings</i> , 2022, 271, 112318.	6.7	3
7	Socio-technical analysis of a sanitation innovation in a peri-urban household in Durban, South Africa. <i>Science of the Total Environment</i> , 2021, 755, 143284.	8.0	13
8	Make your research more accessible. <i>Water Research</i> , 2021, 188, 116453.	11.3	0
9	Disruptions in loading and aeration impact effluent chlorine demand during biological greywater recycling. <i>Water Research X</i> , 2021, 11, 100087.	6.1	3
10	Predictive models using cheap and easy field measurements: Can they fill a gap in planning, monitoring, and implementing fecal sludge management solutions?. <i>Water Research</i> , 2021, 196, 116997.	11.3	13
11	Integrating granular activated carbon (GAC) to gravity-driven membrane (GDM) to improve its flux stabilization: Respective roles of adsorption and biodegradation by GAC. <i>Science of the Total Environment</i> , 2021, 768, 144758.	8.0	22
12	Making Waves: Why water reuse frameworks need to co-evolve with emerging small-scale technologies. <i>Water Research X</i> , 2021, 11, 100094.	6.1	15
13	Linking seasonal N ₂ O emissions and nitrification failures to microbial dynamics in a SBR wastewater treatment plant. <i>Water Research X</i> , 2021, 11, 100098.	6.1	26
14	Transformation of TiO ₂ (nano)particles during sewage sludge incineration. <i>Journal of Hazardous Materials</i> , 2021, 411, 124932.	12.4	5
15	The value of human data annotation for machine learning based anomaly detection in environmental systems. <i>Water Research</i> , 2021, 206, 117695.	11.3	14
16	Estimation of countrywide N ₂ O emissions from wastewater treatment in Switzerland using long-term monitoring data. <i>Water Research X</i> , 2021, 13, 100122.	6.1	28
17	Robustness of mainstream anammox activity at bench and pilot scale. <i>Science of the Total Environment</i> , 2021, 796, 148920.	8.0	13
18	Innovation for improved hand hygiene: Field testing the Autarky handwashing station in collaboration with informal settlement residents in Durban, South Africa. <i>Science of the Total Environment</i> , 2021, 796, 149024.	8.0	4

#	ARTICLE	IF	CITATIONS
19	Stagnation leads to short-term fluctuations in the effluent water quality of biofilters: A problem for greywater reuse?. <i>Water Research X</i> , 2021, 13, 100120.	6.1	12
20	Biological activated carbon filter for greywater post-treatment: Long-term TOC removal with adsorption and biodegradation. <i>Water Research X</i> , 2021, 13, 100113.	6.1	10
21	Release of gold (Au), silver (Ag) and cerium dioxide (CeO ₂) nanoparticles from sewage sludge incineration ash. <i>Environmental Science: Nano</i> , 2021, 8, 3220-3232.	4.3	4
22	On-site urine treatment combining Ca(OH) ₂ dissolution and dehydration with ambient air. <i>Water Research X</i> , 2021, 13, 100124.	6.1	8
23	Modelling hydrolysis: Simultaneous versus sequential biodegradation of the hydrolysable fractions. <i>Waste Management</i> , 2020, 101, 150-160.	7.4	13
24	Influence of intermittent flow on removal of organics in a biological activated carbon filter (BAC) used as post-treatment for greywater. <i>Water Research X</i> , 2020, 9, 100078.	6.1	6
25	Particulate substrate retention in plug-flow and fully-mixed conditions during operation of aerobic granular sludge systems. <i>Water Research X</i> , 2020, 9, 100075.	6.1	10
26	Rethinking wastewater risks and monitoring in light of the COVID-19 pandemic. <i>Nature Sustainability</i> , 2020, 3, 981-990.	23.7	195
27	Competitive co-adsorption of bacteriophage MS2 and natural organic matter onto multiwalled carbon nanotubes. <i>Water Research X</i> , 2020, 9, 100058.	6.1	13
28	Linking transformations of organic carbon to post-treatment performance in a biological water recycling system. <i>Science of the Total Environment</i> , 2020, 721, 137489.	8.0	9
29	Acknowledging excellent reviewers and associate editors. <i>Water Research X</i> , 2020, 7, 100046.	6.1	0
30	A Research Agenda for the Future of Urban Water Management: Exploring the Potential of Nongrid, Small-Grid, and Hybrid Solutions. <i>Environmental Science & Technology</i> , 2020, 54, 5312-5322.	10.0	73
31	Modeling the water-energy nexus in households. <i>Energy and Buildings</i> , 2020, 225, 110262.	6.7	13
32	Limited simultaneous nitrification-denitrification (SND) in aerobic granular sludge systems treating municipal wastewater: Mechanisms and practical implications. <i>Water Research X</i> , 2020, 7, 100048.	6.1	77
33	Acknowledging excellent reviewers and associate editors. <i>Water Research</i> , 2020, 173, 115560.	11.3	0
34	Synchrotron hard X-ray chemical imaging of trace element speciation in heterogeneous samples: development of criteria for uncertainty analysis. <i>Journal of Analytical Atomic Spectrometry</i> , 2020, 35, 567-579.	3.0	6
35	Practical implementation of true on-site water recycling systems for hand washing and toilet flushing. <i>Water Research X</i> , 2020, 7, 100051.	6.1	14
36	Make your research more accessible. <i>Water Research X</i> , 2020, 9, 100082.	6.1	0

#	ARTICLE	IF	CITATIONS
37	Editorial note. <i>Water Research</i> , 2019, 162, 276.	11.3	0
38	Transformation of Nanoscale and Ionic Cu and Zn during the Incineration of Digested Sewage Sludge (Biosolids). <i>Environmental Science & Technology</i> , 2019, 53, 11704-11713.	10.0	19
39	Stabilizing control of a urine nitrification process in the presence of sensor drift. <i>Water Research</i> , 2019, 165, 114958.	11.3	9
40	Evaluation of conceptual model and predictors of faecal sludge dewatering performance in Senegal and Tanzania. <i>Water Research</i> , 2019, 167, 115101.	11.3	35
41	Biomass segregation between biofilm and flocs improves the control of nitrite-oxidizing bacteria in mainstream partial nitrification and anammox processes. <i>Water Research</i> , 2019, 154, 104-116.	11.3	191
42	Comparing the anti-bacterial performance of chlorination and electrolysis post-treatments in a hand washing water recycling system. <i>Water Research X</i> , 2019, 2, 100020.	6.1	19
43	Organic substrate diffusibility governs microbial community composition, nutrient removal performance and kinetics of granulation of aerobic granular sludge. <i>Water Research X</i> , 2019, 4, 100033.	6.1	85
44	Source Community and Assembly Processes Affect the Efficiency of Microbial Microcystin Degradation on Drinking Water Filtration Membranes. <i>Frontiers in Microbiology</i> , 2019, 10, 843.	3.5	4
45	Biofilm compressibility in ultrafiltration: A relation between biofilm morphology, mechanics and hydraulic resistance. <i>Water Research</i> , 2019, 157, 335-345.	11.3	30
46	Gravity-driven membrane filtration for water and wastewater treatment: A review. <i>Water Research</i> , 2019, 149, 553-565.	11.3	306
47	The WaterHub Modules: Material and Energy Flow Analysis of Domestic Hot Water Systems. , 2019, , .		2
48	Pore-Scale Hydrodynamics in a Progressively Bioclogged Three-Dimensional Porous Medium: 3D Particle Tracking Experiments and Stochastic Transport Modeling. <i>Water Resources Research</i> , 2018, 54, 2183-2198.	4.2	34
49	Biofilms in 3D porous media: Delineating the influence of the pore network geometry, flow and mass transfer on biofilm development. <i>Water Research</i> , 2018, 134, 280-291.	11.3	71
50	A framework for good biofilm reactor modeling practice (GBRMP). <i>Water Science and Technology</i> , 2018, 77, 1149-1164.	2.5	32
51	Linking composition of extracellular polymeric substances (EPS) to the physical structure and hydraulic resistance of membrane biofilms. <i>Water Research</i> , 2018, 132, 211-221.	11.3	161
52	Stratification in the physical structure and cohesion of membrane biofilms – Implications for hydraulic resistance. <i>Journal of Membrane Science</i> , 2018, 564, 897-904.	8.2	33
53	Chemical composition, nutrient-balancing and biological treatment of hand washing greywater. <i>Water Research</i> , 2018, 144, 752-762.	11.3	33
54	Physical structure determines compression of membrane biofilms during Gravity Driven Membrane (GDM) ultrafiltration. <i>Water Research</i> , 2018, 143, 539-549.	11.3	35

#	ARTICLE	IF	CITATIONS
55	Effect of biofilm structural deformation on hydraulic resistance during ultrafiltration: A numerical and experimental study. <i>Water Research</i> , 2018, 145, 375-387.	11.3	41
56	Combustion of Sewage Sludge: Kinetics and Speciation of the Combustible. <i>Energy & Fuels</i> , 2018, 32, 10656-10667.	5.1	10
57	Early testing of new sanitation technology for urban slums: The case of the Blue Diversion Toilet. <i>Science of the Total Environment</i> , 2017, 576, 264-272.	8.0	33
58	From biofilm ecology to reactors: a focused review. <i>Water Science and Technology</i> , 2017, 75, 1753-1760.	2.5	79
59	Biofilm carrier migration model describes reactor performance. <i>Water Science and Technology</i> , 2017, 75, 2818-2828.	2.5	10
60	Modeling hydraulic transport and anaerobic uptake by PAOs and GAOs during wastewater feeding in EBPR granular sludge reactors. <i>Biotechnology and Bioengineering</i> , 2017, 114, 1688-1702.	3.3	23
61	Growth of <i>Nitrosococcus</i> -Related Ammonia Oxidizing Bacteria Coincides with Extremely Low pH Values in Wastewater with High Ammonia Content. <i>Environmental Science & Technology</i> , 2017, 51, 6857-6866.	10.0	64
62	Modeling in-sewer transformations at catchment scale – implications on drug consumption estimates in wastewater-based epidemiology. <i>Water Research</i> , 2017, 122, 655-668.	11.3	58
63	Comparing the Resistance, Resilience, and Stability of Replicate Moving Bed Biofilm and Suspended Growth Combined Nitritation–Anammox Reactors. <i>Environmental Science & Technology</i> , 2017, 51, 5108-5117.	10.0	82
64	Removal rates and energy demand of the electrochemical oxidation of ammonia and organic substances in real stored urine. <i>Environmental Science: Water Research and Technology</i> , 2017, 3, 480-491.	2.4	34
65	Robust planning of sanitation services in urban informal settlements: An analytical framework. <i>Water Research</i> , 2017, 110, 297-312.	11.3	16
66	Emerging outcomes from a cross-disciplinary doctoral programme on water resource systems. <i>Water Policy</i> , 2017, 19, 463-478.	1.5	7
67	Controlling Bacterial Pathogens in Water for Reuse: Treatment Technologies for Water Recirculation in the Blue Diversion Autarky Toilet. <i>Frontiers in Environmental Science</i> , 2017, 5, 90.	3.3	18
68	Biofilm imaging in porous media by laboratory X-Ray tomography: Combining a non-destructive contrast agent with propagation-based phase-contrast imaging tools. <i>PLoS ONE</i> , 2017, 12, e0180374.	2.5	40
69	Microbial activity balance in size fractionated suspended growth biomass from full-scale sidestream combined nitritation-anammox reactors. <i>Bioresource Technology</i> , 2016, 218, 38-45.	9.6	63
70	Influence of Different Sewer Biofilms on Transformation Rates of Drugs. <i>Environmental Science & Technology</i> , 2016, 50, 13351-13360.	10.0	58
71	Degradation of the unbiodegradable particulate fraction (XU) from different activated sludges during batch digestion tests at ambient temperature. <i>Water Research</i> , 2016, 98, 206-214.	11.3	5
72	Effect of short term external perturbations on bacterial ecology and activities in a partial nitritation and anammox reactor. <i>Bioresource Technology</i> , 2016, 219, 527-535.	9.6	48

#	ARTICLE	IF	CITATIONS
73	Formation of aerobic granules for the treatment of real and low-strength municipal wastewater using a sequencing batch reactor operated at constant volume. <i>Water Research</i> , 2016, 105, 341-350.	11.3	133
74	Operating a pilot-scale nitrification/distillation plant for complete nutrient recovery from urine. <i>Water Science and Technology</i> , 2016, 73, 215-222.	2.5	92
75	The composition and compression of biofilms developed on ultrafiltration membranes determine hydraulic biofilm resistance. <i>Water Research</i> , 2016, 102, 63-72.	11.3	60
76	Mainstream partial nitrification and anammox: long-term process stability and effluent quality at low temperatures. <i>Water Research</i> , 2016, 101, 628-639.	11.3	420
77	Response of Simulated Drinking Water Biofilm Mechanical and Structural Properties to Long-Term Disinfectant Exposure. <i>Environmental Science & Technology</i> , 2016, 50, 1779-1787.	10.0	66
78	Impact of aeration shear stress on permeate flux and fouling layer properties in a low pressure membrane bioreactor for the treatment of grey water. <i>Journal of Membrane Science</i> , 2016, 510, 382-390.	8.2	100
79	Locally produced natural conditioners for dewatering of faecal sludge. <i>Environmental Technology (United Kingdom)</i> , 2016, 37, 2802-2814.	2.2	29
80	Effect of humic acid on the kinetics of silver nanoparticle sulfidation. <i>Environmental Science: Nano</i> , 2016, 3, 203-212.	4.3	59
81	An energy-efficient membrane bioreactor for on-site treatment and recovery of wastewater. <i>Journal of Water Sanitation and Hygiene for Development</i> , 2015, 5, 448-455.	1.8	26
82	Blue Diversion: a new approach to sanitation in informal settlements. <i>Journal of Water Sanitation and Hygiene for Development</i> , 2015, 5, 64-71.	1.8	23
83	Considering microbial and aggregate heterogeneity in biofilm reactor models: how far do we need to go?. <i>Water Science and Technology</i> , 2015, 72, 1692-1699.	2.5	7
84	On-site treatment of used wash-water using biologically activated membrane bioreactors operated at different solids retention times. <i>Journal of Water Sanitation and Hygiene for Development</i> , 2015, 5, 544-552.	1.8	9
85	Activity and growth of anammox biomass on aerobically pre-treated municipal wastewater. <i>Water Research</i> , 2015, 80, 325-336.	11.3	195
86	Direct electrochemical oxidation of ammonia on graphite as a treatment option for stored source-separated urine. <i>Water Research</i> , 2015, 69, 284-294.	11.3	90
87	Modeling the low pH limit of <i>Nitrosomonas eutropha</i> in high-strength nitrogen wastewaters. <i>Water Research</i> , 2015, 83, 161-170.	11.3	56
88	Role of Biofilm Roughness and Hydrodynamic Conditions in <i>Legionella pneumophila</i> Adhesion to and Detachment from Simulated Drinking Water Biofilms. <i>Environmental Science & Technology</i> , 2015, 49, 4274-4282.	10.0	91
89	Inhibition of Direct Electrolytic Ammonia Oxidation Due to a Change in Local pH. <i>Electrochimica Acta</i> , 2015, 165, 348-355.	5.2	42
90	Effect of particulate organic substrate on aerobic granulation and operating conditions of sequencing batch reactors. <i>Water Research</i> , 2015, 85, 158-166.	11.3	93

#	ARTICLE	IF	CITATIONS
91	Observability of anammox activity in single-stage nitrification/anammox reactors using mass balances. <i>Environmental Science: Water Research and Technology</i> , 2015, 1, 523-534.	2.4	5
92	Bacterial growth in batch-operated membrane filtration systems for drinking water treatment. <i>Separation and Purification Technology</i> , 2015, 156, 165-174.	7.9	10
93	Formation of Chlorination Byproducts and Their Emission Pathways in Chlorine Mediated Electro-Oxidation of Urine on Active and Nonactive Type Anodes. <i>Environmental Science & Technology</i> , 2015, 49, 11062-11069.	10.0	76
94	Effect of Ozone Treatment on Nano-Sized Silver Sulfide in Wastewater Effluent. <i>Environmental Science & Technology</i> , 2015, 49, 10911-10919.	10.0	38
95	Biofilm increases permeate quality by organic carbon degradation in low pressure ultrafiltration. <i>Water Research</i> , 2015, 85, 512-520.	11.3	64
96	The effect of different aeration conditions in activated sludge " Side-stream system on sludge production, sludge degradation rates, active biomass and extracellular polymeric substances. <i>Water Research</i> , 2015, 85, 46-56.	11.3	43
97	Impact of coexistence of flocs and biofilm on performance of combined nitrification-anammox granular sludge reactors. <i>Water Research</i> , 2015, 68, 127-139.	11.3	131
98	Resiliency of Anammox against External Stress Factors " Effects of Temperature and Wastewater Constituents. <i>Proceedings of the Water Environment Federation</i> , 2015, 2015, 1986-1993.	0.0	0
99	An interactive framework of process engineering and systems microbiology toward improved performance of aerobic-anaerobic ammonium oxidation for energy-efficient nitrogen removal from wastewater. <i>Proceedings of the Water Environment Federation</i> , 2015, 2015, 1-8.	0.0	0
100	How far can genetic signatures be used to anticipate and trigger the behavior of environmental biotechnology systems in the water engineering domain?. <i>Proceedings of the Water Environment Federation</i> , 2015, 2015, 6170-6170.	0.0	1
101	Biodegradation of Microcystins during Gravity-Driven Membrane (GDM) Ultrafiltration. <i>PLoS ONE</i> , 2014, 9, e111794.	2.5	35
102	Successful application of nitrification/anammox to wastewater with elevated organic carbon to ammonia ratios. <i>Water Research</i> , 2014, 49, 316-326.	11.3	250
103	Effect of fouling layer spatial distribution on permeate flux: A theoretical and experimental study. <i>Journal of Membrane Science</i> , 2014, 471, 130-137.	8.2	51
104	Inorganic particles increase biofilm heterogeneity and enhance permeate flux. <i>Water Research</i> , 2014, 64, 177-186.	11.3	51
105	Presence of biofilms on ultrafiltration membrane surfaces increases the quality of permeate produced during ultra-low pressure gravity-driven membrane filtration. <i>Water Research</i> , 2014, 60, 164-173.	11.3	89
106	Sulfidation Kinetics of Silver Nanoparticles Reacted with Metal Sulfides. <i>Environmental Science & Technology</i> , 2014, 48, 4885-4892.	10.0	93
107	Biofilm formation and permeate quality improvement in Gravity Driven Membrane ultrafiltration. <i>Water Science and Technology: Water Supply</i> , 2014, 14, 274-282.	2.1	20
108	Towards Community Systems Microbiology for the Optimization of Aerobic-Anaerobic Ammonium Oxidation Processes. <i>Proceedings of the Water Environment Federation</i> , 2014, 2014, 2645-2649.	0.0	0

#	ARTICLE	IF	CITATIONS
109	A consolidated approach of flocculent and granular sludge systems under the perspective of bacterial resource management. Proceedings of the Water Environment Federation, 2014, 2014, 5008-5009.	0.0	6
110	Two-Stage Acidic-Alkaline Hydrothermal Pretreatment of Lignocellulose for the High Recovery of Cellulose and Hemicellulose Sugars. Applied Biochemistry and Biotechnology, 2013, 169, 1069-1087.	2.9	31
111	Urban water management to increase sustainability of cities. Water Research, 2013, 47, 7149.	11.3	5
112	Lignocellulosic hydrolysates and extracellular electron shuttles for H ₂ production using co-culture fermentation with <i>Clostridium beijerinckii</i> and <i>Geobacter metallireducens</i> . Bioresource Technology, 2013, 147, 89-95.	9.6	29
113	Exogenous anthrahydroquinone-2,6-disulfonate specifically increases xylose utilization during mixed sugar fermentation by <i>Clostridium beijerinckii</i> NCIMB 8052. International Journal of Hydrogen Energy, 2013, 38, 2719-2727.	7.1	8
114	Activity of metazoa governs biofilm structure formation and enhances permeate flux during Gravity-Driven Membrane (GDM) filtration. Water Research, 2013, 47, 2085-2095.	11.3	136
115	Roles of ionic strength and biofilm roughness on adhesion kinetics of <i>Escherichia coli</i> onto groundwater biofilm grown on PVC surfaces. Water Research, 2013, 47, 2531-2542.	11.3	86
116	Interactions between <i>Clostridium beijerinckii</i> and <i>Geobacter metallireducens</i> in co-culture fermentation with anthrahydroquinone-2,6-disulfonate (AH ₂ QDS) for enhanced biohydrogen production from xylose. Biotechnology and Bioengineering, 2013, 110, 164-172.	3.3	31
117	Rethinking wastewater characterisation methods for activated sludge systems – a position paper. Water Science and Technology, 2013, 67, 2363-2373.	2.5	21
118	Anaerobic biodegradation of methyl tert-butyl ether and tert-butyl alcohol in petrochemical wastewater. Environmental Technology (United Kingdom), 2012, 33, 1937-1943.	2.2	7
119	Anthrahydroquinone-2,6-disulfonate increases the rate of hydrogen production during <i>Clostridium beijerinckii</i> fermentation with glucose, xylose, and cellobiose. International Journal of Hydrogen Energy, 2012, 37, 11701-11709.	7.1	21
120	Method to identify potential phosphorus rate-limiting conditions in post-denitrification biofilm reactors within systems designed for simultaneous low-level effluent nitrogen and phosphorus concentrations. Water Research, 2012, 46, 6228-6238.	11.3	20
121	Predation influences the structure of biofilm developed on ultrafiltration membranes. Water Research, 2012, 46, 3323-3333.	11.3	189
122	Backwash intensity and frequency impact the microbial community structure and function in a fixed-bed biofilm reactor. Applied Microbiology and Biotechnology, 2012, 96, 815-827.	3.6	15
123	Combined biomimetic and inorganic acids hydrolysis of hemicellulose in <i>Miscanthus</i> for bioethanol production. Bioresource Technology, 2012, 110, 278-287.	9.6	30
124	Combined Nitritation-Anammox: Advances in Understanding Process Stability. Environmental Science & Technology, 2011, 45, 9735-9742.	10.0	176
125	Anthrahydroquinone-2,6-disulfonate (AH ₂ QDS) increases hydrogen molar yield and xylose utilization in growing cultures of <i>Clostridium beijerinckii</i> . Applied Microbiology and Biotechnology, 2011, 92, 855-864.	3.6	27
126	Effects of the antimicrobial tylosin on the microbial community structure of an anaerobic sequencing batch reactor. Biotechnology and Bioengineering, 2011, 108, 296-305.	3.3	17

#	ARTICLE	IF	CITATIONS
127	Syntrophic acetate oxidation in two-phase (acidâ€“methane) anaerobic digesters. <i>Water Science and Technology</i> , 2011, 64, 1812-1820.	2.5	55
128	Systematic evaluation of biofilm models for engineering practice: components and critical assumptions. <i>Water Science and Technology</i> , 2011, 64, 930-944.	2.5	45
129	Changes in the Structure and Function of Microbial Communities in Drinking Water Treatment Bioreactors upon Addition of Phosphorus. <i>Applied and Environmental Microbiology</i> , 2010, 76, 7473-7481.	3.1	60
130	Mathematical modelling of biofilms and biofilm reactors for engineering design. <i>Water Science and Technology</i> , 2010, 62, 1821-1836.	2.5	50
131	Evaluating operating conditions for outcompeting nitrite oxidizers and maintaining partial nitrification in biofilm systems using biofilm modeling and Monte Carlo filtering. <i>Water Research</i> , 2010, 44, 1995-2009.	11.3	71
