| #  | Article                                                                                                                                                                                                              | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | SoC CMOS UWB Pulse Radar Sensor for Contactless Respiratory Rate Monitoring. IEEE Transactions on Biomedical Circuits and Systems, 2011, 5, 503-510.                                                                 | 2.7 | 198       |
| 2  | Two mm-Wave Vector Modulator Active Phase Shifters With Novel IQ Generator in 28 nm FDSOI CMOS.<br>IEEE Journal of Solid-State Circuits, 2017, 52, 344-356.                                                          | 3.5 | 92        |
| 3  | 13 GHz CMOS Active Inductor LC VCO. IEEE Microwave and Wireless Components Letters, 2012, 22, 138-140.                                                                                                               | 2.0 | 47        |
| 4  | UWB CMOS Monocycle Pulse Generator. IEEE Transactions on Circuits and Systems I: Regular Papers, 2010, 57, 2654-2664.                                                                                                | 3.5 | 44        |
| 5  | 32 dB Gain 28 nm Bulk CMOS W-Band LNA. IEEE Microwave and Wireless Components Letters, 2015, 25, 55-57.                                                                                                              | 2.0 | 35        |
| 6  | 22.7-dB Gain \$-\$19.7-dBm \$ICP_{1{m dB}}\$ UWB CMOS LNA. IEEE Transactions on Circuits and Systems II:<br>Express Briefs, 2009, 56, 689-693.                                                                       | 2.2 | 31        |
| 7  | Noncontact Measurement of River Surface Velocity and Discharge Estimation With a Low-Cost<br>Doppler Radar Sensor. IEEE Transactions on Geoscience and Remote Sensing, 2020, 58, 5195-5207.                          | 2.7 | 27        |
| 8  | Microwave Active Inductors. IEEE Microwave and Wireless Components Letters, 2009, 19, 461-463.                                                                                                                       | 2.0 | 25        |
| 9  | 50 GHz mm-Wave CMOS Active Inductor. IEEE Microwave and Wireless Components Letters, 2014, 24, 254-256.                                                                                                              | 2.0 | 22        |
| 10 | 1.29-W/mm <sup>2</sup> 23-dBm 66-GHz Power Amplifier in 55-nm SiGe BiCMOS With In-Line Coplanar<br>Transformer Power Splitters and Combiner. IEEE Microwave and Wireless Components Letters, 2017,<br>27, 1146-1148. | 2.0 | 19        |
| 11 | Analyses and techniques for phase noise reduction in CMOS Colpitts oscillator topology.<br>International Journal of Circuit Theory and Applications, 2016, 44, 616-638.                                              | 1.3 | 18        |
| 12 | LCâ€active VCO for CMOS RF transceivers. International Journal of Circuit Theory and Applications, 2010, 38, 69-84.                                                                                                  | 1.3 | 17        |
| 13 | Analyses and design of 95-GHz SoC CMOS radiometers for passive body imaging. Analog Integrated Circuits and Signal Processing, 2013, 77, 373-383.                                                                    | 0.9 | 16        |
| 14 | Performance and Trends in Millimetre-Wave CMOS Oscillators for Emerging Wireless Applications.<br>International Journal of Microwave Science and Technology, 2013, 2013, 1-6.                                        | 0.6 | 16        |
| 15 | Transformer-Based Input Integrated Matching in Cascode Amplifiers: Analytical Proofs. IEEE<br>Transactions on Circuits and Systems I: Regular Papers, 2018, 65, 1495-1504.                                           | 3.5 | 16        |
| 16 | K-Band SiGe System-on-Chip Radiometric Receiver for Remote Sensing of the Atmosphere. IEEE<br>Transactions on Circuits and Systems I: Regular Papers, 2017, 64, 3025-3035.                                           | 3.5 | 15        |
| 17 | Enabling technology for heart health wireless assistance. , 2010, , .                                                                                                                                                |     | 14        |
| 18 | Comparative Analyses of Phase Noise in 28 nm CMOS LC Oscillator Circuit Topologies: Hartley,<br>Colpitts, and Common-Source Cross-Coupled Differential Pair. Scientific World Journal, The, 2014,<br>2014, 1-13.     | 0.8 | 14        |

| #  | Article                                                                                                                                                                                                              | lF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | High-Frequency CMOS Active Inductor: Design Methodology and Noise Analysis. IEEE Transactions on<br>Very Large Scale Integration (VLSI) Systems, 2015, 23, 1123-1136.                                                | 2.1 | 14        |
| 20 | Analysis of Phase Noise in 28 nm CMOS LC Oscillator Differential Topologies: Armstrong, Colpitts,<br>Hartley and Common-Source Cross-Coupled Pair. Journal of Circuits, Systems and Computers, 2015, 24,<br>1550052. | 1.0 | 12        |
| 21 | Planar Differential Antenna for Short-Range UWB Pulse Radar Sensor. IEEE Antennas and Wireless<br>Propagation Letters, 2013, 12, 1527-1530.                                                                          | 2.4 | 11        |
| 22 | Planar Differential Antenna Design and Integration With Pulse Radar Microchip Sensor. IEEE Sensors<br>Journal, 2014, 14, 2477-2487.                                                                                  | 2.4 | 9         |
| 23 | On-Chip Millimeter-Wave Cold-Source Noise Figure Measurements With PNA-X. IEEE Transactions on Instrumentation and Measurement, 2017, 66, 3399-3401.                                                                 | 2.4 | 8         |
| 24 | Sub-100 ps monocycle pulses for 5G UWB communications. , 2016, , .                                                                                                                                                   |     | 7         |
| 25 | The Theory of Special Noise Invariants. IEEE Transactions on Circuits and Systems I: Regular Papers, 2019, 66, 1305-1318.                                                                                            | 3.5 | 7         |
| 26 | A novel phase shifter for 60 GHz phased arrays. , 2015, , .                                                                                                                                                          |     | 6         |
| 27 | 67 GHz threeâ€spiral transformer CMOS oscillator. International Journal of Circuit Theory and Applications, 2016, 44, 1798-1813.                                                                                     | 1.3 | 6         |
| 28 | Editors' Choice—Review—Semiconductor Integrated Radar for Sensing Applications. ECS Journal of<br>Solid State Science and Technology, 2018, 7, Q3126-Q3142.                                                          | 0.9 | 6         |
| 29 | Millimeter-Wave Integrated Silicon Devices: Active versus Passive — The Eternal Struggle Between<br>Good and Evil : (Invited Paper). , 2019, , .                                                                     |     | 5         |
| 30 | 0.4V low-power 60-GHz oscillator in 65nm CMOS. , 2012, , .                                                                                                                                                           |     | 4         |
| 31 | Analysis and design of Ka-band SoC radiometer for space detection of solar flares. , 2015, , .                                                                                                                       |     | 4         |
| 32 | Transformer-based input integrated matching in cascode Amplifier: Circuit analysis and comparison with inductive degeneration. , 2016, , .                                                                           |     | 4         |
| 33 | Analyses and techniques for phase noise reduction in CMOS Hartley oscillator topology.<br>International Journal of Circuit Theory and Applications, 2017, 45, 1993-2016.                                             | 1.3 | 4         |
| 34 | Transformerâ€coupled Ï€â€network differential CMOS oscillator circuit topology. International Journal of Circuit Theory and Applications, 2017, 45, 407-418.                                                         | 1.3 | 4         |
| 35 | A 24-GHz Single-Transistor Oscillator on Paper. IEEE Microwave and Wireless Components Letters, 2020, 30, 1085-1088.                                                                                                 | 2.0 | 4         |
| 36 | Design Variations on Planar Differential Antenna with Potential for Multiple, Wide, and Narrow Band<br>Coverage. International Journal of Antennas and Propagation, 2015, 2015, 1-13.                                | 0.7 | 3         |

| #  | Article                                                                                                                                                                                   | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Phase noise analysis in CMOS differential Armstrong oscillator topology. International Journal of<br>Circuit Theory and Applications, 2016, 44, 1697-1705.                                | 1.3 | 3         |
| 38 | K-band SiGe dual-input LNA and detector for SoC radiometers for remote sensing of atmosphere. , 2016, , .                                                                                 |     | 3         |
| 39 | UWB Radios — The maturity age?. , 2016, , .                                                                                                                                               |     | 3         |
| 40 | Analysis and design of mm-wave detectors in SiGe SoC radiometers for spaceborne observations of solar flares. , 2016, , .                                                                 |     | 3         |
| 41 | Millimeter-wave high-Q active inductor in 65nm CMOS. , 2012, , .                                                                                                                          |     | 2         |
| 42 | Performances and trends in millimeter-wave CMOS voltage controlled oscillators. , 2012, , .                                                                                               |     | 2         |
| 43 | Complements on phase noise analysis and design of CMOS ring oscillators. , 2012, , .                                                                                                      |     | 2         |
| 44 | UWB pulse radio transceivers and antennas: Considerations on design and implementation. , 2014, , .                                                                                       |     | 2         |
| 45 | Analyses of phase noise reduction techniques in CMOS Colpitts oscillator topology at the mm-waves:<br>Noise filter and optimum current density. , 2015, , .                               |     | 2         |
| 46 | Impact of switching on design of Ka-band SoC Dicke radiometer for space detection of solar flares. ,<br>2015, , .                                                                         |     | 2         |
| 47 | Analyses of phase noise reduction techniques in CMOS Colpitts oscillator topology at the mm-waves:<br>Inductive degeneration and optimum current density. , 2015, , .                     |     | 2         |
| 48 | A novel differential Colpitts CMOS oscillator circuit topology. , 2016, , .                                                                                                               |     | 2         |
| 49 | 50ÂGHz activeâ€LC CMOS oscillator: Theoretical study and experimental proofs. Radio Science, 2017, 52, 1117-1128.                                                                         | 0.8 | 2         |
| 50 | Integrated Micro-Devices for a Lab-in-Organoid Technology Platform: Current Status and Future Perspectives. Frontiers in Neuroscience, 2022, 16, 842265.                                  | 1.4 | 2         |
| 51 | Feasibility study including detector non-idealities of a 95-GHz CMOS SoC radiometer for passive imaging. , 2012, , .                                                                      |     | 1         |
| 52 | Audio Telecom ADC Featuring Click-Free Gain Control Technique, Dithering Insertion, and Idle Tone<br>Shifting. IEEE Transactions on Instrumentation and Measurement, 2012, 61, 2879-2887. | 2.4 | 1         |
| 53 | 50 GHz LC-active oscillator in 65 nm CMOS. , 2015, , .                                                                                                                                    |     | 1         |
| 54 | Analyses of phase noise reduction techniques in CMOS Hartley oscillator topology at the mm-waves:<br>Inductive degeneration and optimum current density. , 2015, , .                      |     | 1         |
