#	ARTICLE	IF	CITATIONS
1	Concept Development and Use of an Automated Food Intake and Eating Behavior Assessment Method. Journal of Visualized Experiments, 2021, , .	0.3	1
2	Effects of Oro-Sensory Exposure on Satiation and Underlying Neurophysiological Mechanismsâ€”What Do We Know So Far?. Nutrients, 2021, 13, 1391.	4.1	16
3	Short and Long-Term Innovations on Dietary Behavior Assessment and Coaching: Present Efforts and Vision of the Pride and Prejudice Consortium. International Journal of Environmental Research and Public Health, 2021, 18, 7877.	2.6	3
4	Endocrine Cephalic Phase Responses to Food Cues: A Systematic Review. Advances in Nutrition, 2020, 11, 1364-1383.	6.4	23
5	How oro-sensory exposure and eating rate affect satiation and associated endocrine responsesâ€”a randomized trial. American Journal of Clinical Nutrition, 2020, 111, 1137-1149.	4.7	24
6	Sensory analysis of characterising flavours: evaluating tobacco product odours using an expert panel. Tobacco Control, 2019, 28, 152-160.	3.2	15
7	Unaware of the amount consumed: Systematic error in estimating food- and drink intake. Physiology and Behavior, 2019, 209, 112591.	2.1	0
8	Brain response to food cues varying in portion size is associated with individual differences in the portion size effect in children. Appetite, 2018, 125, 139-151.	3.7	22
9	Exacting Responses: Lack of Endocrine Cephalic Phase Responses Upon Oro-Sensory Exposure. Frontiers in Endocrinology, 2018, 9, 332.	3.5	9
10	Sensory analysis of characterizing flavors in tobacco products using a trained expert panel. Tobacco Induced Diseases, 2018, 16, .	0.6	0
11	Comparison of oro-sensory exposure duration and intensity manipulations on satiation. Physiology and Behavior, 2017, 176, 76-83.	2.1	46
12	Brain regions implicated in inhibitory control and appetite regulation are activated in response to food portion size and energy density in children. International Journal of Obesity, 2016, 40, 1515-1522.	3.4	27
13	Brain response to images of food varying in energy density is associated with body composition in 7- to 10-year-old children: Results of an exploratory study. Physiology and Behavior, 2016, 162, 3-9.	2.1	23
14	Orbitofrontal cortex response to food portion size is linked with obesogenic appetitive profile in children. FASEB Journal, 2016, 30, 270.3.	0.5	0
15	Mechanisms of the portion size effect. What is known and where do we go from here?. Appetite, 2015, 88, 39-49.	3.7	101
