citing authors

#	ARTICLE	IF	CITATIONS
1	Spatial and temporal variations of atmospheric chemical condition in the Southeastern U.S.. Atmospheric Research, 2021, 248, 105190.	4.1	4
2	Improving estimates of PM2.5 concentration and chemical composition by application of High Spectral Resolution Lidar (HSRL) and Creating Aerosol Types from chemistry (CATCH) algorithm. Atmospheric Environment, 2021, 250, 118250.	4.1	4
3	Surface ocean microbiota determine cloud precursors. Scientific Reports, 2021, 11, 281.	3.3	19
4	Partitioning of NH3-NH4+ in the Southeastern U.S.. Atmosphere, 2021, 12, 1681.	2.3	2
5	Observations of new particle formation, modal growth rates, and direct emissions of sub-10 nm particles in an urban environment. Atmospheric Environment, 2020, 242, 117835.	4.1	10
6	Spatial and temporal variations of PM2.5 mass closure and inorganic PM2.5 in the Southeastern U.S.. Environmental Science and Pollution Research, 2019, 26, 33181-33191.	5.3	10
7	Perspective on identifying and characterizing the processes controlling iron speciation and residence time at the atmosphere-ocean interface. Marine Chemistry, 2019, 217, 103704.	2.3	41
8	Possible Wintertime Sources of Fine Particles in an Urban Environment. Journal of Geophysical Research D: Atmospheres, 2019, 124, 13055-13070.	3.3	7
9	Pyrogenic iron: The missing link to high iron solubility in aerosols. Science Advances, 2019, 5, eaau7671.	10.3	128
10	MDPI Oceans: A New Publication Channel for Open Access Science Focused on the Ocean. Oceans, 2019, 1, 1-5.	1.3	1
11	Ocean Contributions to the Marine Boundary Layer Aerosol Budget. Atmosphere, 2019, 10, 98.	2.3	2
12	Hygroscopicity- and Size-Resolved Measurements of Submicron Aerosol on the East Coast of the United States. Journal of Geophysical Research D: Atmospheres, 2018, 123, 1826-1839.	3.3	6
13	Continuous flow hygroscopicity-resolved relaxed eddy accumulation (Hy-Res REA) method of measuring size-resolved sodium chloride particle fluxes. Aerosol Science and Technology, 2018, 52, 433-450.	3.1	3
14	Reviews and syntheses: the GESAMP atmospheric iron deposition model intercomparison study. Biogeosciences, 2018, 15, 6659-6684.	3.3	63
15	Does Marine Surface Tension Have Global Biogeography? Addition for the OCEANFILMS Package. Atmosphere, 2018, 9, 216.	2.3	10
16	Potential effect of atmospheric dissolved organic carbon on the iron solubility in seawater. Marine Chemistry, 2017, 194, 124-132.	2.3	17
17	Aerosol Properties Observed in the Subtropical North Pacific Boundary Layer. Journal of Geophysical Research D: Atmospheres, 2017, 122, 9990.	3.3	11
18	Creating Aerosol Types from CHEMISTRY (CATCH): A New Algorithm to Extend the Link Between Remote Sensing and Models. Journal of Geophysical Research D: Atmospheres, 2017, 122, 12,366.	3.3	3

#	ARTICLE	IF	CITATIONS
19	Acceleration of oxygen decline in the tropical Pacific over the past decades by aerosol pollutants. <i>Nature Geoscience</i> , 2016, 9, 443-447.	12.9	67
20	Hygroscopic growth and cloud droplet activation of xanthan gum as a proxy for marine hydrogels. <i>Journal of Geophysical Research D: Atmospheres</i> , 2016, 121, 11,803.	3.3	18
21	Influence of measurement uncertainties on fractional solubility of iron in mineral aerosols over the oceans. <i>Aeolian Research</i> , 2016, 22, 85-92.	2.7	15
22	Spaceborne observations of the lidar ratio of marine aerosols. <i>Atmospheric Chemistry and Physics</i> , 2015, 15, 3241-3255.	4.9	28
23	Quantifying environmental stress-induced emissions of algal isoprene and monoterpenes using laboratory measurements. <i>Biogeosciences</i> , 2015, 12, 637-651.	3.3	58
24	Implementing marine organic aerosols into the GEOS-Chem model. <i>Geoscientific Model Development</i> , 2015, 8, 619-629.	3.6	12
25	The physical and chemical characteristics of marine primary organic aerosol: a review. <i>Atmospheric Chemistry and Physics</i> , 2013, 13, 3979-3996.	4.9	211
26	Atmospheric dissolved iron deposition to the global oceans: effects of oxalate-promoted Fe dissolution, photochemical redox cycling, and dust mineralogy. <i>Geoscientific Model Development</i> , 2013, 6, 1137-1155.	3.6	81
27	Global distribution and climate forcing of marine organic aerosol – Part 2: Effects on cloud properties and radiative forcing. <i>Atmospheric Chemistry and Physics</i> , 2012, 12, 6555-6563.	4.9	33
28	Model evaluation of marine primary organic aerosol emission schemes. <i>Atmospheric Chemistry and Physics</i> , 2012, 12, 8553-8566.	4.9	34
29	A global comparison of GEOS-Chem-predicted and remotely-sensed mineral dust aerosol optical depth and extinction profiles. <i>Journal of Advances in Modeling Earth Systems</i> , 2012, 4, .	3.8	36
30	Wind speed dependent size-resolved parameterization for the organic mass fraction of sea spray aerosol. <i>Atmospheric Chemistry and Physics</i> , 2011, 11, 8777-8790.	4.9	150
31	Deriving the effect of wind speed on clean marine aerosol optical properties using the A-Train satellites. <i>Atmospheric Chemistry and Physics</i> , 2011, 11, 11401-11413.	4.9	23
32	Global distribution and climate forcing of marine organic aerosol: 1. Model improvements and evaluation. <i>Atmospheric Chemistry and Physics</i> , 2011, 11, 11689-11705.	4.9	87
33	Interpreting elevated space-borne HCHO columns over the Mediterranean Sea using the OMI sensor. <i>Atmospheric Chemistry and Physics</i> , 2011, 11, 12787-12798.	4.9	5
34	Understanding the transport of Patagonian dust and its influence on marine biological activity in the South Atlantic Ocean. <i>Atmospheric Chemistry and Physics</i> , 2011, 11, 2487-2502.	4.9	61
35	The contribution of marine organics to the air quality of the western United States. <i>Atmospheric Chemistry and Physics</i> , 2010, 10, 7415-7423.	4.9	21
36	The effect of marine isoprene emissions on secondary organic aerosol and ozone formation in the coastal United States. <i>Atmospheric Environment</i> , 2010, 44, 115-121.	4.1	37

#	ARTICLE	IF	CITATIONS
37	Production and Emissions of Marine Isoprene and Monoterpenes: A Review. <i>Advances in Meteorology</i> , 2010, 2010, 1-24.	1.6	146
38	Effects of Ocean Ecosystem on Marine Aerosol-Cloud Interaction. <i>Advances in Meteorology</i> , 2010, 2010, 1-13.	1.6	20
39	Modeling dust and soluble iron deposition to the South Atlantic Ocean. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	72
40	Acidic processing of mineral dust iron by anthropogenic compounds over the north Pacific Ocean. <i>Journal of Geophysical Research</i> , 2009, 114, .	3.3	97
41	A new physically-based quantification of marine isoprene and primary organic aerosol emissions. <i>Atmospheric Chemistry and Physics</i> , 2009, 9, 4915-4927.	4.9	161
42	Isoprene, Cloud Droplets, and Phytoplankton. <i>Science</i> , 2007, 317, 42-43.	12.6	15
43	Atlantic Southern Ocean productivity: Fertilization from above or below?. <i>Global Biogeochemical Cycles</i> , 2007, 21, n/a-n/a.	4.9	52
44	Phytoplankton and Cloudiness in the Southern Ocean. <i>Science</i> , 2006, 314, 1419-1423.	12.6	308
45	Dust and pollution: A recipe for enhanced ocean fertilization?. <i>Journal of Geophysical Research</i> , 2005, 110, .	3.3	208
46	Evaluation of a new cloud droplet activation parameterization with in situ data from CRYSTAL-FACE and CSTRIFE. <i>Journal of Geophysical Research</i> , 2005, 110, .	3.3	86
47	Estimation of iron solubility from observations and a global aerosol model. <i>Journal of Geophysical Research</i> , 2005, 110, .	3.3	99
48	Iron mobilization in mineral dust: Can anthropogenic SO ₂ emissions affect ocean productivity?. <i>Geophysical Research Letters</i> , 2003, 30, .	4.0	267
