#	ARTICLE	IF	CITATIONS
1	Considering ERP difference scores as individual difference measures: Issues with subtraction and alternative approaches. <i>Psychophysiology</i> , 2017, 54, 114-122.	2.4	194
2	The ERN is the ERN is the ERN? Convergent validity of error-related brain activity across different tasks. <i>Biological Psychology</i> , 2013, 93, 377-385.	2.2	155
3	Error-related negativity (ERN) and sustained threat: Conceptual framework and empirical evaluation in an adolescent sample. <i>Psychophysiology</i> , 2016, 53, 372-385.	2.4	143
4	The development of the error-related negativity (ERN) and its relationship with anxiety: Evidence from 8 to 13 year-olds. <i>Developmental Cognitive Neuroscience</i> , 2012, 2, 152-161.	4.0	139
5	The Utility of Event-Related Potentials in Clinical Psychology. <i>Annual Review of Clinical Psychology</i> , 2019, 15, 71-95.	12.3	121
6	Enhanced error-related brain activity in children predicts the onset of anxiety disorders between the ages of 6 and 9.. <i>Journal of Abnormal Psychology</i> , 2015, 124, 266-274.	1.9	116
7	Differentiating Anxiety and Depression in Children and Adolescents: Evidence From Event-Related Brain Potentials. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2015, 44, 238-249.	3.4	102
8	A biomarker of anxiety in children and adolescents: A review focusing on the error-related negativity (ERN) and anxiety across development. <i>Developmental Cognitive Neuroscience</i> , 2017, 27, 58-68.	4.0	96
9	The stability of the feedback negativity and its relationship with depression during childhood and adolescence. <i>Development and Psychopathology</i> , 2015, 27, 1285-1294.	2.3	89
10	Psychometrics and the neuroscience of individual differences: Internal consistency limits between-subjects effects.. <i>Journal of Abnormal Psychology</i> , 2017, 126, 823-834.	1.9	82
11	Reliability of the <scp>ERN</scp> across multiple tasks as a function of increasing errors. <i>Psychophysiology</i> , 2013, 50, 1220-1225.	2.4	80
12	Psychometric properties of the error-related negativity in children and adolescents. <i>Psychophysiology</i> , 2014, 51, 602-610.	2.4	75
13	Increased Error-Related Brain Activity in Six-Year-Old Children with Clinical Anxiety. <i>Journal of Abnormal Child Psychology</i> , 2013, 41, 1257-1266.	3.5	69
14	A neural biomarker, the error-related negativity, predicts the first onset of generalized anxiety disorder in a large sample of adolescent females. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2018, 59, 1162-1170.	5.2	64
15	Self-Reported and Observed Punitive Parenting Prospectively Predicts Increased Error-Related Brain Activity in Six-Year-Old Children. <i>Journal of Abnormal Child Psychology</i> , 2015, 43, 821-829.	3.5	63
16	Methodological choices in event-related potential (ERP) research and their impact on internal consistency reliability and individual differences: An examination of the error-related negativity (ERN) and anxiety.. <i>Journal of Abnormal Psychology</i> , 2020, 129, 29-37.	1.9	54
17	Reduced P300 in depression: Evidence from a flanker task and impact on ERN, CRN, and Pe. <i>Psychophysiology</i> , 2020, 57, e13520.	2.4	51
18	Neural Biomarker and Early Temperament Predict Increased Internalizing Symptoms After a Natural Disaster. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2017, 56, 410-416.	0.5	38

#	ARTICLE	IF	CITATIONS
19	Evidence for specificity of the impact of punishment on error-related brain activity in high versus low trait anxious individuals. <i>International Journal of Psychophysiology</i> , 2017, 120, 157-163.	1.0	38
20	Developing Psychiatric Biomarkers: a Review Focusing on the Error-Related Negativity as a Biomarker for Anxiety. <i>Current Treatment Options in Psychiatry</i> , 2016, 3, 356-364.	1.9	36
21	Transdiagnostic factors and pathways to multifinality: The error-related negativity predicts whether preschool irritability is associated with internalizing versus externalizing symptoms at age 9. <i>Development and Psychopathology</i> , 2016, 28, 913-926.	2.3	32
22	Aberrant attentional bias to sad faces in depression and the role of stressful life events: Evidence from an eye-tracking paradigm. <i>Behaviour Research and Therapy</i> , 2020, 135, 103762.	3.1	31
23	The Presence of a Controlling Parent Is Related to an Increase in the Error-Related Negativity in 5-7 Year-Old Children. <i>Journal of Abnormal Child Psychology</i> , 2019, 47, 935-945.	3.5	28
24	Examining the relationships between error-related brain activity (the ERN) and anxiety disorders versus externalizing disorders in young children: Focusing on cognitive control, fear, and shyness. <i>Comprehensive Psychiatry</i> , 2018, 87, 112-119.	3.1	27
25	Neural Correlates of Choking Under Pressure: Athletes High in Sports Anxiety Monitor Errors More When Performance Is Being Evaluated. <i>Developmental Neuropsychology</i> , 2017, 42, 104-112.	1.4	26
26	A brief, computerized intervention targeting error sensitivity reduces the error-related negativity. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2020, 20, 172-180.	2.0	25
27	Error-related brain activity is related to aversive potentiation of the startle response in children, but only the ERN is associated with anxiety disorders.. <i>Emotion</i> , 2017, 17, 487-496.	1.8	24
28	Understanding the Link between Anxiety and a Neural Marker of Anxiety (The Error-Related Negativity) in 5 to 7 Year-Old Children. <i>Developmental Neuropsychology</i> , 2019, 44, 71-87.	1.4	23
29	Early temperamental fearfulness and the developmental trajectory of error-related brain activity. <i>Developmental Psychobiology</i> , 2018, 60, 224-231.	1.6	22
30	A review examining the relationship between individual differences in the error-related negativity and cognitive control. <i>International Journal of Psychophysiology</i> , 2019, 144, 7-13.	1.0	22
31	Maternal Depression Is Related to Reduced Error-Related Brain Activity in Child and Adolescent Offspring. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2018, 47, 324-335.	3.4	17
32	The development of the error-related negativity in large sample of adolescent females: Associations with anxiety symptoms. <i>Biological Psychology</i> , 2018, 138, 96-103.	2.2	17
33	COVID-related fear maintains controlling parenting behaviors during the pandemic. <i>Cognitive Behaviour Therapy</i> , 2021, 50, 305-319.	3.5	16
34	Controlling parenting and perfectionism is associated with an increased error-related negativity (ERN) in young adults. <i>Social Cognitive and Affective Neuroscience</i> , 2020, 15, 87-95.	3.0	14
35	On the relationship between the error-related negativity and anxiety in children and adolescents: From a neural marker to a novel target for intervention. <i>Psychophysiology</i> , 2022, 59, e14050.	2.4	14
36	Pubertal development and anxiety risk independently relate to startle habituation during fear conditioning in 8-14 year-old females. <i>Developmental Psychobiology</i> , 2017, 59, 436-448.	1.6	13

#	ARTICLE	IF	CITATIONS
37	Error-related negativity predicts increases in anxiety in a sample of clinically anxious female children and adolescents over 2 years. <i>Journal of Psychiatry and Neuroscience</i> , 2021, 46, E472-E479.	2.4	13
38	The relationship between stressful life events and the error-related negativity in children and adolescents. <i>Developmental Cognitive Neuroscience</i> , 2022, 55, 101110.	4.0	13
39	Linking puberty and error-monitoring: Relationships between self-reported pubertal stages, pubertal hormones, and the error-related negativity in a large sample of children and adolescents. <i>Developmental Psychobiology</i> , 2018, 60, 483-490.	1.6	12
40	Increased dehydroepiandrosterone (DHEA) is associated with anxiety in adolescent girls. <i>Psychoneuroendocrinology</i> , 2020, 119, 104751.	2.7	12
41	Parenting style moderates the effects of exposure to natural disaster-related stress on the neural development of reactivity to threat and reward in children. <i>Development and Psychopathology</i> , 2019, 31, 1589-1598.	2.3	11
42	The association between parenting and the error-related negativity across childhood and adolescence. <i>Developmental Cognitive Neuroscience</i> , 2020, 45, 100852.	4.0	11
43	Effects of menstrual cycle phase on associations between the error-related negativity and checking symptoms in women. <i>Psychoneuroendocrinology</i> , 2019, 103, 233-240.	2.7	9
44	A genetic variant brain-derived neurotrophic factor (BDNF) polymorphism interacts with hostile parenting to predict error-related brain activity and thereby risk for internalizing disorders in children. <i>Development and Psychopathology</i> , 2018, 30, 125-141.	2.3	5
45	Psychometric properties of threat-related attentional bias in young children using eye-tracking. <i>Developmental Psychobiology</i> , 2020, 63, 1120-1131.	1.6	5
46	Overprotective Parenting Mediates the Relationship Between Early Childhood ADHD and Anxiety Symptoms: Evidence From a Cross-Sectional and Longitudinal Study. <i>Journal of Attention Disorders</i> , 2022, 26, 319-327.	2.6	4
47	The Parent Sensitivity to Child Anxiety Index. <i>Child Psychiatry and Human Development</i> , 2018, 49, 814-821.	1.9	3
48	Parental Presence Impacts a Neural Correlate of Anxiety (the Late Positive Potential) in 5-7 Year Old Children: Interactions with Parental Sensitivity to Child Anxiety. <i>Journal of Abnormal Child Psychology</i> , 2020, 48, 951-963.	3.5	3
