1	Interleukin-5 Expression in the Lung Epithelium of Transgenic Mice Leads to Pulmonary Changes Pathognomonic of Asthma. Journal of Experimental Medicine, 1997, 185, 2143-2156.	8.5	480
2	CD4 T-Lymphocyte Activation in Asthma Is Accompanied by Increased Serum Concentrations of Interleukin-5: Effect of Glucocorticoid Therapy. The American Review of Respiratory Disease, 1993, 147, 540-547.	2.9	275
3	T Cell Factor 1 Is Required for Group 2 Innate Lymphoid Cell Generation. Immunity, 2013, 38, 694-704.	14.3	214
4	Interleukin-9 Promotes Allergen-Induced Eosinophilic Inflammation and Airway Hyperresponsiveness in Transgenic Mice. American Journal of Respiratory Cell and Molecular Biology, 1998, 19, 713-720.	2.9	167
5	Strain dependence of airway hyperresponsiveness reflects differences in eosinophil localization in the lung. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2001, 281, L394-L402.	2.9	130
6	IL-9 induces chemokine expression in lung epithelial cells and baseline airway eosinophilia in transgenic mice. European Journal of Immunology, 1999, 29, 2130-2139.	2.9	119
7	Cutting Edge: Notch Signaling Promotes the Plasticity of Group-2 Innate Lymphoid Cells. Journal of Immunology, 2017, 198, 1798-1803.	0.8	115
8	Social stress and asthma: The role of corticosteroid insensitivity. Journal of Allergy and Clinical Immunology, 2010, 125, 550-558.	2.9	109
9	Protective role of the lung collectins surfactant protein A and surfactant protein D in airway inflammation. Journal of Allergy and Clinical Immunology, 2008, 122, 861-879.	2.9	108
10	Anti-CD86 (B7.2) Treatment Abolishes Allergic Airway Hyperresponsiveness in Mice. American Journal of Respiratory and Critical Care Medicine, 1999, 159, 1638-1643.	5.6	101
11	Interleukin 9 promotes influx and local maturation of eosinophils. Blood, 2001, 97, 1035-1042.	1.4	97
12	Kinetics of cell infiltration and cytokine messenger RNA expression after intradermal challenge with allergen and tuberculin in the same atopic individuals. Journal of Allergy and Clinical Immunology, 1994, 94, 764-772.	2.9	91
13	Absence of bacterially induced RELMÎ² reduces injury in the dextran sodium sulfate model of colitis. Journal of Clinical Investigation, 2006, 116, 2914-2923.	8.2	89
14	Recent advances in alveolar biology: Evolution and function of alveolar proteins. Respiratory Physiology and Neurobiology, 2010, 173, S43-S54.	1.6	86
15	Aspergillus fumigatus-Induced Allergic Airway Inflammation Alters Surfactant Homeostasis and Lung Function in BALB/c Mice. American Journal of Respiratory Cell and Molecular Biology, 2001, 25, 45-50.	2.9	85
16	IL-4 and IL-13 Form a Negative Feedback Circuit with Surfactant Protein-D in the Allergic Airway Response. Journal of Immunology, 2006, 176, 3557-3565.	0.8	83
17	Group 2 innate lymphoid cells mediate ozone-induced airway inflammation and hyperresponsiveness in mice. Journal of Allergy and Clinical Immunology, 2016, 137, 571-578.	2.9	83
18	An Official American Thoracic Society Research Statement: Current Challenges Facing Research and Therapeutic Advances in Airway Remodeling. American Journal of Respiratory and Critical Care Medicine, 2017, 195, e4-e19.	5.6	83

#	Article	IF	Citations
19	Delayed Clearance ofPneumocystis cariniiInfection, Increased Inflammation, and Altered Nitric Oxide Metabolism in Lungs of Surfactant Proteinâ€"D Knockout Mice. Journal of Infectious Diseases, 2004, 189, 1528-1539.	4.0	79
20	Social Stress Enhances Allergen-Induced Airway Inflammation in Mice and Inhibits Corticosteroid Responsiveness of Cytokine Production. Journal of Immunology, 2009, 182, 7888-7896.	0.8	76
21	The effect of dexamethasone, cyclosporine, and rapamycin on T-lymphocyte proliferation in vitro: Comparison of cells from patients with glucocorticoid-sensitive and glucocorticoid-resistant chronic asthma. Journal of Allergy and Clinical Immunology, 1994, 93, 510-519.	2.9	71
22	Enhanced Lung Injury and Delayed Clearance of Pneumocystis carinii in Surfactant Protein A-Deficient Mice: Attenuation of Cytokine Responses and Reactive Oxygen-Nitrogen Species. Infection and Immunity, 2004, 72, 6002-6011.	2.2	68
23	CD23 Exhibits Negative Regulatory Effects on Allergic Sensitization and Airway Hyperresponsiveness. American Journal of Respiratory and Critical Care Medicine, 2000, 161, 952-960.	5.6	67
24	Chronic obstructive pulmonary disease and inhaled steroids alter surfactant protein D (SP-D) levels: a cross-sectional study. Respiratory Research, 2008, 9, 13.	3.6	66
25	The Cellular Functions of Eosinophils: Collegium Internationale Allergologicum (CIA) Update 2020. International Archives of Allergy and Immunology, 2020, 181, 11-23.	2.1	65
26	Susceptibility to ozone-induced airway inflammation is associated with decreased levels of surfactant protein D. Respiratory Research, 2006, 7, 85.	3.6	64
27	Attenuated allergic airway hyperresponsiveness in C57BL/6 mice is associated with enhanced surfactant protein (SP)-D production following allergic sensitization. Respiratory Research, 2003, 4, 15.	3.6	63
28	Ozone inhalation induces exacerbation of eosinophilic airway inflammation and hyperresponsiveness in allergenâ€sensitized mice. Allergy: European Journal of Allergy and Clinical Immunology, 2008, 63, 438-446.	5.7	63
29	Adoptive transfer of allergenâ€specific CD4 + Tâ€ƒcells induces airway inflammation and hyperresponsiveness in Brownâ€"Norway rats. Immunology, 1997, 91, 176-185.	4.4	61
30	Effect of Microbial Heat Shock Proteins on Airway Inflammation and Hyperresponsiveness. Journal of Immunology, 2002, 169, 5300-5307.	0.8	59
31	Interleukin (IL)-5 but Not Immunoglobulin E Reconstitutes Airway Inflammation and Airway Hyperresponsiveness in IL-4â€"Deficient Mice. American Journal of Respiratory Cell and Molecular Biology, 2000, 23, 327-334.	2.9	58
32	Effects of prolonged repeated exposure to ovalbumin in sensitized brown Norway rats.. American Journal of Respiratory and Critical Care Medicine, 1994, 150, 23-27.	5.6	57
33	Prevention of Alveolar Destruction and Airspace Enlargement in a Mouse Model of Pulmonary Lymphangioleiomyomatosis (LAM). Science Translational Medicine, 2012, 4, 154ra134.	12.4	55
34	Expression of Thâ€2 cytokines interleukinâ€4 and â^'5 and of Thâ€1 cytokine interferonâ€Î³ in ovalbuminâ€exposed sensitized Brownâ€Norway rats. Immunology, 1996, 88, 247-251.	4.4	54
35	CD23 Deficient Mice Develop Allergic Airway Hyperresponsiveness Following Sensitization with Ovalbumin. American Journal of Respiratory and Critical Care Medicine, 1997, 156, 1945-1955.	5.6	52
36	Fluticasone Propionate Protects against Ozone-Induced Airway Inflammation and Modified Immune Cell Activation Markers in Healthy Volunteers. Environmental Health Perspectives, 2008, 116, 799-805.	6.0	52

#	Article	IF	Citations
37	Airway hyperresponsiveness, elevation of serum-specific IgE and activation of T cells following allergen exposure in sensitized Brown-Norway rats. Immunology, 1995, 85, 598-603.	4.4	48
38	The late asthmatic response is linked with increased surface tension and reduced surfactant protein B in mice. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2002, 283, L755-L765.	2.9	47
39	T-cells subsets and activation in bronchial mucosa of sensitized Brown-Norway rats after single allergen exposure. Immunology, 1995, 85, 591-7.	4.4	47
40	Surfactant protein D inhibits TNF-Î± production by macrophages and dendritic cells in mice. Journal of Allergy and Clinical Immunology, 2008, 122, 521-528.	2.9	44
41	IL-4 induces production of the lung collectin surfactant protein-D. Journal of Allergy and Clinical Immunology, 2004, 113, 439-444.	2.9	41
42	Contribution of Intercellular-Adhesion Molecule-1 in Allergen-Induced Airway Hyperresponsiveness and Inflammation in Sensitised Brown-Norway Rats. International Archives of Allergy and Immunology, 1994, 104, 291-295.	2.1	39
43	Hyperpolarized 3He MRI in Asthma. Academic Radiology, 2005, 12, 1362-1370.	2.5	37
44	SARS-CoV-2 detection and genomic sequencing from hospital surface samples collected at UC Davis. PLoS ONE, 2021, 16, e0253578.	2.5	37
45	Essential role of IFNÎ² and CD38 in TNFÎ±-induced airway smooth muscle hyper-responsiveness. Immunobiology, 2008, 213, 499-509.	1.9	35
46	SPâ€Ð and regulation of the pulmonary innate immune system in allergic airway changes. Clinical and Experimental Allergy, 2010, 40, 547-562.	2.9	34
47	Role of pathogenic oral flora in postoperative pneumonia following brain surgery. BMC Infectious Diseases, 2009, 9, 104.	2.9	33
48	Resistinâ€like moleculeâ€Îˆ (<scp>RELM</scp>â€Îˆ) targets airways fibroblasts to effect remodelling in asthma: from mouse to man. Clinical and Experimental Allergy, 2015, 45, 940-952.	2.9	33
49	Glucagon-like peptide 1: A potential anti-inflammatory pathway in obesity-related asthma. , 2017, 180, 139-143.		33
50	Adeno-Associated Virus 9-Mediated Airway Expression of Antibody Protects Old and Immunodeficient Mice against Influenza Virus. Vaccine Journal, 2014, 21, 1528-1533.	3.1	31
51	Circulating Plasma Biomarkers of Survival in Antifibrotic-Treated Patients With Idiopathic Pulmonary Fibrosis. Chest, 2020, 158, 1526-1534.	0.8	31
52	Properdin Contributes to Allergic Airway Inflammation through Local C3a Generation. Journal of Immunology, 2015, 195, 1171-1181.	0.8	29
53	Oxidative damage of SP-D abolishes control of eosinophil extracellular DNA trap formation. Journal of Leukocyte Biology, 2018, 104, 205-214.	3.3	28
54	Role and regulation of lung collectins in allergic airway sensitization. , 2006, 110, 14-34.		27

#	Article	IF	Citations
55	Viruses and non-allergen environmental triggers in asthma. Journal of Investigative Medicine, 2019, 67, 1029-1041.	1.6	26
56	Modulation of antigen-induced B and T cell responses by antigen-specific IgE antibodies. Journal of Immunology, 1997, 159, 4056-63.	0.8	26
57	Inhibition of myristoylated alanine-rich C kinase substrate (MARCKS) protein inhibits ozone-induced airway neutrophilia and inflammation. Experimental Lung Research, 2010, 36, 75-84.	1.2	25
58	Ozone-Induced Oxidative Stress, Neutrophilic Airway Inflammation, and Glucocorticoid Resistance in Asthma. Frontiers in Immunology, 2021, 12, 631092.	4.8	25
59	Group 2 innate lymphoid cells promote airway hyperresponsiveness through production of VEGFA. Journal of Allergy and Clinical Immunology, 2018, 141, 1929-1931.e4.	2.9	24
60	A Community-transmitted Case of Severe Acute Respiratory Distress Syndrome (SARS) Due to SARS-CoV-2 in the United States. Clinical Infectious Diseases, 2020, 71, 2222-2226.	5.8	22
61	Diacylglycerol kinase Î¶ promotes allergic airway inflammation and airway hyperresponsiveness through distinct mechanisms. Science Signaling, 2019, 12, .	3.6	20
62	Surfactant protein D and asthma. Clinical and Experimental Allergy, 2004, 34, 1815-1818.	2.9	19
63	Surfactant Protein-A inhibits Aspergillus fumigatus-induced allergic T-cell responses. Respiratory Research, 2005, 6, 97.	3.6	19
64	Cutting Edge: Role of NK Cells and Surfactant Protein D in Dendritic Cell Lymph Node Homing: Effects of Ozone Exposure. Journal of Immunology, 2016, 196, 553-557.	0.8	19
65	Systemic <scp><scp>FasL</scp></scp> neutralization increases eosinophilic inflammation in a mouse model of asthma. Allergy: European Journal of Allergy and Clinical Immunology, 2012, 67, 328-335.	5.7	18
66	Deficiency of Melanoma Differentiationâ€“associated Protein 5 Results in Exacerbated Chronic Postviral Lung Inflammation. American Journal of Respiratory and Critical Care Medicine, 2014, 189, 437-448.	5.6	18
67	mTORC2 regulates multiple aspects of NKTâ€cell development and function. European Journal of Immunology, 2017, 47, 516-526.	2.9	18
68	Transgenic smooth muscle expression of the human CysLT1receptor induces enhanced responsiveness of murine airways to leukotriene D4. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2004, 286, L992-L1001.	2.9	17
69	Ozone-induced enhancement of airway hyperreactivity in rhesus macaques: Effects of antioxidant treatment. Journal of Allergy and Clinical Immunology, 2020, 145, 312-323.	2.9	17
70	Clinical trial design during and beyond the pandemic: the I-SPY COVID trial. Nature Medicine, 2022, 28, 9-11.	30.7	17
71	The effect of lipoprotein-associated phospholipase A2 deficiency on pulmonary allergic responses in aspergillus fumigatus sensitized mice. Respiratory Research, 2012, 13, 100.	3.6	14
72	Ozone Inhalation Attenuated the Effects of Budesonide on Aspergillus fumigatus-Induced Airway Inflammation and Hyperreactivity in Mice. Frontiers in Immunology, 2019, 10, 2173.	4.8	14

#	Article	IF	Citations
73	Sugar Consumption Increases Susceptibility to Allergic Airway Inflammation and Activates the Innate Immune System in the Lung. Journal of Allergy and Clinical Immunology, 2008, 121, S196-S196.	2.9	12
74	PARP-1: a new player in the asthma field?. Allergy: European Journal of Allergy and Clinical Immunology, 2011, 66, 811-814.	5.7	10
75	In VivoEvaluation of Adeno-Associated Virus Gene Transfer in Airways of Mice with Acute or Chronic Respiratory Infection. Human Gene Therapy, 2014, 25, 966-976.	2.7	10
76	Blomia tropicalisâ€“Specific TCR Transgenic Th2 Cells Induce Inducible BALT and Severe Asthma in Mice by an IL-4/IL-13â€“Dependent Mechanism. Journal of Immunology, 2016, 197, 3771-3781.	0.8	10
77	Deletion of Microsomal Prostaglandin E Synthase-1 Does Not Alter Ozone-Induced Airway Hyper-Responsiveness. Journal of Pharmacology and Experimental Therapeutics, 2010, 334, 63-68.	2.5	9
78	Galectinâ€9: a suppressor of food allergy?. Allergy: European Journal of Allergy and Clinical Immunology, 2012, 67, 293-295.	5.7	9
79	Obesity-related, metabolic asthma: a new role for glucagon-like peptide 1 agonists. Lancet Respiratory Medicine,the, 2017, 5, 162-164.	10.7	9
80	Inhibition of re-expression of surface CD4, but not CD8, on activated human T-lymphocytes by the immunosuppressive drugs dexamethasone and cyclosporine a: Correlation with inhibition of proliferation. International Journal of Immunopharmacology, 1996, 18, 45-52.	1.1	8
81	The dendritic cell niche in chronic obstructive pulmonary disease. Respiratory Research, 2012, 13, 80.	3.6	7
82	Paradigms in Chronic Obstructive Pulmonary Disease: Phenotypes, Immunobiology, and Therapy with a Focus on Vascular Disease. Journal of Investigative Medicine, 2017, 65, 953-963.	1.6	7
83	A burning need to redefine airways disease: Biomass smoke exposure identified as a unique risk factor for asthmaâ€“chronic obstructive pulmonary disease overlap in low- and middle-income countries. Journal of Allergy and Clinical Immunology, 2019, 143, 1339-1341.	2.9	6
84	The Th2 gene cluster unraveled: role of <scp>RHS</scp>6. Allergy: European Journal of Allergy and Clinical Immunology, 2017, 72, 679-681.	5.7	5
85	Group 2 innate lymphoid cells display ILC3-like functional plasticity in asthmatics and non-human primates. Journal of Allergy and Clinical Immunology, 2018, 141, AB1.	2.9	5
86	T cells and eosinophils in asthma. Acta Microbiologica Et Immunologica Hungarica, 1998, 45, 19-29.	0.8	5
87	Targeting Iº<scp>BNS</scp> in allergic asthma: where it resides, matters. Allergy: European Journal of Allergy and Clinical Immunology, 2017, 72, 1003-1005.	5.7	4
88	Imaging Of Airway Remodeling In A Murine Model Of Bronchial Hyper-Responsiveness Using Hyperpolarized Gas MRI. , 2011, , .		3
89	The B-cell superantigen Finegoldia magna protein L causes pulmonary inflammation by a mechanism dependent on MyD88 but not B cells or immunoglobulins. Inflammation Research, 2012, 61, 161-169.	4.0	3
90	Breaking Steroid Resistance: Effect of Vitamin D on IL-23. American Journal of Respiratory Cell and Molecular Biology, 2017, 57, 267-269.	2.9	3

#	Article	IF	Citations
91	Surfactant Protein D (SP-D) Binds to Signal Regulatory Protein Alpha (SIRP-Î±) on Alveolar Macrophages and Dendritic Cells and Promotes Allergen-Induced Lymph-Node Directed Migration. Journal of Allergy and Clinical Immunology, 2010, 125, AB126.	2.9	2
92	Autoreactive Bronchus-Associated Lymphoid Tissue in Interstitial Lung Disease: Friend or Foe?. American Journal of Respiratory Cell and Molecular Biology, 2013, 48, 397-398.	2.9	2
93	Patching it together: epicutaneous vaccination with heat-labileEscherichia colitoxin against birch pollen allergy. Allergy: European Journal of Allergy and Clinical Immunology, 2017, 72, 5-8.	5.7	2
94	Surfactant Protein D (SP-D) Inhibits Neutrophil Extracellular DNA Trap Formation: Effects of S-nitrosylation. Journal of Allergy and Clinical Immunology, 2019, 143, AB192.	2.9	2
95	A Novel Nonhuman Primate Model of Nonatopic Asthma. Methods in Molecular Biology, 2022, , 83-94.	0.9	2
96	488 Lung delivery of an interleukin-9 antibody treatment inhibits airway hyperresponsiveness (AHR), BAL eosionophila, mucin production, and serum IgE elevation to natural antigens in a murine model of asthma. Journal of Allergy and Clinical Immunology, 2000, 105, S159.	2.9	1
97	The Role of Surfactant Protein D (SP-D) and IgA in Schaedler's E.coli Induced Diminished Translocation of Lactobacillus salivarius Into the Lung: Crosstalk Between Innate and Adaptive Immunity. Journal of Allergy and Clinical Immunology, 2007, 119, S177.	2.9	1
98	Effects of Surfactant Protein D (SP-D) on Dendritic Cell Subtypes in the Lung in Mice. Journal of Allergy and Clinical Immunology, 2009, 123, S73-S73.	2.9	1
99	Impaired Lymph-Node Homing of Dendritic Cells (DC) in Allergen-Challenged Surfactant Protein D Deficient (SP-D-/-) Mice is Associated with Lack of Ccr7 and Reduced Expression of Signal Regulatory Protein-Alpha (Sirp-Î±). Journal of Allergy and Clinical Immunology, 2011, 127, AB270-AB270.	2.9	1
100	Rhinovirus 16 (RV16) Induces Airway Hyperresponsiveness (AHR) and Differential Mediator Release in Human lung slices ex vivo. Journal of Allergy and Clinical Immunology, 2011, 127, AB55-AB55.	2.9	1
101	Ozone Inhalation Induces Epithelial IL-33 and Thymic Stromal Lymphopoietin (TSLP) and Leads To Eosinophilic Airway Inflammation. Journal of Allergy and Clinical Immunology, 2014, 133, AB145.	2.9	1
102	Serum Interleukin 13 (IL-13) and Surfactant Protein D (SP-D) Expression Is Differentially Associated With Disease Status In Pediatric Asthma Patients. Journal of Allergy and Clinical Immunology, 2014, 133, AB148.	2.9	1
103	Surfactant Protein-D (SP-D) Is A Lung Specific Regulator of Group 2 Innate Lymphoid Cells (ILC2). Journal of Allergy and Clinical Immunology, 2017, 139, AB15.	2.9	1
104	Circulating T cells, natural killer (NK) cells and group 2 innate lymphoid cells (ILC2) of severe asthmapatients from the University of California Asthma Network (UCANTM) clinic, express increased levels of both IL-13 and IL-17. Journal of Allergy and Clinical Immunology, 2017, 139, AB267.	2.9	1
105	The Flying Monkeys of Ozone: Oxysterols Inactivate NLRP2 in Airway Epithelial Cells. American Journal of Respiratory Cell and Molecular Biology, 2021, 65, 461-463.	2.9	1
106	318 Costimulation by CD80 (B7.1) and CD86 (B7.2) induce comparable Jun kinase expression and T cell activation but show differential susceptibility to antibody treatment in allergic responses in vitro. Journal of Allergy and Clinical Immunology, 2000, 105, S107.	2.9	0
107	C57/BL-6 mice produce higher levels of surfactant protein (SP)-D and attenuated airway responses in comparison with balb/c mice following allergic sensitizationâ€. Journal of Allergy and Clinical Immunology, 2002, 109, S23-S23.	2.9	0
108	Allergic airway hyperresponsiveness (AHR) induced by aspergillus fumigatus (Af) is attenuated in C57BL/6 mice genetically deficient of surfactant protein (SP)-D. Journal of Allergy and Clinical Immunology, 2002, 109, S168-S168.	2.9	0

#	Article	IF	Citations
109	Surfactant protein (SP)-D production in a murine model of allergic late phase response is induced by interleukin (IL)-4. Journal of Allergy and Clinical Immunology, 2002, 109, S298-S299.	2.9	0
110	Surfactant protein-A (SP-A) modifies lymphocyte responses to antigen and non-specific stimulation in vitro. Journal of Allergy and Clinical Immunology, 2002, 109, S320-S321.	2.9	0
111	Increased BAL Levels of Surfactant Protein (SP)-D in a Transgenic Mouse Model of Allergic Bronchopulmonary Aspergillosis. Journal of Allergy and Clinical Immunology, 2006, 117, S317.	2.9	0
112	TNFÎ± Release Results in Increased Expression of the Innate Immune Regulatory Molecule Surfactant Protein D (SP-D) in a Model of Aspergillus fumigatus (Af) and Ozone-Induced Airway Inflammation. Journal of Allergy and Clinical Immunology, 2006, 117, S16.	2.9	0
113	Resolution of Airway Eosinophilia is Associated with Upregulation of Fas Ligand (FasL) Expression After a Single Aspergillus fumigatus (Af) Challenge of Sensitized Mice. Journal of Allergy and Clinical Immunology, 2006, 117, S145.	2.9	0
114	Role of Resistin-Like Molecule (RELM)-Î² in Allergic Airway Inflammation. Journal of Allergy and Clinical Immunology, 2006, 117, S182.	2.9	0
115	Regulation of Dendritic Cell Function by Surfactant ProteinÂD. Journal of Allergy and Clinical Immunology, 2007, 119, S296.	2.9	0
116	Dexamethasone and The Long Acting Î²2-Adrenergic Receptor Agonist, R,R-formoterrol (RF), Upregulate CCAAT Enhancer Binding Protein (C/EBP) Gene Expression and Induce Production of The Immunoprotective Surfactant Protein D (SP-D) in Alveolar Epithelial Cells. Journal of Allergy and Clinical Immunology, 2008, 121, S1-S1.	2.9	0
117	The B Cell Superantigen Peptostreptococcus Magnus (Pm) Protein L Induces Lung Inflammation and Airway Hyperreactivity Through a MyD88-Dependent Mechanism. Journal of Allergy and Clinical Immunology, 2008, 121, S256-S256.	2.9	0
118	Social stress enhances allergen-induced airway inflammation in mice and inhibits corticosteroid responsiveness of cytokine production. Journal of Immunology, 2009, 183, 3551.2-3551.	0.8	0
119	Social Stress Alters Glucocorticoid Responsiveness in a Mouse Model of Allergic Airway Inflammation. Journal of Allergy and Clinical Immunology, 2009, 123, S59-S59.	2.9	0
120	Resistin-Like Molecule (RELM)-Â² Deficient Mice Are Protected From Extra-Cellular Matrix Protein (ECM) Deposition After A Single Challenge With Aspergillus Fumigatus (Af). , 2010, , .		0
121	Resistin-Like Molecule (RELM)-Î² Expression is Associated with Activation of Lung Extra-Cellular Matrix Proteins (ECM) in a Mouse Model of Asthma. Journal of Allergy and Clinical Immunology, 2010, 125, AB47.	2.9	0
122	The Role Of IL-4 In Ozone-Induced Exacerbation Of Allergic Airway Inflammation In A Murine Model. , 2011, , .		0
123	Surfactant Protein D (SP-D) Inhibits Allergen-Induced Epithelial Accumulation And Promotes Lymph-Node Homing Of Myeloid Dendritic Cells. , 2011, , .		0
124	Chronic Inflammation Is Associated With Increased Resistin-Like Molecule (RELM)-Beta Expression In Surfactant Protein D (SP-D) Knockout Mice. , 2011, , .		0
125	Lipoprotein Associated Phospholipase A2 (LP-PLA2)/Platelet Activating Factor Acetyl Hydrolase (PAF-AH) Deficiency Is Associated With Increased Numbers Of M2 Macrophages In The Lung During The Allergic Airway Response In Mice. , 2012, , .		0
126	Properdin is increased after allergen challenge of asthmatic patients and contributes to OVA-induced airway inflammation and AHR at the effector phase by enhancing C3a generation in mice. Immunobiology, 2012, 217, 1196.	1.9	0

#	Article	IF	Citations
127	Adeno-Associated Viral (AAV)-Surfactant Protein D (SP-D)-Gene Treatment Rescued The Pulmonary Innate Immune Cell Abnormalities In SP-D-/- Mice. , 2012, , .		0
128	Impaired Dendritic Cell Migration Contributes To Allergen-Induced Epithelial Accumulation And Decreased Lymph-Node Homing Of Myeloid Dendritic Cells In The Chronic Granulomatous Disease (CGD) Lung In Mice. , 2012, , .		0
