#	ARTICLE	IF	CITATIONS
1	Risk factors associated with acute kidney injury in extremely low birth weight (ELBW) infants. <i>Pediatric Nephrology</i> , 2012, 27, 303-311.	1.7	116
2	Metabolic Bone Disease. <i>Journal of Parenteral and Enteral Nutrition</i> , 2014, 38, 982-990.	2.6	99
3	Survey and evidence based review of probiotics used in very low birth weight preterm infants within the United States. <i>Journal of Perinatology</i> , 2016, 36, 1106-1111.	2.0	45
4	Standardized Slow Enteral Feeding Protocol and the Incidence of Necrotizing Enterocolitis in Extremely Low Birth Weight Infants. <i>Journal of Parenteral and Enteral Nutrition</i> , 2015, 39, 644-654.	2.6	42
5	Feeding and Swallowing Difficulties in Neonates. <i>Clinics in Perinatology</i> , 2020, 47, 223-241.	2.1	29
6	Risk factors associated with the need for a tracheostomy in extremely low birth weight infants. <i>Pediatric Pulmonology</i> , 2013, 48, 146-150.	2.0	20
7	Incidence and risk factors of urinary tract infection in very low birth weight infants. <i>Journal of Neonatal-Perinatal Medicine</i> , 2016, 9, 83-90.	0.8	20
8	Effect of amphotericin B lipid complex (ABLC) in very low birth weight infants. <i>Pediatric Nephrology</i> , 2009, 24, 295-299.	1.7	19
9	Standardized slow enteral feeding protocol reduces necrotizing enterocolitis in micropremies. <i>Journal of Neonatal-Perinatal Medicine</i> , 2017, 10, 171-180.	0.8	16
10	Role of feeding strategy bundle with acid-suppressive therapy in infants with esophageal acid reflux exposure: a randomized controlled trial. <i>Pediatric Research</i> , 2021, 89, 645-652.	2.3	12
11	Persistent feeding difficulties among infants with fetal opioid exposure: mechanisms and clinical reasoning. <i>Journal of Maternal-Fetal and Neonatal Medicine</i> , 2019, 32, 3633-3639.	1.5	11
12	Childhood obesity and adverse cardiometabolic risk in large for gestational age infants and potential early preventive strategies: a narrative review. <i>Pediatric Research</i> , 2021, , .	2.3	11
13	Transitioning from gavage to full oral feeds in premature infants: When should we discontinue the nasogastric tube?. <i>Journal of Perinatology</i> , 2019, 39, 1257-1262.	2.0	8
14	Infant body composition assessment in the neonatal intensive care unit (NICU) using air displacement plethysmography: Strategies for implementation into clinical workflow. <i>Clinical Nutrition ESPEN</i> , 2021, 43, 212-222.	1.2	5
15	Diagnostic challenge of large congenital liver cyst in the newborn. <i>Pediatrics International</i> , 2014, 56, 267-270.	0.5	4
16	Effect of parenteral nutrition duration on patterns of growth and body composition in very low birth weight premature infants. <i>Journal of Parenteral and Enteral Nutrition</i> , 2021, 45, 1673-1682.	2.6	4
17	Diagnostic utility of impedance-pH monitoring in infants of diabetic mothers with oral feeding difficulties. <i>Journal of Perinatology</i> , 2021, 41, 1886-1892.	2.0	3
18	Effects of parenteral phosphorus dose restriction in preterm infants. <i>Journal of Neonatal-Perinatal Medicine</i> , 2016, 9, 153-158.	0.8	2

#	ARTICLE	IF	CITATIONS
19	Body adiposity and oral feeding outcomes in infants: a pilot study. <i>Journal of Perinatology</i> , 2021, 41, 1059-1064.	2.0	2
20	Extremely Preterm Neonate with a Tracheobronchial Foreign Body: A Case Report. <i>Cureus</i> , 2020, 12, e7659.	0.5	2
21	Anemia of Prematurity and Oral Feeding Milestones in Premature Infants. <i>American Journal of Perinatology</i> , 2021, 38, 553-559.	1.4	0
22	Predictive ability of postnatal growth failure for adverse feeding-related outcomes in preterm infants: an exploratory study comparing Fenton with INTERGROWTH-21st preterm growth charts. <i>Journal of Maternal-Fetal and Neonatal Medicine</i> , 2021, , 1-8.	1.5	0
23	Accretion Rates of Fat and Fat-free Mass in Infants at 30-45 weeks Postmenstrual Age. , 2022, 1, 7-13.		0
