Χιλομιμ Υμλη

#	Article	IF	CITATIONS
1	Bayesian empirical likelihood inference and order shrinkage for autoregressive models. Statistical Papers, 2022, 63, 97-121.	1.2	11
2	Weighted quantile regression with missing covariates using empirical likelihood. Statistics, 2016, 50, 89-113.	0.6	10
3	Optimal subsampling for composite quantile regression in big data. Statistical Papers, 2022, 63, 1649-1676.	1.2	5
4	Rank-based empirical likelihood inference on medians of k populations. Journal of Statistical Planning and Inference, 2012, 142, 1009-1026.	0.6	4
5	Empirical and weighted conditional likelihoods for matched case-control studies with missing covariates. Journal of Multivariate Analysis, 2013, 119, 185-199.	1.0	4
6	Doubly robust augmented-estimating-equations estimation with nonignorable nonresponse data. Statistical Papers, 2020, 61, 2241-2270.	1.2	4
7	Combining conditional and unconditional moment restrictions with missing responses. Journal of Multivariate Analysis, 2010, 101, 2420-2433.	1.0	3
8	Combining quasi and empirical likelihoods in generalized linear models with missing responses. Journal of Multivariate Analysis, 2012, 111, 39-58.	1.0	3
9	Weighted rank estimation for nonparametric transformation models with nonignorable missing data. Computational Statistics and Data Analysis, 2021, 153, 107061.	1.2	3
10	Empirical likelihood-based weighted rank regression with missing covariates. Statistical Papers, 2020, 61, 697-725.	1.2	1
11	Weighted rank estimation for nonparametric transformation models with doubly truncated data. Journal of the Korean Statistical Society, 2021, 50, 1-24.	0.4	1
12	Weighted empirical likelihood for quantile regression with non ignorable missing covariates. Communications in Statistics - Theory and Methods, 2019, 48, 3068-3084.	1.0	0
13	Adaptive empirical likelihood estimation with nonignorable nonresponse data. Statistics, 2020, 54, 1-22.	0.6	0
14	Empirical likelihood inference for rank regression with doubly truncated data. AStA Advances in Statistical Analysis, 2021, 105, 25-73.	0.9	0
