

Larissa I Privalova

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3086035/larissa-i-privalova-publications-by-year.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
71	New Data on Various Directed Dose-Response Relationships and the Combined Action Types for Different Outcomes of Nanoparticle Cytotoxicity. <i>Dose-Response</i> , 2021 , 19, 15593258211052420	2.3	3
70	Comparative assessment of the pulmonary effect in rats to a single intratracheal administration of selenium or copper oxide nanoparticles. <i>Toxicological Review</i> , 2021 , 29, 39-46	0.2	1
69	About the threshold concentration of nickel oxide nanoparticles in long-term inhalation exposure of rats. <i>Toxicological Review</i> , 2021 , 29, 34-42	0.2	
68	Cardioinotropic Effects in Subchronic Intoxication of Rats with Lead and/or Cadmium Oxide Nanoparticles. <i>International Journal of Molecular Sciences</i> , 2021 , 22,	6.3	1
67	Effects of Lead and/or Cadmium on the Contractile Function of the Rat Myocardium Following Subchronic Exposure and Its Attenuation with a Complex of Bioprotectors. II III <i>Public Health and Life Environment</i> , 2021 , 25-33	0.3	
66	Assessment of Combined and Comparative Toxicity of Zinc Oxide and Copper Oxide Nanoparticles in the In Vivo Experiment. IIIIII <i>Public Health and Life Environment</i> , 2021 , 34-40	0.3	
65	Impact of toxicity effects of zinc oxide nanoparticles in rats within acute and subacute experiments. <i>Gigiena I Sanitariia</i> , 2021 , 100, 704-710	0.4	
64	On an extended understanding of the term "hormesis" for denoting alternating directions of the organism's response to increasing adverse exposures. <i>Toxicology</i> , 2021 , 447, 152629	4.4	4
63	Some data on the comparative and combined toxic activity of nanoparticles containing lead and cadmium with special attention to their vasotoxicity. <i>Nanotoxicology</i> , 2021 , 15, 205-222	5.3	2
62	Assessment of cytotoxicity of an original industrial aerosol containing a high percentage of amorphous silica in the nanometer range. <i>Gigiena I Sanitariia</i> , 2021 , 100, 938-942	0.4	
61	General toxic and cardiovascular toxic impact of cadmium oxide nanoparticles. <i>Gigiena I Sanitariia</i> , 2021 , 99, 1346-1352	0.4	0
60	The combined action of lead and physical load in a subchorionic experiment on rats. <i>Gigiena I Sanitariia</i> , 2021 , 100, 1404-1411	0.4	
59	Analysis of changes in the rat cardiovascular system under the action of lead intoxication and muscular exercise. <i>Gigiena I Sanitariia</i> , 2021 , 100, 1467-1474	0.4	
58	The various dose-dependent effect of selenium oxide and copper oxide nanoparticles in vitro and application of the hormesis paradigm. <i>Gigiena I Sanitariia</i> , 2021 , 100, 1475-1480	0.4	
57	An overview of experiments with lead-containing nanoparticles performed by the Ekaterinburg nanotoxicological research team. <i>Nanotoxicology</i> , 2020 , 14, 788-806	5.3	3
56	Changes in rat myocardium contractility under subchronic intoxication with lead and cadmium salts administered alone or in combination. <i>Toxicology Reports</i> , 2020 , 7, 433-442	4.8	8
55	Some Peculiarities in the Dose Dependence of Separate and Combined In Vitro Cardiotoxicity Effects Induced by CdS and PbS Nanoparticles With Special Attention to Hormesis Manifestations. <i>Dose-Response</i> , 2020 , 18, 1559325820914180	2.3	8

54	Manifestation of Systemic Toxicity in Rats after a Short-Time Inhalation of Lead Oxide Nanoparticles. <i>International Journal of Molecular Sciences</i> , 2020 , 21,	6.3	13
53	STUDYING COMBINED SUBCHRONIC TOXICITY OF LEAD AND CADMIUM WITH A SPECIAL FOCUS IN TERMS OF THEIR CARDIOVASCULAR EFFECTS. <i>Gigiena I Sanitariia</i> , 2020 , 99, 103-108	0.4	1
52	CHANGES OF MYOCARDIUM CONTRACTILITY ASSOCIATED WITH A SUBCHRONIC LEAD INTOXICATION IN RATS. <i>Gigiena I Sanitariia</i> , 2020 , 99, 193-199	0.4	1
51	Increasing the Resistance of the Body to Adverse Cytotoxic Effects of Amorphous Silicon Dioxide Nanoparticles. <i>Public Health and Life Environment</i> , 2020 , 62-66	0.3	
50	AN EXPERIMENTAL TRIAL OF BIOPROPHYLLACTIC FORMULA DESIGNED TO MINIMIZE COMBINED TOXICITY OF BOTH LEAD AND CADMIUM. <i>Gigiena I Sanitariia</i> , 2020 , 99, 85-89	0.4	1
49	The Experimental Study of Cardiotoxic Effects of Lead Oxide Nanoparticles by Their Various Routes of Exposure. <i>Public Health and Life Environment</i> , 2020 , 67-72	0.3	1
48	Further verification of some postulates of the combined toxicity theory: New animal experimental data on separate and joint adverse effects of lead and cadmium. <i>Food and Chemical Toxicology</i> , 2020 , 136, 110971	4.7	17
47	Force-velocity characteristics of isolated myocardium preparations from rats exposed to subchronic intoxication with lead and cadmium acting separately or in combination. <i>Food and Chemical Toxicology</i> , 2020 , 144, 111641	4.7	3
46	Some outcomes and a hypothetical mechanism of combined lead and benzo(a)pyrene intoxication, and its alleviation with a complex of bioprotectors. <i>Toxicology Reports</i> , 2020 , 7, 986-994	4.8	0
45	Consequent stages of developing a multi-compartmental mechanistic model for chronically inhaled nanoparticles pulmonary retention. <i>Toxicology Reports</i> , 2019 , 6, 279-287	4.8	1
44	Toxic Effects of Low-Level Long-Term Inhalation Exposures of Rats to Nickel Oxide Nanoparticles. <i>International Journal of Molecular Sciences</i> , 2019 , 20,	6.3	19
43	More data on in vitro assessment of comparative and combined toxicity of metal oxide nanoparticles. <i>Food and Chemical Toxicology</i> , 2019 , 133, 110753	4.7	11
42	BIOLOGICAL PROPHYLAXIS IN THE SYSTEM OF THE MANAGEMENT OF OCCUPATIONAL RISK DUE TO EXPOSURE OF METAL-CONTAINING NANOPARTICLES. <i>Gigiena I Sanitariia</i> , 2019 , 96, 1187-1191	0.4	2
41	Further analysis of rat myocardium contractility changes associated with a subchronic lead intoxication. <i>Food and Chemical Toxicology</i> , 2019 , 125, 233-241	4.7	6
40	The most important inferences from the Ekaterinburg nanotoxicology team's animal experiments assessing adverse health effects of metallic and metal oxide nanoparticles. <i>Toxicology Reports</i> , 2018 , 5, 363-376	4.8	21
39	Combined Subchronic Toxicity of Aluminum (III), Titanium (IV) and Silicon (IV) Oxide Nanoparticles and Its Alleviation with a Complex of Bioprotectors. <i>International Journal of Molecular Sciences</i> , 2018 , 19,	6.3	23
38	Effects of subchronic lead intoxication of rats on the myocardium contractility. <i>Food and Chemical Toxicology</i> , 2018 , 120, 378-389	4.7	16
37	In vivo toxicity of copper oxide, lead oxide and zinc oxide nanoparticles acting in different combinations and its attenuation with a complex of innocuous bio-protectors. <i>Toxicology</i> , 2017 , 380, 72-93	4.4	58

36	A paradoxical response of the rat organism to long-term inhalation of silica-containing submicron (predominantly nanoscale) particles of a collected industrial aerosol at realistic exposure levels. <i>Toxicology</i> , 2017 , 384, 59-68	4.4	25
35	Experimental Research into Metallic and Metal Oxide Nanoparticle Toxicity In Vivo. <i>Nanomedicine and Nanotoxicology</i> , 2017 , 259-319	0.3	19
34	Looking for Biological Protectors against Adverse Health Effects of Some Nanoparticles that Can Pollute Workplace and Ambient Air (A Summary of Authors' Experimental Results). <i>Journal of Environmental Protection</i> , 2017 , 08, 844-866	0.6	7
33	Experimental study and mathematical modeling of toxic metals combined action as a scientific foundation for occupational and environmental health risk assessment. A summary of results obtained by the Ekaterinburg research team (Russia). <i>Toxicology Reports</i> , 2017 , 4, 194-201	4.8	23
32	Changes in the Dose-Response Relationship of One Toxicant Under Simultaneous Exposure to Another Toxicant. <i>Dose-Response</i> , 2016 , 14, 1559325816672935	2.3	6
31	The pulmonary phagocytosis response to separate and combined impacts of manganese (IV) and chromium (VI) containing particulates. <i>Toxicology</i> , 2016 , 370, 78-85	4.4	5
30	On the contribution of the phagocytosis and the solubilization to the iron oxide nanoparticles retention in and elimination from lungs under long-term inhalation exposure. <i>Toxicology</i> , 2016 , 363-364, 19-28	4.4	36
29	Further development of the theory and mathematical description of combined toxicity: An approach to classifying types of action of three-factorial combinations (a case study of manganese-chromium-nickel subchronic intoxication). <i>Toxicology</i> , 2015 , 334, 33-44	4.4	24
28	Is it possible to enhance the organism's resistance to toxic effects of metallic nanoparticles?. <i>Toxicology</i> , 2015 , 337, 79-82	4.4	6
27	Some inferences from in vivo experiments with metal and metal oxide nanoparticles: the pulmonary phagocytosis response, subchronic systemic toxicity and genotoxicity, regulatory proposals, searching for bioprotectors (a self-overview). <i>International Journal of Nanomedicine</i> , 2015 , 10, 3013-29	7.3	23
26	Attenuation of Combined Nickel(II) Oxide and Manganese(II, III) Oxide Nanoparticles' Adverse Effects with a Complex of Bioprotectors. <i>International Journal of Molecular Sciences</i> , 2015 , 16, 22555-83	6.3	48
25	Some patterns of metallic nanoparticles' combined subchronic toxicity as exemplified by a combination of nickel and manganese oxide nanoparticles. <i>Food and Chemical Toxicology</i> , 2015 , 86, 351-64	4.7	38
24	Further development of mathematical description for combined toxicity: A case study of lead-fluoride combination. <i>Toxicology Reports</i> , 2015 , 2, 297-307	4.8	32
23	Some considerations concerning the theory of combined toxicity: a case study of subchronic experimental intoxication with cadmium and lead. <i>Food and Chemical Toxicology</i> , 2014 , 64, 144-56	4.7	47
22	Subchronic toxicity of copper oxide nanoparticles and its attenuation with the help of a combination of bioprotectors. <i>International Journal of Molecular Sciences</i> , 2014 , 15, 12379-406	6.3	51
21	Some characteristics of free cell population in the airways of rats after intratracheal instillation of copper-containing nano-scale particles. <i>International Journal of Molecular Sciences</i> , 2014 , 15, 21538-53	6.3	14
20	Toxicodynamic and toxicokinetic descriptors of combined chromium (VI) and nickel toxicity. <i>International Journal of Toxicology</i> , 2014 , 33, 498-505	2.4	19
19	Does a concomitant exposure to lead influence unfavorably the naphthalene subchronic toxicity and toxicokinetics?. <i>Environmental Toxicology and Chemistry</i> , 2014 , 33, 152-7	3.8	7

18	Enhancing Population Resistance to Toxic Exposures as an Auxilliary Tool of Decreasing Environmental and Occupational Health Risks (a Self-Overview). <i>Journal of Environmental Protection</i> , 2014 , 05, 1435-1449	0.6	11
17	Attenuation of subchronic formaldehyde inhalation toxicity with oral administration of glutamate, glycine and methionine. <i>Toxicology Letters</i> , 2013 , 220, 181-6	4.4	14
16	Comparative in vivo assessment of some adverse bioeffects of equidimensional gold and silver nanoparticles and the attenuation of nanosilver's effects with a complex of innocuous bioprotectors. <i>International Journal of Molecular Sciences</i> , 2013 , 14, 2449-83	6.3	56
15	PM10, and children's respiratory symptoms and lung function in the PATY study. <i>European Respiratory Journal</i> , 2012 , 40, 538-47	13.6	75
14	Interaction of iron oxide Fe3O4 nanoparticles and alveolar macrophages in vivo. <i>Bulletin of Experimental Biology and Medicine</i> , 2012 , 152, 627-9	0.8	16
13	An Approach to Tentative Reference Levels Setting for Nanoparticles in the Workroom Air Based on Comparing Their Toxicity with That of Their Micrometric Counterparts: A Case Study of Iron Oxide Fe3O4. <i>ISRN Nanotechnology</i> , 2012 , 2012, 1-12		8
12	Subchronic systemic toxicity and bioaccumulation of Fe3O4 nano- and microparticles following repeated intraperitoneal administration to rats. <i>International Journal of Toxicology</i> , 2011 , 30, 59-68	2.4	39
11	Some Peculiarities of Pulmonary Clearance Mechanisms in Rats after Intratracheal Instillation of Magnetite (Fe3O4) Suspensions with Different Particle Sizes in the Nanometer and Micrometer Ranges: Are We Defenseless against Nanoparticles?. <i>International Journal of Occupational and Environmental Health</i> , 2010 , 17, 508-24		25
10	Some peculiarities of pulmonary clearance mechanisms in rats after intratracheal instillation of magnetite (Fe3O4) suspensions with different particle sizes in the nanometer and micrometer ranges: are we defenseless against nanoparticles?. <i>International Journal of Occupational and Environmental Health</i> , 2010 , 16, 508-24		14
9	Toxicity of monazite particulates and its attenuation with a complex of bio-protectors. <i>Medicina Del Lavoro</i> , 2009 , 100, 455-70	1.9	4
8	Prenatal and postnatal tobacco smoke exposure and respiratory health in Russian children. <i>Respiratory Research</i> , 2006 , 7, 48	7.3	57
7	Housing characteristics and children's respiratory health in the Russian Federation. <i>American Journal of Public Health</i> , 2004 , 94, 657-62	5.1	64
6	Lead poisoning among young children in Russia: concurrent evaluation of childhood lead exposure in Ekaterinburg, Krasnouralsk, and Volgograd. <i>Environmental Health Perspectives</i> , 2002 , 110, 559-62	8.4	23
5	Some Considerations concerning Multimedia-Multipollutant Risk Assessment Methodology: Use of Epidemiologic Data for Non-Cancer Risk Assessment in Russia. <i>Environmental Health Perspectives</i> , 2001 , 109, 7	8.4	3
4	Use of health information systems in the Russian federation in the assessment of environmental health effects. <i>Environmental Health Perspectives</i> , 2000 , 108, 589-94	8.4	9
3	Prediction of the comparative intensity of pneumoconiotic changes caused by chronic inhalation exposure to dusts of different cytotoxicity by means of a mathematical model. <i>Occupational and Environmental Medicine</i> , 1994 , 51, 173-80	2.1	20
2	An Approach to Detecting Delayed Effects of Radioactive Contamination on Industrial-Urban-Area Dwellers. <i>Environmental Health Perspectives</i> , 1994 , 102, 470	8.4	1
1	Trends and Perspectives of the Biological Prophylaxis of Silicosis. <i>Environmental Health Perspectives</i> , 1989 , 82, 311	8.4	1
