

W Brent Lievers

List of Publications by Citations

Source: <https://exaly.com/author-pdf/3093669/w-brent-lievers-publications-by-citations.pdf>

Version: 2024-04-17

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

33
papers

407

#	Paper	IF	Citations
33	Using incremental forming to calibrate a void nucleation model for automotive aluminum sheet alloys. <i>Acta Materialia</i> , 2004 , 52, 3001-3007	8.4	68
32	The influence of iron content on the bendability of AA6111 sheet. <i>Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing</i> , 2003 , 361, 312-320	5.3	38
31	Incidence and Severity of Foot and Ankle Injuries in Men's Collegiate American Football. <i>Orthopaedic Journal of Sports Medicine</i> , 2015 , 3, 2325967115581593	3.5	30
30	Etiology and biomechanics of first metatarsophalangeal joint sprains (turf toe) in athletes. <i>Critical Reviews in Biomedical Engineering</i> , 2012 , 40, 43-61	1.1	29
29	An evaluation of global thresholding techniques for the automatic image segmentation of automotive aluminum sheet alloys. <i>Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing</i> , 2004 , 381, 134-142	5.3	26
28	Minimizing specimen length in elastic testing of end-constrained cancellous bone. <i>Journal of the Mechanical Behavior of Biomedical Materials</i> , 2010 , 3, 22-30	4.1	20
27	The co-operative role of voids and shear bands in strain localization during bending. <i>Mechanics of Materials</i> , 2003 , 35, 661-674	3.3	20
26	Foot kinematics and loading of professional athletes in American football-specific tasks. <i>Gait and Posture</i> , 2013 , 38, 563-9	2.6	18
25	Development of an injury risk function for first metatarsophalangeal joint sprains. <i>Medicine and Science in Sports and Exercise</i> , 2013 , 45, 2144-50	1.2	18
24	Specimen diameter and "side artifacts" in cancellous bone evaluated using end-constrained elastic tension. <i>Bone</i> , 2010 , 47, 371-7	4.7	17
23	Effects of dehydration-induced structural and material changes on the apparent modulus of cancellous bone. <i>Medical Engineering and Physics</i> , 2010 , 32, 921-5	2.4	17
22	Age, sex, causal and injury patterns in tarsometatarsal dislocations: a literature review of over 2000 cases. <i>Foot</i> , 2012 , 22, 117-24	1.3	16
21	Specimen size effect in the volumetric shrinkage of cancellous bone measured at two levels of dehydration. <i>Journal of Biomechanics</i> , 2007 , 40, 1903-9	2.9	16
20	Measuring the mass and center of gravity of helmet systems for underground workers. <i>International Journal of Industrial Ergonomics</i> , 2018 , 64, 23-30	2.9	11
19	Biomechanical response of the human foot when standing in a natural position while exposed to vertical vibration from 10-200 Hz. <i>Ergonomics</i> , 2019 , 62, 644-656	2.9	11
18	Etiology and Biomechanics of Tarsometatarsal Injuries in Professional Football Players: A Video Analysis. <i>Orthopaedic Journal of Sports Medicine</i> , 2014 , 2, 2325967114525347	3.5	10
17	Patient-specific modelling of the foot: automated hexahedral meshing of the bones. <i>Computer Methods in Biomechanics and Biomedical Engineering</i> , 2013 , 16, 1287-97	2.1	6

16	Etiology and Biomechanics of Midfoot (Lisfranc) Injuries in Athletes. <i>Critical Reviews in Biomedical Engineering</i> , 2015 , 43, 213-38	1.1	6
15	Standing centre of pressure alters the vibration transmissibility response of the foot. <i>Ergonomics</i> , 2019 , 62, 1202-1213	2.9	5
14	Characterizing the frequency of repeated citations: The effects of journal, subject area, and self-citation. <i>Information Processing and Management</i> , 2012 , 48, 1116-1123	6.3	5
13	Epidemiology of Foot Injuries Using National Collegiate Athletic Association Data From the 2009-2010 Through 2014-2015 Seasons. <i>Journal of Athletic Training</i> , 2020 , 55, 181-187	4	5
12	Anatomical locations for capturing magnitude differences in foot-transmitted vibration exposure, determined using multiple correspondence analysis. <i>Theoretical Issues in Ergonomics Science</i> , 2020 , 21, 562-576	2.2	5
11	Failure behaviour of rat vertebrae determined through simultaneous compression testing and micro-CT imaging. <i>Journal of the Mechanical Behavior of Biomedical Materials</i> , 2018 , 79, 73-82	4.1	2
10	Misalignment Error in Cancellous Bone Apparent Elastic Modulus Depends on Bone Volume Fraction and Degree of Anisotropy. <i>Journal of Biomechanical Engineering</i> , 2021 , 143,	2.1	2
9	Manuscript Processing Times Are Negatively Correlated with Journal Impact Factors / La corrélation négative entre les délais de traitement des manuscrits et les facteurs d'impact des revues scientifiques. <i>Canadian Journal of Information & Library Sciences</i> , 2013 , 37, 225-236		1
8	Matrix-Erosion Tessellation: Comparing Particle Clustering Measures Extracted from Three-Dimensional vs Two-Dimensional Images. <i>Metallurgical and Materials Transactions A: Physical Metallurgy and Materials Science</i> , 2009 , 40, 36-45	2.3	1
7	Leg, Foot, and Ankle Injury Biomechanics 2015 , 499-547		1
6	Development and commissioning of an instrumented pneumatic device to simulate blunt- and sharp-force trauma. <i>Forensic Science International</i> , 2020 , 307, 110123	2.6	1
5	Four degree-of-freedom lumped parameter model of the foot-ankle system exposed to vertical vibration from 10 to 60 Hz with varying centre of pressure conditions. <i>Ergonomics</i> , 2021 , 64, 1002-1017	2.9	1
4	Evaluating a theoretical and an empirical model of "side effects" in cancellous bone. <i>Medical Engineering and Physics</i> , 2021 , 94, 8-15	2.4	1
3	2D size of trabecular bone structure units (BSU) correlate more strongly with 3D architectural parameters than age in human vertebrae.. <i>Bone</i> , 2022 , 160, 116399	4.7	0
2	Stabbing angle alters peak force and work during sharp force trauma of porcine ribs. <i>Forensic Science International</i> , 2020 , 314, 110373	2.6	
1	Fracture tolerance of the patellofemoral joint in frontal knee impacts of 75 and 35 year-old males. <i>International Journal of Crashworthiness</i> , 2011 , 16, 397-409	1
