#	ARTICLE	IF	CITATIONS
1	Charging station location problem: A comprehensive review on models and solution approaches. Transportation Research Part C: Emerging Technologies, 2021, 132, 103376.	7.6	63
2	Locating electric vehicle charging stations under uncertain battery energy status and power consumption. Computers and Industrial Engineering, 2020, 149, 106752.	6.3	15
3	A multi-stage stochastic integer programming approach for locating electric vehicle charging stations. Computers and Operations Research, 2020, 117, 104888.	4.0	48
4	Efficient solution approaches for locating electric vehicle fast charging stations under driving range uncertainty. Computers and Operations Research, 2019, 109, 288-299.	4.0	25
5	A bi-level programming approach to locate capacitated electric vehicle charging stations. , 2019, , .		1
6	A stochastic closed-loop supply chain network design problem with multiple recovery options. Computers and Industrial Engineering, 2018, 118, 23-32.	6.3	38
7	Modeling international facility location under uncertainty: A review, analysis, and insights. IIE Transactions, 2018, 50, 535-551.	2.4	14
8	Location of Electric Vehicle Charging Stations Under Uncertainty on the Driving Range. Lecture Notes in Computer Science, 2018, , 475-486.	1.3	1
9	Considering multiple recovery options and uncertainties in a closed-loop supply chain network design problem. , 2017, , .		0
10	A MILP model and heuristic approach for facility location under multiple operational constraints. Computers and Industrial Engineering, 2016, 98, 446-461.	6.3	23
11	A distribution network design problem in the automotive industry: MIP formulation and heuristics. Computers and Operations Research, 2014, 52, 16-28.	4.0	10
