#	ARTICLE	IF	CITATIONS
1	Untangling the oxidative cost of reproduction: An analysis in wild banded mongooses. <i>Ecology and Evolution</i> , 2022, 12, e8644.	0.8	4
2	Leaders of war: modelling the evolution of conflict among heterogeneous groups. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2022, 377, 20210140.	1.8	7
3	Testing the acoustic adaptation hypothesis with vocalizations from three mongoose species. <i>Animal Behaviour</i> , 2022, 187, 71-95.	0.8	4
4	Fighting force and experience combine to determine contest success in a warlike mammal. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2022, 119, .	3.3	0
5	Assessment during Intergroup Contests. <i>Trends in Ecology and Evolution</i> , 2021, 36, 139-150.	4.2	11
6	Extra-group paternity varies with proxies of relatedness in a social mammal with high inbreeding risk. <i>Behavioral Ecology</i> , 2021, 32, 94-104.	1.0	3
7	Network-level consequences of outgroup threats in banded mongooses: Grooming and aggression between the sexes. <i>Journal of Animal Ecology</i> , 2021, 90, 153-167.	1.3	12
8	Mixture models as a method for comparative sociality: social networks and demographic change in resident killer whales. <i>Behavioral Ecology and Sociobiology</i> , 2021, 75, 1.	0.6	9
9	A veil of ignorance can promote fairness in a mammal society. <i>Nature Communications</i> , 2021, 12, 3717.	5.8	6
10	A double pedigree reveals genetic but not cultural inheritance of cooperative personalities in wild banded mongooses. <i>Ecology Letters</i> , 2021, 24, 1966-1975.	3.0	9
11	Age and sex influence social interactions, but not associations, within a killer whale pod. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2021, 288, 20210617.	1.2	21
12	A long postreproductive life span is a shared trait among genetically distinct killer whale populations. <i>Ecology and Evolution</i> , 2021, 11, 9123-9136.	0.8	14
13	Kinship dynamics: patterns and consequences of changes in local relatedness. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2021, 288, 20211129.	1.2	27
14	Cooperatively breeding banded mongooses do not avoid inbreeding through familiarity-based kin recognition. <i>Behavioral Ecology and Sociobiology</i> , 2021, 75, 1.	0.6	1
15	Individual foraging specialization in group-living species. <i>Animal Behaviour</i> , 2021, 182, 285-294.	0.8	4
16	The dynamics of social cohesion in response to simulated intergroup conflict in banded mongooses. <i>Ecology and Evolution</i> , 2021, 11, 18662-18675.	0.8	0
17	Inbreeding depresses altruism in a cooperative society. <i>Ecology Letters</i> , 2020, 23, 1460-1467.	3.0	8
18	Exploitative leaders incite intergroup warfare in a social mammal. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 29759-29766.	3.3	29

#	ARTICLE	IF	CITATIONS
19	Who goes there? Social surveillance as a response to intergroup conflict in a primitive termite. <i>Biology Letters</i> , 2020, 16, 20200131.	1.0	11
20	Modelling cetacean morbillivirus outbreaks in an endangered killer whale population. <i>Biological Conservation</i> , 2020, 242, 108398.	1.9	13
21	Behavioural response of workers to repeated intergroup encounters in the harvester ant <i>Messor barbarus</i> . <i>Insectes Sociaux</i> , 2019, 66, 491-500.	0.7	12
22	Elevated aggression is associated with uncertainty in a network of dog dominance interactions. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2019, 286, 20190536.	1.2	17
23	Stable isotopes are quantitative indicators of trophic niche. <i>Ecology Letters</i> , 2019, 22, 1990-1992.	3.0	28
24	Life-History Evolution: Grandmothering in Space and Time. <i>Current Biology</i> , 2019, 29, R215-R218.	1.8	6
25	Live long and prosper: durable benefits of early-life care in banded mongooses. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2019, 374, 20180114.	1.8	17
26	Developing differences: early-life effects and evolutionary medicine. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2019, 374, 20190039.	1.8	14
27	Evolution of menopause. <i>Current Biology</i> , 2019, 29, R112-R115.	1.8	13
28	Postreproductive killer whale grandmothers improve the survival of their grandoffspring. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019, 116, 26669-26673.	3.3	53
29	Spontaneous abortion as a response to reproductive conflict in the banded mongoose. <i>Biology Letters</i> , 2019, 15, 20190529.	1.0	7
30	A high-quality pedigree and genetic markers both reveal inbreeding depression for quality but not survival in a cooperative mammal. <i>Molecular Ecology</i> , 2018, 27, 2271-2288.	2.0	17
31	Postreproductive lifespans are rare in mammals. <i>Ecology and Evolution</i> , 2018, 8, 2482-2494.	0.8	65
32	Intragroup competition predicts individual foraging specialisation in a group-living mammal. <i>Ecology Letters</i> , 2018, 21, 665-673.	3.0	66
33	Telomere dynamics in wild banded mongooses: Evaluating longitudinal and quasi-longitudinal markers of senescence. <i>Experimental Gerontology</i> , 2018, 107, 67-73.	1.2	6
34	Kin discrimination via odour in the cooperatively breeding banded mongoose. <i>Royal Society Open Science</i> , 2018, 5, 171798.	1.1	5
35	Dynamic conflict among heterogeneous groups: a comment on Christensen and Radford. <i>Behavioral Ecology</i> , 2018, 29, 1016-1017.	1.0	9
36	Decoupling of Genetic and Cultural Inheritance in a Wild Mammal. <i>Current Biology</i> , 2018, 28, 1846-1850.e2.	1.8	20

#	ARTICLE	IF	CITATIONS
37	Analyses of ovarian activity reveal repeated evolution of post-reproductive lifespans in toothed whales. <i>Scientific Reports</i> , 2018, 8, 12833.	1.6	67
38	Data collection and storage in long-term ecological and evolutionary studies: The Mongoose 2000 system. <i>PLoS ONE</i> , 2018, 13, e0190740.	1.1	4
39	Reproductive Conflict and the Evolution of Menopause in Killer Whales. <i>Current Biology</i> , 2017, 27, 298-304.	1.8	85
40	Causes and consequences of intergroup conflict in cooperative banded mongooses. <i>Animal Behaviour</i> , 2017, 126, 31-40.	0.8	63
41	Lifetime fitness consequences of early-life ecological hardship in a wild mammal population. <i>Ecology and Evolution</i> , 2017, 7, 1712-1724.	0.8	54
42	Explaining negative kin discrimination in a cooperative mammal society. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2017, 114, 5207-5212.	3.3	58
43	Group size and visitor numbers predict faecal glucocorticoid concentrations in zoo meerkats. <i>Royal Society Open Science</i> , 2017, 4, 161017.	1.1	18
44	Biased escorts: offspring sex, not relatedness explains alloparental care patterns in a cooperative breeder. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017, 284, 20162384.	1.2	22
45	Heterozygosity but not inbreeding coefficient predicts parasite burdens in the banded mongoose. <i>Journal of Zoology</i> , 2017, 302, 32-39.	0.8	9
46	Individual and demographic consequences of mass eviction in cooperative banded mongooses. <i>Animal Behaviour</i> , 2017, 134, 103-112.	0.8	6
47	Pregnancy is detected via odour in a wild cooperative breeder. <i>Biology Letters</i> , 2017, 13, 20170441.	1.0	4
48	Mortality risk and social network position in resident killer whales: sex differences and the importance of resource abundance. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017, 284, 20171313.	1.2	69
49	Smelling fit: scent marking exposes parasitic infection status in the banded mongoose. <i>Environmental Epigenetics</i> , 2017, 63, 237-247.	0.9	7
50	Adaptation to public goods cheats in <i>Pseudomonas aeruginosa</i> . <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017, 284, 20171089.	1.2	48
51	Evidence of Oxidative Shielding of Offspring in a Wild Mammal. <i>Frontiers in Ecology and Evolution</i> , 2016, 4, .	1.1	27
52	Banded mongooses: Demography, life history, and social behavior. , 2016, , 318-337.		43
53	Female reproductive competition explains variation in prenatal investment in wild banded mongooses. <i>Scientific Reports</i> , 2016, 6, 20013.	1.6	12
54	Lack of aggression and apparent altruism towards intruders in a primitive termite. <i>Royal Society Open Science</i> , 2016, 3, 160682.	1.1	4

#	ARTICLE	IF	CITATIONS
55	Reproductive competition triggers mass eviction in cooperative banded mongooses. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2016, 283, 20152607.	1.2	25
56	Variable ecological conditions promote male helping by changing banded mongoose group composition. <i>Behavioral Ecology</i> , 2016, 27, 978-987.	1.0	23
57	The significance of postreproductive lifespans in killer whales: a comment on Robeck et al.: Table 1.. <i>Journal of Mammalogy</i> , 2016, 97, 906-909.	0.6	6
58	Oxidative shielding and the cost of reproduction. <i>Biological Reviews</i> , 2016, 91, 483-497.	4.7	143
59	Banded mongooses avoid inbreeding when mating with members of the same natal group. <i>Molecular Ecology</i> , 2015, 24, 3738-3751.	2.0	38
60	Elevated glucocorticoid concentrations during gestation predict reduced reproductive success in subordinate female banded mongooses. <i>Biology Letters</i> , 2015, 11, 20150620.	1.0	8
61	The evolution of prolonged life after reproduction. <i>Trends in Ecology and Evolution</i> , 2015, 30, 407-416.	4.2	175
62	The origins of consistent individual differences in cooperation in wild banded mongooses, <i>Mungos mungo</i> . <i>Animal Behaviour</i> , 2015, 107, 193-200.	0.8	41
63	Ecological Knowledge, Leadership, and the Evolution of Menopause in Killer Whales. <i>Current Biology</i> , 2015, 25, 746-750.	1.8	271
64	Adjustment of costly extra-group paternity according to inbreeding risk in a cooperative mammal. <i>Behavioral Ecology</i> , 2015, 26, 1486-1494.	1.0	40
65	Do paper wasps negotiate over helping effort?. <i>Behavioral Ecology</i> , 2014, 25, 88-94.	1.0	5
66	Evidence for frequent incest in a cooperatively breeding mammal. <i>Biology Letters</i> , 2014, 10, 20140898.	1.0	32
67	Suppressing subordinate reproduction provides benefits to dominants in cooperative societies of meerkats. <i>Nature Communications</i> , 2014, 5, 4499.	5.8	35
68	Hormonal mediation of a carry-over effect in a wild cooperative mammal. <i>Functional Ecology</i> , 2014, 28, 1377-1386.	1.7	28
69	Reproductive Competition Among Males in Multimale Groups of Primates: Modeling the Costs and Effectiveness of Conflict. <i>International Journal of Primatology</i> , 2014, 35, 746-763.	0.9	10
70	Policing of reproduction by hidden threats in a cooperative mammal. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 326-330.	3.3	51
71	Dominant aggression as a deterrent signal in paper wasps. <i>Behavioral Ecology</i> , 2014, 25, 706-715.	1.0	14
72	Using social parasitism to test reproductive skew models in a primitively eusocial wasp. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2014, 281, 20141206.	1.2	8

#	ARTICLE	IF	CITATIONS
73	Testing for vocal individual discrimination in adult banded mongooses. <i>Journal of Zoology</i> , 2013, 291, 171-177.	0.8	5
74	Longevity suppresses conflict in animal societies. <i>Biology Letters</i> , 2013, 9, 20130680.	1.0	9
75	Resolving social conflict among females without overt aggression. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2013, 368, 20130076.	1.8	33
76	Demography and Social Evolution of Banded Mongooses. <i>Advances in the Study of Behavior</i> , 2013, 45, 407-445.	1.0	85
77	VII.10. Cooperative Breeding. , 2013, , 677-682.		0
78	Resource limitation moderates the adaptive suppression of subordinate breeding in a cooperatively breeding mongoose. <i>Behavioral Ecology</i> , 2012, 23, 635-642.	1.0	42
79	Sex-biased dispersal, haplodiploidy and the evolution of helping in social insects. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2012, 279, 787-793.	1.2	44
80	The cost of dominance: suppressing subordinate reproduction affects the reproductive success of dominant female banded mongooses. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2012, 279, 619-624.	1.2	43
81	Suppression of Social Conflict and Evolutionary Transitions to Cooperation. <i>American Naturalist</i> , 2012, 179, 293-301.	1.0	28
82	Fine-scale spatiotemporal patterns of genetic variation reflect budding dispersal coupled with strong natal philopatry in a cooperatively breeding mammal. <i>Molecular Ecology</i> , 2012, 21, 5348-5362.	2.0	36
83	Segmental concatenation of individual signatures and context cues in banded mongoose (Mungos) Tj ETQq1 1 0.784314 rgBT/Overl	1.7	62
84	Food availability shapes patterns of helping effort in a cooperative mongoose. <i>Animal Behaviour</i> , 2012, 83, 1377-1385.	0.8	35
85	Cooperative breeding systems. , 2012, , 206-225.		24
86	Inclusive fitness theory and eusociality. <i>Nature</i> , 2011, 471, E1-E4.	13.7	339
87	Scent marking in wild banded mongooses: 2. Intrasexual overmarking and competition between males. <i>Animal Behaviour</i> , 2011, 81, 43-50.	0.8	24
88	Scent marking in wild banded mongooses: 1. Sex-specific scents and overmarking. <i>Animal Behaviour</i> , 2011, 81, 31-42.	0.8	41
89	Scent marking in wild banded mongooses: 3. Intrasexual overmarking in females. <i>Animal Behaviour</i> , 2011, 81, 51-60.	0.8	21
90	The role of threats in animal cooperation. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2011, 278, 170-178.	1.2	83

#	ARTICLE	IF	CITATIONS
91	Reproductive competition and the evolution of extreme birth synchrony in a cooperative mammal. <i>Biology Letters</i> , 2011, 7, 54-56.	1.0	63
92	Location and group size influence decisions in simulated intergroup encounters in banded mongooses. <i>Behavioral Ecology</i> , 2011, 22, 493-500.	1.0	56
93	Top males gain high reproductive success by guarding more successful females in a cooperatively breeding mongoose. <i>Animal Behaviour</i> , 2010, 80, 649-657.	0.8	47
94	Imitation and Traditions in Wild Banded Mongooses. <i>Current Biology</i> , 2010, 20, 1171-1175.	1.8	47
95	Scent marking within and between groups of wild banded mongooses. <i>Journal of Zoology</i> , 2010, 280, 72-83.	0.8	69
96	Reproductive control via eviction (but not the threat of eviction) in banded mongooses. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2010, 277, 2219-2226.	1.2	85
97	The evolution of menopause in cetaceans and humans: the role of demography. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2010, 277, 3765-3771.	1.2	145
98	How Threats Influence the Evolutionary Resolution of Within-Group Conflict. <i>American Naturalist</i> , 2009, 173, 759-771.	1.0	68
99	Social stability and helping in small animal societies. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2009, 364, 3181-3189.	1.8	38
100	Models of reproductive skew: outside options and the resolution of reproductive conflict. , 2009, , 3-23.		22
101	Reproductive conflict and the separation of reproductive generations in humans. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2008, 105, 5332-5336.	3.3	181
102	Sex Differences in Dispersal and the Evolution of Helping and Harming. <i>American Naturalist</i> , 2008, 172, 318-330.	1.0	94
103	Direct fitness, reciprocity and helping: A perspective from primitively eusocial wasps. <i>Behavioural Processes</i> , 2007, 76, 160-162.	0.5	15
104	Reproductive skew and the evolution of group dissolution tactics: a synthesis of concession and restraint models. <i>Animal Behaviour</i> , 2007, 74, 1643-1654.	0.8	38
105	Self-serving punishment and the evolution of cooperation. <i>Journal of Evolutionary Biology</i> , 2006, 19, 1383-1385.	0.8	36
106	A new perspective on size hierarchies in nature: patterns, causes, and consequences. <i>Oecologia</i> , 2006, 149, 362-372.	0.9	92
107	A tale of two theories: parent-offspring conflict and reproductive skew. <i>Animal Behaviour</i> , 2006, 71, 255-263.	0.8	40
108	Individual Variation in Social Aggression and the Probability of Inheritance: Theory and a Field Test. <i>American Naturalist</i> , 2006, 167, 837-852.	1.0	81

#	ARTICLE	IF	CITATIONS
109	Escalated conflict in a social hierarchy. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2006, 273, 2977-2984.	1.2	57
