

Giovanni Casella

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3130744/giovanni-casella-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
51	The early reduction of left ventricular mass after sleeve gastrectomy depends on the fall of branched-chain amino acid circulating levels.. <i>EBioMedicine</i> , 2022 , 76, 103864	8.8	1
50	Perioperative management of acute pain by multimodal analgesia after laparoscopic sleeve gastrectomy: A prospective cohort study. <i>Perioperative Care and Operating Room Management</i> , 2022 , 27, 100249	0.5	
49	Small intestinal metabolism is central to whole-body insulin resistance. <i>Gut</i> , 2021 , 70, 1098-1109	19.2	4
48	Esophageal adenocarcinoma after sleeve gastrectomy: actual or potential threat? Italian series and literature review. <i>Surgery for Obesity and Related Diseases</i> , 2021 , 17, 848-854	3	12
47	Response to: Sleeve gastrectomy may double the risk of esophageal adenocarcinoma in morbidly obese patients. <i>Surgery for Obesity and Related Diseases</i> , 2021 , 17, 1030	3	0
46	GORD and Barrett's oesophagus after bariatric procedures: multicentre prospective study. <i>British Journal of Surgery</i> , 2021 , 108, 1498-1505	5.3	1
45	The Effect of Sleeve Gastrectomy on Oxidative Stress in Obesity. <i>Biomedicines</i> , 2020 , 8,	4.8	5
44	Obesity Surgery and Cancer: What Are the Unanswered Questions?. <i>Frontiers in Endocrinology</i> , 2020 , 11, 213	5.7	10
43	Laparoscopic cholecystectomy: which predicting factors of conversion? Two Italian center's studies. <i>Minerva Chirurgica</i> , 2020 , 75, 141-152	0.8	5
42	The jejunum is the key factor in insulin resistance. <i>Surgery for Obesity and Related Diseases</i> , 2020 , 16, 509-519	3	1
41	Impact of COVID-19 outbreak on emergency surgery and emergency department admissions: an Italian level 2 emergency department experience. <i>British Journal of Surgery</i> , 2020 , 107, e374-e375	5.3	14
40	Sleeve gastrectomy and gastroesophageal reflux: a comprehensive endoscopic and pH-manometric prospective study. <i>Surgery for Obesity and Related Diseases</i> , 2020 , 16, 1629-1637	3	5
39	Duodenal-jejunal bypass improves nonalcoholic fatty liver disease independently of weight loss in rodents with diet-induced obesity. <i>American Journal of Physiology - Renal Physiology</i> , 2020 , 319, G502-G511	5.1	2
38	Simulation of gastric bypass effects on glucose metabolism and non-alcoholic fatty liver disease with the Sleeveballoon device. <i>EBioMedicine</i> , 2019 , 46, 452-462	8.8	8
37	Cholecystectomy for acute cholecystitis in octogenarians: impact of advanced age on postoperative outcome. <i>Minerva Chirurgica</i> , 2019 , 74, 289-296	0.8	3
36	New insight into the mechanisms of ectopic fat deposition improvement after bariatric surgery. <i>Scientific Reports</i> , 2019 , 9, 17315	4.9	14
35	Lack of correlation between gastroesophageal reflux disease symptoms and esophageal lesions after sleeve gastrectomy. <i>Surgery for Obesity and Related Diseases</i> , 2018 , 14, 751-756	3	68

34	Improving Weight Loss by Combination of Two Temporary Antiobesity Treatments. <i>Obesity Surgery</i> , 2018 , 28, 3733-3737	3.7	10
33	The anorexigenic peptide neurotensin relates to insulin sensitivity in obese patients after BPD or RYGB metabolic surgery. <i>International Journal of Obesity</i> , 2018 , 42, 2057-2061	5.5	9
32	Neuropilin 1 Mediates Keratinocyte Growth Factor Signaling in Adipose-Derived Stem Cells: Potential Involvement in Adipogenesis. <i>Stem Cells International</i> , 2018 , 2018, 1075156	5	14
31	10-year follow-up after laparoscopic sleeve gastrectomy: Outcomes in a monocentric series. <i>Surgery for Obesity and Related Diseases</i> , 2018 , 14, 1480-1487	3	44
30	Gastroesophageal reflux disease and Barrett's esophagus after laparoscopic sleeve gastrectomy: a possible, underestimated long-term complication. <i>Surgery for Obesity and Related Diseases</i> , 2017 , 13, 568-574	3	244
29	Lipidomic Changes in Skeletal Muscle in Patients after Biliopancreatic Diversion. <i>Hormone and Metabolic Research</i> , 2017 , 49, 880-885	3.1	1
28	The Role of Sleeve Gastrectomy in Reducing Cardiovascular Risk. <i>Obesity Surgery</i> , 2017 , 27, 1145-1151	3.7	11
27	Sleeve Gastrectomy. <i>Updates in Surgery Series</i> , 2017 , 41-55	0.1	
26	Long-term results after laparoscopic sleeve gastrectomy in a large monocentric series. <i>Surgery for Obesity and Related Diseases</i> , 2016 , 12, 757-762	3	47
25	Insulin Resistance, Microbiota, and Fat Distribution Changes by a New Model of Vertical Sleeve Gastrectomy in Obese Rats. <i>Diabetes</i> , 2016 , 65, 2990-3001	0.9	34
24	Learning curve for laparoscopic sleeve gastrectomy: role of training in a high-volume bariatric center. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2016 , 30, 3741-8	5.2	19
23	Use of platelet-rich plasma to reinforce the staple line during laparoscopic sleeve gastrectomy: feasibility study and preliminary outcome. <i>Journal of Laparoendoscopic and Advanced Surgical Techniques - Part A</i> , 2015 , 25, 222-7	2.1	8
22	Spider surgical system versus multiport laparoscopic surgery: performance comparison on a surgical simulator. <i>BMC Surgery</i> , 2015 , 15, 54	2.3	5
21	Laparoscopic Sleeve Gastrectomy 2015 , 175-185		0
20	Longitudinal sleeve gastrectomy: current perspectives. <i>Open Access Surgery</i> , 2014 , 35	0.4	1
19	Comparative use of different techniques for leak and bleeding prevention during laparoscopic sleeve gastrectomy: a multicenter study. <i>Surgery for Obesity and Related Diseases</i> , 2014 , 10, 450-4	3	73
18	Can virtual reality simulators be a certification tool for bariatric surgeons?. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2014 , 28, 242-8	5.2	20
17	Cardiac remodeling in obese patients after laparoscopic sleeve gastrectomy. <i>World Journal of Surgery</i> , 2013 , 37, 565-72	3.3	31

16	Effect of consecutive intragastric balloon (BIB) plus diet versus single BIB plus diet on eating disorders not otherwise specified (EDNOS) in obese patients. <i>Obesity Surgery</i> , 2013 , 23, 2075-9	3.7	20
15	How long is antibiotic therapy necessary after urgent cholecystectomy for acute cholecystitis?. <i>Journal of Gastrointestinal Surgery</i> , 2013 , 17, 1947-52	3.3	10
14	Long-term remission of type 2 diabetes in morbidly obese patients after sleeve gastrectomy. <i>Surgery for Obesity and Related Diseases</i> , 2013 , 9, 498-502	3	57
13	Sleeve gastrectomy and crural repair in obese patients with gastroesophageal reflux disease and/or hiatal hernia. <i>Surgery for Obesity and Related Diseases</i> , 2013 , 9, 356-61	3	175
12	Type 2 diabetes in obese patients with body mass index of 30-35 kg/m ² : sleeve gastrectomy versus medical treatment. <i>Surgery for Obesity and Related Diseases</i> , 2012 , 8, 20-4	3	40
11	Obesity, type 2 diabetes mellitus, and other comorbidities: a prospective cohort study of laparoscopic sleeve gastrectomy vs medical treatment. <i>Archives of Surgery</i> , 2012 , 147, 694-700		49
10	Ten-year duration of type 2 diabetes as prognostic factor for remission after sleeve gastrectomy. <i>Surgery for Obesity and Related Diseases</i> , 2011 , 7, 697-702	3	30
9	A Time-Saving Technique for Specimen Extraction in Sleeve Gastrectomy: Reply. <i>World Journal of Surgery</i> , 2011 , 35, 925-925	3.3	
8	Laparoscopic sleeve gastrectomy and left adrenalectomy with supragastric approach. <i>Surgical Laparoscopy, Endoscopy and Percutaneous Techniques</i> , 2010 , 20, e195-8	1.3	2
7	A time-saving technique for specimen extraction in sleeve gastrectomy. <i>World Journal of Surgery</i> , 2010 , 34, 765-7	3.3	17
6	Early postoperative insulin-resistance changes after sleeve gastrectomy. <i>Obesity Surgery</i> , 2010 , 20, 50-5	3.7	101
5	Initial experience with laparoscopic crural closure in the management of hiatal hernia in obese patients undergoing sleeve gastrectomy. <i>Obesity Surgery</i> , 2010 , 20, 1149-53	3.7	84
4	Reoperation after laparoscopic adjustable gastric banding: analysis of a cohort of 500 patients with long-term follow-up. <i>Surgery for Obesity and Related Diseases</i> , 2008 , 4, 430-6	3	33
3	Biliary Lithiasis and Obesity 2008 , 415-424		3
2	Effectiveness of laparoscopic sleeve gastrectomy (first stage of biliopancreatic diversion with duodenal switch) on co-morbidities in super-obese high-risk patients. <i>Obesity Surgery</i> , 2006 , 16, 1138-44	3.7	269
1	Results after laparoscopic adjustable gastric banding in patients over 55 years of age. <i>Obesity Surgery</i> , 2005 , 15, 351-6	3.7	22
