

Kazuyo

List of Publications by Citations

Source: <https://exaly.com/author-pdf/3141553/kazuyo-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
61	An Asian emission inventory of anthropogenic emission sources for the period 1980-2020. <i>Atmospheric Chemistry and Physics</i> , 2007 , 7, 4419-4444	6.8	1134
60	Analysis of the seasonal variation of ozone in the boundary layer in East Asia using the Community Multi-scale Air Quality model: What controls surface ozone levels over Japan?. <i>Atmospheric Environment</i> , 2006 , 40, 1856-1868	5.3	114
59	Systematic analysis of interannual and seasonal variations of model-simulated tropospheric NO ₂ in Asia and comparison with GOME-satellite data. <i>Atmospheric Chemistry and Physics</i> , 2007 , 7, 1671-1681	6.8	109
58	Impacts of aerosols on summertime tropospheric photolysis frequencies and photochemistry over Central Eastern China. <i>Atmospheric Environment</i> , 2011 , 45, 1817-1829	5.3	97
57	Significant latitudinal gradient in the surface ozone spring maximum over East Asia. <i>Geophysical Research Letters</i> , 2005 , 32,	4.9	85
56	Future prediction of surface ozone over east Asia using Models-3 Community Multiscale Air Quality Modeling System and Regional Emission Inventory in Asia. <i>Journal of Geophysical Research</i> , 2008 , 113,		83
55	Near-ground ozone source attributions and outflow in central eastern China during MTX2006. <i>Atmospheric Chemistry and Physics</i> , 2008 , 8, 7335-7351	6.8	83
54	Theoretical Estimation of Lithium Isotopic Reduced Partition Function Ratio for Lithium Ions in Aqueous Solution. <i>Journal of Physical Chemistry A</i> , 2001 , 105, 602-613	2.8	71
53	Impact of open crop residual burning on air quality over Central Eastern China during the Mount Tai Experiment 2006 (MTX2006). <i>Atmospheric Chemistry and Physics</i> , 2010 , 10, 7353-7368	6.8	60
52	Regional-specific emission inventory for NH ₃ , N ₂ O, and CH ₄ via animal farming in South, Southeast, and East Asia. <i>Atmospheric Environment</i> , 2004 , 38, 7111-7121	5.3	55
51	Evaluation of Premature Mortality Caused by Exposure to PM _{2.5} and Ozone in East Asia: 2000, 2005, 2020. <i>Water, Air, and Soil Pollution</i> , 2012 , 223, 3445-3459	2.6	48
50	A country-specific, high-resolution emission inventory for methane from livestock in Asia in 2000. <i>Atmospheric Environment</i> , 2003 , 37, 4393-4406	5.3	46
49	PM diminution and haze events over Delhi during the COVID-19 lockdown period: an interplay between the baseline pollution and meteorology. <i>Scientific Reports</i> , 2020 , 10, 13442	4.9	39
48	Emissions of nonmethane volatile organic compounds from open crop residue burning in the Yangtze River Delta region, China. <i>Journal of Geophysical Research D: Atmospheres</i> , 2014 , 119, 7684-7698	4.4	37
47	Overview of the Mount Tai Experiment (MTX2006) in central East China in June 2006: studies of significant regional air pollution. <i>Atmospheric Chemistry and Physics</i> , 2013 , 13, 8265-8283	6.8	36
46	Sensitivity analysis of source regions to PM _{2.5} concentration at Fukue Island, Japan. <i>Journal of the Air and Waste Management Association</i> , 2014 , 64, 445-52	2.4	35
45	MICS-Asia III: multi-model comparison and evaluation of aerosol over East Asia. <i>Atmospheric Chemistry and Physics</i> , 2019 , 19, 11911-11937	6.8	35

44	Model evaluation and intercomparison of surface-level ozone and relevant species in East Asia in the context of MICS-Asia Phase III [Part 1: Overview. <i>Atmospheric Chemistry and Physics</i> , 2019 , 19, 12993-13015	6.8	33
43	MICS-Asia III: overview of model intercomparison and evaluation of acid deposition over Asia. <i>Atmospheric Chemistry and Physics</i> , 2020 , 20, 2667-2693	6.8	30
42	Sensitivity analyses of factors influencing CMAQ performance for fine particulate nitrate. <i>Journal of the Air and Waste Management Association</i> , 2014 , 64, 374-87	2.4	28
41	Overview of Model Inter-Comparison in Japan—Study for Reference Air Quality Modeling (J-STREAM). <i>Atmosphere</i> , 2018 , 9, 19	2.7	24
40	Evaluation and uncertainty investigation of the NO ₂ , CO and NH ₃ modeling over China under the framework of MICS-Asia III. <i>Atmospheric Chemistry and Physics</i> , 2020 , 20, 181-202	6.8	24
39	Source region attribution of PM _{2.5} mass concentrations over Japan. <i>Geochemical Journal</i> , 2015 , 49, 185-194	6.8	21
38	Comprehensive analyses of source sensitivities and apportionments of PM _{2.5} and ozone over Japan via multiple numerical techniques. <i>Atmospheric Chemistry and Physics</i> , 2020 , 20, 10311-10329	6.8	20
37	Rapid reduction in black carbon emissions from China: evidence from 2009–2019 observations on Fukue Island, Japan. <i>Atmospheric Chemistry and Physics</i> , 2020 , 20, 6339-6356	6.8	18
36	Investigating the response of East Asian ozone to Chinese emission changes using a linear approach. <i>Atmospheric Environment</i> , 2012 , 55, 475-482	5.3	18
35	Uncertainties in O ₃ concentrations simulated by CMAQ over Japan using four chemical mechanisms. <i>Atmospheric Environment</i> , 2019 , 198, 448-462	5.3	18
34	Refinement of Modeled Aqueous-Phase Sulfate Production via the Fe- and Mn-Catalyzed Oxidation Pathway. <i>Atmosphere</i> , 2018 , 9, 132	2.7	16
33	Why do models perform differently on particulate matter over East Asia? A multi-model intercomparison study for MICS-Asia III. <i>Atmospheric Chemistry and Physics</i> , 2020 , 20, 7393-7410	6.8	13
32	Effects of a Detailed Vegetation Database on Simulated Meteorological Fields, Biogenic VOC Emissions, and Ambient Pollutant Concentrations over Japan. <i>Atmosphere</i> , 2018 , 9, 179	2.7	13
31	Impact of Chemical Production and Transport on Summertime Diurnal Ozone Behavior at a Mountainous Site in North China Plain. <i>Scientific Online Letters on the Atmosphere</i> , 2008 , 4, 121-124	2.1	13
30	Seasonal Response of North Western Pacific Marine Ecosystems to Deposition of Atmospheric Inorganic Nitrogen Compounds from East Asia. <i>Scientific Reports</i> , 2018 , 8, 9324	4.9	13
29	Model Inter-Comparison for PM _{2.5} Components over urban Areas in Japan in the J-STREAM Framework. <i>Atmosphere</i> , 2020 , 11, 222	2.7	11
28	Influence of model grid resolution on NO ₂ vertical column densities over East Asia. <i>Journal of the Air and Waste Management Association</i> , 2014 , 64, 436-44	2.4	11
27	Nitrogen oxides concentration and emission change detection during COVID-19 restrictions in North India. <i>Scientific Reports</i> , 2021 , 11, 9800	4.9	11

26	Can Delhi's Pollution be Affected by Crop Fires in the Punjab Region?. <i>Scientific Online Letters on the Atmosphere</i> , 2020 , 16, 86-91	2.1	10
25	Model Inter-Comparison Study for Asia (MICS-Asia) phase III: multimodel comparison of reactive nitrogen deposition over China. <i>Atmospheric Chemistry and Physics</i> , 2020 , 20, 10587-10610	6.8	9
24	Urban Air Quality Model Inter-Comparison Study (UMICS) for Improvement of PM2.5 Simulation in Greater Tokyo Area of Japan. <i>Asian Journal of Atmospheric Environment</i> , 2018 , 12, 139-152	1.3	9
23	Model Performance Differences in Sulfate Aerosol in Winter over Japan Based on Regional Chemical Transport Models of CMAQ and CAMx. <i>Atmosphere</i> , 2018 , 9, 488	2.7	9
22	Long-Term Simulations of Surface Ozone in East Asia During 1980-2020 with CMAQ and REAS Inventory. <i>NATO Security Through Science Series C: Environmental Security</i> , 2008 , 136-144		9
21	Identifying key factors influencing model performance on ground-level ozone over urban areas in Japan through model inter-comparisons. <i>Atmospheric Environment</i> , 2020 , 223, 117255	5.3	8
20	Uplifting of Asian Continental Pollution Plumes from the Boundary Layer to the Free Atmosphere over the Northwestern Pacific Rim in Spring. <i>Scientific Online Letters on the Atmosphere</i> , 2013 , 9, 40-44	2.1	7
19	Evaluation of the Effect of Surface Ozone on Main Crops in East Asia: 2000, 2005, and 2020. <i>Water, Air, and Soil Pollution</i> , 2013 , 224, 1	2.6	5
18	Theoretical Estimation of the Solvent Effect of the Lithium Isotopic Reduced Partition Function Ratio. <i>Journal of Physical Chemistry A</i> , 2003 , 107, 7832-7844	2.8	5
17	Model Performance Differences in Fine-Mode Nitrate Aerosol during Wintertime over Japan in the J-STREAM Model Inter-Comparison Study. <i>Atmosphere</i> , 2020 , 11, 511	2.7	4
16	Differences in Model Performance and Source Sensitivities for Sulfate Aerosol Resulting from Updates of the Aqueous- and Gas-Phase Oxidation Pathways for a Winter Pollution Episode in Tokyo, Japan. <i>Atmosphere</i> , 2019 , 10, 544	2.7	4
15	Observed and Modeled Mass Concentrations of Organic Aerosols and PM2.5 at Three Remote Sites around the East China Sea: Roles of Chemical Aging. <i>Aerosol and Air Quality Research</i> , 2017 , 17, 3091-3105	4.6	4
14	Advantages of Continuous Monitoring of Hourly PM2.5 Component Concentrations in Japan for Model Validation and Source Sensitivity Analyses. <i>Asian Journal of Atmospheric Environment</i> , 2021 , 15, 1-29	1.3	4
13	Why models perform differently on particulate matter over East Asia? A multi-model intercomparison study for MICS-Asia III 2019 ,		3
12	Model evaluation and inter-comparison of surface-level ozone and relevant species in East Asia in the context of MICS-Asia phase III Part I: overview 2019 ,		3
11	Diurnal variations of fossil and nonfossil carbonaceous aerosols in Beijing. <i>Atmospheric Environment</i> , 2015 , 122, 349-356	5.3	3
10	Recent Trends and Future Projections in Asian Air Pollution. <i>Journal of Disaster Research</i> , 2007 , 2, 163-172	2.8	3
9	MICS-Asia III: Multi-model comparison of reactive Nitrogen deposition over China 2020 ,		2

8	Year-round modeling of sulfate aerosol over Asia through updates of aqueous-phase oxidation and gas-phase reactions with stabilized Criegee intermediates. <i>Atmospheric Environment: X</i> , 2021 , 12, 100123 ^{2.8}	2
7	Evaluation and uncertainty investigation of the NO ₂ , CO and NH ₃ ; modeling over China under the framework of MICS-Asia III 2019 ,	1
6	MICS-Asia III: Multi-model comparison and evaluation of aerosol over East Asia 2019 ,	1
5	MICS-Asia III: Overview of model inter-comparison and evaluation of acid deposition over Asia 2019 ,	1
4	Comprehensive analyses of source sensitivities to and apportionments of PM _{2.5} and ozone over Japan via multiple numerical techniques 2020 ,	1
3	Investigating Impacts on Atmospheric Environment from Ship Emissions by Using Numerical Simulations. <i>Journal of the Japan Institute of Marine Engineering</i> , 2014 , 49, 770-775	0.1 1
2	Insights into seasonal variation of wet deposition over southeast Asia via precipitation adjustment from the findings of MICS-Asia III. <i>Atmospheric Chemistry and Physics</i> , 2021 , 21, 8709-8734	6.8 1
1	Dominance of the residential sector in Chinese black carbon emissions as identified from downwind atmospheric observations during the COVID-19 pandemic.. <i>Scientific Reports</i> , 2021 , 11, 23378	4.9 1
