

# T E Trnqvist

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/3143854/t-e-tornqvist-publications-by-year.pdf>

**Version:** 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

37  
papers

1,554  
citations

25  
h-index

39  
g-index

42  
ext. papers

1,911  
ext. citations

8.4  
avg, IF

5.25  
L-index

#	Paper	IF	Citations
37	Organic Matter Accretion, Shallow Subsidence, and River Delta Sustainability. <i>Journal of Geophysical Research F: Earth Surface</i> , <b>2021</b> , 126, e2021JF006231	3.8	3
36	Does Load-Induced Shallow Subsidence Inhibit Delta Growth?. <i>Journal of Geophysical Research F: Earth Surface</i> , <b>2021</b> , 126, e2021JF006153	3.8	3
35	Measuring, modelling and projecting coastal land subsidence. <i>Nature Reviews Earth &amp; Environment</i> , <b>2021</b> , 2, 40-58	30.2	25
34	Coastal Wetland Resilience, Accelerated Sea-Level Rise, and the Importance of Timescale. <i>AGU Advances</i> , <b>2021</b> , 2, e2020AV000334	5.4	8
33	Engineered Continental-Scale Rivers Can Drive Changes in the Carbon Cycle. <i>AGU Advances</i> , <b>2021</b> , 2, e2020AV000273	5.4	8
32	Global-scale human impact on delta morphology has led to net land area gain. <i>Nature</i> , <b>2020</b> , 577, 514-518	30.4	117
31	Tipping points of Mississippi Delta marshes due to accelerated sea-level rise. <i>Science Advances</i> , <b>2020</b> , 6, eaaz5512	14.3	37
30	Inception of a global atlas of sea levels since the Last Glacial Maximum. <i>Quaternary Science Reviews</i> , <b>2019</b> , 220, 359-371	3.9	44
29	Measuring rates of present-day relative sea-level rise in low-elevation coastal zones: a critical evaluation. <i>Ocean Science</i> , <b>2019</b> , 15, 61-73	4	25
28	Crevasse Splays Versus Avulsions: A Recipe for Land Building With Levee Breaches. <i>Geophysical Research Letters</i> , <b>2018</b> , 45, 4058-4067	4.9	43
27	Anatomy of Mississippi Delta growth and its implications for coastal restoration. <i>Science Advances</i> , <b>2018</b> , 4, eaar4740	14.3	68
26	Future Change to Tide-Influenced Deltas. <i>Geophysical Research Letters</i> , <b>2018</b> , 45, 3499-3507	4.9	41
25	Mechanisms of late Quaternary fault throw-rate variability along the north central Gulf of Mexico coast: implications for coastal subsidence. <i>Basin Research</i> , <b>2017</b> , 29, 557-570	3.2	14
24	Short organic carbon turnover time and narrow $^{14}\text{C}$ age spectra in early Holocene wetland paleosols. <i>Geochemistry, Geophysics, Geosystems</i> , <b>2017</b> , 18, 142-155	3.6	9
23	Vulnerability of Louisiana's coastal wetlands to present-day rates of relative sea-level rise. <i>Nature Communications</i> , <b>2017</b> , 8, 14792	17.4	137
22	Efficient retention of mud drives land building on the Mississippi Delta plain. <i>Earth Surface Dynamics</i> , <b>2017</b> , 5, 387-397	3.8	26
21	Late Holocene evolution of a coupled, mud-dominated delta plain-chenier plain system, coastal Louisiana, USA. <i>Earth Surface Dynamics</i> , <b>2017</b> , 5, 689-710	3.8	28

20	Connecting the backwater hydraulics of coastal rivers to fluvio-deltaic sedimentology and stratigraphy. <i>Geology</i> , <b>2016</b> , 44, 979-982	5	52
19	The contribution of glacial isostatic adjustment to projections of sea-level change along the Atlantic and Gulf coasts of North America. <i>Earth's Future</i> , <b>2016</b> , 4, 440-464	7.9	42
18	Palaeo-sea-level and palaeo-ice-sheet databases: problems, strategies, and perspectives. <i>Climate of the Past</i> , <b>2016</b> , 12, 911-921	3.9	22
17	Episodic overbank deposition as a dominant mechanism of floodplain and delta-plain aggradation. <i>Geology</i> , <b>2015</b> , 43, 875-878	5	98
16	Understanding subsidence in the Mississippi Delta region due to sediment, ice, and ocean loading: Insights from geophysical modeling. <i>Journal of Geophysical Research: Solid Earth</i> , <b>2014</b> , 119, 3838-3856	3.6	46
15	Rapid and widespread response of the Lower Mississippi River to eustatic forcing during the last glacial-interglacial cycle: Reply. <i>Bulletin of the Geological Society of America</i> , <b>2013</b> , 125, 1375-1375	3.9	
14	Links between early Holocene ice-sheet decay, sea-level rise and abrupt climate change. <i>Nature Geoscience</i> , <b>2012</b> , 5, 601-606	18.3	126
13	Synchronizing a sea-level jump, final Lake Agassiz drainage, and abrupt cooling 8200years ago. <i>Earth and Planetary Science Letters</i> , <b>2012</b> , 315-316, 41-50	5.3	48
12	Quantifying Holocene lithospheric subsidence rates underneath the Mississippi Delta. <i>Earth and Planetary Science Letters</i> , <b>2012</b> , 331-332, 21-30	5.3	47
11	Rapid and widespread response of the Lower Mississippi River to eustatic forcing during the last glacial-interglacial cycle. <i>Bulletin of the Geological Society of America</i> , <b>2012</b> , 124, 690-704	3.9	42
10	High-resolution numerical modeling of tides in the western Atlantic, Gulf of Mexico, and Caribbean Sea during the Holocene. <i>Journal of Geophysical Research</i> , <b>2011</b> , 116,		61
9	The sea-level conundrum: case studies from palaeo-archives. <i>Journal of Quaternary Science</i> , <b>2010</b> , 25, 19-25	2.3	26
8	Investigating the impact of Lake Agassiz drainage routes on the 8.2 ka cold event with a climate model. <i>Climate of the Past</i> , <b>2009</b> , 5, 471-480	3.9	10
7	Spatial variability of late Holocene and 20th century sea-level rise along the Atlantic coast of the United States. <i>Geology</i> , <b>2009</b> , 37, 1115-1118	5	140
6	A new Late Holocene sea-level record from the Mississippi Delta: evidence for a climate/sea level connection?. <i>Quaternary Science Reviews</i> , <b>2009</b> , 28, 1737-1749	3.9	54
5	A Dutch geoscience perspective on the Katrina disaster. <i>Geologie En Mijnbouw/Netherlands Journal of Geosciences</i> , <b>2007</b> , 86, 307-315	1.1	5
4	Did the last sea level lowstand always lead to cross-shelf valley formation and source-to-sink sediment flux?. <i>Journal of Geophysical Research</i> , <b>2006</b> , 111,		25
3	Causes of River Avulsion: Insights from the Late Holocene Avulsion History of the Mississippi River, U.S.A.--Discussion. <i>Journal of Sedimentary Research</i> , <b>2006</b> , 76, 959-959	2.1	3

- 2 Conditioning a Process-Based Model of Sedimentary Architecture to Well Data. *Journal of Sedimentary Research*, **2001**, 71, 868-879 2.1 33
- 1 Global coastal wetland expansion under accelerated sea-level rise is unlikely 2
