

Berta N Estevinho

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3144546/berta-n-estevinho-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
62	Optimization of electrospinning parameters for the production of zein microstructures for food and biomedical applications. <i>Micron</i> , 2022 , 152, 103164	2.3	4
61	Spray-drying of oil-in-water emulsions for encapsulation of retinoic acid: Polysaccharide- and protein-based microparticles characterization and controlled release studies. <i>Food Hydrocolloids</i> , 2022 , 124, 107193	10.6	1
60	Development of Food Grade Controlled Delivery Systems by Microencapsulation of Polyphenols with Health Benefits 2022 , 495-510		
59	Grafting MSI-78A onto chitosan microspheres enhances its antimicrobial activity. <i>Acta Biomaterialia</i> , 2021 , 137, 186-186	10.8	1
58	Microencapsulation of retinoic acid by atomization into biopolymeric matrices: Binary and ternary blends of alginic acid sodium, xanthan gum and modified chitosan. <i>Food Hydrocolloids</i> , 2021 , 107310	10.6	0
57	Development of Controlled Delivery Functional Systems by Microencapsulation of Different Extracts of Plants: <i>Hypericum perforatum</i> L., <i>Salvia officinalis</i> L. and <i>Syzygium aromaticum</i> . <i>Food and Bioprocess Technology</i> , 2021 , 14, 1503-1517	5.1	4
56	Encapsulation in food industry with emerging electrohydrodynamic techniques: Electrospinning and electro spraying - A review. <i>Food Chemistry</i> , 2021 , 339, 127850	8.5	55
55	Preparation and Incorporation of Functional Ingredients in Edible Films and Coatings. <i>Food and Bioprocess Technology</i> , 2021 , 14, 209-231	5.1	35
54	Methodologies for simulation of gastrointestinal digestion of different controlled delivery systems and further uptake of encapsulated bioactive compounds. <i>Trends in Food Science and Technology</i> , 2021 , 114, 510-520	15.3	13
53	A new approach to the production of zein microstructures with vitamin B12, by electrospinning and spray drying techniques. <i>Powder Technology</i> , 2021 , 392, 47-57	5.2	5
52	Improvement of vitamin E microencapsulation and release using different biopolymers as encapsulating agents. <i>Food and Bioproducts Processing</i> , 2021 , 130, 23-33	4.9	1
51	The progress and application of vitamin E encapsulation [A review]. <i>Food Hydrocolloids</i> , 2021 , 121, 106998	10.6	8
50	Polysaccharide-based delivery systems for curcumin and turmeric powder encapsulation using a spray-drying process. <i>Powder Technology</i> , 2020 , 370, 137-146	5.2	20
49	Nanocarriers loaded with nutraceuticals and bioactive ingredients (vitamins and minerals) 2020 , 373-412		4
48	In vitro evaluation of microparticles with <i>Laurus nobilis</i> L. extract prepared by spray-drying for application in food and pharmaceutical products. <i>Food and Bioproducts Processing</i> , 2020 , 122, 124-135	4.9	10
47	Preliminary evaluation and studies on the preparation, characterization and in vitro release studies of different biopolymer microparticles for controlled release of folic acid. <i>Powder Technology</i> , 2020 , 369, 279-288	5.2	7
46	Production of vitamin B1 microparticles by a spray drying process using different biopolymers as wall materials. <i>Canadian Journal of Chemical Engineering</i> , 2020 , 98, 1682-1695	2.3	9

45	Microencapsulation of Vitamin A by spray-drying, using binary and ternary blends of gum arabic, starch and maltodextrin. <i>Food Hydrocolloids</i> , 2020 , 108, 106029	10.6	27
44	A new approach for the microencapsulation of curcumin by a spray drying method, in order to value food products. <i>Powder Technology</i> , 2020 , 362, 428-435	5.2	33
43	A dry and fully dispersible bacterial cellulose formulation as a stabilizer for oil-in-water emulsions. <i>Carbohydrate Polymers</i> , 2020 , 230, 115657	10.3	15
42	Edible Films Prepared with Different Biopolymers, Containing Polyphenols Extracted from Elderberry (<i>Sambucus Nigra</i> L.), to Protect Food Products and to Improve Food Functionality. <i>Food and Bioprocess Technology</i> , 2020 , 13, 1742-1754	5.1	9
41	Microencapsulation of polyphenols - The specific case of the microencapsulation of <i>Sambucus Nigra</i> L. extracts - A review. <i>Trends in Food Science and Technology</i> , 2020 , 105, 454-467	15.3	26
40	Formulation approaches for improved retinoids delivery in the treatment of several pathologies. <i>European Journal of Pharmaceutics and Biopharmaceutics</i> , 2019 , 143, 80-90	5.7	8
39	Characterization of biopolymer-based systems obtained by spray-drying for retinoic acid controlled delivery. <i>Powder Technology</i> , 2019 , 345, 758-765	5.2	14
38	Spray Drying Encapsulation of Elderberry Extract and Evaluating the Release and Stability of Phenolic Compounds in Encapsulated Powders. <i>Food and Bioprocess Technology</i> , 2019 , 12, 1381-1394	5.1	31
37	Potential food application of resveratrol microparticles: Characterization and controlled release studies. <i>Powder Technology</i> , 2019 , 355, 593-601	5.2	21
36	Citronella Oil Microencapsulated in Carboxymethylated Tamarind Gum and its Controlled Release. <i>Engineering Journal</i> , 2019 , 23, 217-227	1.8	8
35	Application of a cyanobacterial extracellular polymeric substance in the microencapsulation of vitamin B12. <i>Powder Technology</i> , 2019 , 343, 644-651	5.2	23
34	New Trends in the Microencapsulation of Functional Fatty Acid-Rich Oils Using Transglutaminase Catalyzed Crosslinking. <i>Comprehensive Reviews in Food Science and Food Safety</i> , 2018 , 17, 274-289	16.4	31
33	Development of enzymatically-active bacterial cellulose membranes through stable immobilization of an engineered β -galactosidase. <i>International Journal of Biological Macromolecules</i> , 2018 , 115, 476-482	7.9	18
32	Production, properties, and applications of solid self-emulsifying delivery systems (S-SEDS) in the food and pharmaceutical industries. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2018 , 538, 108-126	5.1	46
31	Microencapsulation of Curcumin by a Spray-Drying Technique Using Gum Arabic as Encapsulating Agent and Release Studies. <i>Food and Bioprocess Technology</i> , 2018 , 11, 1795-1806	5.1	32
30	STUDY OF DIFFERENT ENCAPSULATING AGENTS FOR THE MICROENCAPSULATION OF VITAMIN B12. <i>Environmental Engineering and Management Journal</i> , 2018 , 17, 855-864	0.6	5
29	Microencapsulation of Citronella Oil with Carboxymethylated Tamarind Gum. <i>Walailak Journal of Science and Technology</i> , 2018 , 15, 515-527	1.5	6
28	Application of Biopolymers in Microencapsulation Processes 2018 , 191-222		3

27	Microencapsulation of a Natural Antioxidant from Coffee Chlorogenic Acid (3-Caffeoylquinic Acid). <i>Food and Bioprocess Technology</i> , 2017 , 10, 1521-1530	5.1	35
26	Microencapsulation of <i>Gulosibacter molinativorax</i> ON4 cells by a spray-drying process using different biopolymers. <i>Journal of Hazardous Materials</i> , 2017 , 338, 85-92	12.8	17
25	Study of microencapsulation and controlled release of modified chitosan microparticles containing vitamin B12. <i>Powder Technology</i> , 2017 , 318, 162-169	5.2	36
24	Design of microparticles containing natural antioxidants: Preparation, characterization and controlled release studies. <i>Powder Technology</i> , 2017 , 313, 287-292	5.2	41
23	Kinetic models applied to soluble vitamins delivery systems prepared by spray drying. <i>Drying Technology</i> , 2017 , 35, 1249-1257	2.6	31
22	Design and characterization of controlled-release vitamin A microparticles prepared by a spray-drying process. <i>Powder Technology</i> , 2017 , 305, 411-417	5.2	46
21	A Key for the Future of the Flavors in Food Industry 2017 , 1-19		10
20	Microencapsulation of natural antioxidants for food application – The specific case of coffee antioxidants – A review. <i>Trends in Food Science and Technology</i> , 2016 , 58, 21-39	15.3	120
19	Microencapsulation of vitamin A: A review. <i>Trends in Food Science and Technology</i> , 2016 , 51, 76-87	15.3	90
18	Application of microencapsulated essential oils in cosmetic and personal healthcare products - a review. <i>International Journal of Cosmetic Science</i> , 2016 , 38, 109-19	2.7	167
17	Soluble vitamins (vitamin B12 and vitamin C) microencapsulated with different biopolymers by a spray drying process. <i>Powder Technology</i> , 2016 , 289, 71-78	5.2	79
16	Preliminary studies of rosmarinic acid microencapsulation with chitosan and modified chitosan for topical delivery. <i>Powder Technology</i> , 2016 , 297, 44-49	5.2	61
15	Production of microparticles of molinate degrading biocatalysts using the spray drying technique. <i>Chemosphere</i> , 2016 , 161, 61-68	8.4	7
14	Effect of the pH in the formation of β -galactosidase microparticles produced by a spray-drying process. <i>International Journal of Biological Macromolecules</i> , 2015 , 78, 238-42	7.9	30
13	Enzyme kinetics: the whole picture reveals hidden meanings. <i>FEBS Journal</i> , 2015 , 282, 2309-16	5.7	11
12	DEVELOPMENT AND VALIDATION OF UV SPECTROPHOTOMETRIC METHOD FOR DETERMINING THE HERBICIDE MOLINATE WITH AND WITHOUT ALGINATE MICROPARTICLES. <i>Environmental Engineering and Management Journal</i> , 2015 , 14, 303-309	0.6	5
11	The Influence of Microencapsulation with a Modified Chitosan (Water Soluble) on β -Galactosidase Activity. <i>Drying Technology</i> , 2014 , 32, 1575-1586	2.6	29
10	Microencapsulation of β -galactosidase with different biopolymers by a spray-drying process. <i>Food Research International</i> , 2014 , 64, 134-140	7	62

9	Microencapsulation with chitosan by spray drying for industry applications [A review]. <i>Trends in Food Science and Technology</i> , 2013 , 31, 138-155	15.3	202
8	Uncertainty in the Determination of Glucose and Sucrose in Solutions with Chitosan by Enzymatic Methods. <i>Journal of the Brazilian Chemical Society</i> , 2013 ,	1.5	3
7	STUDY OF THE INHIBITION EFFECT ON THE MICROENCAPSULATED ENZYME b-GALACTOSIDASE. <i>Environmental Engineering and Management Journal</i> , 2012 , 11, 1923-1930	0.6	21
6	Uncertainty in the determination of glucose in aqueous solutions by high-performance liquid chromatography with evaporative light scattering detection. <i>Journal of Separation Science</i> , 2009 , 32, 3116-25	3.4	11
5	A preliminary feasibility study for pentachlorophenol column sorption by almond shell residues. <i>Chemical Engineering Journal</i> , 2008 , 136, 188-194	14.7	22
4	Removal of 2,4-dichlorophenol and pentachlorophenol from waters by sorption using coal fly ash from a Portuguese thermal power plant. <i>Journal of Hazardous Materials</i> , 2007 , 143, 535-40	12.8	57
3	Pentachlorophenol removal from aqueous matrices by sorption with almond shell residues. <i>Journal of Hazardous Materials</i> , 2006 , 137, 1175-81	12.8	51
2	Innovation and improvement in food fortification: Microencapsulation of vitamin B2 and B3 by a spray-drying method and evaluation of the simulated release profiles. <i>Journal of Dispersion Science and Technology</i> , 1-13	1.5	1
1	Microencapsulation in Food Biotechnology by a Spray-Drying Process 593-606		2
