#	ARTICLE	IF	CITATIONS
1	Developmental differences in brain functional connectivity during social interaction in middle childhood. <i>Developmental Cognitive Neuroscience</i> , 2022, 54, 101079.	1.9	4
2	Neural similarity between mentalizing and live social interaction during the transition to adolescence. <i>Human Brain Mapping</i> , 2022, , .	1.9	2
3	Explaining Variance in Social Symptoms of Children with Autism Spectrum Disorder. <i>Journal of Autism and Developmental Disorders</i> , 2021, 51, 1249-1265.	1.7	11
4	Editorial: Social Interaction in Neuropsychiatry. <i>Frontiers in Psychiatry</i> , 2021, 12, 683158.	1.3	3
5	Effects of social and emotional context on neural activation and synchrony during movie viewing. <i>Human Brain Mapping</i> , 2021, 42, 6053-6069.	1.9	4
6	Social cognition in context: A naturalistic imaging approach. <i>NeuroImage</i> , 2020, 216, 116392.	2.1	52
7	A conceptual model of risk and protective factors associated with internalizing symptoms in autism spectrum disorder: A scoping review, synthesis, and call for more research. <i>Development and Psychopathology</i> , 2020, 32, 1254-1272.	1.4	9
8	Cortical temporal hierarchy is immature in middle childhood. <i>NeuroImage</i> , 2020, 216, 116616.	2.1	8
9	Functional near-infrared spectroscopy in toddlers: Neural differentiation of communicative cues and relation to future language abilities. <i>Developmental Science</i> , 2020, 23, e12948.	1.3	5
10	Interpersonal Synchrony in Autism. <i>Current Psychiatry Reports</i> , 2020, 22, 12.	2.1	67
11	Minimal coherence among varied theory of mind measures in childhood and adulthood. <i>Cognition</i> , 2019, 191, 103997.	1.1	79
12	Using second-person neuroscience to elucidate the mechanisms of social interaction. <i>Nature Reviews Neuroscience</i> , 2019, 20, 495-505.	4.9	420
13	An fMRI study of action observation and action execution in childhood. <i>Developmental Cognitive Neuroscience</i> , 2019, 37, 100655.	1.9	53
14	The influence of age and performance on hippocampal function and the encoding of contextual information in early childhood. <i>NeuroImage</i> , 2019, 195, 433-443.	2.1	28
15	Social and delay discounting in autism spectrum disorder. <i>Autism Research</i> , 2019, 12, 870-877.	2.1	10
16	Handling Multiplicity in Neuroimaging Through Bayesian Lenses with Multilevel Modeling. <i>Neuroinformatics</i> , 2019, 17, 515-545.	1.5	66
17	Neural correlates of developing theory of mind competence in early childhood. <i>NeuroImage</i> , 2019, 184, 707-716.	2.1	32
18	Inter-subject synchrony as an index of functional specialization in early childhood. <i>Scientific Reports</i> , 2018, 8, 2252.	1.6	35

#	ARTICLE	IF	CITATIONS
19	Developmental relations between amygdala volume and anxiety traits: Effects of informant, sex, and age. <i>Development and Psychopathology</i> , 2018, 30, 1503-1515.	1.4	23
20	Let's chat: developmental neural bases of social motivation during real-time peer interaction. <i>Developmental Science</i> , 2018, 21, e12581.	1.3	35
21	A Social-Interactive Neuroscience Approach to Understanding the Developing Brain. <i>Advances in Child Development and Behavior</i> , 2018, 54, 1-44.	0.7	33
22	Social interaction recruits mentalizing and reward systems in middle childhood. <i>Human Brain Mapping</i> , 2018, 39, 3928-3942.	1.9	41
23	Development of hippocampal functional connectivity during childhood. <i>Human Brain Mapping</i> , 2017, 38, 182-201.	1.9	57
24	Perceived communicative intent in gesture and language modulates the superior temporal sulcus. <i>Human Brain Mapping</i> , 2016, 37, 3444-3461.	1.9	37
25	Reprint of "Biological motion perception links diverse facets of theory of mind during middle childhood". <i>Journal of Experimental Child Psychology</i> , 2016, 149, 72-80.	0.7	1
26	Perceived live interaction modulates the developing social brain. <i>Social Cognitive and Affective Neuroscience</i> , 2016, 11, 1354-1362.	1.5	20
27	Hippocampal functional connectivity and episodic memory in early childhood. <i>Developmental Cognitive Neuroscience</i> , 2016, 19, 58-69.	1.9	61
28	Interaction matters: A perceived social partner alters the neural processing of human speech. <i>NeuroImage</i> , 2016, 129, 480-488.	2.1	39
29	Biological motion perception links diverse facets of theory of mind during middle childhood. <i>Journal of Experimental Child Psychology</i> , 2016, 146, 238-246.	0.7	25
30	Communicative Signals Promote Object Recognition Memory and Modulate the Right Posterior STS. <i>Journal of Cognitive Neuroscience</i> , 2016, 28, 8-19.	1.1	6
31	Developmental Differences in Relations Between Episodic Memory and Hippocampal Subregion Volume During Early Childhood. <i>Child Development</i> , 2015, 86, 1710-1718.	1.7	68
32	Tracking the Neurodevelopmental Correlates of Mental State Inference in Early Childhood. <i>Developmental Neuropsychology</i> , 2015, 40, 379-394.	1.0	7
33	Rapid neural discrimination of communicative gestures. <i>Social Cognitive and Affective Neuroscience</i> , 2015, 10, 545-551.	1.5	18
34	Spontaneous mentalizing captures variability in the cortical thickness of social brain regions. <i>Social Cognitive and Affective Neuroscience</i> , 2015, 10, 327-334.	1.5	31
35	Contributions of social and affective neuroscience to our understanding of typical and atypical development. <i>Developmental Cognitive Neuroscience</i> , 2014, 8, 1-6.	1.9	4
36	Amygdala volume linked to individual differences in mental state inference in early childhood and adulthood. <i>Developmental Cognitive Neuroscience</i> , 2014, 8, 153-163.	1.9	34

#	ARTICLE	IF	CITATIONS
37	Atypical brain activation patterns during a face-to-face joint attention game in adults with autism spectrum disorder. <i>Human Brain Mapping</i> , 2013, 34, 2511-2523.	1.9	79
38	Eye-Tracking, Autonomic, and Electrophysiological Correlates of Emotional Face Processing in Adolescents with Autism Spectrum Disorder. <i>Journal of Autism and Developmental Disorders</i> , 2013, 43, 188-199.	1.7	92
39	Interaction versus observation: A finer look at this distinction and its importance to autism. <i>Behavioral and Brain Sciences</i> , 2013, 36, 435-435.	0.4	5
40	Intrinsic functional network organization in high-functioning adolescents with autism spectrum disorder. <i>Frontiers in Human Neuroscience</i> , 2013, 7, 573.	1.0	134
41	Do You See What I See? The Neural Bases of Joint Attention. , 2013, , 216-237.		11
42	Similar Brain Activation during False Belief Tasks in a Large Sample of Adults with and without Autism. <i>PLoS ONE</i> , 2013, 8, e75468.	1.1	166
43	Look at this: the neural correlates of initiating and responding to bids for joint attention. <i>Frontiers in Human Neuroscience</i> , 2012, 6, 169.	1.0	90
44	Live face-to-face interaction during fMRI: A new tool for social cognitive neuroscience. <i>NeuroImage</i> , 2010, 50, 1639-1647.	2.1	306
45	The superior temporal sulcus performs a common function for social and speech perception: Implications for the emergence of autism. <i>Neuroscience and Biobehavioral Reviews</i> , 2008, 32, 123-142.	2.9	272
46	Functional neuroimaging of speech perception during a pivotal period in language acquisition. <i>Developmental Science</i> , 2008, 11, 237-252.	1.3	84
47	Fusiform Function in Children with an Autism Spectrum Disorder Is a Matter of "Who". <i>Biological Psychiatry</i> , 2008, 64, 552-560.	0.7	175
48	Deviant Functional Magnetic Resonance Imaging Patterns of Brain Activity to Speech in 2-3-Year-Old Children with Autism Spectrum Disorder. <i>Biological Psychiatry</i> , 2008, 64, 589-598.	0.7	201
49	Mapping Early Brain Development in Autism. <i>Neuron</i> , 2007, 56, 399-413.	3.8	685
50	fMRI during natural sleep as a method to study brain function during early childhood. <i>NeuroImage</i> , 2007, 38, 696-707.	2.1	76
51	Failing to deactivate: Resting functional abnormalities in autism. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2006, 103, 8275-8280.	3.3	549
52	Autism at the beginning: Microstructural and growth abnormalities underlying the cognitive and behavioral phenotype of autism. <i>Development and Psychopathology</i> , 2005, 17, 577-97.	1.4	167
53	When Is the Brain Enlarged in Autism? A Meta-Analysis of All Brain Size Reports. <i>Biological Psychiatry</i> , 2005, 58, 1-9.	0.7	564
54	The autistic brain: birth through adulthood. <i>Current Opinion in Neurology</i> , 2004, 17, 489-496.	1.8	194
