#	ARTICLE	IF	CITATIONS
1	Pregestational Diabetes Mellitus. , 2022, , 405-425.		0
2	Impact of Carbohydrate Counting Method during Pregnancy in Women with Pregestational Diabetes Mellitus: A Controlled Clinical Trial. Revista Brasileira De Ginecologia E Obstetricia, 2022, 44, 220-230.	0.3	2
3	Identification of Variants Responsible for Monogenic Forms of Diabetes in Brazil. Frontiers in Endocrinology, 2022, 13, 827325.	1.5	2
4	Binge eating disorder, frequency of depression, and systemic inflammatory state in individuals with obesity â€“ A cross sectional study. Archives of Endocrinology and Metabolism, 2022, , .	0.3	5
5	Bariatric Embolization in the Treatment of Patients with a Body Mass Index Between 30 and 39.9Âkg/m2 (Obesity Class I and II) and Metabolic Syndrome, a Pilot Study. CardioVascular and Interventional Radiology, 2021, 44, 598-606.	0.9	6
6	Adipose tissue-derived stromal/stem cells + cholecalciferol: a pilot study in recent-onset type 1 diabetes patients. Archives of Endocrinology and Metabolism, 2021, 65, 342-351.	0.3	10
7	PDX1-MODY: A rare missense mutation as a cause of monogenic diabetes. European Journal of Medical Genetics, 2021, 64, 104194.	0.7	8
8	Metabolic and Appetite Effects of Fructose and Glucose in Subjects with Type 1 Diabetes: A Randomized Crossover Clinical Trial. Current Diabetes Reviews, 2021, 17, e113020188536.	0.6	1
9	Ten years follow up of first degree relatives of type 1 diabetes patients: presence of autoimmune biomarkers and the progression to diabetes in a retrospective cohort. Archives of Endocrinology and Metabolism, 2021, 65, 436-442.	0.3	0
10	Diabetes and impaired fasting glucose in a population-based sample of individuals aged 75â€‰+ years: associations with cognition, major depressive disorder, functionality and quality of lifeâ€“the PietÃ study. Neurological Sciences, 2021, 42, 3663-3671.	0.9	2
11	<p>Identification of the First PAX4-MODY Family Reported in Brazil</p>. Diabetes, Metabolic Syndrome and Obesity: Targets and Therapy, 2020, Volume 13, 2623-2631.	1.1	10
12	Severity and mortality of COVID 19 in patients with diabetes, hypertension and cardiovascular disease: a meta-analysis. Diabetology and Metabolic Syndrome, 2020, 12, 75.	1.2	221
13	Impact of binge eating during pregnancy on gestational weight gain and postpartum weight retention among women with gestational diabetes mellitus: LINDAâ€Brasil. International Journal of Eating Disorders, 2020, 53, 1818-1825.	2.1	3
14	Comparison of glucose measurement on dried blood spots versus plasma samples in pregnant women with and without anemia. Archives of Endocrinology and Metabolism, 2020, 64, 454-461.	0.3	2
15	Postprandial metabolic effects of fructose and glucose in type 1 diabetes patients: a pilot randomized crossover clinical trial. Archives of Endocrinology and Metabolism, 2019, 63, 376-384.	0.3	6
16	Association between high titers of glutamic acid decarboxylase antibody and epilepsy in patients with type 1 diabetes mellitus: A cross-sectional study. Seizure: the Journal of the British Epilepsy Association, 2019, 71, 318-321.	0.9	6
17	HbA1c variability and long-term glycemic control are linked to diabetic retinopathy and glomerular filtration rate in patients with type 1 diabetes and multiethnic background. Journal of Diabetes and Its Complications, 2019, 33, 610-615.	1.2	15
18	The first case of NEUROD1â€MODY reported in Latin America. Molecular Genetics & Genomic Medicine, 2019, 7, e989.	0.6	11

#	ARTICLE	IF	CITATIONS
19	Lower Insulin-Dose Adjusted A1c (IDAA1c) Is Associated With Less Complications in Individuals With Type 1 Diabetes Treated With Hematopoietic Stem-Cell Transplantation and Conventional Therapy. <i>Frontiers in Endocrinology</i> , 2019, 10, 747.	1.5	2
20	Quantitative gingival crevicular fluid proteome in type 2 diabetes mellitus and chronic periodontitis. <i>Oral Diseases</i> , 2019, 25, 588-595.	1.5	14
21	MODY probability calculator for GCK and HNF1A screening in a multiethnic background population. <i>Archives of Endocrinology and Metabolism</i> , 2019, 64, 17-23.	0.3	7
22	Predictive factors for birth weight of newborns of mothers with gestational diabetes mellitus. <i>Diabetes Research and Clinical Practice</i> , 2018, 138, 262-270.	1.1	8
23	Does sucrose affect the glucose variability in patients with type 1 diabetes? a pilot crossover clinical study. <i>Nutrition</i> , 2018, 55-56, 179-184.	1.1	4
24	Clinical aspects of pancreatogenic diabetes secondary to hereditary pancreatitis. <i>Diabetology and Metabolic Syndrome</i> , 2017, 9, 4.	1.2	6
25	Carbohydrate Counting during Pregnancy in Women with Type 1 Diabetes: Are There Predictable Changes That We Should Know?. <i>Annals of Nutrition and Metabolism</i> , 2017, 70, 140-146.	1.0	7
26	The impact of ethnicity, educational and economic status on the prescription of insulin therapeutic regimens and on glycemic control in patients with type 1 diabetes. A nationwide study in Brazil. <i>Diabetes Research and Clinical Practice</i> , 2017, 134, 44-52.	1.1	18
27	Clinical characteristics of patients with cerebellar ataxia associated with anti-GAD antibodies. <i>Arquivos De Neuro-Psiquiatria</i> , 2017, 75, 142-146.	0.3	8
28	Gestational diabetes mellitus and type 2 diabetes: same disease in a different moment of life? Maybe not. <i>Archives of Endocrinology and Metabolism</i> , 2017, 61, 208-210.	0.3	9
29	Interventions to improve patients' compliance with therapies aimed at lowering glycated hemoglobin (HbA1c) in type 1 diabetes: systematic review and meta-analyses of randomized controlled clinical trials of psychological, telecare, and educational interventions. <i>Trials</i> , 2016, 17, 94.	0.7	52
30	Changes in lipid profile after treatment of women with gestational diabetes mellitus. <i>Journal of Clinical Lipidology</i> , 2016, 10, 350-355.	0.6	5
31	Clinical features of diabetes mellitus in hereditary pancreatitis. <i>Diabetology and Metabolic Syndrome</i> , 2015, 7, .	1.2	0
32	The impact of sustained hyperglycemia, metabolic memory and hba1c variability in the development of chronic complications in patients with type 1 diabetes. <i>Diabetology and Metabolic Syndrome</i> , 2015, 7, .	1.2	0
33	Comparative study of perinatal outcomes between pregnant women with gestational diabetes mellitus diagnosed by the new IADPSG and the old ADA criteria. <i>Diabetology and Metabolic Syndrome</i> , 2015, 7, .	1.2	1
34	High normal TSH is associated with retinopathy and increased albumin excretion in euthyroid type 1 diabetic patients. <i>Diabetology and Metabolic Syndrome</i> , 2015, 7, .	1.2	0
35	Thyroid disorders are common in first-degree relatives of individuals with type 1 diabetes mellitus. <i>Archives of Endocrinology and Metabolism</i> , 2015, 59, 112-115.	0.3	5
36	Association between type 1 diabetes mellitus and epilepsy: more than coincidence?. <i>Diabetology and Metabolic Syndrome</i> , 2015, 7, .	1.2	0

#	ARTICLE	IF	CITATIONS
37	Type 1 diabetes associated with other autoimmune diseases: is there any association with glycemic control and microvascular complications?. <i>Diabetology and Metabolic Syndrome</i> , 2015, 7, .	1.2	0
38	Relationship between adherence to diet, glycemic control and cardiovascular risk factors in patients with type 1 diabetes: a nationwide survey in Brazil. <i>Nutrition Journal</i> , 2014, 13, 19.	1.5	37
39	Precocious markers of cardiovascular risk and vascular damage in apparently healthy women with previous gestational diabetes. <i>Diabetology and Metabolic Syndrome</i> , 2014, 6, 63.	1.2	12
40	Impact of advanced and basic carbohydrate counting methods on metabolic control in patients with type 1 diabetes. <i>Nutrition</i> , 2014, 30, 286-290.	1.1	19
41	Safety and Effectiveness of Bolus Insulin Aspart in People with Type 2 Diabetes: A1chieve Sub-Analysis. <i>Diabetes Therapy</i> , 2013, 4, 153-166.	1.2	5
42	Does sucrose intake affect antropometric variables, glycemia, lipemia and C-reactive protein in subjects with type 1 diabetes?: a controlled-trial. <i>Diabetology and Metabolic Syndrome</i> , 2013, 5, 67.	1.2	16
43	Body composition study by dual-energy x-ray absorptiometry in familial partial lipodystrophy: finding new tools for an objective evaluation. <i>Diabetology and Metabolic Syndrome</i> , 2012, 4, 40.	1.2	19
44	Regional differences in clinical care among patients with type 1 diabetes in Brazil: Brazilian Type 1 Diabetes Study Group. <i>Diabetology and Metabolic Syndrome</i> , 2012, 4, 44.	1.2	29
45	Self-monitoring of blood glucose during pregnancy: indications and limitations. <i>Diabetology and Metabolic Syndrome</i> , 2012, 4, 54.	1.2	14
46	Assessment of arterial stiffness in women with gestational diabetes. <i>Diabetic Medicine</i> , 2012, 29, 227-231.	1.2	11
47	Effects of pregnancy on the onset and progression of diabetic nephropathy and of diabetic nephropathy on pregnancy outcomes. <i>Diabetes and Metabolic Syndrome: Clinical Research and Reviews</i> , 2011, 5, 137-142.	1.8	29
48	Low triglyceride levels are associated with a better metabolic control in patients with type 1 diabetes. <i>Diabetology and Metabolic Syndrome</i> , 2011, 3, 22.	1.2	7
49	Comparison of Body Composition Study by Dual-Energy X-Ray Absorptiometry (DEXA) in Familial Partial Lipodystrophies and Control Subjects. , 2011, , P1-457-P1-457.		0
50	Dysglycemias in pregnancy: from diagnosis to treatment. Brazilian consensus statement. <i>Diabetology and Metabolic Syndrome</i> , 2010, 2, 27.	1.2	19
51	Ethnicity and young age influence the frequency of diabetic ketoacidosis at the onset of type 1 diabetes. <i>Diabetes Research and Clinical Practice</i> , 2007, 78, 259-262.	1.1	42
52	Can we simplify the 100-g oral glucose tolerance test in pregnancy?. <i>Diabetes Research and Clinical Practice</i> , 2006, 71, 247-250.	1.1	6
53	Characteristics of childhood and adult-onset type 1 diabetes in a multi-ethnic population. <i>Diabetes Research and Clinical Practice</i> , 2005, 69, 22-28.	1.1	11
54	Correlation between autoantibodies to GAD (glutamic acid decarboxylase) and pancreatic β -cell function in young diabetics adults in HUCFF-UFRJ, Rio De Janeiro, Brazil. <i>Diabetes Research and Clinical Practice</i> , 2000, 50, 93-94.	1.1	0
