#	ARTICLE	IF	CITATIONS
1	The investigation of geochemical and geomechanical properties in surface paste disposal by pilot-scale tests. International Journal of Mining, Reclamation and Environment, 2022, 36, 537-551.	2.8	13
2	Effects of pozzolanic materials in surface paste disposal by pilot-scale tests: observation of physical changes. International Journal of Environmental Science and Technology, 2021, 18, 949-964.	3.5	26
3	The study of permeability changes of a gob structure in an underground coal mine to prevent spontaneous combustion. International Journal of Mining, Reclamation and Environment, 2021, 35, 693-708.	2.8	3
4	Optimisation of pre-blending process for raw materials in quarrying. International Journal of Mining, Reclamation and Environment, 2020, 34, 519-530.	2.8	3
5	The investigation of effect of particle size distribution on flow behavior of paste tailings. Journal of Environmental Management, 2019, 243, 393-401.	7.8	24
6	The effects of cement on some physical and chemical behavior for surface paste disposal method. Journal of Environmental Management, 2019, 231, 33-40.	7.8	14
7	An investigation of crack formation in surface paste disposal method for pyritic Pb-Zn tailings. International Journal of Environmental Science and Technology, 2018, 15, 281-288.	3.5	9
8	The investigation of Co2 emissions for different rock units in the production of aggregate. Environmental Earth Sciences, 2017, 76, 1.	2.7	7
9	Field Properties and Performance of Surface Paste Disposal. , 2017, , 145-176.		4
10	Study of the optimal aggregate blending model for quarries. Environmental Earth Sciences, 2016, 75, 1.	2.7	4
11	The analysis of ground vibrations induced by bench blasting at Akyol quarry and practical blasting charts. Environmental Geology, 2008, 54, 737-743.	1.2	40
