#	Article	IF	CITATIONS
1	Reduced default mode network functional connectivity in patients with recurrent major depressive disorder. Proceedings of the National Academy of Sciences of the United States of America, 2019, 116, 9078-9083.	7.1	441
2	Multivariate classification of social anxiety disorder using whole brain functional connectivity. Brain Structure and Function, 2015, 220, 101-115.	2.3	321
3	Abnormal amplitude low-frequency oscillations in medication-naive, first-episode patients with major depressive disorder: A resting-state fMRI study. Journal of Affective Disorders, 2013, 146, 401-406.	4.1	231
4	Mental Health of Pregnant and Postpartum Women During the Coronavirus Disease 2019 Pandemic: A Systematic Review and Meta-Analysis. Frontiers in Psychology, 2020, 11, 617001.	2.1	164
5	Abnormal resting-state cerebellar–cerebral functional connectivity in treatment-resistant depression and treatment sensitive depression. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2013, 44, 51-57.	4.8	160
6	Abnormal regional spontaneous neural activity in first-episode, treatment-naive patients with late-life depression: A resting-state fMRI study. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2012, 39, 326-331.	4.8	155
7	Alterations of the amplitude of low-frequency fluctuations in treatment-resistant and treatment-response depression: A resting-state fMRI study. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2012, 37, 153-160.	4.8	148
8	Abnormal neural activities in first-episode, treatment-naïve, short-illness-duration, and treatment-response patients with major depressive disorder: A resting-state fMRI study. Journal of Affective Disorders, 2011, 135, 326-331.	4.1	127
9	Disrupted cortical hubs in functional brain networks in social anxiety disorder. Clinical Neurophysiology, 2015, 126, 1711-1716.	1.5	126
10	Emotional Roles of Mono-Aminergic Neurotransmitters in Major Depressive Disorder and Anxiety Disorders. Frontiers in Psychology, 2018, 9, 2201.	2.1	126
11	Classification of Different Therapeutic Responses of Major Depressive Disorder with Multivariate Pattern Analysis Method Based on Structural MR Scans. PLoS ONE, 2012, 7, e40968.	2.5	125
12	Decreased interhemispheric resting-state functional connectivity in first-episode, drug-naive major depressive disorder. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2013, 41, 24-29.	4.8	121
13	Disrupted regional homogeneity in treatment-resistant depression: A resting-state fMRI study. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2011, 35, 1297-1302.	4.8	110
14	Clinical Characteristics of Children With COVID-19: A Meta-Analysis. Frontiers in Pediatrics, 2020, 8, 431.	1.9	108
15	Abnormal neural activity of brain regions in treatment-resistant and treatment-sensitive major depressive disorder: A resting-state fMRI study. Journal of Psychiatric Research, 2012, 46, 1366-1373.	3.1	96
16	Abnormal default-mode network homogeneity in first-episode, drug-naive schizophrenia at rest. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2014, 49, 16-20.	4.8	94
17	Right lateralized white matter abnormalities in first-episode, drug-naive paranoid schizophrenia. Neuroscience Letters, 2012, 531, 5-9.	2.1	85
18	Is there a cerebellar compensatory effort in first-episode, treatment-naive major depressive disorder at rest?. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2013, 46, 13-18.	4.8	82

#	Article	IF	CITATIONS
19	Disrupted intrinsic functional brain topology in patients with major depressive disorder. Molecular Psychiatry, 2021, 26, 7363-7371.	7.9	82
20	Early and late onset, first-episode, treatment-naive depression: same clinical symptoms, different regional neural activities. Journal of Affective Disorders, 2012, 143, 56-63.	4.1	80
21	Abnormal regional homogeneity as a potential imaging biomarker for adolescent-onset schizophrenia: A resting-state fMRI study and support vector machine analysis. Schizophrenia Research, 2018, 192, 179-184.	2.0	80
22	Altered white matter integrity in young adults with first-episode, treatment-naive, and treatment-responsive depression. Neuroscience Letters, 2012, 522, 139-144.	2.1	78
23	Decreased resting-state interhemispheric coordination in first-episode, drug-naive paranoid schizophrenia. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2014, 48, 14-19.	4.8	76
24	Altered resting-state dynamic functional brain networks in major depressive disorder: Findings from the REST-meta-MDD consortium. NeuroImage: Clinical, 2020, 26, 102163.	2.7	76
25	Abnormal Default-Mode Network Homogeneity in First-Episode, Drug-Naive Major Depressive Disorder. PLoS ONE, 2014, 9, e91102.	2.5	72
26	Altered white matter integrity of forebrain in treatment-resistant depression: A diffusion tensor imaging study with tract-based spatial statistics. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2012, 38, 201-206.	4.8	71
27	Abnormal Causal Connectivity by Structural Deficits in First-Episode, Drug-Naive Schizophrenia at Rest. Schizophrenia Bulletin, 2015, 41, 57-65.	4.3	71
28	Decreased Interhemispheric Coordination in Treatment-Resistant Depression: A Resting-State fMRI Study. PLoS ONE, 2013, 8, e71368.	2.5	68
29	Decreased insular connectivity in drug-naive major depressive disorder at rest. Journal of Affective Disorders, 2015, 179, 31-37.	4.1	65
30	Functional and anatomical brain deficits in drug-naive major depressive disorder. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2014, 54, 1-6.	4.8	61
31	Increased functional connectivity strength of right inferior temporal gyrus in first-episode, drug-naive somatization disorder. Australian and New Zealand Journal of Psychiatry, 2015, 49, 74-81.	2.3	59
32	Reversal alterations of amplitude of low-frequency fluctuations in early and late onset, first-episode, drug-naive depression. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2013, 40, 153-159.	4.8	58
33	Abnormal long- and short-range functional connectivity in adolescent-onset schizophrenia patients: A resting-state fMRI study. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2018, 81, 445-451.	4.8	55
34	Increased Cerebellar-Default-Mode-Network Connectivity in Drug-Naive Major Depressive Disorder at Rest. Medicine (United States), 2015, 94, e560.	1.0	54
35	Abnormal neural activity as a potential biomarker for drug-naive first-episode adolescent-onset schizophrenia with coherence regional homogeneity and support vector machine analyses. Schizophrenia Research, 2018, 192, 408-415.	2.0	52
36	Biotypes of major depressive disorder: Neuroimaging evidence from resting-state default mode network patterns. Neurolmage: Clinical, 2020, 28, 102514.	2.7	51

#	Article	IF	CITATIONS
37	Decreased resting-state interhemispheric functional connectivity in unaffected siblings of schizophrenia patients. Schizophrenia Research, 2014, 152, 170-175.	2.0	50
38	Dissociation of regional activity in the default mode network in first-episode, drug-naive major depressive disorder at rest. Journal of Affective Disorders, 2013, 151, 1097-1101.	4.1	49
39	Brain structural abnormalities as potential markers for detecting individuals with ultra-high risk for psychosis: A systematic review and meta-analysis. Schizophrenia Research, 2019, 209, 22-31.	2.0	49
40	Increased Cerebellar Functional Connectivity With the Default-Mode Network in Unaffected Siblings of Schizophrenia Patients at Rest. Schizophrenia Bulletin, 2015, 41, 1317-1325.	4.3	48
41	Increased short-range and long-range functional connectivity in first-episode, medication-naive schizophrenia at rest. Schizophrenia Research, 2015, 166, 144-150.	2.0	48
42	Patients with first-episode, drug-naive schizophrenia and subjects at ultra-high risk of psychosis shared increased cerebellar-default mode network connectivity at rest. Scientific Reports, 2016, 6, 26124.	3.3	46
43	Cerebellar structural and functional abnormalities in first-episode and drug-naive patients with schizophrenia: A meta-analysis. Psychiatry Research - Neuroimaging, 2019, 283, 24-33.	1.8	46
44	Dissociation of Regional Activity in Default Mode Network in Medication-Naive, First-Episode Somatization Disorder. PLoS ONE, 2014, 9, e99273.	2.5	45
45	Resting-state cerebellar-cerebral networks are differently affected in first-episode, drug-naive schizophrenia patients and unaffected siblings. Scientific Reports, 2015, 5, 17275.	3.3	45
46	Decreased gray matter volume in the left middle temporal gyrus as a candidate biomarker for schizophrenia: A study of drug naive, first-episode schizophrenia patients and unaffected siblings. Schizophrenia Research, 2014, 159, 43-50.	2.0	43
47	Decreased Resting-State Interhemispheric Functional Connectivity Correlated with Neurocognitive Deficits in Drug-Naive First-Episode Adolescent-Onset Schizophrenia. International Journal of Neuropsychopharmacology, 2018, 21, 33-41.	2.1	43
48	Dysfunction in Serotonergic and Noradrenergic Systems and Somatic Symptoms in Psychiatric Disorders. Frontiers in Psychiatry, 2019, 10, 286.	2.6	43
49	Hyperactivity of the default-mode network in first-episode, drug-naive schizophrenia at rest revealed by family-based case–control and traditional case–control designs. Medicine (United States), 2017, 96, e6223.	1.0	40
50	Decreased interhemispheric functional connectivity in insula and angular gyrus/supramarginal gyrus: Significant findings in first-episode, drug-naive somatization disorder. Psychiatry Research - Neuroimaging, 2016, 248, 48-54.	1.8	37
51	Olanzapine modulation of long- and short-range functional connectivity in the resting brain in a sample of patients with schizophrenia. European Neuropsychopharmacology, 2017, 27, 48-58.	0.7	37
52	Shared and distinct homotopic connectivity changes in melancholic and non-melancholic depression. Journal of Affective Disorders, 2021, 287, 268-275.	4.1	37
53	Decreased regional activity and network homogeneity of the fronto-limbic network at rest in drug-naive major depressive disorder. Australian and New Zealand Journal of Psychiatry, 2015, 49, 550-556.	2.3	34
54	Disrupted asymmetry of inter- and intra-hemispheric functional connectivity in patients with drug-naive, first-episode schizophrenia and their unaffected siblings. EBioMedicine, 2018, 36, 429-435.	6.1	32

#	Article	IF	CITATIONS
55	Decreased regional activity of default-mode network in unaffected siblings of schizophrenia patients at rest. European Neuropsychopharmacology, 2014, 24, 545-552.	0.7	31
56	Unidirectionally affected causal connectivity of cortico-limbic-cerebellar circuit by structural deficits in drug-naive major depressive disorder. Journal of Affective Disorders, 2015, 172, 410-416.	4.1	31
57	Dysfunctional resting-state connectivities of brain regions with structural deficits in drug-naive first-episode schizophrenia adolescents. Schizophrenia Research, 2015, 168, 353-359.	2.0	31
58	Abnormal default-mode network homogeneity and its correlations with personality in drug-naive somatization disorder at rest. Journal of Affective Disorders, 2016, 193, 81-88.	4.1	31
59	Treatment effects of olanzapine on homotopic connectivity in drug-free schizophrenia at rest. World Journal of Biological Psychiatry, 2018, 19, S106-S114.	2.6	31
60	A Selective Review of the Excitatory-Inhibitory Imbalance in Schizophrenia: Underlying Biology, Genetics, Microcircuits, and Symptoms. Frontiers in Cell and Developmental Biology, 2021, 9, 664535.	3.7	30
61	Cerebellar abnormalities in first-episode, drug-naive schizophrenia at rest. Psychiatry Research - Neuroimaging, 2018, 276, 73-79.	1.8	29
62	Alterations of Interhemispheric Functional Connectivity and Degree Centrality in Cervical Dystonia: A Resting-State fMRI Study. Neural Plasticity, 2019, 2019, 1-11.	2.2	29
63	Enhanced Global-Brain Functional Connectivity in the Left Superior Frontal Gyrus as a Possible Endophenotype for Schizophrenia. Frontiers in Neuroscience, 2019, 13, 145.	2.8	29
64	Abnormal regional homogeneity and its correlations with personality in first-episode, treatment-naive somatization disorder. International Journal of Psychophysiology, 2015, 97, 108-112.	1.0	28
65	Dissociation of functional and anatomical brain abnormalities in unaffected siblings of schizophrenia patients. Clinical Neurophysiology, 2015, 126, 927-932.	1.5	28
66	Altered Serum Tumor Necrosis Factor and Interleukin-1Î <sup>2</sup> in First-Episode Drug-Naive and Chronic Schizophrenia. Frontiers in Neuroscience, 2018, 12, 296.	2.8	28
67	Altered network homogeneity of the default-mode network in drug-naive obsessiveâ^'compulsive disorder. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2019, 93, 77-83.	4.8	28
68	Altered Global Brain Functional Connectivity in Drug-Naive Patients With Obsessive-Compulsive Disorder. Frontiers in Psychiatry, 2020, 11, 98.	2.6	28
69	Disrupted white matter integrity in first-episode, drug-naive, late-onset depression. Journal of Affective Disorders, 2014, 163, 70-75.	4.1	26
70	Aberrant default mode network homogeneity in patients with first-episode treatment-naive melancholic depression. International Journal of Psychophysiology, 2017, 112, 46-51.	1.0	26
71	Regional white matter abnormalities in drug-naive, first-episode schizophrenia patients and their healthy unaffected siblings. Australian and New Zealand Journal of Psychiatry, 2015, 49, 246-254.	2.3	25
72	Abnormal regional homogeneity as potential imaging biomarker for psychosis risk syndrome: a resting-state fMRI study and support vector machine analysis. Scientific Reports, 2016, 6, 27619.	3.3	25

#	Article	IF	CITATIONS
73	Abnormal functional connectivity strength in patients with adolescent-onset schizophrenia: a resting-state fMRI study. European Child and Adolescent Psychiatry, 2017, 26, 839-845.	4.7	25
74	Voxelâ€wise brainâ€wide functional connectivity abnormalities in firstâ€episode, drugâ€naive patients with major depressive disorder. American Journal of Medical Genetics Part B: Neuropsychiatric Genetics, 2018, 177, 447-453.	1.7	25
75	Enhanced baseline activity in the left ventromedial putamen predicts individual treatment response in drug-naive, first-episode schizophrenia: Results from two independent study samples. EBioMedicine, 2019, 46, 248-255.	6.1	24
76	Functional asymmetry of thalamocortical networks in subjects at ultra-high risk for psychosis and first-episode schizophrenia. European Neuropsychopharmacology, 2019, 29, 519-528.	0.7	24
77	Reduced connectivity in anterior cingulate cortex as an early predictor for treatment response in drug-naive, first-episode schizophrenia: A global-brain functional connectivity analysis. Schizophrenia Research, 2020, 215, 337-343.	2.0	24
78	Decreased default-mode network homogeneity in unaffected siblings of schizophrenia patients at rest. Psychiatry Research - Neuroimaging, 2014, 224, 218-224.	1.8	23
79	Decreased interhemispheric coordination in the posterior default-mode network and visual regions as trait alterations in first-episode, drug-naive major depressive disorder. Brain Imaging and Behavior, 2018, 12, 1251-1258.	2.1	23
80	Disrupted hemispheric connectivity specialization in patients with major depressive disorder: Evidence from the REST-meta-MDD Project. Journal of Affective Disorders, 2021, 284, 217-228.	4.1	23
81	Clinical significance of increased cerebellar default-mode network connectivity in resting-state patients with drug-naive somatization disorder. Medicine (United States), 2016, 95, e4043.	1.0	22
82	Family-based case-control study of homotopic connectivity in first-episode, drug-naive schizophrenia at rest. Scientific Reports, 2017, 7, 43312.	3.3	22
83	Relationship between long-term use of a typical antipsychotic medication by Chinese schizophrenia patients and the bone turnover markers serum osteocalcin and β-CrossLaps. Schizophrenia Research, 2016, 176, 259-263.	2.0	21
84	Decreased long- and short-range functional connectivity at rest in drug-naive major depressive disorder. Australian and New Zealand Journal of Psychiatry, 2016, 50, 763-769.	2.3	21
85	Olanzapine modulates the default-mode network homogeneity in recurrent drug-free schizophrenia at rest. Australian and New Zealand Journal of Psychiatry, 2017, 51, 1000-1009.	2.3	21
86	Altered functional connectivity strength and its correlations with cognitive function in subjects with ultraâ€high risk for psychosis at rest. CNS Neuroscience and Therapeutics, 2018, 24, 1140-1148.	3.9	21
87	Voxel-Mirrored Homotopic Connectivity of Resting-State Functional Magnetic Resonance Imaging in Blepharospasm. Frontiers in Psychology, 2018, 9, 1620.	2.1	21
88	Reduced Brain Activity in the Right Putamen as an Early Predictor for Treatment Response in Drug-Naive, First-Episode Schizophrenia. Frontiers in Psychiatry, 2019, 10, 741.	2.6	20
89	Cognitive deficits in subjects at risk for psychosis, first-episode and chronic schizophrenia patients. Psychiatry Research, 2019, 274, 235-242.	3.3	20
90	Voxel-based global-brain functional connectivity alterations in first-episode drug-naive patients with somatization disorder. Journal of Affective Disorders, 2019, 254, 82-89.	4.1	20

#	Article	IF	CITATIONS
91	Reduced nucleus accumbens functional connectivity in reward network and default mode network in patients with recurrent major depressive disorder. Translational Psychiatry, 2022, 12, .	4.8	20
92	Increased anterior default-mode network homogeneity in first-episode, drug-naive major depressive disorder: A replication study. Journal of Affective Disorders, 2018, 225, 767-772.	4.1	19
93	Disrupted Regional Homogeneity in Melancholic and Non-melancholic Major Depressive Disorder at Rest. Frontiers in Psychiatry, 2021, 12, 618805.	2.6	19
94	Associations Between Internet Addiction and Gender, Anxiety, Coping Styles and Acceptance in University Freshmen in South China. Frontiers in Psychiatry, 2021, 12, 558080.	2.6	19
95	Using short-range and long-range functional connectivity to identify schizophrenia with a family-based case-control design. Psychiatry Research - Neuroimaging, 2017, 264, 60-67.	1.8	18
96	Reduced Global-Brain Functional Connectivity and Its Relationship With Symptomatic Severity in Cervical Dystonia. Frontiers in Neurology, 2019, 10, 1358.	2.4	18
97	Brain structural alterations in MDD patients with gastrointestinal symptoms: Evidence from the REST-meta-MDD project. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2021, 111, 110386.	4.8	18
98	Abnormal spontaneous neural activity as a potential predictor of early treatment response in patients with obsessive–compulsive disorder. Journal of Affective Disorders, 2022, 309, 27-36.	4.1	18
99	Alterations in white matter integrity in first-episode, treatment-naive patients with somatization disorder. Neuroscience Letters, 2015, 599, 102-108.	2.1	17
100	Abnormal default-mode network homogeneity and its correlations with neurocognitive deficits in drug-naive first-episode adolescent-onset schizophrenia. Schizophrenia Research, 2020, 215, 140-147.	2.0	17
101	Decreased Resting-State Interhemispheric Functional Connectivity in Medication-Free Obsessive-Compulsive Disorder. Frontiers in Psychiatry, 2020, 11, 559729.	2.6	17
102	Reduced erythrocyte membrane polyunsaturated fatty acid levels indicate diminished treatment response in patients with multi- versus first-episode schizophrenia. NPJ Schizophrenia, 2022, 8, 7.	3.6	17
103	Bidirectional Causal Connectivity in the Cortico-Limbic-Cerebellar Circuit Related to Structural Alterations in First-Episode, Drug-Naive Somatization Disorder. Frontiers in Psychiatry, 2018, 9, 162.	2.6	16
104	Increased frontal gray matter volume in individuals with prodromal psychosis. CNS Neuroscience and Therapeutics, 2019, 25, 987-994.	3.9	16
105	Preliminary Clinical Investigation of Combinatorial Pharmacogenomic Testing for the Optimized Treatment of Depression: A Randomized Single-Blind Study. Frontiers in Neuroscience, 2019, 13, 960.	2.8	15
106	Suicidality in patients with premenstrual dysphoric disorder–A systematic review and meta-analysis. Journal of Affective Disorders, 2021, 295, 339-346.	4.1	15
107	Abnormal spontaneous neural activity of brain regions in patients with primary blepharospasm at rest. Journal of the Neurological Sciences, 2019, 403, 44-49.	0.6	14
108	Reduced regional homogeneity and neurocognitive impairment in patients with moderate-to-severe obstructive sleep apnea. Sleep Medicine, 2020, 75, 418-427.	1.6	14

#	Article	IF	CITATIONS
109	Abnormal Default-Mode Network Homogeneity in Melancholic and Nonmelancholic Major Depressive Disorder at Rest. Neural Plasticity, 2021, 2021, 1-12.	2.2	14
110	Disrupted Regional Homogeneity in Drug-Naive Patients With Bipolar Disorder. Frontiers in Psychiatry, 2020, 11, 825.	2.6	13
111	Disrupted Regional Homogeneity in Major Depressive Disorder With Gastrointestinal Symptoms at Rest. Frontiers in Psychiatry, 2021, 12, 636820.	2.6	13
112	Increased coherence-based regional homogeneity in resting-state patients with first-episode, drug-naive somatization disorder. Journal of Affective Disorders, 2018, 235, 150-154.	4.1	12
113	Increased Causal Connectivity Related to Anatomical Alterations as Potential Endophenotypes for Schizophrenia. Medicine (United States), 2015, 94, e1493.	1.0	11
114	Anatomical distance affects cortical-subcortical connectivity in first-episode, drug-naive somatization disorder. Journal of Affective Disorders, 2017, 217, 153-158.	4.1	11
115	Increased regional homogeneity modulated by metacognitive training predicts therapeutic efficacy in patients with schizophrenia. European Archives of Psychiatry and Clinical Neuroscience, 2021, 271, 783-798.	3.2	11
116	Efficacy of Treatments Targeting Hypothalamic-Pituitary-Adrenal Systems for Major Depressive Disorder: A Meta-Analysis. Frontiers in Pharmacology, 2021, 12, 732157.	3.5	11
117	Dissociation of anatomical and functional alterations of the default-mode network in first-episode, drug-naive schizophrenia. Clinical Neurophysiology, 2015, 126, 2276-2281.	1.5	10
118	Decreased white matter FA values in the left inferior frontal gyrus is a possible intermediate phenotype of schizophrenia: evidences from a novel group strategy. European Archives of Psychiatry and Clinical Neuroscience, 2018, 268, 89-98.	3.2	10
119	Editorial: Brain and Somatization Symptoms in Psychiatric Disorders. Frontiers in Psychiatry, 2019, 10, 146.	2.6	10
120	Voxel-Wise Brain-Wide Functional Connectivity Abnormalities in Patients with Primary Blepharospasm at Rest. Neural Plasticity, 2021, 2021, 1-9.	2.2	10
121	Increased Nucleus Accumbens Connectivity in Resting-State Patients With Drug-Naive, First-Episode Somatization Disorder. Frontiers in Psychiatry, 2019, 10, 585.	2.6	9
122	Resting-state functional hypoconnectivity of amygdala in clinical high risk state and first-episode schizophrenia. Brain Imaging and Behavior, 2020, 14, 1840-1849.	2.1	9
123	Increased cerebellar–default-mode network connectivity at rest in obsessive–compulsive disorder. European Archives of Psychiatry and Clinical Neuroscience, 2020, 270, 1015-1024.	3.2	9
124	Abnormal Spontaneous Brain Activities of Limbic-Cortical Circuits in Patients With Dry Eye Disease. Frontiers in Human Neuroscience, 2020, 14, 574758.	2.0	9
125	Metacognitive Training Modulates Default-Mode Network Homogeneity During 8-Week Olanzapine Treatment in Patients With Schizophrenia. Frontiers in Psychiatry, 2020, 11, 234.	2.6	9
126	Adverse Psychological Reactions and Psychological Aids for Medical Staff During the COVID-19 Outbreak in China. Frontiers in Psychiatry, 2021, 12, 580067.	2.6	9

#	Article	IF	CITATIONS
127	Reduced Global-Brain Functional Connectivity of the Cerebello-Thalamo-Cortical Network in Patients With Dry Eye Disease. Frontiers in Human Neuroscience, 2020, 14, 572693.	2.0	8
128	Increased Homotopic Connectivity in the Prefrontal Cortex Modulated by Olanzapine Predicts Therapeutic Efficacy in Patients with Schizophrenia. Neural Plasticity, 2021, 2021, 1-11.	2.2	8
129	Impaired robust interhemispheric function integration of depressive brain from RESTâ€metaâ€MDD database in China. Bipolar Disorders, 2022, 24, 400-411.	1.9	8
130	Altered Fractional Amplitude of Low-Frequency Fluctuation in Major Depressive Disorder and Bipolar Disorder. Frontiers in Psychiatry, 2021, 12, 739210.	2.6	8
131	Abnormal interhemispheric homotopic functional connectivity is correlated with gastrointestinal symptoms in patients with major depressive disorder. Journal of Psychiatric Research, 2021, 144, 234-240.	3.1	8
132	Regionâ€specific insular volumetric decreases in drugâ€naive, firstâ€episode schizophrenia and their unaffected siblings. American Journal of Medical Genetics Part B: Neuropsychiatric Genetics, 2020, 183, 106-112.	1.7	7
133	Abnormal global-brain functional connectivity and its relationship with cognitive deficits in drug-naive first-episode adolescent-onset schizophrenia. Brain Imaging and Behavior, 2022, , 1.	2.1	7
134	Regional white matter volume abnormalities in first-episode somatization disorder. International Journal of Psychophysiology, 2018, 133, 12-16.	1.0	6
135	Abnormal Functional Asymmetry in the Salience and Auditory Networks in First-episode, Drug-naive Somatization Disorder. Neuroscience, 2020, 444, 1-8.	2.3	6
136	Less reduced gray matter volume in the subregions of superior temporal gyrus predicts better treatment efficacy in drug-naive, first-episode schizophrenia. Brain Imaging and Behavior, 2021, 15, 1997-2004.	2.1	6
