#	ARTICLE	IF	CITATIONS
1	Preliminary study of genome-wide association identifies novel susceptibility genes for serum mineral elements in the Chinese Han population. <i>Biological Trace Element Research</i> , 2022, 200, 2549-2555.	1.9	7
2	C5orf66 rs4976270/rs639933 Are Associated with Colorectal Cancer Risk in Southern Chinese Han Population: A Case-Control Study. <i>Digestion</i> , 2022, 103, 103-115.	1.2	1
3	Nicotine promotes chronic obstructive pulmonary disease via inducing pyroptosis activation in bronchial epithelial cells. <i>Molecular Medicine Reports</i> , 2022, 25, .	1.1	12
4	Genome-wide association study of serum tumor markers in Southern Chinese Han population. <i>BMC Cancer</i> , 2022, 22, 160.	1.1	2
5	Missense Variant rs28362680 in BTNL2 Reduces Risk of Coronary Heart Disease. <i>Pharmacogenomics and Personalized Medicine</i> , 2022, Volume 15, 449-464.	0.4	0
6	lncRNA GAS5 promotes pyroptosis in COPD by functioning as a ceRNA to regulate the miRâ€²223â€³p/NLRP3 axis. <i>Molecular Medicine Reports</i> , 2022, 26, .	1.1	16
7	The polymorphisms of FGFR2 and MGAT5 affect the susceptibility to COPD in the Chinese people. <i>BMC Pulmonary Medicine</i> , 2021, 21, 129.	0.8	5
8	LINC01414/LINC00824 genetic polymorphisms in association with the susceptibility of chronic obstructive pulmonary disease. <i>BMC Pulmonary Medicine</i> , 2021, 21, 213.	0.8	2
9	CTNNA3 genetic polymorphism may be a new genetic signal of type 2 diabetes in the Chinese Han population: a case control study. <i>BMC Medical Genomics</i> , 2021, 14, 257.	0.7	5
10	Influence of the CYP2J2 Gene Polymorphisms on Chronic Obstructive Pulmonary Disease Risk in the Chinese Han Population. <i>Archivos De Bronconeumologia</i> , 2020, 56, 697-703.	0.4	1
11	The effect of CYP3A4 genetic variants on the susceptibility to chronic obstructive pulmonary disease in the Hainan Han population. <i>Genomics</i> , 2020, 112, 4399-4405.	1.3	2
12	<i>CYP24A1</i> rs1570669 Variant Has a Protective Effect against Tumors of the Urinary System. <i>Public Health Genomics</i> , 2020, 23, 200-209.	0.6	0
13	Spectrum of gene mutations identified by targeted nextâ€²generation sequencing in Chinese leukemia patients. <i>Molecular Genetics & Genomic Medicine</i> , 2020, 8, e1369.	0.6	9
14	The correlation between CYP4F2 variants and chronic obstructive pulmonary disease risk in Hainan Han population. <i>Respiratory Research</i> , 2020, 21, 86.	1.4	4
15	TERT gene polymorphisms are associated with chronic obstructive pulmonary disease risk in the Chinese Li population. <i>Molecular Genetics & Genomic Medicine</i> , 2019, 7, e773.	0.6	8
16	<p>CYP2B6 genetic polymorphisms influence chronic obstructive pulmonary disease susceptibility in the Hainan population</p>. <i>International Journal of COPD</i> , 2019, Volume 14, 2103-2115.	0.9	9
17	Association between ILâ€²4 tagging single nucleotide polymorphisms and the risk of lung cancer in China. <i>Molecular Genetics & Genomic Medicine</i> , 2019, 7, e00585.	0.6	12
18	MicroRNAâ€²186 is associated with hypoxiaâ€²inducible factorâ€²1â€² expression in chronic obstructive pulmonary disease. <i>Molecular Genetics & Genomic Medicine</i> , 2019, 7, e531.	0.6	16

#	ARTICLE	IF	CITATIONS
19	Telomere length, <i>ZNF208</i> genetic variants and risk of chronic obstructive pulmonary disease in the Hainan Li population. <i>Journal of Gene Medicine</i> , 2018, 20, e3061.	1.4	4
20	microRNA-22 can regulate expression of the long non-coding RNA MEG3 in acute myeloid leukemia. <i>Oncotarget</i> , 2017, 8, 65211-65217.	0.8	22
21	TET2 and MEG3 promoter methylation is associated with acute myeloid leukemia in a Hainan population. <i>Oncotarget</i> , 2017, 8, 18337-18347.	0.8	28
22	Variants in multiple genes polymorphism association analysis of COPD in the Chinese Li population. <i>International Journal of COPD</i> , 2015, 10, 1455.	0.9	20
