#	ARTICLE	IF	CITATIONS
1	Lower interaural coherence in off-signal bands impairs binaural detection. <i>Journal of the Acoustical Society of America</i> , 2022, 151, 3927-3936.	0.5	4
2	Towards a simplified and generalized monaural and binaural auditory model for psychoacoustics and speech intelligibility. <i>Acta Acustica</i> , 2022, 6, 23.	0.4	1
3	The role of early and late reflections on perception of source orientation. <i>Journal of the Acoustical Society of America</i> , 2021, 149, 2255-2269.	0.5	6
4	Toward an Individual Binaural Loudness Model for Hearing Aid Fitting and Development. <i>Frontiers in Psychology</i> , 2021, 12, 634943.	1.1	1
5	Instrumental Quality Predictions and Analysis of Auditory Cues for Algorithms in Modern Headphone Technology. <i>Trends in Hearing</i> , 2021, 25, 233121652110012.	0.7	4
6	Computationally Efficient Spatial Rendering of Late Reverberation in Virtual Acoustic Environments. , 2021, , .		2
7	Spatial Resolution of Late Reverberation in Virtual Acoustic Environments. <i>Trends in Hearing</i> , 2021, 25, 233121652110549.	0.7	6
8	Tone detection thresholds in interaurally delayed noise of different bandwidths. <i>Acta Acustica</i> , 2021, 5, 60.	0.4	3
9	Speech Intelligibility of Mandarin- and German-Speaking Listeners in Challenging Conditions. , 2021, , .		0
10	A twoâ€œpath model of auditory modulation detection using temporal fine structure and envelope cues. <i>European Journal of Neuroscience</i> , 2020, 51, 1265-1278.	1.2	22
11	Modelling human speech recognition in challenging noise maskers using machine learning. <i>Acoustical Science and Technology</i> , 2020, 41, 94-98.	0.3	1
12	Prediction of individual speech recognition performance in complex listening conditions. <i>Journal of the Acoustical Society of America</i> , 2020, 147, 1379-1391.	0.5	11
13	Defining the Proper Stimulus and Its Ecology - Mammals. , 2020, , 187-206.		3
14	The effect of room acoustical parameters on speech reception thresholds and spatial release from masking. <i>Journal of the Acoustical Society of America</i> , 2019, 146, 2188-2200.	0.5	10
15	On the limitations of sound localization with hearing devices. <i>Journal of the Acoustical Society of America</i> , 2019, 146, 1732-1744.	0.5	25
16	The percept of reverberation is not affected by visual room impression in virtual environments. <i>Journal of the Acoustical Society of America</i> , 2019, 145, EL229-EL235.	0.5	13
17	Better-ear glimpsing with symmetrically-placed interferers in bilateral cochlear implant users. <i>Journal of the Acoustical Society of America</i> , 2018, 143, 2128-2141.	0.5	26
18	Evaluation of combined dynamic compression and single channel noise reduction for hearing aid applications. <i>International Journal of Audiology</i> , 2018, 57, S43-S54.	0.9	5

#	ARTICLE	IF	CITATIONS
19	Predicting speech intelligibility with deep neural networks. <i>Computer Speech and Language</i> , 2018, 48, 51-66.	2.9	56
20	Loudness summation of equal loud narrowband signals in normal-hearing and hearing-impaired listeners. <i>International Journal of Audiology</i> , 2018, 57, S71-S80.	0.9	4
21	Restoring Perceived Loudness for Listeners With Hearing Loss. <i>Ear and Hearing</i> , 2018, 39, 664-678.	1.0	20
22	A framework for testing and comparing binaural models. <i>Hearing Research</i> , 2018, 360, 92-106.	0.9	18
23	Spectral directional cues captured by hearing device microphones in individual human ears. <i>Journal of the Acoustical Society of America</i> , 2018, 144, 2072-2087.	0.5	9
24	Removing Reflections in Semianechoic Impulse Responses by Frequency-Dependent Truncation. <i>AES: Journal of the Audio Engineering Society</i> , 2018, 66, 146-153.	0.8	13
25	Adapting Hearing Devices to the Individual Ear Acoustics: Database and Target Response Correction Functions for Various Device Styles. <i>Trends in Hearing</i> , 2018, 22, 233121651877931.	0.7	18
26	Physiologically motivated individual loudness model for normal hearing and hearing impaired listeners. <i>Journal of the Acoustical Society of America</i> , 2018, 144, 917-930.	0.5	8
27	Effect of sound level on virtual and free-field localization of brief sounds in the anterior median plane. <i>Hearing Research</i> , 2018, 365, 28-35.	0.9	1
28	Sensorineural hearing loss enhances auditory sensitivity and temporal integration for amplitude modulation. <i>Journal of the Acoustical Society of America</i> , 2017, 141, 971-980.	0.5	37
29	Differences in the temporal course of interaural time difference sensitivity between acoustic and electric hearing in amplitude modulated stimuli. <i>Journal of the Acoustical Society of America</i> , 2017, 141, 1862-1873.	0.5	30
30	Binaural masking release in symmetric listening conditions with spectro-temporally modulated maskers. <i>Journal of the Acoustical Society of America</i> , 2017, 142, 12-28.	0.5	16
31	The role of short-time intensity and envelope power for speech intelligibility and psychoacoustic masking. <i>Journal of the Acoustical Society of America</i> , 2017, 142, 1098-1111.	0.5	20
32	Assessment and Prediction of Binaural Aspects of Audio Quality. <i>AES: Journal of the Audio Engineering Society</i> , 2017, 65, 929-942.	0.8	9
33	Physiological motivated transmission-lines as front end for loudness models. <i>Journal of the Acoustical Society of America</i> , 2016, 139, 2896-2910.	0.5	8
34	Envelope and intensity based prediction of psychoacoustic masking and speech intelligibility. <i>Journal of the Acoustical Society of America</i> , 2016, 140, 1023-1038.	0.5	23
35	A simulation framework for auditory discrimination experiments: Revealing the importance of across-frequency processing in speech perception. <i>Journal of the Acoustical Society of America</i> , 2016, 139, 2708-2722.	0.5	30
36	Monaural speech intelligibility and detection in maskers with varying amounts of spectro-temporal speech features. <i>Journal of the Acoustical Society of America</i> , 2016, 140, 524-540.	0.5	27

#	ARTICLE	IF	CITATIONS
37	Interactions between amplitude modulation and frequency modulation processing: Effects of age and hearing loss. <i>Journal of the Acoustical Society of America</i> , 2016, 140, 121-131.	0.5	34
38	Spectral and binaural loudness summation for hearing-impaired listeners. <i>Hearing Research</i> , 2016, 335, 179-192.	0.9	31
39	Binaural Glimpses at the Cocktail Party?. <i>JARO - Journal of the Association for Research in Otolaryngology</i> , 2016, 17, 461-473.	0.9	13
40	Auditory Model-Based Dynamic Compression Controlled by Subband Instantaneous Frequency and Speech Presence Probability Estimates. <i>IEEE/ACM Transactions on Audio Speech and Language Processing</i> , 2016, 24, 1759-1772.	4.0	11
41	Suprathreshold auditory processing deficits in noise: Effects of hearing loss and age. <i>Hearing Research</i> , 2016, 331, 27-40.	0.9	43
42	The Influence of High-Frequency Envelope Information on Low-Frequency Vowel Identification in Noise. <i>PLoS ONE</i> , 2016, 11, e0145610.	1.1	4
43	Robust auditory localization using probabilistic inference and coherence-based weighting of interaural cues. <i>Journal of the Acoustical Society of America</i> , 2015, 138, 2635-2648.	0.5	8
44	Evaluation of Spatial Audio Reproduction Schemes for Application in Hearing Aid Research. <i>Acta Acustica United With Acustica</i> , 2015, 101, 842-854.	0.8	19
45	Application of psychophysical models for audibility prediction of technical signals in real-world background noise. <i>Applied Acoustics</i> , 2015, 88, 44-51.	1.7	5
46	Sound Quality Assessment Using Auditory Models. <i>AES: Journal of the Audio Engineering Society</i> , 2014, 62, 324-336.	0.8	12
47	A Computationally-Efficient and Perceptually-Plausible Algorithm for Binaural Room Impulse Response Simulation. <i>AES: Journal of the Audio Engineering Society</i> , 2014, 62, 748-766.	0.8	47
48	Single channel noise reduction based on an auditory filterbank. , 2014, , .		6
49	Optimized loudness-function estimation for categorical loudness scaling data. <i>Hearing Research</i> , 2014, 316, 16-27.	0.9	42
50	Prediction of consonant recognition in quiet for listeners with normal and impaired hearing using an auditory model. <i>Journal of the Acoustical Society of America</i> , 2014, 135, 1506-1517.	0.5	16
51	Modeling within- and across-channel processes in comodulation masking release. <i>Journal of the Acoustical Society of America</i> , 2013, 133, 350-364.	0.5	16
52	A multi-resolution envelope-power based model for speech intelligibility. <i>Journal of the Acoustical Society of America</i> , 2013, 134, 436-446.	0.5	136
53	Comparing the effect of pause duration on threshold interaural time differences between exponential and squared-sine envelopes (L). <i>Journal of the Acoustical Society of America</i> , 2013, 133, 1-4.	0.5	13
54	The effect of overall level on sensitivity to interaural differences of time and level at high frequencies. <i>Journal of the Acoustical Society of America</i> , 2013, 134, 494-502.	0.5	36

#	ARTICLE	IF	CITATIONS
55	Lateralization based on interaural differences in the second-order amplitude modulator. Journal of the Acoustical Society of America, 2012, 131, 398-408.	0.5	9
56	Perceptual Sensitivity to High-Frequency Interaural Time Differences Created by Rustling Sounds. JARO - Journal of the Association for Research in Otolaryngology, 2012, 13, 131-143.	0.9	13
57	Assessment of auditory nonlinearity for listeners with different hearing losses using temporal masking and categorical loudness scaling. Hearing Research, 2011, 280, 177-191.	0.9	18
58	Auditory model based direction estimation of concurrent speakers from binaural signals. Speech Communication, 2011, 53, 592-605.	1.6	113
59	The influence of different segments of the ongoing envelope on sensitivity to interaural time delays. Journal of the Acoustical Society of America, 2011, 129, 3856-3872.	0.5	63
60	Lateralization of stimuli with independent fine-structure and envelope-based temporal disparities. Journal of the Acoustical Society of America, 2009, 125, 1622-1635.	0.5	40
61	Auditory stream formation affects comodulation masking release retroactively. Journal of the Acoustical Society of America, 2009, 125, 2182-2188.	0.5	47
62	Coding of temporally fluctuating interaural timing disparities in a binaural processing model based on phase differences. Brain Research, 2008, 1220, 234-245.	1.1	32
63	Psychophysical and Physiological Evidence for Fast Binaural Processing. Journal of Neuroscience, 2008, 28, 2043-2052.	1.7	45
64	A computational model of human auditory signal processing and perception. Journal of the Acoustical Society of America, 2008, 124, 422-438.	0.5	157
65	Modeling comodulation masking release using an equalization-cancellation mechanism. Journal of the Acoustical Society of America, 2007, 121, 2111-2126.	0.5	41
66	A neural circuit transforming temporal periodicity information into a rate-based representation in the mammalian auditory system. Journal of the Acoustical Society of America, 2007, 121, 310-326.	0.5	29
67	Comparison of level discrimination, increment detection, and comodulation masking release in the audio- and envelope-frequency domains. Journal of the Acoustical Society of America, 2007, 121, 2168-2181.	0.5	1
68	Estimates of auditory filter phase response at and below characteristic frequency (L). Journal of the Acoustical Society of America, 2005, 117, 1713-1716.	0.5	9
69	Modulation masking produced by second-order modulators. Journal of the Acoustical Society of America, 2005, 117, 2158-2168.	0.5	18
70	Perceptual interaction between carrier periodicity and amplitude modulation in broadband stimuli: A comparison of the autocorrelation and modulation-filterbank model. Journal of the Acoustical Society of America, 2005, 118, 2470-2481.	0.5	11
71	External and internal limitations in amplitude-modulation processing. Journal of the Acoustical Society of America, 2004, 116, 478-490.	0.5	53
72	Modulation masking produced by complex tone modulators. Journal of the Acoustical Society of America, 2003, 114, 2135-2146.	0.5	19

#	ARTICLE	IF	CITATIONS
73	Spectro-temporal processing in the envelope-frequency domain. Journal of the Acoustical Society of America, 2002, 112, 2921-2931.	0.5	76
74	Characterizing frequency selectivity for envelope fluctuations. Journal of the Acoustical Society of America, 2000, 108, 1181.	0.5	235
