

Patricia K Kuhl

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3186130/patricia-k-kuhl-publications-by-year.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

104
papers

14,786

#	Paper	IF	Citations
104	Development of infants' neural speech processing and its relation to later language skills: an MEG study.. <i>NeuroImage</i> , 2022 , 119242	7.9	0
103	Designing Virtual, Moderated Studies of Early Childhood Development. <i>Frontiers in Psychology</i> , 2021 , 12, 740290	3.4	3
102	Infants' neural speech discrimination predicts individual differences in grammar ability at 6 years of age and their risk of developing speech-language disorders. <i>Developmental Cognitive Neuroscience</i> , 2021 , 48, 100949	5.5	4
101	Comparing Automatic and Manual Measures of Parent-Infant Conversational Turns: A Word of Caution. <i>Child Development</i> , 2021 , 92, 672-681	4.9	3
100	Auditory deficits in infants at risk for dyslexia during a linguistic sensitive period predict future language. <i>NeuroImage: Clinical</i> , 2021 , 30, 102578	5.3	2
99	Infant Speech Perception 2021 , 113-158		1
98	Using magnetoencephalography to examine word recognition, lateralization, and future language skills in 14-month-old infants. <i>Developmental Cognitive Neuroscience</i> , 2021 , 47, 100901	5.5	5
97	Exposure to a second language in infancy alters speech production. <i>Bilingualism</i> , 2020 , 23, 1-14	3.2	3
96	Early Second Language Learning through SparkLing—Scaling up a Language Intervention in Infant Education Centers. <i>Mind, Brain, and Education</i> , 2020 , 14, 94-103	1.8	3
95	Parent coaching increases conversational turns and advances infant language development. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020 , 117, 3484-3491	11.5	47
94	Effects of formant proximity and stimulus prototypicality on the neural discrimination of vowels: Evidence from the auditory frequency-following response. <i>Brain and Language</i> , 2019 , 194, 77-83	2.9	7
93	Neuroplasticity, bilingualism, and mental mathematics: A behavior-MEG study. <i>Brain and Cognition</i> , 2019 , 134, 122-134	2.7	4
92	Strength of Ventral Tegmental Area Connections With Left Caudate Nucleus Is Related to Conflict Monitoring. <i>Frontiers in Psychology</i> , 2019 , 10, 2869	3.4	1
91	Parent coaching at 6 and 10 months improves language outcomes at 14 months: A randomized controlled trial. <i>Developmental Science</i> , 2019 , 22, e12762	4.5	29
90	Right Forceps Minor and Anterior Thalamic Radiation Predict Executive Function Skills in Young Bilingual Adults. <i>Frontiers in Psychology</i> , 2018 , 9, 118	3.4	26
89	Linguistic effect on speech perception observed at the brainstem. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018 , 115, 8716-8721	11.5	23
88	Two are better than one: Infant language learning from video improves in the presence of peers. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018 , 115, 9859-9866	11.5	58

87	Speech discrimination in 11-month-old bilingual and monolingual infants: a magnetoencephalography study. <i>Developmental Science</i> , 2017 , 20, e12427	4.5	117
86	Infant-directed speech in English and Spanish: Assessments of monolingual and bilingual caregiver VOT. <i>Journal of Phonetics</i> , 2017 , 63, 19-34	2.2	17
85	Bilingual Baby: Foreign Language Intervention in Madrid's Infant Education Centers. <i>Mind, Brain, and Education</i> , 2017 , 11, 133-143	1.8	8
84	Social Interaction and Language Acquisition 2017 , 615-634		4
83	The Impact of Early Social Interactions on Later Language Development in Spanish-English Bilingual Infants. <i>Child Development</i> , 2017 , 88, 1216-1234	4.9	82
82	Look Who's Talking NOW! Parentese Speech, Social Context, and Language Development Across Time. <i>Frontiers in Psychology</i> , 2017 , 8, 1008	3.4	28
81	Effects of enriched auditory experience on infants' speech perception during the first year of life. <i>Prospects</i> , 2016 , 46, 235-247	4.8	1
80	Brain white matter structure and COMT gene are linked to second-language learning in adults. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016 , 113, 7249-54	11.5	37
79	Musical intervention enhances infants' neural processing of temporal structure in music and speech. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016 , 113, 5212-17	11.5	91
78	Relationships between quantity of language input and brain responses in bilingual and monolingual infants. <i>International Journal of Psychophysiology</i> , 2016 , 110, 1-17	2.9	112
77	Neuroimaging of the bilingual brain: Structural brain correlates of listening and speaking in a second language. <i>Brain and Language</i> , 2016 , 162, 1-9	2.9	43
76	Social Interaction in Infants' Learning of Second-Language Phonetics: An Exploration of Brain-Behavior Relations. <i>Developmental Neuropsychology</i> , 2015 , 40, 216-29	1.8	32
75	Mothers say "baby" and their newborns do not choose to listen: a behavioral preference study to compare with ERP results. <i>Frontiers in Human Neuroscience</i> , 2015 , 9, 153	3.3	8
74	Early Language Learning and the Social Brain. <i>Cold Spring Harbor Symposia on Quantitative Biology</i> , 2014 , 79, 211-20	3.9	18
73	Look who's talking: speech style and social context in language input to infants are linked to concurrent and future speech development. <i>Developmental Science</i> , 2014 , 17, 880-91	4.5	174
72	Infants' brain responses to speech suggest analysis by synthesis. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014 , 111, 11238-45	11.5	160
71	Early gray-matter and white-matter concentration in infancy predict later language skills: a whole brain voxel-based morphometry study. <i>Brain and Language</i> , 2013 , 124, 34-44	2.9	50
70	Language experienced in utero affects vowel perception after birth: a two-country study. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2013 , 102, 156-60	3.1	167

69	Brain responses to words in 2-year-olds with autism predict developmental outcomes at age 6. <i>PLoS ONE</i> , 2013 , 8, e64967	3.7	52
68	Age-specific average head template for typically developing 6-month-old infants. <i>PLoS ONE</i> , 2013 , 8, e73821	3.7	19
67	Theta brain rhythms index perceptual narrowing in infant speech perception. <i>Frontiers in Psychology</i> , 2013 , 4, 690	3.4	50
66	Mental addition in bilinguals: an fMRI study of task-related and performance-related activation. <i>Cerebral Cortex</i> , 2012 , 22, 1851-61	5.1	17
65	Event-related potentials to an english/spanish syllabic contrast in mexican 10-13-month-old infants. <i>ISRN Neurology</i> , 2012 , 2012, 702986		7
64	Social Mechanisms in Early Language Acquisition: Understanding Integrated Brain Systems Supporting Language 2011 ,		6
63	Impact of second-language experience in infancy: brain measures of first- and second-language speech perception. <i>Developmental Science</i> , 2011 , 14, 242-8	4.5	52
62	Early Language Learning and Literacy: Neuroscience Implications for Education. <i>Mind, Brain, and Education</i> , 2011 , 5, 128-142	1.8	55
61	Bilingual language learning: An ERP study relating early brain responses to speech, language input, and later word production. <i>Journal of Phonetics</i> , 2011 , 39, 546-557	2.2	153
60	Neuroscience. Who's talking?. <i>Science</i> , 2011 , 333, 529-30	33.3	12
59	Quantifying the adequacy of neural representations for a cross-language phonetic discrimination task: prediction of individual differences. <i>Cerebral Cortex</i> , 2010 , 20, 1-12	5.1	70
58	Brain mechanisms in early language acquisition. <i>Neuron</i> , 2010 , 67, 713-27	13.9	439
57	Age-related changes in acoustic modifications of Mandarin maternal speech to preverbal infants and five-year-old children: a longitudinal study. <i>Journal of Child Language</i> , 2009 , 36, 909-22	2.3	57
56	Sustained and transient language control in the bilingual brain. <i>NeuroImage</i> , 2009 , 47, 414-22	7.9	102
55	Neural signatures of phonetic learning in adulthood: a magnetoencephalography study. <i>NeuroImage</i> , 2009 , 46, 226-40	7.9	90
54	Foundations for a new science of learning. <i>Science</i> , 2009 , 325, 284-8	33.3	491
53	Neural substrates of language acquisition. <i>Annual Review of Neuroscience</i> , 2008 , 31, 511-34	17	158
52	Socioeconomic status predicts hemispheric specialisation of the left inferior frontal gyrus in young children. <i>NeuroImage</i> , 2008 , 40, 1392-401	7.9	163

51	Phonetic learning as a pathway to language: new data and native language magnet theory expanded (NLM-e). <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2008 , 363, 979-1000	5.8	473
50	Cognitive control factors in speech perception at 11 months. <i>Developmental Psychology</i> , 2008 , 44, 1505-1517	3.7	43
49	2. Event-related potential studies of early language processing at the phoneme, word, and sentence levels. <i>Trends in Language Acquisition Research</i> , 2008 , 23-64	0.2	8
48	Cracking the speech code: How infants learn language. <i>Acoustical Science and Technology</i> , 2007 , 28, 71-83	3.5	12
47	Is speech learning 'gated' by the social brain?. <i>Developmental Science</i> , 2007 , 10, 110-20	4.5	450
46	Clarifying the associations between language and social development in autism: a study of non-native phoneme recognition. <i>Journal of Autism and Developmental Disorders</i> , 2007 , 37, 1256-63	4.6	16
45	Principal component analyses and scalp distribution of the auditory P150-250 and N250-550 to speech contrasts in Mexican and American infants. <i>Developmental Neuropsychology</i> , 2007 , 31, 363-78	1.8	17
44	Grammatical processing without semantics? An event-related brain potential study of preschoolers using jabberwocky sentences. <i>Journal of Cognitive Neuroscience</i> , 2007 , 19, 1050-65	3.1	14
43	Acoustic analysis of lexical tone in Mandarin infant-directed speech. <i>Developmental Psychology</i> , 2007 , 43, 912-7	3.7	53
42	Perception of native and non-native affricate-fricative contrasts: cross-language tests on adults and infants. <i>Journal of the Acoustical Society of America</i> , 2006 , 120, 2285-94	2.2	94
41	Infant speech perception activates Broca's area: a developmental magnetoencephalography study. <i>NeuroReport</i> , 2006 , 17, 957-62	1.7	194
40	Infants show a facilitation effect for native language phonetic perception between 6 and 12 months. <i>Developmental Science</i> , 2006 , 9, F13-F21	4.5	477
39	Language/Culture/Mind/Brain. <i>Annals of the New York Academy of Sciences</i> , 2006 , 935, 136-174	6.5	28
38	Effects of language experience: neural commitment to language-specific auditory patterns. <i>NeuroImage</i> , 2005 , 26, 703-20	7.9	124
37	Early Speech Perception and Later Language Development: Implications for the "Critical Period". <i>Language Learning and Development</i> , 2005 , 1, 237-264	1.3	200
36	Neural patterns to speech and vocabulary growth in American infants. <i>NeuroReport</i> , 2005 , 16, 495-8	1.7	65
35	Sentence processing in 30-month-old children: an event-related potential study. <i>NeuroReport</i> , 2005 , 16, 645-8	1.7	36
34	Links between social and linguistic processing of speech in preschool children with autism: behavioral and electrophysiological measures. <i>Developmental Science</i> , 2005 , 8, F1-F12	4.5	319

33	Brain potentials to native and non-native speech contrasts in 7- and 11-month-old American infants. <i>Developmental Science</i> , 2005 , 8, 162-72	4.5	254
32	An event-related brain potential study of sentence comprehension in preschoolers: semantic and morphosyntactic processing. <i>Cognitive Brain Research</i> , 2005 , 23, 247-58		58
31	Foundations and Opportunities for an Interdisciplinary Science of Learning 2005 , 19-34		8
30	Early Speech Perception and Later Language Development: Implications for the "Critical Period". <i>Language Learning and Development</i> , 2005 , 1, 237-264	1.3	111
29	Speech perception in infancy predicts language development in the second year of life: a longitudinal study. <i>Child Development</i> , 2004 , 75, 1067-84	4.9	388
28	Early language acquisition: cracking the speech code. <i>Nature Reviews Neuroscience</i> , 2004 , 5, 831-43	13.5	1155
27	Magnetoencephalography is feasible for infant assessment of auditory discrimination. <i>Experimental Neurology</i> , 2004 , 190 Suppl 1, S44-51	5.7	44
26	Investigating the role of infant-directed speech with a computer model. <i>Acoustics Research Letters Online: ARLO</i> , 2003 , 4, 129-134		65
25	A perceptual interference account of acquisition difficulties for non-native phonemes. <i>Cognition</i> , 2003 , 87, B47-57	3.5	349
24	An association between mothers's speech clarity and infants's speech discrimination skills. <i>Developmental Science</i> , 2003 , 6, F1-F10	4.5	250
23	Foreign-language experience in infancy: effects of short-term exposure and social interaction on phonetic learning. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2003 , 100, 9096-101	11.5	748
22	Human speech and birdsong: communication and the social brain. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2003 , 100, 9645-6	11.5	66
21	Perceptual magnet and phoneme boundary effects in speech perception: do they arise from a common mechanism?. <i>Perception & Psychophysics</i> , 2000 , 62, 874-86		56
20	Birdsong and human speech: common themes and mechanisms. <i>Annual Review of Neuroscience</i> , 1999 , 22, 567-631	17	1303
19	Infant vocalizations in response to speech: vocal imitation and developmental change. <i>Journal of the Acoustical Society of America</i> , 1996 , 100, 2425-38	2.2	335
18	Influences of phonetic identification and category goodness on American listeners' perception of /r/ and /l/. <i>Journal of the Acoustical Society of America</i> , 1996 , 99, 1130-40	2.2	71
17	Mapping the perceptual magnet effect for speech using signal detection theory and multidimensional scaling. <i>Journal of the Acoustical Society of America</i> , 1995 , 97, 553-62	2.2	217
16	Learning and representation in speech and language. <i>Current Opinion in Neurobiology</i> , 1994 , 4, 812-22	7.6	186

15	Perceptual strategies in prelingual speech segmentation. <i>Journal of Child Language</i> , 1993 , 20, 229-52	2.3	85
14	Cross-modal speech perception in adults and infants using nonspeech auditory stimuli.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 1991 , 17, 829-840	2.6	76
13	Human adults and human infants show a "perceptual magnet effect" for the prototypes of speech categories, monkeys do not. <i>Perception & Psychophysics</i> , 1991 , 50, 93-107		676
12	Categorization of speech by infants: Support for speech-sound prototypes.. <i>Developmental Psychology</i> , 1989 , 25, 577-588	3.7	108
11	Maternal speech to infants in a tonal language: Support for universal prosodic features in motherese.. <i>Developmental Psychology</i> , 1988 , 24, 14-20	3.7	315
10	On handedness in primates and human infants. <i>Behavioral and Brain Sciences</i> , 1988 , 11, 727-729	0.9	9
9	Acoustic determinants of infant preference for motherese speech 1987 , 10, 279-293		562
8	Perception of auditory equivalence classes for speech in early infancy 1983 , 6, 263-285		182
7	Enhanced discriminability at the phonetic boundaries for the place feature in macaques. <i>Journal of the Acoustical Society of America</i> , 1983 , 73, 1003-10	2.2	196
6	Enhanced discriminability at the phonetic boundaries for the voicing feature in macaques. <i>Perception & Psychophysics</i> , 1982 , 32, 542-50		134
5	Discrimination of speech by nonhuman animals: Basic auditory sensitivities conducive to the perception of speech-sound categories. <i>Journal of the Acoustical Society of America</i> , 1981 , 70, 340-349	2.2	168
4	Speech perception in early infancy: perceptual constancy for spectrally dissimilar vowel categories. <i>Journal of the Acoustical Society of America</i> , 1979 , 66, 1668-79	2.2	229
3	Speech perception by the chinchilla: identification function for synthetic VOT stimuli. <i>Journal of the Acoustical Society of America</i> , 1978 , 63, 905-17	2.2	332
2	Psychoacoustics and speech perception: Internal standards, perceptual anchors, and prototypes.293-332		21
1	Development of infants' neural speech processing and its relation to later language skills: an MEG study		2
