| #  | ARTICLE                                                                                                                                                                                                                                                       | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | What Makes Cirrhosis Irreversible?â€”Consideration on Structural Changes. <i>Frontiers in Medicine</i> , 2022, 9, 876293.                                                                                                                                     | 2.6 | 0         |
| 2  | Histopathological Chromogranin A-Positivity Is Associated with Right-Sided Colorectal Cancers and Worse Prognosis. <i>Cancers</i> , 2021, 13, 67.                                                                                                             | 3.7 | 6         |
| 3  | Human liver regeneration following massive hepatic necrosis: Two distinct patterns. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2020, 35, 124-134.                                                                                        | 2.8 | 13        |
| 4  | Serum chromograninâ€” level continuously rises with the progression of typeâ€”1 diabetes, and indicates the presence of both enterochromaffinâ€”like cell hyperplasia and autoimmune gastritis. <i>Journal of Diabetes Investigation</i> , 2020, 11, 865-873. | 2.4 | 7         |
| 5  | Postnatal, ontogenic liver growth accomplished by biliary/oval cell proliferation and differentiation. <i>PLoS ONE</i> , 2020, 15, e0233736.                                                                                                                  | 2.5 | 4         |
| 6  | Regular chromogranin A monitoring facilitated the early detection of a gastrointestinal neuroendocrine tumour in a patient with type 1 diabetes. <i>Endokrynologia Polska</i> , 2020, 71, 483-484.                                                            | 1.0 | 1         |
| 7  | Loss of Function of the Nuclear Receptor NR2F2, Encoding COUP-TF2, Causes Testis Development and Cardiac Defects in 46,XX Children. <i>American Journal of Human Genetics</i> , 2018, 102, 487-493.                                                           | 6.2 | 64        |
| 8  | Role of (myo)fibroblasts in the development of vascular and connective tissue structure of the C38 colorectal cancer in mice. <i>Cancer Communications</i> , 2018, 38, 1-11.                                                                                  | 9.2 | 5         |
| 9  | Human liver regeneration in advanced cirrhosis is organized by the portal tree. <i>Journal of Hepatology</i> , 2017, 66, 778-786.                                                                                                                             | 3.7 | 16        |
| 10 | The evidence for and against different modes of tumour cell extravasation in the lung: diapiedesis, capillary destruction, necroptosis, and endothelialization. <i>Journal of Pathology</i> , 2017, 241, 441-447.                                             | 4.5 | 8         |
| 11 | Ductular reaction correlates with fibrogenesis but does not contribute to liver regeneration in experimental fibrosis models. <i>PLoS ONE</i> , 2017, 12, e0176518.                                                                                           | 2.5 | 16        |
| 12 | Imatinib accelerates progenitor cellâ€”mediated liver regeneration in cholineâ€”deficient ethionineâ€”supplemented dietâ€”fed mice. <i>International Journal of Experimental Pathology</i> , 2016, 97, 389-396.                                               | 1.3 | 2         |
| 13 | Mechanisms of vascularization in murine models of primary and metastatic tumor growth. <i>Chinese Journal of Cancer</i> , 2016, 35, 19.                                                                                                                       | 4.9 | 23        |
| 14 | Quantitative morphometric and immunohistochemical analysis and their correlates in cirrhosis â€” A study on explant livers. <i>Scandinavian Journal of Gastroenterology</i> , 2016, 51, 86-94.                                                                | 1.5 | 3         |
| 15 | EZH2 is a sensitive marker of malignancy in salivary gland tumors. <i>Diagnostic Pathology</i> , 2015, 10, 163.                                                                                                                                               | 2.0 | 6         |
| 16 | Structural analysis of oval-cell-mediated liver regeneration in rats. <i>Hepatology</i> , 2012, 56, 1457-1467.                                                                                                                                                | 7.3 | 34        |
| 17 | 1,4â€”Bis[2â€”(3,5â€”dichloropyridyloxy)]benzene induces substantial hyperplasia in fibrotic mouse liver. <i>International Journal of Experimental Pathology</i> , 2012, 93, 125-129.                                                                         | 1.3 | 3         |
| 18 | Immunohistochemical classification of ductular reactions in human liver. <i>Histopathology</i> , 2010, 57, 607-614.                                                                                                                                           | 2.9 | 35        |

| #  | ARTICLE                                                                                                                                                                                             | IF  | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Architectural changes during regenerative and ontogenic liver growth in the rat. Liver Transplantation, 2009, 15, 177-183.                                                                          | 2.4 | 25        |
| 20 | Delta-like protein (DLK) is a novel immunohistochemical marker for human hepatoblastomas. Virchows Archiv Fur Pathologische Anatomie Und Physiologie Und Fur Klinische Medizin, 2008, 452, 443-448. | 2.8 | 34        |
| 21 | Thioacetamide-induced hepatic fibrosis in transforming growth factor beta-1 transgenic mice. European Journal of Gastroenterology and Hepatology, 2004, 16, 127-133.                                | 1.6 | 34        |
| 22 | Immunohistochemical detection of transforming growth factor- $\beta$ 21 in fibrotic liver diseases. Hepatology, 1991, 14, 269-273.                                                                  | 7.3 | 106       |
