#	ARTICLE	IF	CITATIONS
1	Explant culture: An advantageous method for isolation of mesenchymal stem cells from human tissues. <i>Cell Proliferation</i> , 2017, 50, .	5.3	120
2	Probiotic supplementation for management of cardiovascular risk factors in adults with type II diabetes: A systematic review and meta-analysis. <i>Clinical Nutrition</i> , 2018, 37, 532-541.	5.0	87
3	Effects of probiotic supplementation in patients with type 2 diabetes: systematic review and meta-analysis. <i>Nutrition Reviews</i> , 2016, 74, 774-784.	5.8	78
4	Comparison of human mesenchymal stem cells isolated by explant culture method from entire umbilical cord and Wharton's jelly matrix. <i>Cell and Tissue Banking</i> , 2014, 15, 555-565.	1.1	45
5	Human Wharton's jelly mesenchymal stem cell secretome display antiproliferative effect on leukemia cell line and produce additive cytotoxic effect in combination with doxorubicin. <i>Tissue and Cell</i> , 2015, 47, 229-234.	2.2	39
6	Dual Protective and Cytotoxic Benefits of Mesenchymal Stem Cell Therapy in Combination with Chemotherapy/Radiotherapy for Cancer Patients. <i>Critical Reviews in Eukaryotic Gene Expression</i> , 2015, 25, 203-207.	0.9	23
7	Human mesenchymal stromal cell therapy for prevention and recovery of chemo/radiotherapy adverse reactions. <i>Cytotherapy</i> , 2015, 17, 509-525.	0.7	17
8	Effect of CYP3A5*1 expression on tacrolimus required dose for transplant pediatrics: A systematic review and meta-analysis. <i>Pediatric Transplantation</i> , 2018, 22, e13248.	1.0	13
9	Effect of CYP3A5*1 expression on tacrolimus required dose after liver transplantation: A systematic review and meta-analysis. <i>Clinical Transplantation</i> , 2018, 32, e13306.	1.6	12
10	Interindividual variability in diabetic patients' response to opium poppy: an overview of impressive factors. <i>Personalized Medicine</i> , 2022, 19, 155-163.	1.5	0
