

Myles Allen

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3219686/myles-allen-publications-by-year.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
132	Indicate separate contributions of long-lived and short-lived greenhouse gases in emission targets.. <i>Npj Climate and Atmospheric Science</i> , 2022 , 5, 5	8	2
131	Methane and the Paris Agreement temperature goals. <i>Philosophical Transactions Series A, Mathematical, Physical, and Engineering Sciences</i> , 2022 , 380, 20200456	3	0
130	Transformations to regenerative food systemsAn outline of the FixOurFood project. <i>Nutrition Bulletin</i> , 2022 , 47, 106-114	3.5	
129	The meaning of net zero and how to get it right. <i>Nature Climate Change</i> , 2022 , 12, 15-21	21.4	26
128	Quantifying aviation's contribution to global warming. <i>Environmental Research Letters</i> , 2021 , 16, 104027	6.2	5
127	Forecast-based attribution of a winter heatwave within the limit of predictability. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2021 , 118,	11.5	2
126	Quantifying non-CO2 contributions to remaining carbon budgets. <i>Npj Climate and Atmospheric Science</i> , 2021 , 4,	8	1
125	Upstream decarbonization through a carbon takeback obligation: An affordable backstop climate policy. <i>Joule</i> , 2021 ,	27.8	6
124	Further improvement of warming-equivalent emissions calculation. <i>Npj Climate and Atmospheric Science</i> , 2021 , 4,	8	15
123	FaIRv2.0.0: a generalized impulse response model for climate uncertainty and future scenario exploration. <i>Geoscientific Model Development</i> , 2021 , 14, 3007-3036	6.3	8
122	Nature-based solutions can help cool the planet - if we act now. <i>Nature</i> , 2021 , 593, 191-194	50.4	38
121	Ensuring that offsets and other internationally transferred mitigation outcomes contribute effectively to limiting global warming. <i>Environmental Research Letters</i> , 2021 , 16, 074009	6.2	7
120	Comment on Unintentional unfairness when applying new greenhouse gas emissions metrics at country level. <i>Environmental Research Letters</i> , 2021 , 16, 068001	6.2	2
119	Operationalizing the net-negative carbon economy. <i>Nature</i> , 2021 , 596, 377-383	50.4	20
118	The contribution of global aviation to anthropogenic climate forcing for 2000 to 2018. <i>Atmospheric Environment</i> , 2021 , 244, 117834	5.3	160
117	Progressive supply-side policy under the Paris Agreement to enhance geological carbon storage. <i>Climate Policy</i> , 2021 , 21, 63-77	5.3	6
116	Increased outburst flood hazard from Lake Palcacocha due to human-induced glacier retreat. <i>Nature Geoscience</i> , 2021 , 14, 85-90	18.3	16

115	Demonstrating GWP*: a means of reporting warming-equivalent emissions that captures the contrasting impacts of short- and long-lived climate pollutants. <i>Environmental Research Letters</i> , 2020 , 15, 044023	6.2	69
114	Anthropogenic Influence on the 2018 Summer Warm Spell in Europe: The Impact of Different Spatio-Temporal Scales. <i>Bulletin of the American Meteorological Society</i> , 2020 , 101, S41-S46	6.1	13
113	Improved calculation of warming-equivalent emissions for short-lived climate pollutants. <i>Npj Climate and Atmospheric Science</i> , 2019 , 2, 29	8	82
112	Return period of extreme rainfall substantially decreases under 1.5 °C and 2.0 °C warming: a case study for Uttarakhand, India. <i>Environmental Research Letters</i> , 2019 , 14, 044033	6.2	10
111	Forced summer stationary waves: the opposing effects of direct radiative forcing and sea surface warming. <i>Climate Dynamics</i> , 2019 , 53, 4291-4309	4.2	5
110	Assessing changes in risk of amplified planetary waves in a warming world. <i>Atmospheric Science Letters</i> , 2019 , 20, e929	2.4	2
109	Comment on "The global tree restoration potential". <i>Science</i> , 2019 , 366,	33.3	40
108	Evaluation of a large ensemble regional climate modelling system for extreme weather events analysis over Bangladesh. <i>International Journal of Climatology</i> , 2019 , 39, 2845-2861	3.5	5
107	Framing Climate Goals in Terms of Cumulative CO ₂ -Forcing-Equivalent Emissions. <i>Geophysical Research Letters</i> , 2018 , 45, 2795-2804	4.9	19
106	Policy instruments for limiting global temperature rise to 1.5°C: Can humanity rise to the challenge?. <i>Climate Policy</i> , 2018 , 18, 275-286	5.3	41
105	Uncertain impacts on economic growth when stabilizing global temperatures at 1.5°C or 2°C warming. <i>Philosophical Transactions Series A, Mathematical, Physical, and Engineering Sciences</i> , 2018 , 376,	3	34
104	The many possible climates from the Paris Agreement's aim of 1.5 °C warming. <i>Nature</i> , 2018 , 558, 41-49	50.4	77
103	A solution to the misrepresentations of CO ₂ -equivalent emissions of short-lived climate pollutants under ambitious mitigation. <i>Npj Climate and Atmospheric Science</i> , 2018 , 1,	8	136
102	Higher CO ₂ concentrations increase extreme event risk in a 1.5 °C world. <i>Nature Climate Change</i> , 2018 , 8, 604-608	21.4	63
101	Current level and rate of warming determine emissions budgets under ambitious mitigation. <i>Nature Geoscience</i> , 2018 , 11, 574-579	18.3	27
100	Focus on cumulative emissions, global carbon budgets and the implications for climate mitigation targets. <i>Environmental Research Letters</i> , 2018 , 13, 010201	6.2	47
99	FAIR v1.3: a simple emissions-based impulse response and carbon cycle model. <i>Geoscientific Model Development</i> , 2018 , 11, 2273-2297	6.3	75
98	Stakeholder perceptions of event attribution in the loss and damage debate. <i>Climate Policy</i> , 2017 , 17, 533-550	5.3	19

97	Seasonal spatial patterns of projected anthropogenic warming in complex terrain: a modeling study of the western US. <i>Climate Dynamics</i> , 2017 , 48, 2191-2213	4.2	32
96	Assessing mid-latitude dynamics in extreme event attribution systems. <i>Climate Dynamics</i> , 2017 , 48, 3889-3901	4.2	25
95	Estimating Carbon Budgets for Ambitious Climate Targets. <i>Current Climate Change Reports</i> , 2017 , 3, 69-77	4.2	36
94	weather@home 2: validation of an improved global-regional climate modelling system. <i>Geoscientific Model Development</i> , 2017 , 10, 1849-1872	6.3	56
93	Emission budgets and pathways consistent with limiting warming to 1.5 °C. <i>Nature Geoscience</i> , 2017 , 10, 741-747	18.3	320
92	A real-time Global Warming Index. <i>Scientific Reports</i> , 2017 , 7, 15417	4.9	101
91	Perspective has a strong effect on the calculation of historical contributions to global warming. <i>Environmental Research Letters</i> , 2017 , 12, 024022	6.2	32
90	A modified impulse-response representation of the global near-surface air temperature and atmospheric concentration response to carbon dioxide emissions. <i>Atmospheric Chemistry and Physics</i> , 2017 , 17, 7213-7228	6.8	75
89	Half a degree additional warming, prognosis and projected impacts (HAPPI): background and experimental design. <i>Geoscientific Model Development</i> , 2017 , 10, 571-583	6.3	162
88	Mapping the climate change challenge. <i>Nature Climate Change</i> , 2016 , 6, 663-668	21.4	54
87	Differences between carbon budget estimates unravelled. <i>Nature Climate Change</i> , 2016 , 6, 245-252	21.4	183
86	Human influence on climate in the 2014 southern England winter floods and their impacts. <i>Nature Climate Change</i> , 2016 , 6, 627-634	21.4	189
85	A novel bias correction methodology for climate impact simulations. <i>Earth System Dynamics</i> , 2016 , 7, 71-88	4.8	56
84	Predicting future uncertainty constraints on global warming projections. <i>Scientific Reports</i> , 2016 , 6, 18903	4.9	24
83	Perspectives on the causes of exceptionally low 2015 snowpack in the western United States. <i>Geophysical Research Letters</i> , 2016 , 43, 10,980	4.9	65
82	Drivers of peak warming in a consumption-maximizing world. <i>Nature Climate Change</i> , 2016 , 6, 684-686	21.4	29
81	New use of global warming potentials to compare cumulative and short-lived climate pollutants. <i>Nature Climate Change</i> , 2016 , 6, 773-776	21.4	104
80	Comparison of methods: Attributing the 2014 record European temperatures to human influences. <i>Geophysical Research Letters</i> , 2016 , 43, 8685-8693	4.9	41

79	Model structure in observational constraints on transient climate response. <i>Climatic Change</i> , 2015 , 131, 199-211	4.5	33
78	The implications of carbon dioxide and methane exchange for the heavy mitigation RCP2.6 scenario under two metrics. <i>Environmental Science and Policy</i> , 2015 , 51, 77-87	6.2	9
77	Anthropogenic influence on the changing likelihood of an exceptionally warm summer in Texas, 2011. <i>Geophysical Research Letters</i> , 2015 , 42, 2392-2400	4.9	15
76	Implications of event attribution for loss and damage policy. <i>Weather</i> , 2015 , 70, 268-273	0.9	10
75	weather@home development and validation of a very large ensemble modelling system for probabilistic event attribution. <i>Quarterly Journal of the Royal Meteorological Society</i> , 2015 , 141, 1528-1545	6.4	135
74	Impact of delay in reducing carbon dioxide emissions. <i>Nature Climate Change</i> , 2014 , 4, 23-26	21.4	69
73	Sensitivity of Climate Change Detection and Attribution to the Characterization of Internal Climate Variability. <i>Journal of Climate</i> , 2014 , 27, 3477-3491	4.4	20
72	Potential influences on the United Kingdom's floods of winter 2013/14. <i>Nature Climate Change</i> , 2014 , 4, 769-777	21.4	122
71	Increasing the detectability of external influence on precipitation by correcting feature location in GCMs. <i>Journal of Geophysical Research D: Atmospheres</i> , 2014 , 119, 12,466-12,478	4.4	1
70	Correcting precipitation feature location in general circulation models. <i>Journal of Geophysical Research D: Atmospheres</i> , 2014 , 119, 13,350-13,369	4.4	3
69	Test of a decadal climate forecast. <i>Nature Geoscience</i> , 2013 , 6, 243-244	18.3	10
68	Constraining the Ratio of Global Warming to Cumulative CO2 Emissions Using CMIP5 Simulations*. <i>Journal of Climate</i> , 2013 , 26, 6844-6858	4.4	187
67	Risk management and climate change. <i>Nature Climate Change</i> , 2013 , 3, 447-450	21.4	163
66	Energy budget constraints on climate response. <i>Nature Geoscience</i> , 2013 , 6, 415-416	18.3	228
65	The impact of stratospheric resolution on the detectability of climate change signals in the free atmosphere. <i>Geophysical Research Letters</i> , 2013 , 40, 937-942	4.9	3
64	Testing the robustness of the anthropogenic climate change detection statements using different empirical models. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013 , 118, 3192-3199	4.4	24
63	The role of short-lived climate pollutants in meeting temperature goals. <i>Nature Climate Change</i> , 2013 , 3, 1021-1024	21.4	72
62	Obtaining diverse behaviors in a climate model without the use of flux adjustments. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013 , 118, 2781-2793	4.4	19

61	Can correcting feature location in simulated mean climate improve agreement on projected changes?. <i>Geophysical Research Letters</i> , 2013 , 40, 354-358	4.9	19
60	Can correcting feature location in simulated mean climate improve agreement on projected changes? 2013 , 40, 354		5
59	Quantifying uncertainty in future Southern Hemisphere circulation trends. <i>Geophysical Research Letters</i> , 2012 , 39, n/a-n/a	4.9	4
58	Broad range of 2050 warming from an observationally constrained large climate model ensemble. <i>Nature Geoscience</i> , 2012 , 5, 256-260	18.3	98
57	Reconciling two approaches to attribution of the 2010 Russian heat wave. <i>Geophysical Research Letters</i> , 2012 , 39, n/a-n/a	4.9	246
56	Equivalence of greenhouse-gas emissions for peak temperature limits. <i>Nature Climate Change</i> , 2012 , 2, 535-538	21.4	75
55	Anthropogenic greenhouse gas contribution to flood risk in England and Wales in autumn 2000. <i>Nature</i> , 2011 , 470, 382-5	50.4	608
54	In defense of the traditional null hypothesis: remarks on the Trenberth and Curry WIREs opinion articles. <i>Wiley Interdisciplinary Reviews: Climate Change</i> , 2011 , 2, 931-934	8.4	11
53	Difficult but not impossible. <i>Nature Climate Change</i> , 2011 , 1, 72-72	21.4	18
52	Sensitivity of Twentieth-Century Sahel Rainfall to Sulfate Aerosol and CO2 Forcing. <i>Journal of Climate</i> , 2011 , 24, 4999-5014	4.4	106
51	Regional climate response to solar-radiation management. <i>Nature Geoscience</i> , 2010 , 3, 537-541	18.3	144
50	The Detection and Attribution of Human Influence on Climate. <i>Annual Review of Environment and Resources</i> , 2009 , 34, 1-16	17.2	55
49	Greenhouse-gas emission targets for limiting global warming to 2 degrees C. <i>Nature</i> , 2009 , 458, 1158-62	50.4	1707
48	Warming caused by cumulative carbon emissions towards the trillionth tonne. <i>Nature</i> , 2009 , 458, 1163-65	50.4	955
47	Are Changes in Global Precipitation Constrained by the Tropospheric Energy Budget?. <i>Journal of Climate</i> , 2009 , 22, 499-517	4.4	42
46	A Review of Uncertainties in Global Temperature Projections over the Twenty-First Century. <i>Journal of Climate</i> , 2008 , 21, 2651-2663	4.4	180
45	Constraints on Model Response to Greenhouse Gas Forcing and the Role of Subgrid-Scale Processes. <i>Journal of Climate</i> , 2008 , 21, 2384-2400	4.4	52
44	Towards constraining climate sensitivity by linear analysis of feedback patterns in thousands of perturbed-physics GCM simulations. <i>Climate Dynamics</i> , 2008 , 30, 175-190	4.2	159

43	Diagnosis of climate models in terms of transient climate response and feedback response time. <i>Atmospheric Science Letters</i> , 2008 , 9, 7-12	2.4	31
42	Regional probabilistic climate forecasts from a multithousand, multimodel ensemble of simulations. <i>Journal of Geophysical Research</i> , 2007 , 112,		11
41	Testing the Clausius-Clapeyron constraint on changes in extreme precipitation under CO2 warming. <i>Climate Dynamics</i> , 2007 , 28, 351-363	4.2	377
40	Estimates of Uncertainty in Predictions of Global Mean Surface Temperature. <i>Journal of Climate</i> , 2007 , 20, 843-855	4.4	25
39	Atmosphere. Call off the quest. <i>Science</i> , 2007 , 318, 582-3	33.3	78
38	The Detection and Attribution of Climate Change Using an Ensemble of Opportunity. <i>Journal of Climate</i> , 2007 , 20, 504-516	4.4	25
37	A Multimodel Update on the Detection and Attribution of Global Surface Warming. <i>Journal of Climate</i> , 2007 , 20, 517-530	4.4	17
36	Uncertainty in continental-scale temperature predictions. <i>Geophysical Research Letters</i> , 2006 , 33,	4.9	26
35	Incorporating model uncertainty into attribution of observed temperature change. <i>Geophysical Research Letters</i> , 2006 , 33,	4.9	48
34	Alternatives to stabilization scenarios. <i>Geophysical Research Letters</i> , 2006 , 33,	4.9	37
33	Two Approaches to Quantifying Uncertainty in Global Temperature Changes. <i>Journal of Climate</i> , 2006 , 19, 4785-4796	4.4	57
32	Quantifying anthropogenic influence on recent near-surface temperature change. <i>Surveys in Geophysics</i> , 2006 , 27, 491-544	7.6	40
31	Constraining climate forecasts: The role of prior assumptions. <i>Geophysical Research Letters</i> , 2005 , 32,	4.9	120
30	Attribution of global surface warming without dynamical models. <i>Geophysical Research Letters</i> , 2005 , 32, n/a-n/a	4.9	16
29	Constraints on climate change from a multi-thousand member ensemble of simulations. <i>Geophysical Research Letters</i> , 2005 , 32,	4.9	119
28	The End-to-End Attribution Problem: From Emissions to Impacts. <i>Climatic Change</i> , 2005 , 71, 303-318	4.5	113
27	Human contribution to the European heatwave of 2003. <i>Nature</i> , 2004 , 432, 610-4	50.4	990
26	The blame game. <i>Nature</i> , 2004 , 432, 551-2	50.4	35

25	Detection and attribution of changes in 20th century land precipitation. <i>Geophysical Research Letters</i> , 2004 , 31, n/a-n/a	4.9	78
24	Estimating signal amplitudes in optimal fingerprinting, part I: theory. <i>Climate Dynamics</i> , 2003 , 21, 477-491	4.2	309
23	Probable causes of late twentieth century tropospheric temperature trends. <i>Climate Dynamics</i> , 2003 , 21, 573-591	4.2	34
22	Liability for climate change. <i>Nature</i> , 2003 , 421, 891-2	50.4	274
21	Climate forecasting: possible or probable?. <i>Nature</i> , 2003 , 425, 242	50.4	18
20	Constraints on future changes in climate and the hydrologic cycle. <i>Nature</i> , 2002 , 419, 224-32	50.4	1810
19	Towards objective probabilistic climate forecasting. <i>Nature</i> , 2002 , 419, 228	50.4	161
18	Climate of the twentieth century: Detection of change and attribution of causes. <i>Weather</i> , 2002 , 57, 296-303	0.9	3
17	How linear is the Arctic Oscillation response to greenhouse gases?. <i>Journal of Geophysical Research</i> , 2002 , 107, ACL 1-1		72
16	Assessing the robustness of zonal mean climate change detection. <i>Geophysical Research Letters</i> , 2002 , 29, 26-1-26-4	4.9	13
15	Detecting anthropogenic influence with a multi-model ensemble. <i>Geophysical Research Letters</i> , 2002 , 29, 31-1-31-4	4.9	73
14	Estimation of natural and anthropogenic contributions to twentieth century temperature change. <i>Journal of Geophysical Research</i> , 2002 , 107, ACL 10-1		181
13	The role of stratospheric resolution in simulating the Arctic Oscillation response to greenhouse gases. <i>Geophysical Research Letters</i> , 2002 , 29, 138-1-138-4	4.9	29
12	Constraining climate model properties using optimal fingerprint detection methods. <i>Climate Dynamics</i> , 2001 , 18, 277-295	4.2	25
11	Allowing for solar forcing in the detection of human influence on tropospheric temperatures. <i>Geophysical Research Letters</i> , 2001 , 28, 1555-1558	4.9	7
10	Climate change. Uncertainty in the IPCC's Third Assessment Report. <i>Science</i> , 2001 , 293, 430-3	33.3	44
9	Sensitivity analysis of the climate of a chaotic system. <i>Tellus, Series A: Dynamic Meteorology and Oceanography</i> , 2000 , 52, 523-532	2	81
8	Constraining uncertainties in climate models using climate change detection techniques. <i>Geophysical Research Letters</i> , 2000 , 27, 569-572	4.9	37

7	Direct observations of skin-bulk SST variability. <i>Geophysical Research Letters</i> , 2000 , 27, 1171-1174	4.9	50
6	Potential for improved ATSR dual-view SST retrieval. <i>Geophysical Research Letters</i> , 1998 , 25, 3363-3366	4.9	3
5	Decadal predictability of North Atlantic sea surface temperature and climate. <i>Nature</i> , 1997 , 388, 563-567	5.4	315
4	Control of tropical instability waves in the Pacific. <i>Geophysical Research Letters</i> , 1995 , 22, 2581-2584	4.9	17
3	Temperature oscillations. <i>Nature</i> , 1992 , 359, 679-679	5.4	6
2	Model error in weather and climate forecasting		16
1	The scientific basis for climate change liability		3
