#	ARTICLE	IF	CITATIONS
1	Risk of developing asthma in young children with atopic eczema: A systematic review. <i>Journal of Allergy and Clinical Immunology</i> , 2007, 120, 565-569.	2.9	244
2	Guidelines: the doâ€™s, donâ€™ts and donâ€™t knows of feedback for clinical education. <i>Perspectives on Medical Education</i> , 2022, 4, 284-299.	3.5	226
3	Poor inhalation technique, even after inhalation instructions, in children with asthma. , 2000, 29, 39-42.		161
4	Allergic rhinitis is associated with poor asthma control in children with asthma. <i>Thorax</i> , 2012, 67, 582-587.	5.6	161
5	International prevalence of recurrent wheezing during the first year of life: variability, treatment patterns and use of health resources. <i>Thorax</i> , 2010, 65, 1004-1009.	5.6	129
6	Monitoring asthma in children. <i>European Respiratory Journal</i> , 2015, 45, 906-925.	6.7	114
7	International study of wheezing in infants: risk factors in affluent and non-affluent countries during the first year of life. <i>Pediatric Allergy and Immunology</i> , 2010, 21, 878-888.	2.6	110
8	Nonâ€ adherence in children with asthma reviewed: The need for improvement of asthma care and medical education. <i>Pediatric Allergy and Immunology</i> , 2015, 26, 197-205.	2.6	105
9	Illness perceptions: impact on self-management and control in asthma. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2010, 10, 194-199.	2.3	104
10	Sensitization patterns to food and inhalant allergens in childhood: A comparison of nonâ€sensitized, monosensitized, and polysensitized children. <i>Pediatric Allergy and Immunology</i> , 2011, 22, 166-171.	2.6	89
11	Shared decision making: Physiciansâ€™ preferred role, usual role and their perception of its key components. <i>Patient Education and Counseling</i> , 2020, 103, 77-82.	2.2	75
12	Global impact of asthma on children and adolescents' daily lives: The room to breathe survey. <i>Pediatric Pulmonology</i> , 2012, 47, 346-357.	2.0	60
13	Resident burnout: evaluating the role of the learning environment. <i>BMC Medical Education</i> , 2018, 18, 54.	2.4	60
14	Shared decision making, a buzz-word in the Netherlands, the pace quickens towards nationwide implementationâ€ . <i>Zeitschrift Fur Evidenz, Fortbildung Und Qualitat Im Gesundheitswesen</i> , 2017, 123-124, 69-74.	0.9	56
15	The learning environment and resident burnout: a national study. <i>Perspectives on Medical Education</i> , 2022, 7, 120-125.	3.5	49
16	Ciclesonide in wheezy preschool children with a positive asthma predictive index or atopy. <i>Respiratory Medicine</i> , 2011, 105, 1588-1595.	2.9	48
17	Prevalence and risk factors of wheeze in Dutch infants in their first year of life. <i>Pediatric Pulmonology</i> , 2010, 45, 149-156.	2.0	42
18	Asthma education and monitoring: what has been shown to work. <i>Paediatric Respiratory Reviews</i> , 2008, 9, 193-200.	1.8	41

#	ARTICLE	IF	CITATIONS
19	Episodic Viral Wheeze and Multiple Trigger Wheeze in preschool children: A useful distinction for clinicians?. Paediatric Respiratory Reviews, 2011, 12, 160-164.	1.8	40
20	Monitoring asthma in childhood: symptoms, exacerbations and quality of life. European Respiratory Review, 2015, 24, 187-193.	7.1	40
21	Effective follow-up consultations: the importance of patient-centered communication and shared decision making. Paediatric Respiratory Reviews, 2013, 14, 224-228.	1.8	38
22	The relationship between burnout, personality traits, and medical specialty. A national study among Dutch residents. Medical Teacher, 2019, 41, 584-590.	1.8	37
23	How Do Social Networks and Faculty Development Courses Affect Clinical Supervisors's Adoption of a Medical Education Innovation? An Exploratory Study. Academic Medicine, 2013, 88, 398-404.	1.6	35
24	Getting the basics right resolves most cases of uncontrolled and problematic asthma. Acta Paediatrica, International Journal of Paediatrics, 2015, 104, 916-921.	1.5	34
25	Severe episodic viral wheeze in preschool children: High risk of asthma at age 5-10 years. European Journal of Pediatrics, 2012, 171, 947-954.	2.7	31
26	Dietary prevention of allergic disease in children: Are current recommendations really based on good evidence?. Pediatric Allergy and Immunology, 2007, 18, 475-479.	2.6	30
27	A multinational study to compare prevalence of atopic dermatitis in the first year of life. Pediatric Allergy and Immunology, 2015, 26, 359-366.	2.6	30
28	Allergic rhinoconjunctivitis in children. BMJ: British Medical Journal, 2007, 335, 985-988.	2.3	29
29	Feedback and coaching. European Journal of Pediatrics, 2022, 181, 441-446.	2.7	29
30	Comparison between peak expiratory flow and FEV1 measurements on a home spirometer and on a pneumotachograph in children with asthma. Pediatric Pulmonology, 2007, 42, 813-818.	2.0	27
31	Predicting persistence of asthma in preschool wheezers: crystal balls or muddy waters?. Paediatric Respiratory Reviews, 2013, 14, 46-52.	1.8	27
32	Inhaled corticosteroids for recurrent respiratory symptoms in preschool children in general practice: Randomized controlled trial. Pulmonary Pharmacology and Therapeutics, 2008, 21, 88-97.	2.6	26
33	Development and Validation of the Scan of Postgraduate Educational Environment Domains (SPEED): A Brief Instrument to Assess the Educational Environment in Postgraduate Medical Education. PLoS ONE, 2015, 10, e0137872.	2.5	26
34	Is the MARS questionnaire a reliable measure of medication adherence in childhood asthma?. Journal of Asthma, 2016, 53, 1085-1089.	1.7	26
35	Recurrent wheeze in children with Down syndrome: is it asthma?. Acta Paediatrica, International Journal of Paediatrics, 2011, 100, e194-7.	1.5	25
36	Causes of recurrent pneumonia in children in a general hospital. Journal of Paediatrics and Child Health, 2013, 49, E208-12.	0.8	25

#	ARTICLE	IF	CITATIONS
37	Applicability of evidence from previous systematic reviews on immunotherapy in current practice of childhood asthma treatment: a GRADE (Grading of Recommendations Assessment, Development and) Tj ETQq1 1 0.784314 gBT /Over	1.7	14
38	Key issues in inhalation therapy in children. <i>Current Medical Research and Opinion</i> , 2005, 21, S27-S32.	1.9	24
39	The Asthma Predictive Index: Not a useful tool in clinical practice. <i>Journal of Allergy and Clinical Immunology</i> , 2011, 127, 293-294.	2.9	22
40	Inhaled corticosteroids should be the first line of treatment for children with asthma. <i>Paediatric Respiratory Reviews</i> , 2011, 12, 245-249.	1.8	22
41	Clinical practice. <i>European Journal of Pediatrics</i> , 2010, 169, 911-917.	2.7	21
42	How educational innovations and attention to competencies in postgraduate medical education relate to preparedness for practice: the key role of the learning environment. <i>Perspectives on Medical Education</i> , 2022, 4, 300-307.	3.5	21
43	Normal lung function in children with mild to moderate persistent asthma well controlled by inhaled corticosteroids. <i>Journal of Allergy and Clinical Immunology</i> , 2006, 118, 280-282.	2.9	20
44	State of the Evidence on Acute Asthma Management in Children: A Critical Appraisal of Systematic Reviews. <i>Pediatrics</i> , 2007, 120, 1334-1343.	2.1	19
45	High prevalence of sensitization to aeroallergens in children 4–fyr of age or younger with symptoms of allergic disease. <i>Pediatric Allergy and Immunology</i> , 2009, 20, 735-740.	2.6	19
46	Is home spirometry useful in diagnosing asthma in children with nonspecific respiratory symptoms?. <i>Pediatric Pulmonology</i> , 2010, 45, 326-332.	2.0	18
47	Evaluating the child with recurrent lower respiratory tract infections. <i>Paediatric Respiratory Reviews</i> , 2012, 13, 135-138.	1.8	17
48	Using communication skills to improve adherence in children with chronic disease: The adherence equation. <i>Paediatric Respiratory Reviews</i> , 2013, 14, 219-223.	1.8	17
49	Adherence to insulin pump treatment declines with increasing age in adolescents with type 1 diabetes mellitus. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2020, 109, 134-139.	1.5	17
50	Driving lesson or driving test?: A–metaphor to help faculty separate feedback from assessment. <i>Perspectives on Medical Education</i> , 2022, 10, 50-56.	3.5	17
51	General practitioners– prescribing behaviour as a determinant of poor persistence with inhaled corticosteroids in children with respiratory symptoms: mixed methods study. <i>BMJ Open</i> , 2013, 3, e002310.	1.9	16
52	Seasonal variation of diseases in children: a 6-year prospective cohort study in a general hospital. <i>European Journal of Pediatrics</i> , 2016, 175, 457-464.	2.7	16
53	Assessment of Controversial Pediatric Asthma Management Options Using GRADE. <i>Pediatrics</i> , 2012, 130, e658-e668.	2.1	15
54	Treatment adherence and level of control in moderate persistent asthma in children and adolescents treated with fluticasone and salmeterol. <i>Jornal De Pediatria</i> , 2019, 95, 69-75.	2.0	15

#	ARTICLE	IF	CITATIONS
55	Competency-based (CanMEDS) residency training programme in radiology: systematic design procedure, curriculum and success factors. <i>European Radiology</i> , 2010, 20, 967-977.	4.5	14
56	What are we preparing them for? Development of an inventory of tasks for medical, surgical and supportive specialties. <i>Medical Teacher</i> , 2013, 35, e1068-e1077.	1.8	14
57	The clinician's guide on monitoring children with asthma. <i>Paediatric Respiratory Reviews</i> , 2013, 14, 119-125.	1.8	14
58	Do consultants do what they say they do? Observational study of the extent to which clinicians involve their patients in the decision-making process. <i>BMJ Open</i> , 2022, 12, e056471.	1.9	14
59	Increase in atopic sensitization rate among Dutch children with symptoms of allergic disease between 1994 and 2014. <i>Pediatric Allergy and Immunology</i> , 2018, 29, 78-83.	2.6	13
60	Shared decision making, patient-centered communication and patient satisfaction – A cross-sectional analysis. <i>Patient Education and Counseling</i> , 2022, 105, 2145-2150.	2.2	13
61	Shared decision-making in the Netherlands: Progress is made, but not for all. Time to become inclusive to patients. <i>Zeitschrift Fur Evidenz, Fortbildung Und Qualitat Im Gesundheitswesen</i> , 2022, 171, 98-104.	0.9	13
62	Atopic dermatitis is associated with a fivefold increased risk of polysensitisation in children. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2017, 106, 485-488.	1.5	12
63	COVID-19: a unique learning opportunity if the well-being of learners and frontline workers is adequately supported. <i>Perspectives on Medical Education</i> , 2022, 9, 129-131.	3.5	12
64	Does a single measurement of exhaled nitric oxide predict asthma exacerbations?. <i>Archives of Disease in Childhood</i> , 2011, 96, 781-782.	1.9	11
65	Why do medical residents prefer paternalistic decision making? An interview study. <i>BMC Medical Education</i> , 2022, 22, 155.	2.4	11
66	Predictive value of specific IgE for clinical peanut allergy in children: relationship with eczema, asthma, and setting (primary or secondary care). <i>Clinical and Translational Allergy</i> , 2013, 3, 34.	3.2	10
67	Pneumonia and wheezing in the first year: An international perspective. <i>Pediatric Pulmonology</i> , 2015, 50, 1277-1285.	2.0	10
68	Implementing evidence-based medicine in a busy general hospital department: results and critical success factors. <i>BMJ Evidence-Based Medicine</i> , 2018, 23, 173-176.	3.5	10
69	Follow-up of children with asthma. , 2012, , 210-223.		10
70	Drug Delivery in Pediatric Patients with Asthma. <i>American Journal of Drug Delivery</i> , 2003, 1, 61-70.	0.6	9
71	Differences between observers in interpreting double-blind placebo-controlled food challenges: A randomized trial. <i>Pediatric Allergy and Immunology</i> , 2014, 25, 755-759.	2.6	9
72	Mealtime insulin bolus adherence and glycemic control in adolescents on insulin pump therapy. <i>European Journal of Pediatrics</i> , 2018, 177, 1831-1836.	2.7	9

#	ARTICLE	IF	CITATIONS
73	Central airways stenosis in school-aged children: differential diagnosis from asthma. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2003, 92, 266-266.	1.5	8
74	Integrating continuing medical education and faculty development into a single course: Effects on participants'™ behaviour. <i>Medical Teacher</i> , 2013, 35, e1594-e1597.	1.8	8
75	Long-term adherence to daily controller medication in children with asthma: The role of outpatient clinic visits. <i>Pediatric Pulmonology</i> , 2015, 50, 1060-1064.	2.0	8
76	The 'wandering needle'. <i>Pediatric Pulmonology</i> , 2003, 35, 152-154.	2.0	7
77	Asthma exacerbations in a subtropical area and the role of respiratory viruses: a cross-sectional study. <i>BMC Pulmonary Medicine</i> , 2018, 18, 109.	2.0	7
78	The physiology of learning: strategies clinical teachers can adopt to facilitate learning. <i>European Journal of Pediatrics</i> , 2022, 181, 429-433.	2.7	7
79	Poor inhalation technique, even after inhalation instructions, in children with asthma. <i>Pediatric Pulmonology</i> , 2000, 29, 39-42.	2.0	6
80	A boy with breathlessness, digital clubbing and central cyanosis. <i>European Journal of Pediatrics</i> , 2004, 163, 129-130.	2.7	5
81	New guidelines on recurrent wheeze in preschool children: implications for primary care. <i>Primary Care Respiratory Journal: Journal of the General Practice Airways Group</i> , 2008, 17, 243-245.	2.3	5
82	Workplace mentoring of residents in generic competencies by an independent coach. <i>Perspectives on Medical Education</i> , 2022, 7, 337-341.	3.5	5
83	Education makes people take their medication: myth or maxim?. <i>Breathe</i> , 2020, 16, 190338.	1.3	5
84	Shared Decision-making in Different Types of Decisions in Medical Specialist Consultations. <i>Journal of General Internal Medicine</i> , 2022, 37, 2966-2972.	2.6	5
85	Patients'™ preferred and perceived decision-making roles, and observed patient involvement in videotaped encounters with medical specialists. <i>Patient Education and Counseling</i> , 2022, 105, 2702-2707.	2.2	5
86	Partially hydrolysed whey and soy-based infant formulas did not prevent allergic disease in high-risk children. <i>Archives of Disease in Childhood: Education and Practice Edition</i> , 2012, 97, 120-120.	0.5	4
87	Impact of deliberate practice on evidence-based medicine attitudes and behaviours of health care professionals. <i>Perspectives on Medical Education</i> , 2022, 10, 118-124.	3.5	4
88	Association between allergen component sensitisation and clinical allergic disease in children. <i>Allergologia Et Immunopathologia</i> , 2022, 50, 131-141.	1.7	4
89	Hypoallergenicity assessment of an extensively hydrolyzed whey-protein formula in cow's™ milk allergic infants. <i>Pediatric Allergy and Immunology</i> , 2022, 33, .	2.6	4
90	Can we trust what parents tell us? A systematic review. <i>Paediatric Respiratory Reviews</i> , 2017, 24, 65-71.	1.8	3

#	ARTICLE	IF	CITATIONS
91	To track or not to track: wheeze phenotypes in preschool children. <i>European Respiratory Journal</i> , 2018, 51, 1800042.	6.7	3
92	Why are children with asthma bullied? A risk factor analysis. <i>Archives of Disease in Childhood</i> , 2022, 107, 612-615.	1.9	3
93	Reliability of residents' assessments of their postgraduate medical education learning environment: an observational study. <i>BMC Medical Education</i> , 2019, 19, 450.	2.4	2
94	Question 6: What is the use of allergy testing in children with asthma?. <i>Paediatric Respiratory Reviews</i> , 2021, 37, 57-63.	1.8	2
95	The application of the tracer method with peer observation and formative feedback for professional development in clinical practice: a scoping review. <i>Perspectives on Medical Education</i> , 2021, 11, 15.	3.5	2
96	Effectiveness of Individual Feedback and Coaching on Shared Decision-making Consultations in Oncology Care: Protocol for a Randomized Clinical Trial. <i>JMIR Research Protocols</i> , 2022, 11, e35543.	1.0	2
97	Commentaries on "Addition of long-acting beta-agonists to inhaled corticosteroids for chronic asthma in children". <i>Evidence-Based Child Health: A Cochrane Review Journal</i> , 2010, 5, 959-966.	2.0	1
98	Communication & Collaboration, on being a paediatrician. <i>Paediatric Respiratory Reviews</i> , 2013, 14, 207-208.	1.8	1
99	Patient coaching in secondary care: healthcare professionals' views on target group, intervention and coach profile. <i>International Journal for Quality in Health Care</i> , 2021, 33, .	1.8	1
100	Commentary on "Intravenous aminophylline for acute severe asthma in children over two years receiving inhaled bronchodilators". <i>Evidence-Based Child Health: A Cochrane Review Journal</i> , 2006, 1, 149-150.	2.0	0
101	Predicting the outcome of early childhood wheeze: mission impossible. <i>Primary Care Respiratory Journal: Journal of the General Practice Airways Group</i> , 2014, 23, 10-11.	2.3	0
102	Treatment adherence and level of control in moderate persistent asthma in children and adolescents treated with fluticasone and salmeterol. <i>Jornal De Pediatria (Versão Em Português)</i> , 2019, 95, 69-75.	0.2	0
103	Exploratory study of language paediatricians use to promote adherence to long-term controller medication in children with asthma. <i>Allergologia Et Immunopathologia</i> , 2020, 48, 116-123.	1.7	0
104	The art and science of clinical pediatric education. <i>European Journal of Pediatrics</i> , 2022, 181, 427-428.	2.7	0
