#	ARTICLE	IF	CITATIONS
1	Outcome measures and methods of assessment of soft tissue augmentation interventions in the context of dental implant therapy: A systematic review of clinical studies published in the last 10 years. <i>Journal of Clinical Periodontology</i> , 2023, 50, 83-95.	2.3	10
2	Outcome measures and methods of assessment of soft tissue augmentation interventions in the context of dental implant therapy: A systematic review of clinical studies published in the last 10 years. <i>Clinical Oral Implants Research</i> , 2023, 34, 84-96.	1.9	5
3	Randomized controlled pilot study assessing efficacy, efficiency, and patient-reported outcomes measures of chairside and labside single-tooth restorations. <i>Journal of Esthetic and Restorative Dentistry</i> , 2023, 35, 74-83.	1.8	2
4	Effect of Schneiderian membrane integrity on bone formation in sinus augmentation: An experimental study in rabbits. <i>Journal of Clinical Periodontology</i> , 2022, 49, 76-83.	2.3	5
5	Immediate implant placement in conjunction with guided bone regeneration and/or connective tissue grafts: an experimental study in canines. <i>Journal of Periodontal and Implant Science</i> , 2022, 51, 170-180.	0.9	1
6	Dimensional ridge changes in conjunction with four implant timing protocols and two types of soft tissue grafts: A pilot pre-clinical study. <i>Journal of Clinical Periodontology</i> , 2022, , .	2.3	2
7	Informative title: Guided bone regeneration with and without rhBMP-2: 17-year results of a randomized controlled clinical trial. <i>Clinical Oral Implants Research</i> , 2022, 33, 302-312.	1.9	7
8	Cemented versus screw-retained zirconia-based single-implant restorations: 5-year results of a randomized controlled clinical trial. <i>Clinical Oral Implants Research</i> , 2022, 33, 353-361.	1.9	6
9	Randomized controlled clinical study comparing two types of two-piece dental implants supporting fixed restorations—Results at 8 years of loading. <i>Clinical Oral Implants Research</i> , 2022, 33, 333-341.	1.9	4
10	Effect of collagen membrane and of bone substitute on lateral bone augmentation with titanium mesh: An experimental in vivo study. <i>Clinical Oral Implants Research</i> , 2022, 33, 413-423.	1.9	9
11	Five-year randomized controlled clinical study comparing cemented and screw-retained zirconia-based implant-supported single crowns. <i>Clinical Oral Implants Research</i> , 2022, 33, 537-547.	1.9	6
12	Interproximal contact loss at implant sites: a retrospective clinical study with a 10-year follow-up. <i>Clinical Oral Implants Research</i> , 2022, 33, 482-491.	1.9	5
13	Membrane fixation enhances guided bone regeneration in standardized calvarial defects: A pre-clinical study. <i>Journal of Clinical Periodontology</i> , 2022, 49, 177-187.	2.3	15
14	On the discrepancy between professionally assessed and patient-reported outcome measures. <i>Journal of Periodontal and Implant Science</i> , 2022, 52, 89.	0.9	5
15	Restorative angle of zirconia restorations cemented on non-original titanium bases influences the initial marginal bone loss: 5-year results of a prospective cohort study. <i>Clinical Oral Implants Research</i> , 2022, 33, 745-756.	1.9	17
16	Effect of collagen membrane fixation on ridge volume stability and new bone formation following guided bone regeneration. <i>Journal of Clinical Periodontology</i> , 2022, 49, 684-693.	2.3	8
17	Buccal soft tissue dehiscence defects at dental implants—associated factors and frequency of occurrence: A systematic review and meta-analysis. <i>Clinical Oral Implants Research</i> , 2022, 33, 109-124.	1.9	9
18	The influence of thin as compared to thick peri-implant soft tissues on aesthetic outcomes: A systematic review and meta-analysis. <i>Clinical Oral Implants Research</i> , 2022, 33, 56-71.	1.9	15

#	ARTICLE	IF	CITATIONS
19	Anterior implant restorations with a convex emergence profile increase the frequency of recession: 12-month results of a randomized controlled clinical trial. <i>Journal of Clinical Periodontology</i> , 2022, 49, 1145-1157.	2.3	15
20	Augmentation of soft tissue volume at pontic sites: a comparison between a cross-linked and a non-cross-linked collagen matrix. <i>Clinical Oral Investigations</i> , 2021, 25, 1535-1545.	1.4	13
21	Contour changes of peri-implant tissues are minimal and similar for a one- and a two-piece implant system over 12 years. <i>Clinical Oral Investigations</i> , 2021, 25, 719-727.	1.4	4
22	Clinical and histological comparison of the soft tissue morphology between zirconia and titanium dental implants under healthy and experimental mucositis conditions – A randomized controlled clinical trial. <i>Journal of Clinical Periodontology</i> , 2021, 48, 721-733.	2.3	16
23	Short communication: Cemented implant reconstructions are associated with less marginal bone loss than screw-retained reconstructions at 3 and 5 years of loading. <i>Clinical Oral Implants Research</i> , 2021, 32, 651-656.	1.9	3
24	Soft tissue management at implants: Summary and consensus statements of group 2. The 6th EAO Consensus Conference 2021. <i>Clinical Oral Implants Research</i> , 2021, 32, 174-180.	1.9	33
25	Two short implants versus one short implant with a cantilever: 5-year results of a randomized clinical trial. <i>Journal of Clinical Periodontology</i> , 2021, 48, 1480-1490.	2.3	11
26	Secondary stability achieved in dental implants with a calcium-coated sandblasted, large-grit, acid-etched (SLA) surface and a chemically modified SLA surface placed without mechanical engagement: A preclinical study. <i>Clinical Oral Implants Research</i> , 2021, 32, 1474-1483.	1.9	5
27	Primary bone augmentation leads to equally stable marginal tissue conditions comparing the use of xenograft blocks infused with BMP-2 and autogenous bone blocks: A 3D analysis after 3 years. <i>Clinical Oral Implants Research</i> , 2021, 32, 1433-1443.	1.9	5
28	Production time, effectiveness and costs of additive and subtractive computer-aided manufacturing (CAM) of implant prostheses: A systematic review. <i>Clinical Oral Implants Research</i> , 2021, 32, 289-302.	1.9	16
29	Augmentation of keratinized tissue at tooth and implant sites by using autogenous grafts and collagen-based soft-tissue substitutes. <i>Journal of Clinical Periodontology</i> , 2020, 47, 64-71.	2.3	12
30	Deproteinized bovine bone mineral is non-inferior to deproteinized bovine bone mineral with 10% collagen in maintaining the soft tissue contour post-extraction: A randomized trial. <i>Clinical Oral Implants Research</i> , 2020, 31, 294-301.	1.9	14
31	Late implant placement following ridge preservation versus early implant placement: A pilot randomized clinical trial for periodontally compromised non-molar extraction sites. <i>Journal of Clinical Periodontology</i> , 2020, 47, 247-256.	2.3	15
32	Lateral onlay grafting using different combinations of soft-type synthetic block grafts and resorbable collagen membranes: An experimental in vivo study. <i>Clinical Oral Implants Research</i> , 2020, 31, 303-314.	1.9	8
33	Long-term clinical and radiographic results after treatment or no treatment of small buccal bone dehiscences at posterior dental implants: A randomized, controlled clinical trial. <i>Clinical Oral Implants Research</i> , 2020, 31, 517-525.	1.9	11
34	Dimensional changes of the maxillary sinus augmented with a collagenated synthetic bone block or synthetic bone particulates: A pre-clinical study in rabbits. <i>Journal of Clinical Periodontology</i> , 2020, 47, 1416-1426.	2.3	10
35	Changes in mucogingival junction after an apically positioned flap with collagen matrix at sites with or without previous guided bone regeneration: A prospective comparative cohort study. <i>Clinical Oral Implants Research</i> , 2020, 31, 1199-1206.	1.9	5
36	Explorative randomized controlled study comparing soft tissue thickness, contour changes, and soft tissue handling of two ridge preservation techniques and spontaneous healing two months after tooth extraction. <i>Clinical Oral Implants Research</i> , 2020, 31, 565-574.	1.9	25

#	ARTICLE	IF	CITATIONS
37	Randomized controlled clinical trial comparing implant sites augmented with a volumeâ€stable collagen matrix or an autogenous connective tissue graft: 3â€year data after insertion of reconstructions. <i>Journal of Clinical Periodontology</i> , 2020, 47, 630-639.	2.3	65
38	Volume stability of the augmented sinus using a collagenated bovine bone mineral grafted in case of a perforated Schneiderian membrane: An experimental study in rabbits. <i>Journal of Clinical Periodontology</i> , 2020, 47, 649-656.	2.3	6
39	Local tissue effects of various barrier membranes in a rat subcutaneous model. <i>Journal of Periodontal and Implant Science</i> , 2020, 50, 327.	0.9	6
40	The effects of hard and soft tissue grafting and individualization of healing abutments at immediate implants: an experimental study in dogs. <i>Journal of Periodontal and Implant Science</i> , 2019, 49, 171.	0.9	5
41	Prospective randomized controlled clinical study comparing two types of twoâ€piece dental implants supporting fixed reconstructionsâ€Results at 5Âyears of loading. <i>Clinical Oral Implants Research</i> , 2019, 30, 1126-1133.	1.9	14
42	Clinical and patientâ€reported outcomes of implants placed in autogenous bone grafts and implants placed in native bone: A caseâ€control study with a followâ€up of 5â€16Âyears. <i>Clinical Oral Implants Research</i> , 2019, 30, 242-251.	1.9	17
43	The amount of keratinized mucosa may not influence periâ€implant health in compliant patients: A retrospective 5â€year analysis. <i>Journal of Clinical Periodontology</i> , 2019, 46, 354-362.	2.3	37
44	Comparison between two bone substitutes for alveolar ridge preservation after tooth extraction: Coneâ€beam computed tomography results of a nonâ€inferiority randomized controlled trial. <i>Journal of Clinical Periodontology</i> , 2019, 46, 373-381.	2.3	19
45	Management of the extraction socket and timing of implant placement: Consensus report and clinical recommendations of group 3 of the <sc>XV</sc> European Workshop in Periodontology. <i>Journal of Clinical Periodontology</i> , 2019, 46, 183-194.	2.3	109
46	Randomized clinical study using xenograft blocks loaded with bone morphogenetic proteinâ€2 or autogenous bone blocks for ridge augmentation â€ A threeâ€dimensional analysis. <i>Clinical Oral Implants Research</i> , 2019, 30, 872-881.	1.9	23
47	Veneered zirconia abutments cemented on nonâ€original titanium bases: 1â€year results of a prospective case series. <i>Clinical Oral Implants Research</i> , 2019, 30, 735-744.	1.9	12
48	Tissue integration of zirconia and titanium implants with and without buccal dehiscence defectsâ€A histologic and radiographic preclinical study. <i>Clinical Oral Implants Research</i> , 2019, 30, 660-669.	1.9	6
49	Influence of wound closure on volume stability with the application of different GBR materials: an <i>in vitro</i> cone-beam computed tomographic study. <i>Journal of Periodontal and Implant Science</i> , 2019, 49, 14.	0.9	10
50	Cemented vs screwâ€retained zirconiaâ€based single implant reconstructions: A 3â€year prospective randomized controlled clinical trial. <i>Clinical Implant Dentistry and Related Research</i> , 2019, 21, 578-585.	1.6	17
51	Alveolar ridge preservation in the posterior maxilla reduces vertical dimensional change: A randomized controlled clinical trial. <i>Clinical Oral Implants Research</i> , 2019, 30, 515-523.	1.9	42
52	Soft tissue substitutes to increase gingival thickness: Histologic and volumetric analyses in dogs. <i>Journal of Clinical Periodontology</i> , 2019, 46, 96-104.	2.3	11
53	Healing kinetics of oral soft tissue wounds treated with recombinant epidermal growth factor: Translation from a canine model. <i>Journal of Clinical Periodontology</i> , 2019, 46, 105-117.	2.3	8
54	Effects of soft tissue augmentation procedures on periâ€implant health or disease: A systematic review and metaâ€analysis. <i>Clinical Oral Implants Research</i> , 2018, 29, 32-49.	1.9	251

#	ARTICLE	IF	CITATIONS
55	Effects of lateral bone augmentation procedures on peri-implant health or disease: A systematic review and meta-analysis. <i>Clinical Oral Implants Research</i> , 2018, 29, 18-31.	1.9	49
56	Randomized controlled clinical study assessing two membranes for guided bone regeneration of peri-implant bone defects: 3-year results. <i>Clinical Oral Implants Research</i> , 2018, 29, 499-507.	1.9	30
57	Osteogenic efficacy of BMP-2 mixed with hydrogel and bone substitute in peri-implant dehiscence defects in dogs: 16 weeks of healing. <i>Clinical Oral Implants Research</i> , 2018, 29, 300-308.	1.9	12
58	Report of a human autopsy case in maxillary sinuses augmented using a synthetic bone substitute: Micro-computed tomographic and histologic observations. <i>Clinical Oral Implants Research</i> , 2018, 29, 339-345.	1.9	7
59	Non-interventional 1-year follow-up study of peri-implant soft tissues following previous soft tissue augmentation and crown insertion in single-tooth gaps. <i>Journal of Clinical Periodontology</i> , 2018, 45, 504-512.	2.3	48
60	Volumetric changes following ridge preservation or spontaneous healing and early implant placement with simultaneous guided bone regeneration. <i>Journal of Clinical Periodontology</i> , 2018, 45, 484-494.	2.3	9
61	Fracture strength of zirconia implant abutments on narrow diameter implants with internal and external implant abutment connections: A study on the titanium resin base concept. <i>Clinical Oral Implants Research</i> , 2018, 29, 411-423.	1.9	40
62	Randomized, controlled clinical two-centre study using xenogeneic block grafts loaded with recombinant human bone morphogenetic protein-2 or autogenous bone blocks for lateral ridge augmentation. <i>Journal of Clinical Periodontology</i> , 2018, 45, 265-276.	2.3	32
63	Early histological, microbiological, radiological, and clinical response to cemented and screw-retained all-ceramic single crowns. <i>Clinical Oral Implants Research</i> , 2018, 29, 996-1006.	1.9	16
64	Tissue integration of zirconia and titanium implants with and without buccal dehiscence defects. <i>Journal of Periodontal and Implant Science</i> , 2018, 48, 182.	0.9	5
65	Is the use of digital technologies for the fabrication of implant-supported reconstructions more efficient and/or more effective than conventional techniques: A systematic review. <i>Clinical Oral Implants Research</i> , 2018, 29, 184-195.	1.9	67
66	Randomized controlled clinical study of veneered zirconia abutments for single implant crowns: Clinical, histological, and microbiological outcomes. <i>Clinical Implant Dentistry and Related Research</i> , 2018, 20, 988-996.	1.6	8
67	Randomized controlled multicentre study comparing short dental implants (6 mm) versus longer dental implants (11-15 mm) in combination with sinus floor elevation procedures: 5-year data. <i>Journal of Clinical Periodontology</i> , 2018, 45, 1465-1474.	2.3	49
68	Precision of digital implant models compared to conventional implant models for posterior single implant crowns: A within-subject comparison. <i>Clinical Oral Implants Research</i> , 2018, 29, 931-936.	1.9	22
69	Profilometric changes of peri-implant tissues over 5 years: A randomized controlled trial comparing a one- and two-piece implant system. <i>Clinical Oral Implants Research</i> , 2018, 29, 864-872.	1.9	16
70	Short dental implants (6 mm) versus long dental implants (11-15 mm) in combination with sinus floor elevation procedures: 3-year results from a multicentre, randomized, controlled clinical trial. <i>Journal of Clinical Periodontology</i> , 2017, 44, 438-445.	2.3	76
71	Randomized controlled clinical study comparing a volume-stable collagen matrix to autogenous connective tissue grafts for soft tissue augmentation at implant sites: linear volumetric soft tissue changes up to 3 months. <i>Journal of Clinical Periodontology</i> , 2017, 44, 446-453.	2.3	87
72	Biodegradation and tissue integration of various polyethylene glycol matrices: a comparative study in rabbits. <i>Clinical Oral Implants Research</i> , 2017, 28, e244-e251.	1.9	11

#	ARTICLE	IF	CITATIONS
73	Effect of ridge preservation for early implant placement – is there a need to remove the biomaterial?. Journal of Clinical Periodontology, 2017, 44, 556-565.	2.3	17
74	A systematic review of the survival and complication rates of resin-bonded fixed dental prostheses after a mean observation period of at least 5 years. Clinical Oral Implants Research, 2017, 28, 1421-1432.	1.9	97
75	The influence of the emergence profile on the amount of undetected cement excess after delivery of cement-retained implant reconstructions. Clinical Oral Implants Research, 2017, 28, 1515-1522.	1.9	30
76	Randomized controlled clinical trial comparing one-piece and two-piece dental implants supporting fixed and removable dental prostheses: 4- to 6-year observations. Clinical Oral Implants Research, 2017, 28, 1553-1559.	1.9	24
77	Guided bone regeneration with particulate vs. block xenogenic bone substitutes: a pilot cone beam computed tomographic investigation. Clinical Oral Implants Research, 2017, 28, e262-e270.	1.9	32
78	Guided bone regeneration at zirconia and titanium dental implants: a pilot histological investigation. Clinical Oral Implants Research, 2017, 28, 1592-1599.	1.9	19
79	Treatment concepts for the posterior maxilla and mandible: short implants versus long implants in augmented bone. Journal of Periodontal and Implant Science, 2017, 47, 2.	0.9	49
