#	ARTICLE	IF	CITATIONS
1	Using Intervention Mapping to Develop a Decision Support Systemâ€‘Based Smartphone App (selfBACK) to Support Self-management of Nonspecific Low Back Pain: Development and Usability Study. Journal of Medical Internet Research, 2022, 24, e26555.	2.1	11
2	Pain management in eldercare employees â€‘ the role of managers in addressing musculoskeletal pain and pain-related sickness absence. BMC Public Health, 2022, 22, 432.	1.2	1
3	Effectiveness of App-Delivered, Tailored Self-management Support for Adults With Lower Back Painâ€‘Related Disability. JAMA Internal Medicine, 2021, 181, 1288.	2.6	67
4	Nation-Wide Dissemination of a Digital Checklist to Improve Work Environment in the Eldercare Sector in Denmark. Frontiers in Public Health, 2020, 8, 502106.	1.3	0
5	Barriers and facilitators to patient uptake and utilisation of digital interventions for the self-management of low back pain: a systematic review of qualitative studies. BMJ Open, 2020, 10, e038800.	0.8	30
6	Evaluation and Dissemination of a Checklist to Improve Implementation of Work Environment Initiatives in the Eldercare Sector: Protocol for a Prospective Observational Study. JMIR Research Protocols, 2020, 9, e16039.	0.5	1
7	App-Delivered Self-Management Intervention Trial selfBACK for People With Low Back Pain: Protocol for Implementation and Process Evaluation. JMIR Research Protocols, 2020, 9, e20308.	0.5	9
8	Mechanisms for reducing low back pain: a mediation analysis of a multifaceted intervention in workers in elderly care. International Archives of Occupational and Environmental Health, 2019, 92, 49-58.	1.1	21
9	An App-Delivered Self-Management Program for People With Low Back Pain: Protocol for the selfBACK Randomized Controlled Trial. JMIR Research Protocols, 2019, 8, e14720.	0.5	34
10	Operationalizing a model to quantify implementation of a multi-component intervention in a stepped-wedge trial. Implementation Science, 2018, 13, 26.	2.5	12
11	Recall Bias in Low Back Pain Among Workers. Spine, 2018, 43, E727-E733.	1.0	20
12	Identifying a practice-based implementation framework for sustainable interventions for improving the evolving working environment: Hitting the Moving Target Framework. Applied Ergonomics, 2018, 67, 170-177.	1.7	6
13	GLA:DÂ® Back group-based patient education integrated with exercises to support self-management of back painÂ– development, theories and scientific evidenceÂ–. BMC Musculoskeletal Disorders, 2018, 19, 418.	0.8	40
14	Improving work for the body â€‘ a participatory ergonomic intervention aiming at reducing physical exertion and musculoskeletal pain among childcare workers (the TOY-project): study protocol for a wait-list cluster-randomized controlled trial. Trials, 2018, 19, 411.	0.7	11
15	Processes, barriers and facilitators to implementation of a participatory ergonomics program among eldercare workers. Applied Ergonomics, 2017, 58, 491-499.	1.7	40
16	A multi-faceted workplace intervention targeting low back pain was effective for physical work demands and maladaptive pain behaviours, but not for work ability and sickness absence: Stepped wedge cluster randomised trial. Scandinavian Journal of Public Health, 2016, 44, 560-570.	1.2	33
17	A multifaceted workplace intervention for low back pain in nurses' aides. Pain, 2015, 156, 1786-1794.	2.0	46
18	Physical Capacity and Risk for Long-Term Sickness Absence. Journal of Occupational and Environmental Medicine, 2015, 57, 526-530.	0.9	13

#	ARTICLE	IF	CITATIONS
19	Adoption of workplaces and reach of employees for a multi-faceted intervention targeting low back pain among nursesâ€™ aides. BMC Medical Research Methodology, 2014, 14, 60.	1.4	18
20	The association between health and sickness absence among Danish and non-Western immigrant cleaners in Denmark. International Archives of Occupational and Environmental Health, 2013, 86, 397-405.	1.1	21
21	Prevention of low back pain and its consequences among nursesâ€™ aides in elderly care: a stepped-wedge multi-faceted cluster-randomized controlled trial. BMC Public Health, 2013, 13, 1088.	1.2	51
22	Does Self-Assessed Physical Capacity Predict Development of Low Back Pain Among Health Care Workers? A 2-Year Follow-up Study. Spine, 2013, 38, 272-276.	1.0	18
23	Participation of Danish and immigrant cleaners in a 1-year worksite intervention preventing physical deterioration. Ergonomics, 2012, 55, 256-264.	1.1	14
24	Associations between psychosocial work environment and hypertension among non-Western immigrant and Danish cleaners. International Archives of Occupational and Environmental Health, 2012, 85, 829-835.	1.1	17
25	Psychosocial work environment among immigrant and Danish cleaners. International Archives of Occupational and Environmental Health, 2012, 85, 89-95.	1.1	12
26	Health disparities between immigrant and Danish cleaners. International Archives of Occupational and Environmental Health, 2011, 84, 665-674.	1.1	30
27	Successful Reach and Adoption of a workplace health promotion RCT targeting a group of high-risk workers. BMC Medical Research Methodology, 2010, 10, 56.	1.4	19
