#	ARTICLE	IF	CITATIONS
1	Top-down attentional control for distractor locations: The benefit of precuing distractor locations on target localization and discrimination.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2010, 36, 303-316.	0.9	35
2	Persuasive feedback model for inducing energy conservation behaviors of building users based on interaction with a virtual object. <i>Energy and Buildings</i> , 2012, 45, 106-115.	6.7	33
3	The role of active inhibitory control in psychological well-being and mindfulness. <i>Personality and Individual Differences</i> , 2012, 53, 618-621.	2.9	29
4	Location negative priming in identity discrimination relies on location repetition. <i>Perception & Psychophysics</i> , 2005, 67, 789-801.	2.3	15
5	Revisiting the role of probe distractors in negative priming: Location negative priming is observed when probe distractors are consistently absent. <i>Attention, Perception, and Psychophysics</i> , 2009, 71, 1072-1082.	1.3	14
6	Controlled Processing in Single-Prime Negative Priming. <i>Experimental Psychology</i> , 2008, 55, 402-408.	0.7	13
7	Active inhibition of a distractor word: The distractor precue benefit in the Stroop color-naming task.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2011, 37, 799-812.	0.9	13
8	Attentional demand and memory retrieval in negative priming. <i>Psychological Research</i> , 2008, 72, 249-260.	1.7	11
9	Revisiting the primeâ€œprobe contextual similarity effect on negative priming: The impact of cue variability. <i>European Journal of Cognitive Psychology</i> , 2009, 21, 484-500.	1.3	10
10	Inhibition of return to negative emotion: Evidence from an emotional expression detection task.. <i>Emotion</i> , 2010, 10, 272-277.	1.8	9
11	Distractors of low activation can produce negative priming. <i>Memory and Cognition</i> , 2004, 32, 979-989.	1.6	8
12	Dissociations between identity and location negative priming. <i>Acta Psychologica</i> , 2011, 136, 81-89.	1.5	8
13	On the control of single-prime negative priming: The effects of practice and time course.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2009, 35, 1286-1295.	0.9	7
14	Role of attentional tags in working memory-driven attentional capture.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2014, 40, 1301-1307.	0.9	6
15	Location-response binding and inhibition of return in a detection task. <i>Attention, Perception, and Psychophysics</i> , 2021, 83, 1992-2001.	1.3	6
16	Inhibition of return lasts longer at repeatedly stimulated locations than at novel locations. <i>Psychonomic Bulletin and Review</i> , 2006, 13, 896-901.	2.8	5
17	Exogenous Cuing of Distractor Location Facilitates Location Selection by Inhibition of Return. <i>Experimental Psychology</i> , 2009, 56, 121-127.	0.7	5
18	Contextual Similarity Between Successive Targets Modulates Inhibition of Return in the Target-Target Paradigm. <i>Frontiers in Psychology</i> , 2020, 11, 2052.	2.1	5

#	ARTICLE	IF	CITATIONS
19	Probe distractors can influence negative priming by perceptual grouping. <i>Perception & Psychophysics</i> , 2004, 66, 208-218.	2.3	4
20	Strategic Control Modulates Working Memory-Driven Attentional Capture. <i>Experimental Psychology</i> , 2013, 60, 3-11.	0.7	4
21	Target-to-target repetition cost and location negative priming are dissociable: Evidence for different mechanisms.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2011, 37, 1074-1082.	0.9	2
22	Locus of single-prime negative priming: The role of perceptual form. <i>Acta Psychologica</i> , 2013, 143, 303-309.	1.5	2
23	The role of awareness in the cognitive control of single-prime negative priming. <i>Consciousness and Cognition</i> , 2018, 57, 94-105.	1.5	2
24	Attention modulates the contextual similarity effect in negative priming: evidence from task demand and attentional capture. <i>Memory</i> , 2022, 30, 895-914.	1.7	2
25	Proactive inhibitory control of emotional distractors: Evidence for the benefit of precuing emotional distractors. <i>Visual Cognition</i> , 2019, 27, 66-77.	1.6	1
26	Who is more flexible?â€”Awareness of changing context but not working memory capacity modulates inhibitory control. <i>Acta Psychologica</i> , 2018, 185, 41-51.	1.5	0
