|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | An Official American Thoracic Society/European Respiratory Society Statement: Key Concepts and Advances in Pulmonary Rehabilitation. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2013, 188, e13-e64. | 5.6  | 2,668     |
| 2  | Update on Prevalence of Pain in Patients With Cancer: Systematic Review and Meta-Analysis. <i>Journal of Pain and Symptom Management</i> , 2016, 51, 1070-1090.e9.                                                           | 1.2  | 1,117     |
| 3  | Definition and recommendations for advance care planning: an international consensus supported by the European Association for Palliative Care. <i>Lancet Oncology</i> , The, 2017, 18, e543-e551.                           | 10.7 | 765       |
| 4  | Persistent symptoms 3â€¦months after a SARS-CoV-2 infection: the post-COVID-19 syndrome?. <i>ERJ Open Research</i> , 2020, 6, 00542-2020.                                                                                    | 2.6  | 554       |
| 5  | Efficacy of Advance Care Planning: A Systematic Review and Meta-Analysis. <i>Journal of the American Medical Directors Association</i> , 2014, 15, 477-489.                                                                  | 2.5  | 553       |
| 6  | Low physical functioning and impaired performance of activities of daily life in COVID-19 patients who survived hospitalisation. <i>European Respiratory Journal</i> , 2020, 56, 2002096.                                    | 6.7  | 211       |
| 7  | Differential response to pulmonary rehabilitation in COPD: multidimensional profiling. <i>European Respiratory Journal</i> , 2015, 46, 1625-1635.                                                                            | 6.7  | 180       |
| 8  | Symptoms, Comorbidities, and Health Care in Advanced Chronic Obstructive Pulmonary Disease or Chronic Heart Failure. <i>Journal of Palliative Medicine</i> , 2011, 14, 735-743.                                              | 1.1  | 160       |
| 9  | Definition of a COPD self-management intervention: International Expert Group consensus. <i>European Respiratory Journal</i> , 2016, 48, 46-54.                                                                              | 6.7  | 154       |
| 10 | Responsiveness and MCID Estimates for CAT, CCQ, and HADS in Patients With COPD Undergoing Pulmonary Rehabilitation: A Prospective Analysis. <i>Journal of the American Medical Directors Association</i> , 2017, 18, 53-58.  | 2.5  | 123       |
| 11 | A Call for High-Quality Advance Care Planning in Outpatients With Severe COPD or Chronic Heart Failure. <i>Chest</i> , 2011, 139, 1081-1088.                                                                                 | 0.8  | 122       |
| 12 | Palliative care for people living with heart failure: European Association for Palliative Care Task Force expert position statement. <i>Cardiovascular Research</i> , 2020, 116, 12-27.                                      | 3.8  | 111       |
| 13 | Advance care planning in COPD. <i>Respirology</i> , 2012, 17, 72-78.                                                                                                                                                         | 2.3  | 106       |
| 14 | Symptoms of anxiety and depression in COPD patients entering pulmonary rehabilitation. <i>Chronic Respiratory Disease</i> , 2010, 7, 147-157.                                                                                | 2.4  | 102       |
| 15 | Advance care planning for patients with chronic respiratory diseases: a systematic review of preferences and practices. <i>Thorax</i> , 2018, 73, 222-230.                                                                   | 5.6  | 90        |
| 16 | Informal caregivers of patients with COPD: Home Sweet Home?. <i>European Respiratory Review</i> , 2015, 24, 498-504.                                                                                                         | 7.1  | 89        |
| 17 | Predicting Changes in Preferences for Life-Sustaining Treatment Among Patients With Advanced Chronic Organ Failure. <i>Chest</i> , 2012, 141, 1251-1259.                                                                     | 0.8  | 79        |
| 18 | Construct validity of the Post-COVID-19 Functional Status Scale in adult subjects with COVID-19. <i>Health and Quality of Life Outcomes</i> , 2021, 19, 40.                                                                  | 2.4  | 79        |

| #  | ARTICLE                                                                                                                                                                                                                                       | IF  | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Recovery from COVID-19: a sprint or marathon? 6-month follow-up data from online long COVID-19 support group members. <i>ERJ Open Research</i> , 2021, 7, 00141-2021.                                                                         | 2.6 | 79        |
| 20 | Within-Day Test-Retest Reliability of the Timed Up & Go Test in Patients With Advanced Chronic Organ Failure. <i>Archives of Physical Medicine and Rehabilitation</i> , 2013, 94, 2131-2138.                                                  | 0.9 | 76        |
| 21 | Pain in patients with COPD: a systematic review and meta-analysis. <i>BMJ Open</i> , 2014, 4, e005898-e005898.                                                                                                                                | 1.9 | 75        |
| 22 | Measurement properties of the Timed Up & Go test in patients with COPD. <i>Chronic Respiratory Disease</i> , 2016, 13, 344-352.                                                                                                               | 2.4 | 75        |
| 23 | Respiratory adverse effects of opioids for breathlessness: a systematic review and meta-analysis. <i>European Respiratory Journal</i> , 2017, 50, 1701153.                                                                                    | 6.7 | 74        |
| 24 | Effect of Sustained-Release Morphine for Refractory Breathlessness in Chronic Obstructive Pulmonary Disease on Health Status. <i>JAMA Internal Medicine</i> , 2020, 180, 1306.                                                                | 5.1 | 74        |
| 25 | Impaired health status and care dependency in patients with advanced COPD or chronic heart failure. <i>Quality of Life Research</i> , 2011, 20, 1679-1688.                                                                                    | 3.1 | 72        |
| 26 | COVID-19: guidance on palliative care from a European Respiratory Society international task force. <i>European Respiratory Journal</i> , 2020, 56, 2002583.                                                                                  | 6.7 | 69        |
| 27 | Advance care planning for patients with COPD: Past, present and future. <i>Patient Education and Counseling</i> , 2012, 86, 19-24.                                                                                                            | 2.2 | 65        |
| 28 | The Impact of Post-COVID-19 Syndrome on Self-Reported Physical Activity. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 6017.                                                                           | 2.6 | 64        |
| 29 | Educational programmes in COPD management interventions: A systematic review. <i>Respiratory Medicine</i> , 2013, 107, 1637-1650.                                                                                                             | 2.9 | 62        |
| 30 | Care Dependency in Non-Hospitalized Patients with COVID-19. <i>Journal of Clinical Medicine</i> , 2020, 9, 2946.                                                                                                                              | 2.4 | 62        |
| 31 | Patient-clinician communication about end-of-life care for Dutch and US patients with COPD. <i>European Respiratory Journal</i> , 2011, 38, 268-276.                                                                                          | 6.7 | 57        |
| 32 | The Impact of Long COVID-19 on Mental Health: Observational 6-Month Follow-Up Study. <i>JMIR Mental Health</i> , 2022, 9, e33704.                                                                                                             | 3.3 | 54        |
| 33 | Generic and Respiratory-Specific Quality of Life in Non-Hospitalized Patients with COVID-19. <i>Journal of Clinical Medicine</i> , 2020, 9, 3993.                                                                                             | 2.4 | 52        |
| 34 | Practical nursing recommendations for palliative care for people with dementia living in long-term care facilities during the COVID-19 pandemic: A rapid scoping review. <i>International Journal of Nursing Studies</i> , 2021, 113, 103781. | 5.6 | 52        |
| 35 | COgnitive-Pulmonary Disease. <i>BioMed Research International</i> , 2014, 2014, 1-8.                                                                                                                                                          | 1.9 | 50        |
| 36 | Attitudes toward opioids for refractory dyspnea in COPD among Dutch chest physicians. <i>Chronic Respiratory Disease</i> , 2015, 12, 85-92.                                                                                                   | 2.4 | 49        |

| #  | ARTICLE                                                                                                                                                                                                                                                                               | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Activity Levels and Exercise Motivation in Patients With COPD and Their Resident Loved Ones. <i>Chest</i> , 2017, 151, 1028-1038.                                                                                                                                                     | 0.8 | 49        |
| 38 | Underlying goals of advance care planning (ACP): a qualitative analysis of the literature. <i>BMC Palliative Care</i> , 2020, 19, 27.                                                                                                                                                 | 1.8 | 48        |
| 39 | Family Caregiving in Advanced Chronic Organ Failure. <i>Journal of the American Medical Directors Association</i> , 2012, 13, 394-399.                                                                                                                                                | 2.5 | 47        |
| 40 | A qualitative assessment of COPD patients' experiences of pulmonary rehabilitation and guidance by healthcare professionals. <i>Respiratory Medicine</i> , 2014, 108, 500-510.                                                                                                        | 2.9 | 47        |
| 41 | Rehabilitation and palliative care in lung fibrosis. <i>Respirology</i> , 2009, 14, 781-787.                                                                                                                                                                                          | 2.3 | 46        |
| 42 | Cluster-randomised trial of a nurse-led advance care planning session in patients with COPD and their loved ones. <i>Thorax</i> , 2019, 74, 328-336.                                                                                                                                  | 5.6 | 46        |
| 43 | Domain-specific cognitive impairment in patients with COPD and control subjects. <i>International Journal of COPD</i> , 2017, Volume 12, 1-11.                                                                                                                                        | 2.3 | 45        |
| 44 | Fatigue is highly prevalent in patients with COPD and correlates poorly with the degree of airflow limitation. <i>Therapeutic Advances in Respiratory Disease</i> , 2019, 13, 175346661987812.                                                                                        | 2.6 | 45        |
| 45 | Severe Fatigue in Long COVID: Web-Based Quantitative Follow-up Study in Members of Online Long COVID Support Groups. <i>Journal of Medical Internet Research</i> , 2021, 23, e30274.                                                                                                  | 4.3 | 44        |
