

Katsuyuki Shizu

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3274182/katsuyuki-shizu-publications-by-year.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

55

#	Paper	IF	Citations
55	Molecular Vibration Accelerates Charge Transfer Emission in a Highly Twisted Blue Thermally Activated Delayed Fluorescence Material. <i>Journal of Physical Chemistry A</i> , 2021 , 125, 4534-4539	2.8	5
54	Correlated Triplet Pair Formation Activated by Geometry Relaxation in Directly Linked Tetracene Dimer (5,5'-Bitetracene). <i>ACS Omega</i> , 2021 , 6, 2638-2643	3.9	2
53	Theoretical Determination of Rate Constants from Excited States: Application to Benzophenone. <i>Journal of Physical Chemistry A</i> , 2021 , 125, 9000-9010	2.8	2
52	Effect of Vibronic Coupling on Correlated Triplet Pair Formation in the Singlet Fission Process of Linked Tetracene Dimers. <i>Journal of Physical Chemistry A</i> , 2020 , 124, 3641-3651	2.8	13
51	Conformation Control of Iminodibenzyl-Based Thermally Activated Delayed Fluorescence Material by Tilted Face-to-Face Alignment With Optimal Distance (tFFO) Design. <i>Frontiers in Chemistry</i> , 2020 , 8, 530	5	5
50	Visual Understanding of Vibronic Coupling and Quantitative Rate Expression for Singlet Fission in Molecular Aggregates. <i>Bulletin of the Chemical Society of Japan</i> , 2020 , 93, 1305-1313	5.1	2
49	Carbazole and Benzophenone Based Twisted Donor-Acceptor Systems as Solution Processable Green Thermally Activated Delayed Fluorescence Organic Light Emitters. <i>Chemistry Letters</i> , 2018 , 47, 1236-1239	1.7	
48	Combined Inter- and Intramolecular Charge-Transfer Processes for Highly Efficient Fluorescent Organic Light-Emitting Diodes with Reduced Triplet Exciton Quenching. <i>Advanced Materials</i> , 2017 , 29, 1606448	24	110
47	Blue organic light-emitting diodes realizing external quantum efficiency over 25% using thermally activated delayed fluorescence emitters. <i>Scientific Reports</i> , 2017 , 7, 284	4.9	71
46	Thermally Activated Delayed Fluorescence Emitter with a Symmetric Acceptor-Donor-Acceptor Structure. <i>Journal of Photopolymer Science and Technology = [Fotoporima Konwakai Shi]</i> , 2017 , 30, 475-481	0.7	5
45	Highly efficient solution-processed host-free organic light-emitting diodes showing an external quantum efficiency of nearly 18% with a thermally activated delayed fluorescence emitter. <i>Applied Physics Express</i> , 2016 , 9, 032102	2.4	29
44	Organic Electroluminescent Materials Realizing Efficient Conversion from Electricity to Light. <i>Journal of Photopolymer Science and Technology = [Fotoporima Konwakai Shi]</i> , 2016 , 29, 305-310	0.7	5
43	Detailed analysis of charge transport in amorphous organic thin layer by multiscale simulation without any adjustable parameters. <i>Scientific Reports</i> , 2016 , 6, 39128	4.9	23
42	Organic light-emitting diodes: High-throughput virtual screening. <i>Nature Materials</i> , 2016 , 15, 1056-7	27	12
41	Highly efficient electroluminescence from purely organic donor-acceptor systems. <i>Pure and Applied Chemistry</i> , 2015 , 87, 627-638	2.1	34
40	Multiscale simulation of charge transport in a host material, N,N'-dicarbazole-3,5-benzene (mCP), for organic light-emitting diodes. <i>Journal of Materials Chemistry C</i> , 2015 , 3, 5549-5555	7.1	18
39	Highly Efficient Thermally Activated Delayed Fluorescence Emitters with a Small Singlet-Triplet Energy Gap and Large Oscillator Strength. <i>Chemistry Letters</i> , 2015 , 44, 360-362	1.7	48

38	Highly Efficient Blue Electroluminescence Using Delayed-Fluorescence Emitters with Large Overlap Density between Luminescent and Ground States. <i>Journal of Physical Chemistry C</i> , 2015 , 119, 26283-26289	3.8	100
37	Purely organic electroluminescent material realizing 100% conversion from electricity to light. <i>Nature Communications</i> , 2015 , 6, 8476	17.4	606
36	Organic Light-Emitting Diodes (OLEDs): Materials, Photophysics, and Device Physics 2015 , 43-73		4
35	Highly efficient blue electroluminescence based on thermally activated delayed fluorescence. <i>Nature Materials</i> , 2015 , 14, 330-6	27	886
34	Highly efficient electroluminescence from a solution-processable thermally activated delayed fluorescence emitter. <i>Applied Physics Letters</i> , 2015 , 107, 183303	3.4	61
33	Triarylboron-Based Fluorescent Organic Light-Emitting Diodes with External Quantum Efficiencies Exceeding 20 %. <i>Angewandte Chemie</i> , 2015 , 127, 15446-15450	3.6	85
32	Triarylboron-Based Fluorescent Organic Light-Emitting Diodes with External Quantum Efficiencies Exceeding 20 . <i>Angewandte Chemie - International Edition</i> , 2015 , 54, 15231-5	16.4	242
31	[Paper] Meta-linking Strategy for Thermally Activated Delayed Fluorescence Emitters with a Small Singlet-Triplet Energy Gap. <i>ITE Transactions on Media Technology and Applications</i> , 2015 , 3, 108-113	0.7	19
30	Controlled emission colors and singlet-triplet energy gaps of dihydrophenazine-based thermally activated delayed fluorescence emitters. <i>Journal of Materials Chemistry C</i> , 2015 , 3, 2175-2181	7.1	111
29	High efficiency thermally activated delayed fluorescence based on 1,3,5-tris(4-(diphenylamino)phenyl)-2,4,6-tricyanobenzene. <i>Chemical Communications</i> , 2015 , 51, 5028-31	5.8	62
28	Strategy for Designing Electron Donors for Thermally Activated Delayed Fluorescence Emitters. <i>Journal of Physical Chemistry C</i> , 2015 , 119, 1291-1297	3.8	127
27	Effect of Atom Substitution in Chalcogenodiazole-Containing Thermally Activated Delayed Fluorescence Emitters on Radiationless Transition. <i>Journal of Physical Chemistry C</i> , 2015 , 119, 2948-2955	3.8	46
26	Enhanced Electroluminescence from a Thermally Activated Delayed-Fluorescence Emitter by Suppressing Nonradiative Decay. <i>Physical Review Applied</i> , 2015 , 3,	4.3	74
25	Dual Intramolecular Charge-Transfer Fluorescence Derived from a Phenothiazine-Triphenyltriazine Derivative. <i>Journal of Physical Chemistry C</i> , 2014 , 118, 15985-15994	3.8	204
24	Donor-acceptor-structured 1,4-diazatriphenylene derivatives exhibiting thermally activated delayed fluorescence: design and synthesis, photophysical properties and OLED characteristics. <i>Science and Technology of Advanced Materials</i> , 2014 , 15, 034202	7.1	56
23	Thermally Activated Delayed Fluorescence from a Spiro-diazafluorene Derivative. <i>Chemistry Letters</i> , 2014 , 43, 1017-1019	1.7	53
22	Solvent effect on thermally activated delayed fluorescence by 1,2,3,5-tetrakis(carbazol-9-yl)-4,6-dicyanobenzene. <i>Journal of Physical Chemistry A</i> , 2013 , 117, 5607-12	2.8	128
21	Twisted Intramolecular Charge Transfer State for Long-Wavelength Thermally Activated Delayed Fluorescence. <i>Chemistry of Materials</i> , 2013 , 25, 3766-3771	9.6	253

20	Organic luminescent molecule with energetically equivalent singlet and triplet excited states for organic light-emitting diodes. <i>Physical Review Letters</i> , 2013 , 110, 247401	7.4	180
19	Vibronic coupling density and related concepts. <i>Journal of Physics: Conference Series</i> , 2013 , 428, 012010	0.3	16
18	Oxadiazole- and triazole-based highly-efficient thermally activated delayed fluorescence emitters for organic light-emitting diodes. <i>Journal of Materials Chemistry C</i> , 2013 , 1, 4599	7.1	269
17	Inverse Relationship of Reorganization Energy to The Number of π Electrons from Perspective of Vibronic Coupling Density. <i>Journal of Computer Chemistry Japan</i> , 2013 , 12, 215-221	0.2	2
16	Highly efficient organic light-emitting diodes from delayed fluorescence. <i>Nature</i> , 2012 , 492, 234-8	50.4	4461
15	Design of efficient thermally activated delayed fluorescence materials for pure blue organic light emitting diodes. <i>Journal of the American Chemical Society</i> , 2012 , 134, 14706-9	16.4	1147
14	Efficient green thermally activated delayed fluorescence (TADF) from a phenoxazine-triphenyltriazine (PXZ-TRZ) derivative. <i>Chemical Communications</i> , 2012 , 48, 11392-4	5.8	478
13	Theoretical design of a hole-transporting molecule: hexaaza[16]parabiphenylophane. <i>Journal of Materials Chemistry</i> , 2011 , 21, 6375		27
12	Vibronic coupling density analysis for free-base porphin cation. <i>Chemical Physics Letters</i> , 2011 , 505, 42-46	4.5	1
11	Vibronic interactions in hole-transporting molecules: An interplay with electron-hole interactions. <i>Chemical Physics Letters</i> , 2011 , 507, 151-156	2.5	3
10	A boron-containing molecule as an efficient electron-transporting material with low-power consumption. <i>Applied Physics Letters</i> , 2010 , 97, 142111	3.4	27
9	Inelastic electron tunneling spectra and vibronic coupling density analysis of 2,5-dimercapto-1,3,4-thiadiazole and tetrathiafulvalene dithiol. <i>Nanoscale</i> , 2010 , 2, 2186-94	7.7	11
8	Preparation and Characterization of N-Anisyl-Substituted Hexaaza[16]paracyclophane. <i>Angewandte Chemie</i> , 2010 , 122, 8381-8384	3.6	19
7	Preparation and characterization of N-anisyl-substituted hexaaza[1(6)]paracyclophane. <i>Angewandte Chemie - International Edition</i> , 2010 , 49, 8205-8	16.4	49
6	Vibronic coupling density analysis of hole-transporting materials: Electron-density difference in DFT and HF methods. <i>Organic Electronics</i> , 2010 , 11, 1277-1287	3.5	11
5	Vibronic coupling density analysis for β -ligothiophene cations: A new insight for polaronic defects. <i>Chemical Physics</i> , 2010 , 369, 108-121	2.3	12
4	Electron-vibration interactions in triphenylamine cation: Why are triphenylamine-based molecules good hole-transport materials?. <i>Chemical Physics Letters</i> , 2010 , 486, 130-136	2.5	18
3	Reduced vibronic coupling density and its application to bis(ethylenedithio)tetrathiafulvalene (BEDT-TTF). <i>Chemical Physics Letters</i> , 2010 , 491, 65-71	2.5	10

- 2 Vibronic Coupling Constant and Vibronic Coupling Density. *Springer Series in Chemical Physics*, **2009**, 99-129 17
- 1 Electron-vibration interactions in carrier-transport material: Vibronic coupling density analysis in TPD. *Chemical Physics Letters*, **2008**, 458, 152-156 2.5 36
