#	ARTICLE	IF	CITATIONS
1	Indoor Air Pollution in Industrialized Countries. , 2022, , 402-409.		2
2	Short-term effects of particulate matter on cardiovascular morbidity in Italy: a national analysis. European Journal of Preventive Cardiology, 2022, 29, 1202-1211.	1.8	26
3	Urban grey spaces are associated with increased allergy in the general population. Environmental Research, 2022, 206, 112428.	7.5	9
4	Association between Asthma Control and Exposure to Greenness and Other Outdoor and Indoor Environmental Factors: A Longitudinal Study on a Cohort of Asthmatic Children. International Journal of Environmental Research and Public Health, 2022, 19, 512.	2.6	11
5	A series of narrative reviews on air pollution and respiratory health for Pulmonology: Why it is important and who should read it. Pulmonology, 2022, 28, 243-244.	2.1	7
6	Effects of Polycyclic Aromatic Hydrocarbons on Lung Function in Children with Asthma: A Mediation Analysis. International Journal of Environmental Research and Public Health, 2022, 19, 1826.	2.6	10
7	pollution and respiratory diseases: A general update and an Italian perspective. Pulmonology, 2022, 28, 284-296.	2.1	16
8	Association between greenspace and lung function in Italian children-adolescents. International Journal of Hygiene and Environmental Health, 2022, 242, 113947.	4.3	5
9	ARIA digital anamorphosis: Digital transformation of health and care in airway diseases from research to practice. Allergy: European Journal of Allergy and Clinical Immunology, 2021, 76, 168-190.	5.7	46
10	ARIA&EAAACI statement on asthma and COVID&#x2011;19 (June 2, 2020). Allergy: European Journal of Allergy and Clinical Immunology, 2021, 76, 689-697.	5.7	57
11	A model-based approach for assessing bronchodilator responsiveness in children: The conventional cutoff revisited. Journal of Allergy and Clinical Immunology, 2021, 147, 769-772.e10.	2.9	4
12	Cabbage and fermented vegetables: From death rate heterogeneity in countries to candidates for mitigation strategies of severe COVID&#x2011;19. Allergy: European Journal of Allergy and Clinical Immunology, 2021, 76, 735-750.	5.7	83
13	Impact of different exposure models and spatial resolution on the long-term effects of air pollution. Environmental Research, 2021, 192, 110351.	7.5	17
14	Short-Term Effects of Air Pollution on Cardiovascular Hospitalizations in the Pisan Longitudinal Study. International Journal of Environmental Research and Public Health, 2021, 18, 1164.	2.6	7
15	Shotgun Proteomics of Isolated Urinary Extracellular Vesicles for Investigating Respiratory Impedance in Healthy Preschoolers. Molecules, 2021, 26, 1258.	3.8	2
16	Spatial-temporal prediction of ambient nitrogen dioxide and ozone levels over Italy using a Random Forest model for population exposure assessment. Air Quality, Atmosphere and Health, 2021, 14, 817-829.	3.3	15
17	The severe asthma registries: a way to better know and fight the disease. European Annals of Allergy and Clinical Immunology, 2021, 53, 99.	1.0	3
18	A microscale hybrid modelling system to assess the air quality over a large portion of a large European city. Atmospheric Environment, 2021, 264, 118656.	4.1	7

#	ARTICLE	IF	CITATIONS
19	Estimating Daily PM <sub>2.5</sub> and PM <sub>10</sub> over Italy Using an Ensemble Model. Environmental Science & Technology, 2020, 54, 120-128.	10.0	70
20	Anti-muscarinic drugs as preventive treatment of exercise-induced bronchoconstriction (EIB) in children and adults. Respiratory Medicine, 2020, 172, 106-128.	2.9	7
21	Health effects of air pollution: a Southern European perspective. Chinese Medical Journal, 2020, 133, 1568-1574.	2.3	14
22	Longitudinal Asthma Patterns in Italian Adult General Population Samples: Host and Environmental Risk Factors. Journal of Clinical Medicine, 2020, 9, 3632.	2.4	2
23	Association between the Concentration and the Elemental Composition of Outdoor PM <sub>2.5</sub> and Respiratory Diseases in Schoolchildren: A Multicenter Study in the Mediterranean Area. Atmosphere, 2020, 11, 1290.	2.3	3
24	Nrf2-interacting nutrients and COVID-19: time for research to develop adaptation strategies. Clinical and Translational Allergy, 2020, 10, 58.	3.2	56
25	Height and body-mass index trajectories of school-aged children and adolescents from 1985 to 2019 in 200 countries and territories: a pooled analysis of 2181 population-based studies with 65 million participants. Lancet, The, 2020, 396, 1511-1524.	13.7	219
26	Global Burden of Chronic Respiratory Diseases. Journal of Aerosol Medicine and Pulmonary Drug Delivery, 2020, 33, 171-177.	1.4	90
27	Is diet partly responsible for differences in COVID-19 death rates between and within countries?. Clinical and Translational Allergy, 2020, 10, 16.	3.2	97
28	Indoor air pollution, physical and comfort parameters related to schoolchildren's health: Data from the European SINPHONIE study. Science of the Total Environment, 2020, 739, 139870.	8.0	94
29	A prevalent exposure to male dog is a risk factor for exclusive allergic sensitization to Can f 5: An Italian multicenter study. Journal of Allergy and Clinical Immunology: in Practice, 2020, 8, 2399-2401.	3.8	5
30	RAPP&acirc;children: A new tool for assessing quality of life in patients with asthma and rhinitis. Clinical and Experimental Allergy, 2020, 50, 662-671.	2.9	8
31	A global respiratory perspective on the COVID-19 pandemic: commentary and action proposals. European Respiratory Journal, 2020, 56, 2001704.	6.7	29
32	Effects of Particulate Matter on the Incidence of Respiratory Diseases in the Pisan Longitudinal Study. International Journal of Environmental Research and Public Health, 2020, 17, 2540.	2.6	21
33	A multi-city air pollution population exposure study: Combined use of chemical-transport and random-Forest models with dynamic population data. Science of the Total Environment, 2020, 724, 138102.	8.0	45
34	Barriers and incentives for Italian paediatricians to become smoking cessation promoters: a GARD-Italy Demonstration Project. Journal of Thoracic Disease, 2020, 12, 6868-6879.	1.4	3
35	Influence of agricultural and grey spaces proximity on biomarkers of exposure and effect: a population-based study. , 2020, , .		0
36	Presence of serum antibodies anti-benzo(a)pyrenediol epoxide (BPDE-DNA) and tobacco smoking as predictors of respiratory outcomes. , 2020, , .		0

#	ARTICLE	IF	CITATIONS
37	Acute effects of air pollution on urgent hospitalizations on a general population sample: a case-cross over study. , 2020, , .		0
38	Influence of agricultural and grey spaces proximity on allergic rhinitis, asthma and COPD: a population-based study. , 2020, , .		0
39	Helsinki by nature: The Nature Step to Respiratory Health. <i>Clinical and Translational Allergy</i> , 2019, 9, 57.	3.2	36
40	Nationwide epidemiological study for estimating the effect of extreme outdoor temperature on occupational injuries in Italy. <i>Environment International</i> , 2019, 133, 105176.	10.0	58
41	Evidence for a link between the Atlantic Multidecadal Oscillation and annual asthma mortality rates in the US. <i>Scientific Reports</i> , 2019, 9, 11683.	3.3	8
42	Next-generation ARIA care pathways for rhinitis and asthma: a model for multimorbid chronic diseases. <i>Clinical and Translational Allergy</i> , 2019, 9, 44.	3.2	87
43	18-yr cumulative incidence of respiratory/allergic symptoms/diseases and risk factors in the Pisa epidemiological study. <i>Respiratory Medicine</i> , 2019, 158, 33-41.	2.9	14
44	Rising rural body-mass index is the main driver of the global obesity epidemic in adults. <i>Nature</i> , 2019, 569, 260-264.	27.8	469
45	Obstructive sleep apnoea: Improving healthcare services by combining process modelling and population analysis. <i>International Journal of Medical Informatics</i> , 2019, 127, 43-51.	3.3	3
46	Guidance to 2018 good practice: ARIA digitally-enabled, integrated, person-centred care for rhinitis and asthma. <i>Clinical and Translational Allergy</i> , 2019, 9, 16.	3.2	81
47	An association analysis to identify genetic variants linked to asthma and rhino-conjunctivitis in a cohort of Sicilian children. <i>Italian Journal of Pediatrics</i> , 2019, 45, 16.	2.6	5
48	Temporal Changes in Respiratory Morbidity and Multimorbidity with Associated Risk Factors in an Italian General Population Sample. , 2019, , .		0
49	High resolution data to estimate effects of pollution and temperatures in Italy: The BEEP project. <i>European Journal of Public Health</i> , 2019, 29, .	0.3	0
50	Overrating Classifier Performance in ROC Analysis in the Absence of a Test Set: Evidence from Simulation and Italian CARATkids Validation. <i>Methods of Information in Medicine</i> , 2019, 58, e27-e42.	1.2	8
51	Indoor air quality in schools of a highly polluted south Mediterranean area. <i>Indoor Air</i> , 2019, 29, 276-290.	4.3	33
52	Adherence to treatment in allergic rhinitis using mobile technology. The <sc>MASK</sc> Study. <i>Clinical and Experimental Allergy</i> , 2019, 49, 442-460.	2.9	73
53	Prescriptive adherence to GINA guidelines and asthma control: An Italian cross sectional study in general practice. <i>Respiratory Medicine</i> , 2019, 146, 10-17.	2.9	27
54	Estimation of daily PM10 and PM2.5 concentrations in Italy, 2013â€“2015, using a spatiotemporal land-use random-forest model. <i>Environment International</i> , 2019, 124, 170-179.	10.0	251

#	ARTICLE	IF	CITATIONS
55	Prevalence and features of asthmaâ€“chronic obstructive pulmonary disease overlap in Northern Italy general population. <i>Journal of Asthma</i> , 2019, 56, 27-33.	1.7	11
56	Indoor and outdoor pollution. , 2019, , 771-778.		0
57	Health effects of self-reported risk factors and estimated PM10 levels: a cross-sectional study. , 2019, , .		0
58	Effect of host and environmental factors on asthma control: AIS LIFE project. , 2019, , .		0
59	Longitudinal asthma changes in Italian general population samples: host and environmental risk factors. , 2019, , .		0
60	A nationwide study of particulate matter and daily hospitalizations for respiratory diseases in Italy. , 2019, , .		0
61	The short-term effects of air temperature on respiratory mortality and hospital admissions using high resolution data in Italy. Results from BEEP project. , 2019, , .		0
62	Direct and indirect effects of Growth Hormone Deficiency (GHD) on lung function in children: A mediation analysis. <i>Respiratory Medicine</i> , 2018, 137, 61-69.	2.9	3
63	Relationship between domestic smoking and metals and rare earth elements concentration in indoor PM2.5. <i>Environmental Research</i> , 2018, 165, 71-80.	7.5	65
64	RItA: The Italian severe/uncontrolled asthma registry. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2018, 73, 683-695.	5.7	50
65	A strategy for measuring health outcomes and evaluating impacts of interventions on asthma and COPDâ€“common chronic respiratory diseases in Global Alliance against Chronic Respiratory Diseases (GARD) countries. <i>Journal of Thoracic Disease</i> , 2018, 10, 5170-5177.	1.4	6
66	Associations of greenness, greyness and air pollution exposure with childrenâ€™s health: a cross-sectional study in Southern Italy. <i>Environmental Health</i> , 2018, 17, 86.	4.0	47
67	XII AIST 2018 Conference: â€œThe thousand faces of cough: clinical and therapeutic updatesâ€•. <i>Multidisciplinary Respiratory Medicine</i> , 2018, 13, .	1.5	0
68	Research Needs on Respiratory Health in Migrant and Refugee Populations. An Official American Thoracic Society and European Respiratory Society Workshop Report. <i>Annals of the American Thoracic Society</i> , 2018, 15, 1247-1255.	3.2	6
69	Inhalation therapy in the next decade: Determinants of adherence to treatment in asthma and COPD. <i>Monaldi Archives for Chest Disease</i> , 2018, 88, 886.	0.6	17
70	Greater Access to Long Acting Beta2 Agonists Is Associated with Less Hospital Admissions Due to COPD: A Longitudinal Nation-Wide Study. <i>Lung</i> , 2018, 196, 643-648.	3.3	5
71	Use of aerobiological information systems in pollen allergy management. , 2018, , .		0
72	Burden of pollen allergy in 3 European countries: AIS LIFE project. , 2018, , .		1

#	ARTICLE	IF	CITATIONS
73	Association of household environmental factors and respiratory symptoms in children: a multicentric Italian study. , 2018, , .		0
74	Respiratory disease phenotypes in a general population sample: latent transition analysis. , 2018, , .		0
75	Urging Europe to put non-adherence to inhaled respiratory medication higher on the policy agenda: a report from the First European Congress on Adherence to Therapy. European Respiratory Journal, 2017, 49, 1700076.	6.7	33
76	Positioning the principles of precision medicine in care pathways for allergic rhinitis and chronic rhinosinusitis â€“ A <scp>EUFOREA</scp>â€™<scp>ARIA</scp>â€™<scp>EPOS</scp>â€™<scp>AIRWAYS ICP</scp> statement. Allergy: European Journal of Allergy and Clinical Immunology, 2017, 72, 1297-1305.	5.7	130
77	Worldwide trends in body-mass index, underweight, overweight, and obesity from 1975 to 2016: a pooled analysis of 2416 population-based measurement studies in 128Â·9 million children, adolescents, and adults. Lancet, The, 2017, 390, 2627-2642.	13.7	5,010
78	Global Lung Function Initiative 2012 reference values for spirometry in South Italian children. Respiratory Medicine, 2017, 131, 11-17.	2.9	16
79	Sensitization to dust mite defines different phenotypes of asthma: A multicenter study. Pediatric Allergy and Immunology, 2017, 28, 675-682.	2.6	13
80	Building bridges for innovation in ageing: Synergies between action groups of the EIP on AHA. Journal of Nutrition, Health and Aging, 2017, 21, 92-104.	3.3	47
81	Uneven distribution of professors and instructors in medical disciplines dealing with the four main chronic non-communicable diseases: the case of the Italian Universities. Multidisciplinary Respiratory Medicine, 2017, 12, 27.	1.5	1
82	Integrating the care of the complex COPD patient. Monaldi Archives for Chest Disease, 2017, 87, 786.	0.6	1
83	Risk factors for multimorbidity in wheezing children: role of the phenotype. , 2017, , .		0
84	Home or school exposures to mold or dampness are related to respiratory symptoms in children. , 2017, , .		0
85	Development of a nomogram to estimate the quality of life in asthmatic children using the Childhood Asthma Control Test. Pediatric Allergy and Immunology, 2016, 27, 514-520.	2.6	15
86	Trends in adult body-mass index in 200 countries from 1975 to 2014: a pooled analysis of 1698 population-based measurement studies with 19Â·2 million participants. Lancet, The, 2016, 387, 1377-1396.	13.7	3,941
87	Scaling up strategies of the chronic respiratory disease programme of the European Innovation Partnership on Active and Healthy Ageing (Action Plan B3: Area 5). Clinical and Translational Allergy, 2016, 6, 29.	3.2	47
88	Characteristics and predictors of allergic rhinitis undertreatment in primary care. International Journal of Immunopathology and Pharmacology, 2016, 29, 129-136.	2.1	11
89	Respiratory symptoms/diseases prevalence is still increasing: a 25-yr population study. Respiratory Medicine, 2016, 110, 58-65.	2.9	74
90	The Italian registry for severe/uncontrolled asthma. , 2016, , .		1

#	ARTICLE	IF	CITATIONS
91	How do children perceive indoor air quality (IAQ) at school?. , 2016, , .		2
92	Late-asthma onset and associated factors. , 2016, , .		0
93	Measuring lung function in asthmatic children: A spirometry and forced oscillation technique (FOT) comparison. , 2016, , .		0
94	Atopy as a predictor of allergic respiratory diseases in an Italian general population sample. , 2016, , .		0
95	Latent class identification in wheezing preschool children. , 2016, , .		0
96	MACVIA-ARIA Sentinel Network for allergic rhinitis (MASK-rhinitis): the new generation guideline implementation. Allergy: European Journal of Allergy and Clinical Immunology, 2015, 70, 1372-1392.	5.7	160
97	Air quality of nursing homes and its effect on the lung health of elderly residents. Expert Review of Respiratory Medicine, 2015, 9, 671-673.	2.5	12
98	Effects on asthma and respiratory allergy of Climate change and air pollution. Multidisciplinary Respiratory Medicine, 2015, 10, 39.	1.5	92
99	Reduction of Risk of Dying from Tobacco-related Diseases after Quitting Smoking in Italy. Tumori, 2015, 101, 657-663.	1.1	8
100	The Burden of Rhinitis and Rhinoconjunctivitis in Adolescents. Allergy, Asthma and Immunology Research, 2015, 7, 44.	2.9	54
101	Allergy and asthma: Effects of the exposure to particulate matter and biological allergens. Respiratory Medicine, 2015, 109, 1089-1104.	2.9	197
102	COPD prevalence in a north-eastern Italian general population. Respiratory Medicine, 2015, 109, 1040-1047.	2.9	27
103	Effect of indoor nitrogen dioxide on lung function in urban environment. Environmental Research, 2015, 138, 8-16.	7.5	41
104	Indoor air quality, ventilation and respiratory health in elderly residents living in nursing homes in Europe. European Respiratory Journal, 2015, 45, 1228-1238.	6.7	91
105	Odor annoyance perception and health effects in an Italian general population sample. , 2015, , .		2
106	An Elevated Body Mass Index Increases Lung Volume but Reduces Airflow in Italian Schoolchildren. PLoS ONE, 2015, 10, e0127154.	2.5	29
107	Adverse effects of outdoor pollution in the elderly. Journal of Thoracic Disease, 2015, 7, 34-45.	1.4	162
108	COPD symptoms/diagnoses and work exposure: A 20 years population-based survey. , 2015, , .		0

#	ARTICLE	IF	CITATIONS
109	Relationships between school indoor toluene and respiratory symptoms in Italian children. , 2015, , .		0
110	Predictors of headache in urban and rural setting from respiratory questionnaires in children aged 10-15. , 2015, , .		0
111	Outdoor PM2.5  Chemical composition in 3 areas with urban/rural difference in prevalence of respiratory diseases. , 2015, , .		0
112	Effect of not appropriate treatment in severe/not controlled asthma: The AGAVE study. , 2015, , .		0
113	Chemical fingerprint of outdoor PM2.5 in Malta. , 2015, , .		0
114	Life Gain in Italian Smokers Who Quit. International Journal of Environmental Research and Public Health, 2014, 11, 2395-2406.	2.6	7
115	COPD management according to old and new GOLD guidelines: an observational study with Italian general practitioners. Current Medical Research and Opinion, 2014, 30, 1033-1042.	1.9	32
116	The aetiology and antibiotic management of community-acquired pneumonia in adults in Europe: a literature review. European Journal of Clinical Microbiology and Infectious Diseases, 2014, 33, 1065-1079.	2.9	150
117	Integrated care pathways for airway diseases (AIRWAYS-ICPs). European Respiratory Journal, 2014, 44, 304-323.	6.7	154
118	Indoor air pollution. , 2014, , 198-210.		1
119	The complex link between severity of asthma and rhinitis in mite allergic patients. Respiratory Medicine, 2013, 107, 23-29.	2.9	12
120	Risk factors for community-acquired pneumonia in adults in Europe: a literature review. Thorax, 2013, 68, 1057-1065.	5.6	489
121	Indoor air pollution and respiratory health in the elderly. Journal of Environmental Science and Health - Part A Toxic/Hazardous Substances and Environmental Engineering, 2013, 48, 1783-1789.	1.7	71
122	Geriatric study in Europe on health effects of air quality in nursing homes (GERIE study) profile: objectives, study protocol and descriptive data. Multidisciplinary Respiratory Medicine, 2013, 8, 71.	1.5	9
123	Third-hand smoke exposure and health hazards in children. Monaldi Archives for Chest Disease, 2013, 79, 38-43.	0.6	87
124	Indoor and outdoor pollution. , 2013, , 345-351.		5
125	Deciding What Type of Evidence and Outcomes to Include in Guidelines. Proceedings of the American Thoracic Society, 2012, 9, 243-250.	3.5	9
126	The ARGA study with Italian general practitioners: prescriptions for allergic rhinitis and adherence to ARIA guidelines. Current Medical Research and Opinion, 2012, 28, 1743-1751.	1.9	14
