

Patricia Gama

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3287971/patricia-gama-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

40
papers

653
citations

#	Paper	IF	Citations
40	Breastfeeding importance and its therapeutic potential against SARS-CoV-2. <i>Physiological Reports</i> , 2021 , 9, e14744	2.6	5
39	Immediate and Late Effects of Early Weaning on Rat Gastric Cell Differentiation. <i>International Journal of Molecular Sciences</i> , 2019 , 21,	6.3	2
38	Cancer cachexia induces morphological and inflammatory changes in the intestinal mucosa. <i>Journal of Cachexia, Sarcopenia and Muscle</i> , 2019 , 10, 1116-1127	10.3	17
37	High-fat diet affects gut nutrients transporters in hypo and hyperthyroid mice by PPAR- α independent mechanism. <i>Life Sciences</i> , 2018 , 202, 35-43	6.8	15
36	Neonatal- maternal separation primes zymogenic cells in the rat gastric mucosa through glucocorticoid receptor activity. <i>Scientific Reports</i> , 2018 , 8, 9823	4.9	3
35	Liraglutide modulates gut microbiota and reduces NAFLD in obese mice. <i>Journal of Nutritional Biochemistry</i> , 2018 , 62, 143-154	6.3	62
34	Corticosterone activity during early weaning reprograms molecular markers in rat gastric secretory cells. <i>Scientific Reports</i> , 2017 , 7, 45867	4.9	5
33	Hormonal and Growth Regulation of Epithelial and Stromal Cells From the Normal and Malignant Endometrium by Pigment Epithelium-Derived Factor. <i>Endocrinology</i> , 2017 , 158, 2754-2773	4.8	6
32	Ghrelin and GHS-R in the rat gastric mucosa: Are they involved in regulation of growth during early weaning?. <i>Nutrition</i> , 2016 , 32, 101-7	4.8	4
31	TGF- β activates APC through Cdh1 binding for Cks1 and Skp2 proteasomal destruction stabilizing p27kip1 for normal endometrial growth. <i>Cell Cycle</i> , 2016 , 15, 931-47	4.7	7
30	Regulation of corticosterone function during early weaning and effects on gastric cell proliferation. <i>Nutrition</i> , 2014 , 30, 343-9	4.8	10
29	p27 variant and corticotropinoma susceptibility: a genetic and in vitro study. <i>Endocrine-Related Cancer</i> , 2014 , 21, 395-404	5.7	18
28	Association between the p27 rs2066827 variant and tumor multiplicity in patients harboring MEN1 germline mutations. <i>European Journal of Endocrinology</i> , 2014 , 171, 335-42	6.5	24
27	Transforming growth factor β increases p27 levels via synthesis and degradation mechanisms in the hyperproliferative gastric epithelium in rats. <i>PLoS ONE</i> , 2014 , 9, e101965	3.7	3
26	MAPKs and signal transduction in the control of gastrointestinal epithelial cell proliferation and differentiation. <i>International Journal of Molecular Sciences</i> , 2013 , 14, 10143-61	6.3	89
25	MAPK signaling pathway regulates p27 phosphorylation at threonin 187 as part of the mechanism triggered by early-weaning to induce cell proliferation in rat gastric mucosa. <i>PLoS ONE</i> , 2013 , 8, e66651	3.7	13
24	Protein restriction inhibits gastric cell proliferation during rat postnatal growth in parallel to ghrelin changes. <i>Nutrition</i> , 2012 , 28, 707-12	4.8	6

23	EGFR is involved in control of gastric cell proliferation through activation of MAPK and Src signalling pathways in early-weaned rats. <i>Cell Proliferation</i> , 2011 , 44, 174-82	7.9	24
22	Fasting differentially regulates plasma corticosterone-binding globulin, glucocorticoid receptor, and cell cycle in the gastric mucosa of pups and adult rats. <i>American Journal of Physiology - Renal Physiology</i> , 2010 , 298, G117-25	5.1	9
21	Early weaning accelerates the differentiation of mucous neck cells in rat gastric mucosa: possible role of TGFalpha/EGFR. <i>Differentiation</i> , 2010 , 79, 48-56	3.5	14
20	Opposite effects of fasting on TGF-beta3 and TbetaRI distribution in the gastric mucosa of suckling and early weaning rats. <i>Nutrition</i> , 2010 , 26, 224-9	4.8	10
19	In vivo effects of TGFbeta1 on the growth of gastric epithelium in suckling rats. <i>Regulatory Peptides</i> , 2008 , 146, 293-302		13
18	Transforming growth factor-beta, estrogen, and progesterone converge on the regulation of p27Kip1 in the normal and malignant endometrium. <i>Cancer Research</i> , 2007 , 67, 1007-18	10.1	31
17	Chronic hyperglycaemia increases TGFbeta2 signaling and the expression of extracellular matrix proteins in the rat parotid gland. <i>Matrix Biology</i> , 2007 , 26, 572-82	11.4	14
16	Corticosteroids induce the differential expression of TGFbeta isoforms, receptors and signaling in the gastric mucosa of suckling rats. <i>Regulatory Peptides</i> , 2006 , 135, 17-22		10
15	Intestinal damage in strongyloidiasis: the imbalance between cell death and proliferation. <i>Digestive Diseases and Sciences</i> , 2006 , 51, 1063-9	4	9
14	Myenteric denervation differentially reduces enteroendocrine serotonin cell population in rats during postnatal development. <i>Journal of Molecular Histology</i> , 2006 , 37, 95-100	3.3	1
13	The activation function-1 domain of estrogen receptor alpha in uterine stromal cells is required for mouse but not human uterine epithelial response to estrogen. <i>Differentiation</i> , 2005 , 73, 313-22	3.5	57
12	Alternative model to human skin organ culture: a preliminary study with Leibovitz L15 medium. <i>Microscopy Research and Technique</i> , 2005 , 66, 139-44	2.8	4
11	Ileal VIP submucous neurons: confocal study of the area enlargement induced by myenteric denervation in weaning rats. <i>Regulatory Peptides</i> , 2004 , 117, 69-72		9
10	Substance P enhances neuronal area and epithelial cell proliferation after colon denervation in rats. <i>Digestive Diseases and Sciences</i> , 2003 , 48, 2069-76	4	18
9	Ontogenic expression of TGFbeta 1, 2, and 3 and its receptors in the rat gastric mucosa. <i>Developmental Dynamics</i> , 2003 , 227, 450-7	2.9	9
8	Serotonin in the nervous system of the head region of the land planarian <i>Bipalium kewense</i> . <i>Tissue and Cell</i> , 2003 , 35, 479-86	2.7	7
7	Transforming growth factor beta signaling is disabled early in human endometrial carcinogenesis concomitant with loss of growth inhibition. <i>Cancer Research</i> , 2002 , 62, 2778-90	10.1	52
6	Localization of luteinizing-hormone releasing hormone binding sites in the gastric mucosa of suckling rats. <i>The Anatomical Record</i> , 2001 , 264, 43-50		6

5	Cell proliferation and death in the gastric epithelium of developing rats after glucocorticoid treatments. <i>The Anatomical Record</i> , 2000 , 260, 213-21		13
4	Streptozotocin-induced diabetes duration is important to determine changes in the number and basophily of myenteric neurons. <i>Arquivos De Neuro-Psiquiatria</i> , 2000 , 58, 1035-9	1.6	24
3	LHRH antagonist inhibits gastric cell proliferation in suckling rats. <i>Regulatory Peptides</i> , 1999 , 84, 97-100		2
2	Corticosterone treatment inhibits cell proliferation in the gastric epithelium of suckling rats. <i>Journal of Gastroenterology</i> , 1998 , 33, 32-8	6.9	11
1	LHRH and somatostatin effects on the cell proliferation of the gastric epithelium of suckling and weaning rats. <i>Regulatory Peptides</i> , 1996 , 63, 73-8		16
