citing authors

#	ARTICLE	IF	CITATIONS
1	Oxidative status during late pregnancy and early lactation in dairy cows. <i>Veterinary Journal</i> , 2005, 169, 286-292.	0.6	300
2	Relationship among blood indicators of lipomobilization and hepatic function during early lactation in high-yielding dairy cows. <i>Journal of Veterinary Science</i> , 2011, 12, 251.	0.5	167
3	Plasma malonaldehyde (MDA) and total antioxidant status (TAS) during lactation in dairy cows. <i>Research in Veterinary Science</i> , 2006, 80, 133-139.	0.9	154
4	Organic acids as a substitute for monensin in diets for beef cattle. <i>Animal Feed Science and Technology</i> , 2004, 115, 101-116.	1.1	98
5	Effect of Supplementation with Antioxidants on the Quality of Bovine Milk and Meat Production. <i>Scientific World Journal</i> , The, 2013, 2013, 1-8.	0.8	59
6	Essential and toxic trace element concentrations in different commercial veal cuts in Spain. <i>Meat Science</i> , 2016, 121, 47-52.	2.7	25
7	Breeding for organic dairy farming: what types of cows are needed?. <i>Journal of Dairy Research</i> , 2019, 86, 3-12.	0.7	25
8	Influence of Grain Processing on Acid-Base Balance in Feedlot Steers. <i>Veterinary Research Communications</i> , 2006, 30, 823-837.	0.6	21
9	Trace Element Concentrations in Beef Cattle Related to the Breed Aptitude. <i>Biological Trace Element Research</i> , 2018, 186, 135-142.	1.9	20
10	Malic acid supplementation in growing/finishing feedlot bull calves: Influence of chemical form on blood acid-base balance and productive performance. <i>Animal Feed Science and Technology</i> , 2007, 135, 222-235.	1.1	16
11	Determination of Essential and Toxic Elements in Cattle Blood: Serum vs Plasma. <i>Animals</i> , 2019, 9, 465.	1.0	14
12	Effects of supplementation with plant extract product containing carvacrol, cinnamaldehyde and capsaicin on serum metabolites and enzymes during the finishing phase of feedlot-fed bull calves. <i>Animal Feed Science and Technology</i> , 2012, 171, 246-250.	1.1	13
13	Effect of moderate Cu supplementation on serum metabolites, enzymes and redox state in feedlot calves. <i>Research in Veterinary Science</i> , 2012, 93, 269-274.	0.9	11
14	Acid-base status and serum l-lactate in growing/finishing bull calves fed different high-grain diets. <i>Livestock Science</i> , 2009, 120, 66-74.	0.6	10
15	Subcellular distribution of hepatic copper in beef cattle receiving high copper supplementation. <i>Journal of Trace Elements in Medicine and Biology</i> , 2017, 42, 111-116.	1.5	9
16	Effects of monensin and yeast supplementation on blood acid-base balance in finishing feedlot steers fed a high-grain, high-protein diet. <i>Animal Science</i> , 2006, 82, 653-659.	1.3	8
17	Toxic and essential trace element concentrations in different tissues of extensively reared sheep in northern Spain. <i>Journal of Food Composition and Analysis</i> , 2021, 96, 103709.	1.9	8
18	Importance of breed aptitude (beef or dairy) in determining trace element concentrations in bovine muscles. <i>Meat Science</i> , 2018, 145, 101-106.	2.7	7

#	ARTICLE	IF	CITATIONS
19	Preliminary results in the redox balance in healthy cats: influence of age and gender. <i>Journal of Feline Medicine and Surgery</i> , 2013, 15, 328-332.	0.6	5
20	Milk yield and reproductive performance of dairy heifers and cows supplemented with polyunsaturated fatty acids. <i>Pesquisa Agropecuaria Brasileira</i> , 2015, 50, 306-312.	0.9	5
21	Relationship between the essential and toxic element concentrations and the proximate composition of different commercial and internal cuts of young beef. <i>European Food Research and Technology</i> , 2017, 243, 1869-1873.	1.6	5
22	Effects of malate supplementation on acid-base balance and productive performance in growing/finishing bull calves fed a high-grain diet. <i>Archives of Animal Nutrition</i> , 2008, 62, 70-81.	0.9	4
23	Serum metabolite concentrations and enzyme activities in finishing bull calves fed different types of high-grain diets. <i>Archives Animal Breeding</i> , 2011, 54, 137-146.	0.5	4
24	Supplementation with plant extracts (carvacrol, cinnamaldehyde and capsaicin): its effects on acid-base status and productive performance in growing/finishing bull calves. <i>Berliner Und Munchener Tierarztliche Wochenschrift</i> , 2009, 122, 93-9.	0.7	4
25	The influence of chemical form on the effects of supplementary malate on serum metabolites and enzymes in finishing bull calves. <i>Livestock Science</i> , 2011, 137, 260-263.	0.6	3
26	Variation in trace element content between liver lobes in cattle. How important is the sampling site?. <i>Journal of Trace Elements in Medicine and Biology</i> , 2019, 52, 53-57.	1.5	3
27	Iron loading and secondary multi-trace element deficiency in a dairy herd fed silage grass grown on land fertilized with sewage sludge. <i>Environmental Science and Pollution Research</i> , 2019, 26, 36978-36984.	2.7	2
28	Influence of Haemolysis on the Mineral Profile of Cattle Serum. <i>Animals</i> , 2021, 11, 3336.	1.0	2
29	Effects of long-term dietary supplementation of monensin or <i>saccharomyces cerevisiae</i> on blood acid-base and productive performance in growing feedlot steers. <i>Berliner Und Munchener Tierarztliche Wochenschrift</i> , 2006, 119, 480-5.	0.7	2
30	Influence of grain processing in regard to serum metabolites and enzymes for finishing bull calves. <i>Journal of Animal and Feed Sciences</i> , 2011, 20, 483-492.	0.4	1
31	Feed sorting and intake affected by the physical form and composition of the total mixed ration in dairy cows. <i>Revista Brasileira De Saude E Producao Animal</i> , 2015, 16, 736-745.	0.3	0
