#	ARTICLE	IF	CITATIONS
1	The kinematic richness of star clusters â€“ II. Stability of spherical anisotropic models with rotation. Monthly Notices of the Royal Astronomical Society, 2021, 502, 4762-4778.	4.4	6
2	$l = 1$ : Weinbergâ€™s weakly damped mode in an N-body model of a spherical stellar system. Monthly Notices of the Royal Astronomical Society, 2020, , .	4.4	10
3	Spherical models of star clusters with potential escapers. Monthly Notices of the Royal Astronomical Society, 2019, 487, 147-160.	4.4	23
4	A linear stability study of stellar rotating spheres. Proceedings of the International Astronomical Union, 2019, 14, 494-497.	0.0	0
5	Linear stability of stellar rotating spheres. Proceedings of the International Astronomical Union, 2019, 14, 246-247.	0.0	0
6	Phase space complexity of star clusters: Fresh observables for old and new questions. Proceedings of the International Astronomical Union, 2019, 14, 389-394.	0.0	0
7	The kinematic richness of star clusters â€“ I. Isolated spherical models with primordial anisotropy. Monthly Notices of the Royal Astronomical Society, 2017, 471, 2778-2789.	4.4	19
8	An approximate analytic model of a star cluster with potential escapers. Monthly Notices of the Royal Astronomical Society, 2017, 468, 1453-1473.	4.4	23
9	From urban to national heat island: The effect of anthropogenic heat output on climate change in high population industrial countries. Earth's Future, 2016, 4, 298-304.	6.3	9
10	Evolution of star clusters on eccentric orbits. Monthly Notices of the Royal Astronomical Society, 2016, 455, 596-602.	4.4	24
11	moCCA code for star cluster simulations â€“ III. Stellar-mass black holes in the globular cluster M22. Monthly Notices of the Royal Astronomical Society, 2014, 439, 2459-2467.	4.4	32
12	Towards an N-body model for the globular cluster M4. Monthly Notices of the Royal Astronomical Society, 2014, 445, 3435-3443.	4.4	46
13	Few-body modes of binary formation in core collapse. Astronomy and Computing, 2013, 3-4, 35-49.	1.7	4
14	Dynamical evolution of black hole subsystems in idealized star clusters. Monthly Notices of the Royal Astronomical Society, 2013, 432, 2779-2797.	4.4	150
15	Gravothermal oscillations in multicomponent models of star clusters. Monthly Notices of the Royal Astronomical Society, 2012, 425, 2493-2500.	4.4	13
16	More on the structure of tidal tails. Monthly Notices of the Royal Astronomical Society, 2012, 420, 2700-2714.	4.4	125
17	Gravothermal oscillations in two-component models of star clusters. Monthly Notices of the Royal Astronomical Society, 2012, 420, 309-319.	4.4	8
18	The tidal tails of 47 Tucanae. Monthly Notices of the Royal Astronomical Society, 2012, 423, 2845-2853.	4.4	36

#	ARTICLE	IF	CITATIONS
19	Monte Carlo simulations of star clusters - VII. The globular cluster 47 Tuc. Monthly Notices of the Royal Astronomical Society, 2011, 410, 2698-2713.	4.4	70
20	The effects of fly-bys on planetary systems. Monthly Notices of the Royal Astronomical Society, 2011, 411, 859-877.	4.4	178
21	The life cycle of star clusters in a tidal field. Monthly Notices of the Royal Astronomical Society, 2011, 413, 2509-2524.	4.4	146
22	On the mass-radius relation of hot stellar systems. Monthly Notices of the Royal Astronomical Society: Letters, 2010, 408, L16-L20.	3.3	83
23	Tidal tails of star clusters. Monthly Notices of the Royal Astronomical Society, 2010, 401, 105-120.	4.4	135
24	1 Gyr in the life of the globular cluster NGC 6397. Monthly Notices of the Royal Astronomical Society: Letters, 2009, 397, L46-L50.	3.3	30
25	A multiphysics and multiscale software environment for modeling astrophysical systems. New Astronomy, 2009, 14, 369-378.	1.8	146
26	On the structure of tidal tails. Monthly Notices of the Royal Astronomical Society, 2008, 387, 1248-1252.	4.4	99
27	Monte Carlo simulations of star clusters IV. Calibration of the Monte Carlo code and comparison with observations for the open cluster M67. Monthly Notices of the Royal Astronomical Society, 2008, 388, 429-443.	4.4	53
28	A Multiphysics and Multiscale Software Environment for Modeling Astrophysical Systems. Lecture Notes in Computer Science, 2008, , 207-216.	1.3	6
29	Modelling Individual Globular Clusters. Proceedings of the International Astronomical Union, 2007, 3, 121-130.	0.0	0
30	Monte Carlo Simulations of Star Clusters with Primordial Binaries. Comparison with N-body Simulations and Observations. Proceedings of the International Astronomical Union, 2007, 3, 99-103.	0.0	0
31	A summary of Joint Discussion 14. Proceedings of the International Astronomical Union, 2006, 2, 448-449.	0.0	0
32	MODEST-2: a summary. New Astronomy, 2003, 8, 605-628.	1.8	31
33	Two collaborative experiments in star cluster evolution. Symposium - International Astronomical Union, 2003, 208, 103-112.	0.1	2
34	The Gravitational Million-Body Problem. Symposium - International Astronomical Union, 2003, 208, 81-92.	0.1	18
35	A new outcome of binary-binary scattering. Monthly Notices of the Royal Astronomical Society, 2000, 318, L61-L63.	4.4	15
36	Statistics of Small-N Simulations. Symposium - International Astronomical Union, 1996, 174, 131-140.	0.1	1

#	ARTICLE	IF	CITATIONS
37	Dark Matter in Globular Clusters. Symposium - International Astronomical Union, 1996, 174, 303-312.	0.1	9
38	A Numerical Approximation for Hierarchical Triples. Symposium - International Astronomical Union, 1996, 174, 369-370.	0.1	0
39	The Orbital Eccentricities of Binary Millisecond Pulsars in Globular Clusters. Symposium - International Astronomical Union, 1996, 174, 383-383.	0.1	0
40	Ecology of globular clusters. Nature, 1992, 359, 772-773.	27.8	10
41	Two homological models for the evolution of star clusters. Monthly Notices of the Royal Astronomical Society, 1988, 230, 223-241.	4.4	26
42	Bifurcation at complex instability. Celestial Mechanics, 1985, 35, 357-382.	0.1	26
43	Dynamical Evolution of Globular Clusters After Core Collapse. Symposium - International Astronomical Union, 1985, 113, 139-160.	0.1	5
44	Dynamics and Evolution of Globular Clusters. Symposium - International Astronomical Union, 1980, 85, 401-416.	0.1	0
45	Pre-collapse evolution of galactic globular clusters. Monthly Notices of the Royal Astronomical Society, 0, , .	4.4	16
46	Peculiarities in velocity dispersion and surface density profiles of star clusters. Monthly Notices of the Royal Astronomical Society, 0, 407, 2241-2260.	4.4	97
