#	Article	IF	CITATIONS
1	Endocrine response of early-hatching Asian Short-toed Lark nestlings exposed to cold temperature in a high-latitude grassland habitat. Avian Research, 2021, 12, .	1.2	2
2	Mild spring temperature rising affects the anti-oxidation and immune functions of Asian Short-toed Larks. Avian Research, 2020, 11 , .	1.2	2
3	Effects of bird aggregation on the soil properties and microbial community diversity of urban forest fragments. Science of the Total Environment, 2020, 737, 140250.	8.0	4
4	Differential cell stress responses to food availability by the nestlings of Asian Short-toed Lark (Calandrella cheleensis). Avian Research, 2019, 10, .	1.2	1
5	Intensity dependent disruptive effects of light at night on activation of the HPG axis of tree sparrows (Passer montanus). Environmental Pollution, 2019, 249, 904-909.	7.5	18
6	Predicting the vulnerability of birds to trophic threat posed by phenological mismatch based on nutritional and physiological status of nestlings. , 2019, 7, coz096.		3
7	Annual variation in the reproductive hormone and behavior rhythm in a population of the Asian short-toed lark: Can spring temperature influence activation of the HPG axis of wild birds?. Hormones and Behavior, 2017, 95, 76-84.	2.1	13
8	Clock gene is associated with individual variation in the activation of reproductive endocrine and behavior of Asian short toed lark. Scientific Reports, 2017, 7, 15002.	3.3	6
9	Marked daily variation in spring temperature induces variation in Caspase-3, Bcl-2 and HSP60 in Asian Short-toed Larks: how do wild birds maintain cellular homeostasis to cope with the ambient temperature variation?. Journal of Ornithology, 2017, 158, 1025-1034.	1.1	2
10	Do migrant and resident species differ in the timing of increases in reproductive and thyroid hormone secretion and body mass? A case study in the comparison of pre-breeding physiological rhythms in the Eurasian Skylark and Asian Short-toed Lark. Avian Research, 2017, 8, .	1.2	8
