citing authors

#	ARTICLE	IF	CITATIONS
1	Understanding exposures and latent disease risk within the National Institute of Environmental Health Sciences Superfund Research Program. <i>Experimental Biology and Medicine</i> , 2022, 247, 529-537.	2.4	1
2	Invited Perspective: Integrating Data Reveals Benefits of Remediation for Children's Exposure to Hazardous Substances. <i>Environmental Health Perspectives</i> , 2022, 130, 31301.	6.0	3
3	Enhancing Data Integration, Interoperability, and Reuse to Address Complex and Emerging Environmental Health Problems. <i>Environmental Science &amp; Technology</i> , 2022, 56, 7544-7552.	10.0	10
4	The interplay between environmental exposures and COVID-19 risks in the health of children. <i>Environmental Health</i> , 2021, 20, 34.	4.0	13
5	E-Waste in Africa: A Serious Threat to the Health of Children. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 8488.	2.6	38
6	Greater than the sum of its parts: focusing SRP research through a systems approach lens. <i>Reviews on Environmental Health</i> , 2021, 36, 451-457.	2.4	5
7	Sharing SRP data to reduce environmentally associated disease and promote transdisciplinary research. <i>Reviews on Environmental Health</i> , 2020, 35, 111-122.	2.4	11
8	Challenges in children's environmental health in the Asia-Pacific region. <i>Reviews on Environmental Health</i> , 2020, 35, 1-2.	2.4	2
9	Benefits of basic research from the Superfund Research Program. <i>Reviews on Environmental Health</i> , 2020, 35, 85-109.	2.4	6
10	The Importance of Community Engagement and Research Translation within the NIEHS Superfund Research Program. <i>International Journal of Environmental Research and Public Health</i> , 2019, 16, 3067.	2.6	9
11	Advancing science in rapidly changing environments: opportunities for the Central and Eastern European Conference on Health and the Environment to connect to other networks. <i>Reviews on Environmental Health</i> , 2019, 34, 261-266.	2.4	1
12	Pollution and children's health. <i>Science of the Total Environment</i> , 2019, 650, 2389-2394.	8.0	170
13	Children's Environmental Health in South and Southeast Asia: Networking for Better Child Health Outcomes. <i>Annals of Global Health</i> , 2019, 85, .	2.0	6
14	The role of nutrition in influencing mechanisms involved in environmentally mediated diseases. <i>Reviews on Environmental Health</i> , 2018, 33, 87-97.	2.4	35
15	Health Consequences of Environmental Exposures: Causal Thinking in Global Environmental Epidemiology. <i>Annals of Global Health</i> , 2018, 82, 3.	2.0	60
16	Health Consequences of Environmental Exposures in Early Life: Coping with a Changing World in the Post-MDG Era. <i>Annals of Global Health</i> , 2018, 82, 20.	2.0	8
17	Early-life Exposure to Widespread Environmental Toxicants and Health Risk: A Focus on the Immune and Respiratory Systems. <i>Annals of Global Health</i> , 2018, 82, 119.	2.0	53
18	Ensuring a Bright Future for Children's Environmental Health. <i>Annals of Global Health</i> , 2018, 82, 1.	2.0	4

#	ARTICLE	IF	CITATIONS
19	The Lancet Commission on pollution and health. <i>Lancet, The</i> , 2018, 391, 462-512.	13.7	2,747
20	The National Institute of Environmental Health Sciences Superfund Research Program: a model for multidisciplinary training of the next generation of environmental health scientists. <i>Reviews on Environmental Health</i> , 2018, 33, 53-62.	2.4	7
21	Assessing the Economic and Societal Benefits of SRP-Funded Research. <i>Environmental Health Perspectives</i> , 2018, 126, 065002.	6.0	11
22	Pollution and Global Health – An Agenda for Prevention. <i>Environmental Health Perspectives</i> , 2018, 126, 084501.	6.0	58
23	The Curious Case of Cholangiocarcinoma: Opportunities for Environmental Health Scientists to Learn about a Complex Disease. <i>Journal of Environmental and Public Health</i> , 2018, 2018, 1-7.	0.9	5
24	Prevention-intervention strategies to reduce exposure to e-waste. <i>Reviews on Environmental Health</i> , 2018, 33, 219-228.	2.4	38
25	Sustainable exposure prevention through innovative detection and remediation technologies from the NIEHS Superfund Research Program. <i>Reviews on Environmental Health</i> , 2017, 32, 35-44.	2.4	12
26	The CEECHE: a practical approach for reducing exposures and disease outcomes in Central and Eastern Europe. <i>Reviews on Environmental Health</i> , 2017, 32, 3-8.	2.4	2
27	E-Waste and Harm to Vulnerable Populations: A Growing Global Problem. <i>Environmental Health Perspectives</i> , 2016, 124, 550-555.	6.0	261
28	Environmental Pollution: An Under-recognized Threat to Children’s Health, Especially in Low- and Middle-Income Countries. <i>Environmental Health Perspectives</i> , 2016, 124, A41-5.	6.0	96
29	Changing exposures in a changing world: models for reducing the burden of disease. <i>Reviews on Environmental Health</i> , 2016, 31, 93-96.	2.4	5
30	E-waste: the growing global problem and next steps. <i>Reviews on Environmental Health</i> , 2016, 31, 131-135.	2.4	34
31	A quarter century of the Pacific Basin Consortium: looking back to move forward. <i>Reviews on Environmental Health</i> , 2016, 31, 3-9.	2.4	4
32	Interweaving Knowledge Resources to Address Complex Environmental Health Challenges. <i>Environmental Health Perspectives</i> , 2015, 123, 1095-1099.	6.0	15
33	Jenny Pronczuk de Garbino: A Global Champion for Children’s Health. <i>Environmental Health Perspectives</i> , 2015, 123, A52-3.	6.0	1
34	Children’s Health in Latin America: The Influence of Environmental Exposures. <i>Environmental Health Perspectives</i> , 2015, 123, 201-209.	6.0	109
35	Diet, transplacental carcinogenesis, and risk to children. <i>BMJ, The</i> , 2015, 351, h4636.	6.0	3
36	Developmental Origins of Health and Disease: Integrating Environmental Influences. <i>Endocrinology</i> , 2015, 156, 3416-3421.	2.8	290

#	ARTICLE	IF	CITATIONS
37	Networking to advance progress in children's environmental health. <i>The Lancet Global Health</i> , 2014, 2, e129-e130.	6.3	11
38	Health effects of exposure to e-waste. <i>The Lancet Global Health</i> , 2013, 1, e70.	6.3	41
39	Phytotechnologies – Preventing Exposures, Improving Public Health. <i>International Journal of Phytoremediation</i> , 2013, 15, 889-899.	3.1	46
40	Nutrition Can Modulate the Toxicity of Environmental Pollutants: Implications in Risk Assessment and Human Health. <i>Environmental Health Perspectives</i> , 2012, 120, 771-774.	6.0	83
41	Research Strategies to Advance Our Understanding Early Life Exposures to Improve Child Health and Reduce Disease Burden.. <i>Qscience Proceedings</i> , 2012, , .	0.0	0
42	Children's environmental health“from knowledge to action. <i>Lancet, The</i> , 2011, 377, 1134-1136.	13.7	17
43	Environmental Factors in Cancer: Radiation. <i>Reviews on Environmental Health</i> , 2010, 25, 57-62.	2.4	1
44	Strategies for Addressing Global Environmental Health Concerns. <i>Annals of the New York Academy of Sciences</i> , 2008, 1140, 40-44.	3.8	2
45	A New Day for Global Environmental Health. <i>Environmental Health Perspectives</i> , 2008, 116, A148-9.	6.0	3
46	Using Nutrition for Intervention and Prevention against Environmental Chemical Toxicity and Associated Diseases. <i>Environmental Health Perspectives</i> , 2007, 115, 493-495.	6.0	84
47	The NIEHS Environmental Health Sciences Data Resource Portal: Placing Advanced Technologies in Service to Vulnerable Communities. <i>Environmental Health Perspectives</i> , 2007, 115, 564-571.	6.0	17
48	Children's Environmental Health in Central Asia and the Middle East. <i>International Journal of Occupational and Environmental Health</i> , 2006, 12, 362-368.	1.2	7
49	Multidisciplinary Research: Strategies for Assessing Chemical Mixtures to Reduce Risk of Exposure and Disease. <i>Human and Ecological Risk Assessment (HERA)</i> , 2005, 11, 141-151.	3.4	4
50	Human exposure monitoring and evaluation in the Arctic: the importance of understanding exposures to the development of public health policy.. <i>Environmental Health Perspectives</i> , 2004, 112, 113-120.	6.0	25
51	Emerging issues: nutritional awareness in environmental toxicology. <i>Journal of Nutritional Biochemistry</i> , 2004, 15, 194-195.	4.2	16
52	Multidisciplinary research: strategies for assessing chemical mixtures to reduce risk of exposure and disease. <i>International Journal of Occupational Medicine and Environmental Health</i> , 2004, 17, 103-10.	1.3	7
53	Environmental hazards to children’s health in the modern world. <i>Mutation Research - Reviews in Mutation Research</i> , 2003, 544, 235-242.	5.5	70
54	SGOMSEC 15 Methodologies for Assessing Exposures to Metals: Speciation, Bioaccessibility, and Bioavailability in the Environment, Food, and Feed. <i>Ecotoxicology and Environmental Safety</i> , 2003, 56, 3-5.	6.0	2

#	ARTICLE	IF	CITATIONS
55	Environmental threats to children's health in Southeast Asia and the Western Pacific.. Environmental Health Perspectives, 2003, 111, 1340-1347.	6.0	65
56	Chemical mixtures research: significance and future perspectives.. Environmental Health Perspectives, 2002, 110, 891-892.	6.0	46
57	Beyond The Bangkok Statement: research needs to address environmental threats to children's health.. Environmental Health Perspectives, 2002, 110, A284-6.	6.0	10
58	Peer Reviewed: Creating Multidisciplinary Research Opportunities. Environmental Science & Technology, 1999, 33, 241A-244A.	10.0	9
59	Commentary: Children's Health and the Environment: A New Agenda for Prevention Research. Environmental Health Perspectives, 1998, 106, 787.	6.0	47
60	Commentary: Genes and the Environment: Their Impact on Children's Health. Environmental Health Perspectives, 1998, 106, 817.	6.0	17
61	Toxicity and health effects of combustion byâ€products. Toxicological and Environmental Chemistry, 1995, 49, 129-130.	1.2	0
62	The NIEHS Superfund Basic Research Program: Overview and Areas of Future Research Directions. Environmental Health Perspectives, 1995, 103, 3.	6.0	3
63	Genetic and Molecular Ecotoxicology: A Research Framework. Environmental Health Perspectives, 1994, 102, 3-8.	6.0	111
