

Christhina Candido

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3337316/christhina-candido-publications-by-year.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

36
papers

1,525
citations

#	Paper	IF	Citations
36	A Biophilic Design Approach for Improved Energy Performance in Retrofitting Residential Projects. <i>Sustainability</i> , 2022 , 14, 3776	3.6	0
35	The Potential of Harnessing Real-Time Occupancy Data for Improving Energy Performance of Activity-Based Workplaces. <i>Energies</i> , 2022 , 15, 230	3.1	1
34	Occupants Satisfaction and perceived productivity in open-plan offices designed to support activity-based working: findings from different industry sectors. <i>Journal of Corporate Real Estate</i> , 2021 , 23, 106-129	1.9	2
33	A Ten-Year Review of Primary School Flexible Learning Environments: Interior Design and IEQ Performance. <i>Buildings</i> , 2021 , 11, 183	3.2	1
32	Can commercial buildings cope with Australian bushfires? An IAQ analysis. <i>Buildings and Cities</i> , 2021 , 2, 583-598	3.3	1
31	Designing healthy workspaces: results from Australian certified open-plan offices. <i>Facilities</i> , 2020 , 39, 411-433	2.2	7
30	Towards onsite, modular robotic carbon-fibre winding for an integrated ceiling structure. <i>Construction Robotics</i> , 2019 , 3, 23-40	1.4	3
29	Differences in Occupants Satisfaction and Perceived Productivity in High- and Low-Performance Offices. <i>Buildings</i> , 2019 , 9, 199	3.2	14
28	The Rise of Office Design in High-Performance, Open-Plan Environments. <i>Buildings</i> , 2019 , 9, 100	3.2	16
27	Designing activity-based workspaces: satisfaction, productivity and physical activity. <i>Building Research and Information</i> , 2019 , 47, 275-289	4.3	35
26	Variation of indoor minimum mortality temperature in different cities: Evidence of local adaptations. <i>Environmental Pollution</i> , 2019 , 246, 745-752	9.3	3
25	Development of the ASHRAE Global Thermal Comfort Database II. <i>Building and Environment</i> , 2018 , 142, 502-512	6.5	164
24	Indoor Spaces Environmental Evaluation for Office Buildings at CUASO Applicability of the BOSSA Time Lapse. <i>World Sustainability Series</i> , 2018 , 715-733	0.6	
23	Understanding patterns of adaptive comfort behaviour in the Sydney mixed-mode residential context. <i>Energy and Buildings</i> , 2017 , 141, 274-283	7	64
22	Thermal comfort in office buildings: Findings from a field study in mixed-mode and fully-air conditioning environments under humid subtropical conditions. <i>Building and Environment</i> , 2017 , 123, 672-683	6.5	44
21	The effects of higher temperature setpoints during summer on office workers' cognitive load and thermal comfort. <i>Building and Environment</i> , 2017 , 123, 176-188	6.5	45
20	Conforto térmico humano em escritórios com sistema central de condicionamento artificial em clima subtropical úmido: estudos de campo vs. abordagem analítica. <i>Ambiente Construído</i> , 2017 , 17, 111-123	3.4	5

19	Desk ownership in the workplace: The effect of non-territorial working on employee workplace satisfaction, perceived productivity and health. <i>Building and Environment</i> , 2016 , 103, 203-214	6.5	81
18	Thermal pleasure in built environments: alliesthesia in different thermoregulatory zones. <i>Building Research and Information</i> , 2016 , 44, 20-33	4.3	42
17	BOSSA: a multidimensional post-occupancy evaluation tool. <i>Building Research and Information</i> , 2016 , 44, 214-228	4.3	63
16	Thermal comfort during temperature cycles induced by direct load control strategies of peak electricity demand management. <i>Building and Environment</i> , 2016 , 103, 9-20	6.5	31
15	Adaptive thermal comfort in Australian school classrooms. <i>Building Research and Information</i> , 2015 , 43, 383-398	4.3	119
14	ASHRAE 55 adaptive model application in hot and humid climates: the Brazilian case. <i>Architectural Science Review</i> , 2015 , 58, 93-101	2.6	15
13	Indoor temperatures for optimum thermal comfort and human performance - reply to the letter by Wyon and Wargocki. <i>Indoor Air</i> , 2014 , 24, 554-5	5.4	3
12	Progress in thermal comfort research over the last twenty years. <i>Indoor Air</i> , 2013 , 23, 442-61	5.4	277
11	Gender differences in office occupant perception of indoor environmental quality (IEQ). <i>Building and Environment</i> , 2013 , 70, 245-256	6.5	144
10	The next generation of experientially realistic lab-based research: The University of Sydney's Indoor Environmental Quality Laboratory. <i>Architectural Science Review</i> , 2013 , 56, 83-92	2.6	10
9	O efeito da utilização de ventiladores de teto no conforto térmico em salas de aulas com condicionamento híbrido em um local de clima quente e úmido. <i>Ambiente Construído</i> , 2013 , 13, 189-202	0.4	3
8	From thermal boredom to thermal pleasure: a brief literature review. <i>Ambiente Construído</i> , 2012 , 12, 81-90	0.4	10
7	Effects of artificially induced heat acclimatization on subjects' thermal and air movement preferences. <i>Building and Environment</i> , 2012 , 49, 251-258	6.5	20
6	Towards a Brazilian standard for naturally ventilated buildings: guidelines for thermal and air movement acceptability. <i>Building Research and Information</i> , 2011 , 39, 145-153	4.3	30
5	Combined thermal acceptability and air movement assessments in a hot humid climate. <i>Building and Environment</i> , 2011 , 46, 379-385	6.5	67
4	Cooling exposure in hot humid climates: are occupants 'addicted'? <i>Architectural Science Review</i> , 2010 , 53, 59-64	2.6	41
3	Air movement acceptability limits and thermal comfort in Brazil's hot humid climate zone. <i>Building and Environment</i> , 2010 , 45, 222-229	6.5	127
2	Thermal acceptability assessment in buildings located in hot and humid regions in Brazil. <i>Building and Environment</i> , 2010 , 45, 1225-1232	6.5	26

- 1 Aplicabilidade dos limites da velocidade do ar para efeito de conforto térmico em climas quentes e úmidos. *Ambiente Construído*, **2010**, 10, 59-68 0.4 9
