

Xuewu Guo

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3341240/xuewu-guo-publications-by-year.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

43
papers

#	Paper	IF	Citations
43	Analysis of the molecular basis of <i>Saccharomyces cerevisiae</i> mutant with high nucleic acid content by comparative transcriptomics. <i>Food Research International</i> , 2021 , 142, 110188	7	1
42	Uncoupling glucose sensing from GAL metabolism for heterologous lactose fermentation in <i>Saccharomyces cerevisiae</i> . <i>Biotechnology Letters</i> , 2021 , 43, 1607-1616	3	2
41	Enhancement of C6-10 Fatty acid ethyl esters production in <i>Saccharomyces cerevisiae</i> CA by metabolic engineering. <i>LWT - Food Science and Technology</i> , 2021 , 145, 111496	5.4	2
40	Metabolic Engineering of for Ethyl Acetate Biosynthesis. <i>ACS Synthetic Biology</i> , 2021 , 10, 495-504	5.7	2
39	Effect of the Deletion of Genes Related to Amino Acid Metabolism on the Production of Higher Alcohols by. <i>BioMed Research International</i> , 2020 , 2020, 6802512	3	1
38	Production of low-alcohol Huangjiu with improved acidity and reduced levels of higher alcohols by fermentation with scarless ALD6 overexpression yeast. <i>Food Chemistry</i> , 2020 , 321, 126691	8.5	4
37	Biosynthetic Pathway for Ethyl Butyrate Production in. <i>Journal of Agricultural and Food Chemistry</i> , 2020 , 68, 4252-4260	5.7	5
36	Increased RNA production in <i>Saccharomyces cerevisiae</i> by simultaneously overexpressing FHL1, IFH1, and SSF2 and deleting HRP1. <i>Applied Microbiology and Biotechnology</i> , 2020 , 104, 7901-7913	5.7	0
35	Engineering Microbial Consortia for High-Performance Cellulosic Hydrolyzates-Fed Microbial Fuel Cells. <i>Frontiers in Microbiology</i> , 2019 , 10, 409	5.7	20
34	Regulating the Golgi apparatus sorting of proteinase A to decrease its excretion in <i>Saccharomyces cerevisiae</i> . <i>Journal of Industrial Microbiology and Biotechnology</i> , 2019 , 46, 601-612	4.2	2
33	Synthetic <i>Klebsiella pneumoniae</i> - <i>Shewanella oneidensis</i> Consortium Enables Glycerol-Fed High-Performance Microbial Fuel Cells. <i>Biotechnology Journal</i> , 2018 , 13, e1700491	5.6	19
32	Effect of ILV6 Deletion and Expression of aldB from <i>Lactobacillus plantarum</i> in <i>Saccharomyces uvarum</i> on Diacetyl Production and Wine Flavor. <i>Journal of Agricultural and Food Chemistry</i> , 2018 , 66, 8556-8565	5.7	7
31	Heterologous expression of <i>Spathaspora passalidarum</i> xylose reductase and xylitol dehydrogenase genes improved xylose fermentation ability of <i>Aureobasidium pullulans</i> . <i>Microbial Cell Factories</i> , 2018 , 17, 64	6.4	8
30	Reduced production of diacetyl by overexpressing BDH2 gene and ILV5 gene in yeast of the lager brewers with one ILV2 allelic gene deleted. <i>Journal of Industrial Microbiology and Biotechnology</i> , 2017 , 44, 397-405	4.2	8
29	Efficient utilization of hemicellulose and cellulose in alkali liquor-pretreated corncob for bioethanol production at high solid loading by <i>Spathaspora passalidarum</i> U1-58. <i>Bioresource Technology</i> , 2017 , 232, 168-175	11	29
28	Development of a one-step gene knock-out and knock-in method for metabolic engineering of <i>Aureobasidium pullulans</i> . <i>Journal of Biotechnology</i> , 2017 , 251, 145-150	3.7	9
27	Efficient production of 2,3-butanediol from cheese whey powder (CWP) solution by <i>Klebsiella pneumoniae</i> through integrating pulsed fed-batch fermentation with a two-stage pH control strategy. <i>Fuel</i> , 2017 , 203, 469-477	7.1	9

26	Discovering the role of the apolipoprotein gene and the genes in the putative pullulan biosynthesis pathway on the synthesis of pullulan, heavy oil and melanin in <i>Aureobasidium pullulans</i> . <i>World Journal of Microbiology and Biotechnology</i> , 2017 , 34, 11	4.4	2
25	Reducing diacetyl production of wine by overexpressing BDH1 and BDH2 in <i>Saccharomyces uvarum</i> . <i>Journal of Industrial Microbiology and Biotechnology</i> , 2017 , 44, 1541-1550	4.2	8
24	<i>Saccharomyces cerevisiae</i> proteinase A excretion and wine making. <i>World Journal of Microbiology and Biotechnology</i> , 2017 , 33, 210	4.4	9
23	Decreased proteinase A excretion by strengthening its vacuolar sorting and weakening its constitutive secretion in <i>Saccharomyces cerevisiae</i> . <i>Journal of Industrial Microbiology and Biotechnology</i> , 2017 , 44, 149-159	4.2	7
22	Production of 2,3-butanediol by <i>Enterobacter cloacae</i> from corncob-derived xylose. <i>Turkish Journal of Biology</i> , 2016 , 40, 856-865	3.1	4
21	Improved ethyl caproate production of Chinese liquor yeast by overexpressing fatty acid synthesis genes with OPI1 deletion. <i>Journal of Industrial Microbiology and Biotechnology</i> , 2016 , 43, 1261-70	4.2	12
20	Improving Erythritol Production of <i>Aureobasidium pullulans</i> from Xylose by Mutagenesis and Medium Optimization. <i>Applied Biochemistry and Biotechnology</i> , 2016 , 180, 717-727	3.2	22
19	A genetic transformation protocol for the xylose-fermenting yeast <i>Spathaspora passalidarum</i> . <i>Engineering in Life Sciences</i> , 2015 , 15, 550-555	3.4	6
18	Reduction of biogenic amines production by eliminating the PEP4 gene in <i>Saccharomyces cerevisiae</i> during fermentation of Chinese rice wine. <i>Food Chemistry</i> , 2015 , 178, 208-11	8.5	11
17	Effect of MIG1 Gene Deletion on Lactose Utilization in Lac+ <i>Saccharomyces cerevisiae</i> Engineering Strains. <i>Lecture Notes in Electrical Engineering</i> , 2015 , 143-151	0.2	2
16	Improved Lactose Utilization by Overexpression of Galactosidase and Lactose Permease in <i>Klebsiella pneumoniae</i> . <i>Lecture Notes in Electrical Engineering</i> , 2015 , 121-131	0.2	
15	Increasing Galactose Utilized Ability of <i>Saccharomyces cerevisiae</i> Through Gene Engineering. <i>Lecture Notes in Electrical Engineering</i> , 2014 , 213-219	0.2	
14	Enhanced ethyl caproate production of Chinese liquor yeast by overexpressing EHT1 with deleted FAA1. <i>Journal of Industrial Microbiology and Biotechnology</i> , 2014 , 41, 563-72	4.2	27
13	Production of pullulan from xylose and hemicellulose hydrolysate by <i>Aureobasidium pullulans</i> AY82 with pH control and DL-dithiothreitol addition. <i>Biotechnology and Bioprocess Engineering</i> , 2014 , 19, 282-288	3.1	32
12	Effect of the inactivation of lactate dehydrogenase, ethanol dehydrogenase, and phosphotransacetylase on 2,3-butanediol production in <i>Klebsiella pneumoniae</i> strain. <i>Biotechnology for Biofuels</i> , 2014 , 7, 44	7.8	54
11	Enhanced acetate ester production of Chinese liquor yeast by overexpressing ATF1 through precise and seamless insertion of PGK1 promoter. <i>Journal of Industrial Microbiology and Biotechnology</i> , 2014 , 41, 1823-8	4.2	7
10	Enhanced enzymatic xylose/cellulose fractionation from alkaline liquor-pretreated corn cob by surfactant addition and separate fermentation to bioethanol. <i>Turkish Journal of Biology</i> , 2014 , 38, 478-484	3.1	3
9	Development of HPLC Method for Determination of the Content of Tyramine in Rice Wine. <i>Lecture Notes in Electrical Engineering</i> , 2014 , 557-563	0.2	1

8	Corn cob Residue Pretreatment for 2,3-Butanediol Production by Simultaneous Saccharification and Fermentation. <i>Lecture Notes in Electrical Engineering</i> , 2014 , 1469-1479	0.2	2
7	A rapid and efficient one-step site-directed deletion, insertion, and substitution mutagenesis protocol. <i>Analytical Biochemistry</i> , 2013 , 434, 254-8	3.1	15
6	Construction of lactose-consuming <i>Saccharomyces cerevisiae</i> for lactose fermentation into ethanol fuel. <i>Journal of Industrial Microbiology and Biotechnology</i> , 2013 , 40, 353-63	4.2	18
5	Development of <i>Saccharomyces cerevisiae</i> producing higher levels of sulfur dioxide and glutathione to improve beer flavor stability. <i>Applied Biochemistry and Biotechnology</i> , 2012 , 166, 402-13	3.2	21
4	Construction of recombinant industrial brewer's yeast with lower diacetyl production and proteinase A activity. <i>European Food Research and Technology</i> , 2012 , 235, 951-961	3.4	27
3	Intergeneric yeast fusants with efficient ethanol production from cheese whey powder solution: Construction of a <i>Kluyveromyces marxianus</i> and <i>Saccharomyces cerevisiae</i> AY-5 hybrid. <i>Engineering in Life Sciences</i> , 2012 , 12, 656-661	3.4	6
2	Effects of soya fatty acids on cassava ethanol fermentation. <i>Applied Biochemistry and Biotechnology</i> , 2010 , 160, 410-20	3.2	15
1	Improved ethanol production by mixed immobilized cells of <i>Kluyveromyces marxianus</i> and <i>Saccharomyces cerevisiae</i> from cheese whey powder solution fermentation. <i>Applied Biochemistry and Biotechnology</i> , 2010 , 160, 532-8	3.2	36
