1975 citing authors

#	Article	IF	CITATIONS
1	Bowel Inflammation as Measured by Fecal Calprotectin. Cancer Epidemiology Biomarkers and Prevention, 2004, 13, 279-284.	2.5	189
2	Effect of Treatment for <i>Chlamydia pneumoniae</i> and <i>Helicobacter pylori</i> on Markers of Inflammation and Cardiac Events in Patients With Acute Coronary Syndromes. Circulation, 2002, 106, 1219-1223.	1.6	178
3	A new, highly sensitive assay for C-reactive protein can aid the differentiation of inflammatory bowel disorders from constipation- and diarrhoea-predominant functional bowel disorders. European Journal of Gastroenterology and Hepatology, 2002, 14, 409-412.	1.6	108
4	Increased Risk of Atherosclerosis Is Confined to CagA-PositiveHelicobacter pyloriStrains. Stroke, 2003, 34, 610-615.	2.0	105
5	Is Obesity a Risk Factor for Crohn's Disease?. Digestive Diseases and Sciences, 2011, 56, 837-844.	2.3	95
6	Emerging role of calprotectin in gastroenterology. Journal of Gastroenterology and Hepatology (Australia), 2003, 18, 756-762.	2.8	91
7	European Crohn's and Colitis Organisation Topical Review on IBD in the Elderly: Table 1 Journal of Crohn's and Colitis, 2016, 11, jjw188.	1.3	79
8	Proton pump inhibitors are associated with elevation of faecal calprotectin and may affect specificity. European Journal of Gastroenterology and Hepatology, 2003, 15, 573-574.	1.6	73
9	Incidence and survival of oesophageal and gastric cancer in England between 1998 and 2007, a population-based study. BMC Cancer, 2012, 12, 11.	2.6	58
10	Treatment of Crohn's Disease with an IgG4-Guided Exclusion Diet: A Randomized Controlled Trial. Digestive Diseases and Sciences, 2016, 61, 1148-1157.	2.3	51
11	Childhood body mass index and risk of inflammatory bowel disease in adulthood: a population-based cohort study. American Journal of Gastroenterology, 2018, 113, 694-701.	0.4	32
12	Determinants of Weight Loss prior to Diagnosis in Inflammatory Bowel Disease: A Retrospective Observational Study. Gastroenterology Research and Practice, 2014, 2014, 1-7.	1.5	29
13	<i>Chlamydia pneumoniae</i> Serology, Lung Function Decline, and Treatment for Respiratory Disease. American Journal of Respiratory and Critical Care Medicine, 2000, 161, 493-497.	5.6	25
14	Relation of body mass index to risk of developing inflammatory bowel disease amongst women in the Danish National Birth Cohort. PLoS ONE, 2018, 13, e0190600.	2.5	23
15	Faecal calprotectin: factors affecting levels and its potential role as a surrogate marker for risk of development of Crohn's Disease. BMC Gastroenterology, 2016, 16, 126.	2.0	22
16	Body mass index in young men and risk of inflammatory bowel disease through adult life: A population-based Danish cohort study. Scientific Reports, 2019, 9, 6360.	3.3	16
17	Advanced age influences the dynamic changes in circulating C-reactive protein following injury. Journal of Clinical Pathology, 2013, 66, 695-699.	2.0	12
18	Effect of the CD14 promoter polymorphism on liver function tests and its association with alcohol and obesity. European Journal of Gastroenterology and Hepatology, 2003, 15, 1317-1322.	1.6	8

#	Article	IF	CITATIONS
19	Abdominal adiposity is the main determinant of the C-reactive response to injury in subjects undergoing inguinal hernia repair. Journal of Inflammation, 2013, 10, 5.	3.4	5
20	Childhood growth and risk of inflammatory bowel disease: a population-based study of 317,030 children. Scandinavian Journal of Gastroenterology, 2019, 54, 863-868.	1.5	4
21	Lymphocytic Gastritis and Helicobacter pylori: Reluctant Mucosal Partners?. Helicobacter, 2000, 5, 248-249.	3.5	2
22	Environment and Risk of Crohn's Disease. Inflammatory Bowel Diseases, 2014, 20, E11-E12.	1.9	1
23	Obesity and Risk of Crohn's Disease Half the Story. Clinical Gastroenterology and Hepatology, 2023, 21, 1121-1122.	4.4	1
24	Diverticular Disease and Vascular Diseases: A Shared Responsiveness to Injury Is Likely to Be the Underlying Mechanism. Clinical Gastroenterology and Hepatology, 2015, 13, 1375.	4.4	0
