## Anthony Ranchou-Peyruse

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/335368/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Biological, geological and chemical effects of oxygen injection in underground gas storage aquifers in the setting of biomethane deployment. Science of the Total Environment, 2022, 806, 150690.	8.0	7
2	Microbial Diversity Under the Influence of Natural Gas Storage in a Deep Aquifer. Frontiers in Microbiology, 2021, 12, 688929.	3.5	7
3	Genome insights of mercury methylation among Desulfovibrio and Pseudodesulfovibrio strains. Research in Microbiology, 2020, 171, 3-12.	2.1	18
4	An LC-MS/MS Method for a Comprehensive Determination of Metabolites of BTEX Anaerobic Degradation in Bacterial Cultures and Groundwater. Water (Switzerland), 2020, 12, 1869.	2.7	12
5	Microbial Communities and Sulfate-Reducing Microorganisms Abundance and Diversity in Municipal Anaerobic Sewage Sludge Digesters from a Wastewater Treatment Plant (Marrakech, Morocco). Processes, 2020, 8, 1284.	2.8	2
6	Studying key processes related to CO <sub>2</sub> underground storage at the pore scale using high pressure micromodels. Reaction Chemistry and Engineering, 2020, 5, 1156-1185.	3.7	20
7	Geological gasâ€storage shapes deep life. Environmental Microbiology, 2019, 21, 3953-3964.	3.8	15
8	Pseudodesulfovibrio hydrargyri sp. nov., a mercury-methylating bacterium isolated from a brackish sediment. International Journal of Systematic and Evolutionary Microbiology, 2018, 68, 1461-1466.	1.7	23
9	The sequence capture by hybridization: a new approach for revealing the potential of monoâ€aromatic hydrocarbons bioattenuation in a deep oligotrophic aquifer. Microbial Biotechnology, 2017, 10, 469-479.	4.2	17
10	Desulfobulbus oligotrophicus sp. nov., a sulfate-reducing and propionate-oxidizing bacterium isolated from a municipal anaerobic sewage sludge digester. International Journal of Systematic and Evolutionary Microbiology, 2017, 67, 275-281.	1.7	44
11	New Bio-Indicators for Long Term Natural Attenuation of Monoaromatic Compounds in Deep Terrestrial Aquifers. Frontiers in Microbiology, 2016, 7, 122.	3.5	13
12	Desulfotomaculum spp. and related gram-positive sulfate-reducing bacteria in deep subsurface environments. Frontiers in Microbiology, 2013, 4, 362.	3.5	108
