#	Article	IF	Citations
1	The a posteriori error estimates and adaptive computation of nonconforming mixed finite elements for the Stokes eigenvalue problem. Applied Mathematics and Computation, 2022, 421, 126951.	2.2	3
2	The a Priori and a Posteriori Error Estimates of DG Method for the Steklov Eigenvalue Problem in Inverse Scattering. Journal of Scientific Computing, 2022, 91, 1.	2.3	4
3	An adaptive finite element method for the elastic transmission eigenvalue problem. Discrete and Continuous Dynamical Systems - Series B, 2022, .	0.9	0
4	A locking–free shifted inverse iteration based on multigrid discretization for the elastic eigenvalue problem. Mathematical Methods in the Applied Sciences, 2021, 44, 5821-5838.	2.3	1
5	Guaranteed lower eigenvalue bounds for two spectral problems arising in fluid mechanics. Computers and Mathematics With Applications, 2021, 90, 66-72.	2.7	3
6	Two-grid discretizations and a local finite element scheme for a non-selfadjoint Stekloff eigenvalue problem. Computers and Mathematics With Applications, 2020, 79, 1895-1913.	2.7	11
7	A multigrid correction scheme for a new Steklov eigenvalue problem in inverse scattering. International Journal of Computer Mathematics, 2020, 97, 1412-1430.	1.8	8
8	A type of adaptive C^0 non-conforming finite element method for the Helmholtz transmission eigenvalue problem. Computer Methods in Applied Mechanics and Engineering, 2020, 360, 112697.	6.6	10
9	Non-conforming Crouzeix-Raviart element approximation for Stekloff eigenvalues in inverse scattering. Advances in Computational Mathematics, 2020, 46, 1.	1.6	5
10	Guaranteed Lower Bounds for the Elastic Eigenvalues by Using the Nonconforming Crouzeix–Raviart Finite Element. Mathematics, 2020, 8, 1252.	2.2	2
11	Mixed methods for the elastic transmission eigenvalue problem. Applied Mathematics and Computation, 2020, 374, 125081.	2.2	6
12	The adaptive finite element method for the Steklov eigenvalue problem in inverse scattering. Open Mathematics, 2020, 18, 216-236.	1.0	1
13	Local and Parallel Finite Element Algorithms for the Transmission Eigenvalue Problem. Journal of Scientific Computing, 2019, 78, 351-375.	2.3	3
14	A correction method for finding lower bounds of eigenvalues of the second–order elliptic and Stokes operators. Numerical Methods for Partial Differential Equations, 2019, 35, 2149-2170.	3.6	2
15	The two-grid discretization of Ciarlet–Raviart mixed method for biharmonic eigenvalue problems. Applied Numerical Mathematics, 2019, 138, 94-113.	2.1	5
16	Multiscale finite element discretizations based on local defect correction for the biharmonic eigenvalue problem of plate buckling. Mathematical Methods in the Applied Sciences, 2019, 42, 999-1017.	2.3	2
17	Local and parallel finite element method for solving the biharmonic eigenvalue problem of plate vibration. Numerical Methods for Partial Differential Equations, 2019, 35, 851-869.	3.6	5
18	Adaptive Morley element algorithms for the biharmonic eigenvalue problem. Journal of Inequalities and Applications, 2018, 2018, 55.	1.1	1

#	Article	IF	Citations
19	A two-grid discretization scheme of non-conforming finite elements for transmission eigenvalues. Computers and Mathematics With Applications, 2018, 75, 520-533.	2.7	2
20	An adaptive C0IPG method for the Helmholtz transmission eigenvalue problem. Science China Mathematics, 2018, 61, 1519-1542.	1.7	5
21	The adaptive Ciarlet–Raviart mixed method for biharmonic problems with simply supported boundary condition. Applied Mathematics and Computation, 2018, 339, 206-219.	2.2	3
22	C 0IPG adaptive algorithms for the biharmonic eigenvalue problem. Numerical Algorithms, 2018, 78, 553-567.	1.9	7
23	A C^{0}IPG method and its error estimates for the Helmholtz transmission eigenvalue problem. Journal of Computational and Applied Mathematics, 2017, 326, 71-86.	2.0	13
24	An H m -conforming spectral element method on multi-dimensional domain and its application to transmission eigenvalues. Science China Mathematics, 2017, 60, 1529-1542.	1.7	8
25	A new multigrid finite element method for the transmission eigenvalue problems. Applied Mathematics and Computation, 2017, 292, 96-106.	2.2	18
26	Non-conforming finite element methods for transmission eigenvalue problem. Computer Methods in Applied Mechanics and Engineering, 2016, 307, 144-163.	6.6	21
27	Mixed Methods for the Helmholtz Transmission Eigenvalues. SIAM Journal of Scientific Computing, 2016, 38, A1383-A1403.	2.8	40
28	The lower bound property of the Morley element eigenvalues. Computers and Mathematics With Applications, 2016, 72, 904-920.	2.7	4
29	Local and parallel finite element algorithms for the Steklov eigenvalue problem. Numerical Methods for Partial Differential Equations, 2016, 32, 399-417.	3.6	6
30	An adaptive algorithm based on the shifted inverse iteration for the Steklov eigenvalue problem. Applied Numerical Mathematics, 2016, 105, 64-81.	2.1	12
31	An Adaptive Finite Element Method for the Transmission Eigenvalue Problem. Journal of Scientific Computing, 2016, 69, 1279-1300.	2.3	11
32	A Multilevel Correction Scheme for the Steklov Eigenvalue Problem. Mathematical Problems in Engineering, 2015, 2015, 1-11.	1.1	0
33	A Multilevel Correction Method for Convection-Diffusion Eigenvalue Problems. Mathematical Problems in Engineering, 2015, 2015, 1-10.	1.1	6
34	The Shifted-Inverse Iteration Based on the Multigrid Discretizations for Eigenvalue Problems. SIAM Journal of Scientific Computing, 2015, 37, A2583-A2606.	2.8	19
35	A new adaptive mixed finite element method based on residual type a posterior error estimates for the Stokes eigenvalue problem. Numerical Methods for Partial Differential Equations, 2015, 31, 31-53.	3.6	14
36	The multilevel mixed finite element discretizations based on local defect-correction for the Stokes eigenvalue problem. Computer Methods in Applied Mechanics and Engineering, 2015, 289, 249-266.	6.6	11

#	Article	IF	Citations
37	Multilevel finite element discretizations based on local defect correction for nonsymmetric eigenvalue problems. Computers and Mathematics With Applications, 2015, 70, 1799-1816.	2.7	6
38	The Lower/Upper Bound Property of the Crouzeixâ€"Raviart Element Eigenvalues on Adaptive Meshes. Journal of Scientific Computing, 2015, 62, 284-299.	2.3	11
39	An Adaptive Nonconforming Finite Element Algorithm for Laplace Eigenvalue Problem. Abstract and Applied Analysis, 2014, 2014, 1-15.	0.7	0
40	A note on the residual type a posteriori error estimates for finite element eigenpairs of nonsymmetric elliptic eigenvalue problems. Applied Numerical Mathematics, 2014, 82, 51-67.	2.1	4
41	Local a priori/a posteriori error estimates of conforming finite elements approximation for Steklov eigenvalue problems. Science China Mathematics, 2014, 57, 1319-1329.	1.7	8
42	Upper spectral bounds and a posteriori error analysis of several mixed finite element approximations for the Stokes eigenvalue problem. Science China Mathematics, 2013, 56, 1313-1330.	1.7	17
43	The adaptive finite element method based on multi-scale discretizations for eigenvalue problems. Computers and Mathematics With Applications, 2013, 65, 1086-1102.	2.7	13
44	The extrapolation of numerical eigenvalues by finite elements for differential operators. Applied Numerical Mathematics, 2013, 69, 59-72.	2.1	3
45	Spectral Method with the Tensor-Product Nodal Basis for the Steklov Eigenvalue Problem. Mathematical Problems in Engineering, 2013, 2013, 1-9.	1.1	3
46	A Class of Spectral Element Methods and Its A Priori/A Posteriori Error Estimates for 2nd-Order Elliptic Eigenvalue Problems. Abstract and Applied Analysis, 2013, 2013, 1-14.	0.7	6
47	Local and Parallel Finite Element Discretizations for Eigenvalue Problems. SIAM Journal of Scientific Computing, 2013, 35, A2575-A2597.	2.8	21
48	Highly Efficient Calculation Schemes of Finite-Element Filter Approach for the Eigenvalue Problem of Electric Field. Mathematical Problems in Engineering, 2012, 2012, 1-21.	1.1	1
49	A Two-Scale Discretization Scheme for Mixed Variational Formulation of Eigenvalue Problems. Abstract and Applied Analysis, 2012, 2012, 1-29.	0.7	9
50	Multigrid Discretization and Iterative Algorithm for Mixed Variational Formulation of the Eigenvalue Problem of Electric Field. Abstract and Applied Analysis, 2012, 2012, 1-25.	0.7	4
51	Multiscale Discretization Scheme Based on the Rayleigh Quotient Iterative Method for the Steklov Eigenvalue Problem. Mathematical Problems in Engineering, 2012, 2012, 1-18.	1.1	13
52	Two-grid Discretization Schemes Based on the Filter Approach for the Maxwell Eigenvalue Problem. Procedia Engineering, 2012, 37, 143-149.	1.2	1
53	Eigenvalue approximations from below using Morley elements. Advances in Computational Mathematics, 2012, 36, 443-450.	1.6	23
54	Two-Grid Finite Element Discretization Schemes Based on Shifted-Inverse Power Method for Elliptic Eigenvalue Problems. SIAM Journal on Numerical Analysis, 2011, 49, 1602-1624.	2.3	72

#	Article	IF	Citations
55	A two-grid method of the non-conforming Crouzeixâ€"Raviart element for the Steklov eigenvalue problem. Applied Mathematics and Computation, 2011, 217, 9669-9678.	2.2	28
56	A two-grid discretization scheme for the Steklov eigenvalue problem. Journal of Applied Mathematics and Computing, 2011, 36, 129-139.	2.5	27
57	Conforming Finite Element Approximations for a Fourth-Order Steklov Eigenvalue Problem. Mathematical Problems in Engineering, 2011, 2011, 1-13.	1.1	11
58	Lower spectral bounds by Wilson's brick discretization. Applied Numerical Mathematics, 2010, 60, 782-787.	2.1	11
59	Eigenvalue approximation from below using non-conforming finite elements. Science China Mathematics, 2010, 53, 137-150.	1.7	60
60	A posteriori error estimates for the nonconforming EQ<inf>1</inf><sup>rot</sup> element. , 2010, , .		0
61	Generalized Rayleigh quotient and finite element two-grid discretization schemes. Science in China Series A: Mathematics, 2009, 52, 1955-1972.	0.5	13
62	Nonconforming finite element approximations of the Steklov eigenvalue problem. Applied Numerical Mathematics, 2009, 59, 2388-2401.	2.1	37
63	Two-grid Discretization Schemes of the Nonconforming FEM for Eigenvalue Problems. Journal of Computational Mathematics, 2009, 27, 748-763.	0.4	3
64	The order-preserving convergence for spectral approximation of self-adjoint completely continuous operators. Science in China Series A: Mathematics, 2008, 51, 1232-1242.	0.5	15
