

# Francisco Saldanha-da-Gama

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/3388769/francisco-saldanha-da-gama-publications-by-year.pdf>

**Version:** 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

51  
papers

3,067  
citations

25

#	Paper	IF	Citations
51	On Optimizing a Multi-Mode Last-Mile Parcel Delivery System with Vans, Truck and Drone. <i>Electronics (Switzerland)</i> , <b>2021</b> , 10, 2510	2.6	1
50	Humanitarian facility location under uncertainty: Critical review and future prospects. <i>Omega</i> , <b>2021</b> , 102, 102393	7.2	8
49	Solutions for districting problems with chance-constrained balancing requirements. <i>Omega</i> , <b>2021</b> , 103, 102430	7.2	2
48	Towards a stochastic programming modeling framework for districting. <i>Annals of Operations Research</i> , <b>2020</b> , 292, 249-285	3.2	3
47	The facility location problem with capacity transfers. <i>Transportation Research, Part E: Logistics and Transportation Review</i> , <b>2020</b> , 138, 101943	9	4
46	Improved polyhedral descriptions and exact procedures for a broad class of uncapacitated p-hub median problems. <i>Transportation Research Part B: Methodological</i> , <b>2019</b> , 123, 38-63	7.2	3
45	New algorithmic framework for conditional value at risk: Application to stochastic fixed-charge transportation. <i>European Journal of Operational Research</i> , <b>2019</b> , 277, 215-226	5.6	11
44	Modeling frameworks for the multi-skill resource-constrained project scheduling problem: a theoretical and empirical comparison. <i>International Transactions in Operational Research</i> , <b>2019</b> , 26, 946-967	2.9	15
43	Heuristic Solutions for a Class of Stochastic Uncapacitated p-Hub Median Problems. <i>Transportation Science</i> , <b>2019</b> , 53, 1126-1149	4.4	9
42	A Bi-Objective Capacitated Location-Routing Problem for Multiple Perishable Commodities. <i>IEEE Access</i> , <b>2019</b> , 7, 136729-136742	3.5	1
41	On multi-criteria chance-constrained capacitated single-source discrete facility location problems. <i>Omega</i> , <b>2019</b> , 83, 107-122	7.2	24
40	A biased random-key genetic algorithm for the project scheduling problem with flexible resources. <i>Top</i> , <b>2018</b> , 26, 283-308	1.3	16
39	Multi-period stochastic covering location problems: Modeling framework and solution approach. <i>European Journal of Operational Research</i> , <b>2018</b> , 268, 432-449	5.6	13
38	Modeling the shelter site location problem using chance constraints: A case study for Istanbul. <i>European Journal of Operational Research</i> , <b>2018</b> , 270, 132-145	5.6	29
37	Time traps in supply chains: Is optimal still good enough?. <i>European Journal of Operational Research</i> , <b>2018</b> , 264, 813-829	5.6	35
36	A stochastic multi-period capacitated multiple allocation hub location problem: Formulation and inequalities. <i>Omega</i> , <b>2018</b> , 74, 122-134	7.2	53
35	Modeling congestion and service time in hub location problems. <i>Applied Mathematical Modelling</i> , <b>2018</b> , 55, 13-32	4.5	20

34	Comments on: Extensive facility location problems on networks: an updated review. <i>Top</i> , <b>2018</b> , 26, 229-233		2
33	Heuristic Solutions to the Facility Location Problem with General Bernoulli Demands. <i>INFORMS Journal on Computing</i> , <b>2017</b> , 29, 737-753	2.4	9
32	A cutting-plane approach for large-scale capacitated multi-period facility location using a specialized interior-point method. <i>Mathematical Programming</i> , <b>2017</b> , 163, 411-444	2.1	30
31	Ambulance location under stochastic demand: A sampling approach. <i>Operations Research for Health Care</i> , <b>2016</b> , 8, 24-32	1.8	34
30	Multi-period hub network design problems with modular capacities. <i>Annals of Operations Research</i> , <b>2016</b> , 246, 289-312	3.2	22
29	Priority-based heuristics for the multi-skill resource constrained project scheduling problem. <i>Expert Systems With Applications</i> , <b>2016</b> , 57, 91-103	7.8	45
28	Location Science <b>2015</b> ,		63
27	Facility Location Under Uncertainty <b>2015</b> , 177-203		18
26	A note on Branch-and-price approach for the multi-skill project scheduling problem. <i>Optimization Letters</i> , <b>2015</b> , 9, 1255-1258	1.1	5
25	A Modeling Framework for Project Staffing and Scheduling Problems <b>2015</b> , 547-564		9
24	Multi-Period Facility Location <b>2015</b> , 289-310		7
23	The impact of fixed and variable costs in a multi-skill project scheduling problem: An empirical study. <i>Computers and Industrial Engineering</i> , <b>2014</b> , 72, 230-238	6.4	24
22	A two-stage stochastic transportation problem with fixed handling costs and a priori selection of the distribution channels. <i>Top</i> , <b>2014</b> , 22, 1123-1147	1.3	8
21	Multi-product Capacitated Single-Allocation Hub Location Problems: Formulations and Inequalities. <i>Networks and Spatial Economics</i> , <b>2014</b> , 14, 1-25	1.9	21
20	An efficient heuristic approach for a multi-period logistics network redesign problem. <i>Top</i> , <b>2014</b> , 22, 80-108	1.3	28
19	Comparing classical performance measures for a multi-period, two-echelon supply chain network design problem with sizing decisions. <i>Computers and Industrial Engineering</i> , <b>2013</b> , 64, 366-380	6.4	37
18	A tabu search heuristic for redesigning a multi-echelon supply chain network over a planning horizon. <i>International Journal of Production Economics</i> , <b>2012</b> , 136, 218-230	9.3	68
17	Multi-period reverse logistics network design. <i>European Journal of Operational Research</i> , <b>2012</b> , 220, 67-76	3.6	218

16	A multi-stage stochastic supply network design problem with financial decisions and risk management. <i>Omega</i> , <b>2012</b> , 40, 511-524	7.2	128
15	Hub location under uncertainty. <i>Transportation Research Part B: Methodological</i> , <b>2012</b> , 46, 529-543	7.2	118
14	Solving the job-shop scheduling problem optimally by dynamic programming. <i>Computers and Operations Research</i> , <b>2012</b> , 39, 2968-2977	4.6	27
13	Project scheduling with flexible resources: formulation and inequalities. <i>OR Spectrum</i> , <b>2012</b> , 34, 635-663	1.9	36
12	The facility location problem with Bernoulli demands. <i>Omega</i> , <b>2011</b> , 39, 335-345	7.2	37
11	Hub and spoke network design with single-assignment, capacity decisions and balancing requirements. <i>Applied Mathematical Modelling</i> , <b>2011</b> , 35, 4841-4851	4.5	29
10	Single-assignment hub location problems with multiple capacity levels. <i>Transportation Research Part B: Methodological</i> , <b>2010</b> , 44, 1047-1066	7.2	67
9	A stochastic bi-objective location model for strategic reverse logistics. <i>Top</i> , <b>2010</b> , 18, 158-184	1.3	71
8	Discretized formulations for capacitated location problems with modular distribution costs. <i>European Journal of Operational Research</i> , <b>2010</b> , 204, 237-244	5.6	23
7	The capacitated single-allocation hub location problem revisited: A note on a classical formulation. <i>European Journal of Operational Research</i> , <b>2010</b> , 207, 92-96	5.6	45
6	Facility location and supply chain management – A review. <i>European Journal of Operational Research</i> , <b>2009</b> , 196, 401-412	5.6	1196
5	Solving the variable size bin packing problem with discretized formulations. <i>Computers and Operations Research</i> , <b>2008</b> , 35, 2103-2113	4.6	49
4	Dynamic multi-commodity capacitated facility location: a mathematical modeling framework for strategic supply chain planning. <i>Computers and Operations Research</i> , <b>2006</b> , 33, 181-208	4.6	264
3	On the capacitated concentrator location problem: a reformulation by discretization. <i>Computers and Operations Research</i> , <b>2006</b> , 33, 1242-1258	4.6	32
2	Some personal views on the current state and the future of locational analysis. <i>European Journal of Operational Research</i> , <b>1998</b> , 104, 269-287	5.6	29
1	A heuristic approach for the discrete dynamic location problem. <i>Location Science</i> , <b>1998</b> , 6, 211-223		19
