citing authors

| # | ARTICLE | IF | CITATIONS |
|----|---|-----|-----------|
| 1 | Evening administration of melatonin and bright light: Interactions on the EEG during sleep and wakefulness. <i>Journal of Sleep Research</i> , 1998, 7, 145-157. | 1.7 | 110 |
| 2 | Is Sleep per se a Zeitgeber in Humans?. <i>Journal of Biological Rhythms</i> , 2003, 18, 170-178. | 1.4 | 93 |
| 3 | The Physiological Period Length of the Human Circadian Clock In Vivo Is Directly Proportional to Period in Human Fibroblasts. <i>PLoS ONE</i> , 2010, 5, e13376. | 1.1 | 76 |
| 4 | Brightening Depression. <i>Science</i> , 2004, 303, 467c-469. | 6.0 | 64 |
| 5 | The Human Circadian Pacemaker Can See by the Dawn's Early Light. <i>Journal of Biological Rhythms</i> , 2000, 15, 437-446. | 1.4 | 62 |
| 6 | The hockey-stick method to estimate evening dim light melatonin onset (DLMO) in humans. <i>Chronobiology International</i> , 2014, 31, 349-355. | 0.9 | 60 |
| 7 | The hypothermic effect of late evening melatonin does not block the phase delay induced by concurrent bright light in human subjects. <i>Neuroscience Letters</i> , 1997, 232, 57-61. | 1.0 | 54 |
| 8 | Evening melatonin and bright light administration induce additive phase shifts in dim light melatonin onset. <i>Journal of Pineal Research</i> , 2004, 36, 192-194. | 3.4 | 46 |
| 9 | Bright Light for Weight Loss: Results of a Controlled Crossover Trial. <i>Obesity Facts</i> , 2013, 6, 28-38. | 1.6 | 44 |
| 10 | PHASE ADVANCE AFTER ONE OR THREE SIMULATED DAWNS IN HUMANS. <i>Chronobiology International</i> , 2000, 17, 659-668. | 0.9 | 36 |
| 11 | Melatonin Treatment of Winter Depression Following Total Sleep Deprivation: Waking EEG and Mood Correlates. <i>Neuropsychopharmacology</i> , 2005, 30, 1345-1352. | 2.8 | 32 |
| 12 | Human Cone Light Sensitivity and Melatonin Rhythms Following 24-hour Continuous Illumination. <i>Chronobiology International</i> , 2011, 28, 407-414. | 0.9 | 19 |
| 13 | Phase of Melatonin Rhythm in Winter Depression. , 1999, 460, 441-458. | | 18 |
| 14 | Human Retinal Light Sensitivity and Melatonin Rhythms Following Four Days in Near Darkness. <i>Chronobiology International</i> , 2009, 26, 93-107. | 0.9 | 18 |
| 15 | Stimulatory Effect of Morning Bright Light on Reproductive Hormones and Ovulation: Results of a Controlled Crossover Trial. <i>PLoS Clinical Trials</i> , 2007, 2, e7. | 3.5 | 17 |
| 16 | Influence of Timed Nutrient Diet on Depression and Light Sensitivity in Seasonal Affective Disorder. <i>Chronobiology International</i> , 2008, 25, 51-64. | 0.9 | 17 |
| 17 | Impact of oral melatonin on the electroretinogram cone response. <i>Journal of Circadian Rhythms</i> , 2014, 7, 14. | 2.9 | 17 |
| 18 | Diurnal and seasonal variations in cortisol, prolactin, TSH and thyroid hormones in women with and without seasonal affective disorder. <i>Journal of Interdisciplinary Cycle Research</i> , 1993, 24, 185-196. | 0.2 | 13 |

| # | ARTICLE | IF | CITATIONS |
|----|---|-----|-----------|
| 19 | Hemispheric language lateralization in seasonal affective disorder and light treatment. <i>Psychiatry Research</i> , 1993, 47, 99-108. | 1.7 | 13 |
| 20 | A 6-day combined wake and light therapy trial for unipolar depression. <i>Journal of Affective Disorders</i> , 2019, 259, 355-361. | 2.0 | 13 |
| 21 | Shortening of the menstrual cycle following light therapy in seasonal affective disorder. <i>Psychiatry Research</i> , 2007, 153, 93-95. | 1.7 | 12 |
| 22 | Seasonal affective disorder. <i>Handbook of Clinical Neurology</i> / Edited By P J Vinken and G W Bruyn, 2012, 106, 279-289. | 1.0 | 12 |
| 23 | Summer-winter difference in 24-h melatonin rhythms in subjects on a 5-workdays schedule in Siberia without daylight saving time transitions. <i>Physiology and Behavior</i> , 2019, 212, 112686. | 1.0 | 11 |
| 24 | Menstrual cycles are influenced by sunshine. <i>Gynecological Endocrinology</i> , 2011, 27, 711-716. | 0.7 | 10 |
| 25 | Investigation of an Immediate Effect of Bright Light on Oxygen Consumption, Heart Rate, Cortisol, and $\hat{\pm}$ -Amylase in Seasonal Affective Disorder Subjects and Healthy Controls. <i>Neuropsychobiology</i> , 2016, 74, 219-225. | 0.9 | 10 |
| 26 | The Importance of Full Summer Remission as a Criterion for the Diagnosis of Seasonal Affective Disorder. <i>Psychopathology</i> , 1996, 29, 230-235. | 1.1 | 9 |
| 27 | Circadian reinforcement therapy in combination with electronic self-monitoring to facilitate a safe post-discharge period of patients with depression by stabilizing sleep: protocol of a randomized controlled trial. <i>BMC Psychiatry</i> , 2019, 19, 124. | 1.1 | 9 |
| 28 | Effectiveness of Visual vs. Acoustic Closed-Loop Stimulation on EEG Power Density during NREM Sleep in Humans. <i>Clocks & Sleep</i> , 2020, 2, 172-181. | 0.9 | 8 |
| 29 | Menstrual Phase Response to Nocturnal Light. <i>Biological Rhythm Research</i> , 2002, 33, 23-38. | 0.4 | 7 |
| 30 | Winter-summer difference in post-awakening salivary $\hat{\pm}$ -amylase and sleepiness depending on sleep and melatonin. <i>Physiology and Behavior</i> , 2021, 240, 113549. | 1.0 | 7 |
| 31 | Antidepressant effects of combination of sleep deprivation and early evening treatment with melatonin or placebo for winter depression. <i>Biological Rhythm Research</i> , 2005, 36, 389-403. | 0.4 | 5 |
| 32 | Antidepressant effects of light therapy and "natural" treatments for winter depression. <i>Biological Rhythm Research</i> , 2005, 36, 423-437. | 0.4 | 4 |
| 33 | Influence of artificial dusk on sleep. <i>Sleep and Biological Rhythms</i> , 2016, 14, 47-53. | 0.5 | 4 |
| 34 | 787. Xenon in Sub-Anesthetic Doses for Treatment of Major Depression: A Proof-of-Concept Placebo-Controlled Pilot Study. <i>Biological Psychiatry</i> , 2017, 81, S319-S320. | 0.7 | 2 |
| 35 | T104. Gaze Behavior Among Patients With Major Depression Disorder When Looking at Own Face. <i>Biological Psychiatry</i> , 2019, 85, S169. | 0.7 | 1 |
