#	ARTICLE	IF	CITATIONS
1	Effects of posture on cerebellar evoked potentials (CEPs) following brief impulsive stimuli at the mastoid and trunk. <i>Experimental Brain Research</i> , 2022, 240, 1371-1385.	1.5	4
2	Collic evoked potentials, myogenic potentials (CEMPs) and postural responses produced by brief 100ÅHz vibration of the sternocleidomastoid muscle. <i>Neuroscience Letters</i> , 2022, 781, 136677.	2.1	0
3	Source analyses of axial and vestibular evoked potentials associated with brainstem-spinal reflexes show cerebellar and cortical contributions. <i>Neuroscience Letters</i> , 2021, 757, 135960.	2.1	11
4	Non-invasive recording from the human cerebellum during a classical conditioning paradigm using the otolith-evoked blink reflex. <i>Neuroscience Letters</i> , 2021, 765, 136270.	2.1	7
5	Vestibular migraine presenting with acute peripheral vestibulopathy: Clinical, oculo-graphic and vestibular test profiles. <i>Cephalalgia Reports</i> , 2020, 3, 251581632095817.	0.7	3
6	Effects of viewing distance on ocular vestibular evoked myogenic potentials (oVEMPs) for air- and bone-conducted stimuli at multiple sites. <i>Journal of Vestibular Research: Equilibrium and Orientation</i> , 2020, 30, 1-6.	2.0	1
7	Mapping the vestibular cerebellar evoked potential (VsCEP) following air- and bone-conducted vestibular stimulation. <i>Experimental Brain Research</i> , 2020, 238, 601-620.	1.5	17
8	Axial perturbations evoke increased postural reflexes in Parkinsonâ€™s disease with postural instability. <i>Clinical Neurophysiology</i> , 2020, 131, 928-935.	1.5	1
9	High Degree of Genetic Heterogeneity for Hereditary Cerebellar Ataxias in Australia. <i>Cerebellum</i> , 2019, 18, 137-146.	2.5	21
10	Investigating short latency subcortical vestibular projections in humans: what have we learned?. <i>Journal of Neurophysiology</i> , 2019, 122, 2000-2015.	1.8	10
11	Modulation of the human electro-cerebellogram (ECeG) during vestibular and optokinetic stimulation. <i>Neuroscience Letters</i> , 2019, 712, 134497.	2.1	9
12	Responses to anterior and posterior perturbations in Parkinsonâ€™s disease with early postural instability: role of axial and limb rigidity. <i>Experimental Brain Research</i> , 2019, 237, 1853-1867.	1.5	10
13	Sound-evoked vestibular projections to the splenius capitis in humans: comparison with the sternocleidomastoid muscle. <i>Journal of Applied Physiology</i> , 2019, 126, 1619-1629.	2.5	10
14	Vestibular evoked myogenic potentials in practice: Methods, pitfalls and clinical applications. <i>Clinical Neurophysiology Practice</i> , 2019, 4, 47-68.	1.4	184
15	Axial reflexes are present in older subjects and may contribute to balance responses. <i>Experimental Brain Research</i> , 2018, 236, 1031-1039.	1.5	4
16	Vestibular cerebellar evoked potentials in humans and their modulation during optokinetic stimulation. <i>Journal of Neurophysiology</i> , 2018, 120, 3099-3109.	1.8	17
17	Location and phase effects for ocular and cervical vestibular-evoked myogenic potentials evoked by bone-conducted stimuli at midline skull sites. <i>Journal of Neurophysiology</i> , 2018, 119, 1045-1056.	1.8	17
18	The Contributions of Vestibular Evoked Myogenic Potentials and Acoustic Vestibular Stimulation to Our Understanding of the Vestibular System. <i>Frontiers in Neurology</i> , 2018, 9, 481.	2.4	46

#	ARTICLE	IF	CITATIONS
19	Properties of short-latency responses in the upper limbs evoked by axial impulses during leaning: evidence for reticulospinal projections. <i>Experimental Brain Research</i> , 2018, 236, 2611-2618.	1.5	4
20	The human electrocerebellogram (ECeG) recorded non-invasively using scalp electrodes. <i>Neuroscience Letters</i> , 2018, 682, 124-131.	2.1	36
21	The inion response revisited: evidence for a possible cerebellar contribution to vestibular-evoked potentials produced by air-conducted sound stimulation. <i>Journal of Neurophysiology</i> , 2017, 117, 1000-1013.	1.8	21
22	Practice guideline: Cervical and ocular vestibular evoked myogenic potential testing. <i>Neurology</i> , 2017, 89, 2288-2296.	1.1	100
23	Effects of midline sagittal location on bone-conducted cervical and ocular vestibular evoked myogenic potentials. <i>Journal of Applied Physiology</i> , 2017, 122, 1470-1484.	2.5	11
24	Postural responses in the upper limbs evoked by axial impulses: a role for reticulospinal projections. <i>Experimental Brain Research</i> , 2017, 235, 2235-2242.	1.5	7
25	cVEMP morphology changes with recording electrode position, but single motor unit activity remains constant. <i>Journal of Applied Physiology</i> , 2016, 120, 833-842.	2.5	14
26	Properties of 500Hz air- and bone-conducted vestibular evoked myogenic potentials (VEMPs) in superior canal dehiscence. <i>Clinical Neurophysiology</i> , 2016, 127, 2522-2531.	1.5	34
27	Vestibular-dependent inter-stimulus interval effects on sound evoked potentials of central origin. <i>Hearing Research</i> , 2016, 341, 190-201.	2.0	12
28	Electrode montage and gaze effects on ocular vestibular evoked myogenic potentials (oVEMPs). <i>Clinical Neurophysiology</i> , 2016, 127, 2846-2854.	1.5	24
29	Sonographic differences in carpal tunnel syndrome with normal and abnormal nerve conduction studies. <i>Journal of Clinical Neuroscience</i> , 2016, 34, 77-80.	1.5	38
30	Vestibular-evoked myogenic potentials. <i>Handbook of Clinical Neurology</i> / Edited By P J Vinken and G W Bruyn, 2016, 137, 133-155.	1.8	68
31	Postural responses to anterior and posterior perturbations applied to the upper trunk of standing human subjects. <i>Experimental Brain Research</i> , 2016, 234, 367-376.	1.5	21
32	Frequency and phase effects on cervical vestibular evoked myogenic potentials (cVEMPs) to air-conducted sound. <i>Experimental Brain Research</i> , 2016, 234, 2567-2574.	1.5	7
33	Safe Levels of Acoustic Stimulation for Vemps. <i>Otology and Neurotology</i> , 2016, 37, 117-118.	1.3	11
34	Vestibular projections. <i>Neurology</i> , 2016, 86, 112-113.	1.1	3
35	Properties of cervical and ocular vestibular evoked myogenic potentials (cVEMPs and oVEMPs) evoked by 500 Hz and 100 Hz bone vibration at the mastoid. <i>Clinical Neurophysiology</i> , 2016, 127, 848-857.	1.5	15
36	Contrasting phase effects on vestibular evoked myogenic potentials (VEMPs) produced by air- and bone-conducted stimuli. <i>Experimental Brain Research</i> , 2016, 234, 141-149.	1.5	18

#	ARTICLE	IF	CITATIONS
37	Vestibular evoked myogenic potentials (VEMPs) evoked by air- and bone-conducted stimuli in vestibular neuritis. <i>Clinical Neurophysiology</i> , 2015, 126, 2004-2013.	1.5	70
38	Single motor unit responses underlying cervical vestibular evoked myogenic potentials produced by bone-conducted stimuli. <i>Clinical Neurophysiology</i> , 2015, 126, 1234-1245.	1.5	24
39	Selective changes of ocular vestibular myogenic potentials in Parkinson's disease. <i>Movement Disorders</i> , 2015, 30, 584-589.	3.9	29
40	Axially evoked postural reflexes: influence of task. <i>Experimental Brain Research</i> , 2015, 233, 215-228.	1.5	13
41	Vestibular evoked potentials (VsEPs) of cortical origin produced by impulsive acceleration applied at the nasion. <i>Experimental Brain Research</i> , 2014, 232, 3771-3784.	1.5	13
42	Resolution of Othello Syndrome After Subthalamic Nucleus Deep Brain Stimulation in 3 Patients with Parkinson's Disease. <i>Movement Disorders Clinical Practice</i> , 2014, 1, 357-360.	1.5	4
43	Cerebral, subcortical, and cerebellar activation evoked by selective stimulation of muscle and cutaneous afferents: an fMRI study. <i>Physiological Reports</i> , 2014, 2, e00270.	1.7	19
44	Letter to the Editor. <i>Ear and Hearing</i> , 2014, 35, 485-486.	2.1	1
45	Vestibular function and vestibular evoked myogenic potentials (VEMPs) in spasticity. <i>Clinical Neurophysiology</i> , 2014, 125, 1934-1935.	1.5	1
46	Differing response properties of cervical and ocular vestibular evoked myogenic potentials evoked by air-conducted stimulation. <i>Clinical Neurophysiology</i> , 2014, 125, 1238-1247.	1.5	14
47	International guidelines for the clinical application of cervical vestibular evoked myogenic potentials: An expert consensus report. <i>Clinical Neurophysiology</i> , 2014, 125, 658-666.	1.5	178
48	Recruitment properties and significance of short latency reflexes in neck and eye muscles evoked by brief lateral head accelerations. <i>Experimental Brain Research</i> , 2014, 232, 2977-2988.	1.5	12
49	Source analysis of short and long latency vestibular-evoked potentials (VsEPs) produced by left vs. right ear air-conducted 500 Hz tone pips. <i>Hearing Research</i> , 2014, 312, 91-102.	2.0	33
50	Vestibular receptors contribute to cortical auditory evoked potentials. <i>Hearing Research</i> , 2014, 309, 63-74.	2.0	32
51	Safe Levels of Acoustic Stimulation. <i>Otology and Neurotology</i> , 2014, 35, 932-933.	1.3	28
52	A postural reflex evoked by brief axial accelerations. <i>Experimental Brain Research</i> , 2013, 228, 73-85.	1.5	11
53	Differential effects of duration for ocular and cervical vestibular evoked myogenic potentials evoked by air- and bone-conducted stimuli. <i>Experimental Brain Research</i> , 2013, 224, 437-445.	1.5	31
54	Two distinct patterns of VEMP changes with age. <i>Clinical Neurophysiology</i> , 2013, 124, 2066-2068.	1.5	30

#	ARTICLE	IF	CITATIONS
55	Exploring the oVEMP montage. <i>Clinical Neurophysiology</i> , 2013, 124, 1051-1052.	1.5	0
56	Why do oVEMPs become larger when you look up? Explaining the effect of gaze elevation on the ocular vestibular evoked myogenic potential. <i>Clinical Neurophysiology</i> , 2013, 124, 785-791.	1.5	56
57	Exome sequencing identification of a GJB1 missense mutation in a kindred with X-linked spinocerebellar ataxia (SCA-X1). <i>Human Molecular Genetics</i> , 2013, 22, 4329-4338.	2.9	24
58	Mapping the vestibular evoked myogenic potential (VEMP). <i>Journal of Vestibular Research: Equilibrium and Orientation</i> , 2012, 22, 27-32.	2.0	22
59	Ocular vestibular evoked myogenic potential (oVEMP) responses in acute vestibular neuritis. <i>Clinical Neurophysiology</i> , 2012, 123, 1054-1055.	1.5	8
60	Vestibular evoked myogenic potentials in multiple sclerosis. <i>Clinical Neurophysiology</i> , 2012, 123, 1693-1694.	1.5	9
61	Tuning of the ocular vestibular evoked myogenic potential (oVEMP) to air- and bone-conducted sound stimulation in superior canal dehiscence. <i>Experimental Brain Research</i> , 2012, 223, 51-64.	1.5	17
62	Vestibular-dependent spinal reflexes evoked by brief lateral accelerations of the heads of standing subjects. <i>Journal of Applied Physiology</i> , 2012, 112, 1906-1914.	2.5	14
63	Tuning of the ocular vestibular evoked myogenic potential to bone-conducted sound stimulation. <i>Journal of Applied Physiology</i> , 2012, 112, 1279-1290.	2.5	31
64	Differential effect of dopa and subthalamic stimulation on vestibular activity in Parkinson's disease. <i>Movement Disorders</i> , 2012, 27, 1268-1275.	3.9	40
65	Ocular vestibular evoked myogenic potentials are abnormal in internuclear ophthalmoplegia. <i>Clinical Neurophysiology</i> , 2011, 122, 1264-1267.	1.5	38
66	Vestibular neuritis has selective effects on air- and bone-conducted cervical and ocular vestibular evoked myogenic potentials. <i>Clinical Neurophysiology</i> , 2011, 122, 1246-1255.	1.5	60
67	Ocular and cervical vestibular evoked myogenic potentials produced by air- and bone-conducted stimuli: Comparative properties and effects of age. <i>Clinical Neurophysiology</i> , 2011, 122, 2282-2289.	1.5	151
68	Ocular vestibular evoked myogenic potentials produced by impulsive lateral acceleration in unilateral vestibular dysfunction. <i>Clinical Neurophysiology</i> , 2011, 122, 2498-2504.	1.5	33
69	Tuning of the ocular vestibular evoked myogenic potential (oVEMP) to AC sound shows two separate peaks. <i>Experimental Brain Research</i> , 2011, 213, 111-116.	1.5	34
70	Cervical and Ocular Vestibular Evoked Myogenic Potentials Are Sensitive to Stimulus Phase. <i>Audiology and Neuro-Otology</i> , 2011, 16, 277-288.	1.3	17
71	Superior canal dehiscence causes abnormal vestibular bone-conducted tuning. <i>Neurology</i> , 2011, 77, 911-913.	1.1	10
72	Stochastic galvanic vestibular stimulation produces a small reduction in sway in Parkinson's disease. <i>Journal of Vestibular Research: Equilibrium and Orientation</i> , 2010, 19, 137-142.	2.0	69

#	ARTICLE	IF	CITATIONS
73	Vestibular evoked myogenic potentials are intact in cervical dystonia. <i>Movement Disorders</i> , 2010, 25, 2845-2853.	3.9	14
74	Single trial detection of human vestibular evoked myogenic potentials is determined by signal-to-noise ratio. <i>Journal of Applied Physiology</i> , 2010, 109, 53-59.	2.5	8
75	Vestibular-evoked myogenic potentials (VEMPs). <i>Handbook of Clinical Neurophysiology</i> , 2010, , 191-200.	0.0	3
76	Sound conclusions?. <i>Clinical Neurophysiology</i> , 2010, 121, 124-126.	1.5	42
77	Vestibular evoked myogenic potentials: Past, present and future. <i>Clinical Neurophysiology</i> , 2010, 121, 636-651.	1.5	471
78	Vestibular evoked myogenic potentials evoked by brief interaural head acceleration: properties and possible origin. <i>Journal of Applied Physiology</i> , 2009, 107, 841-852.	2.5	76
79	The relative effectiveness of different stimulus waveforms in evoking VEMPs: Significance of stimulus energy and frequency. <i>Journal of Vestibular Research: Equilibrium and Orientation</i> , 2009, 19, 33-40.	2.0	48
80	Properties of rectified averaging of an evoked-type signal: theory and application to the vestibular-evoked myogenic potential. <i>Experimental Brain Research</i> , 2009, 199, 167-176.	1.5	17
81	A utricular origin of frequency tuning to low-frequency vibration in the human vestibular system?. <i>Neuroscience Letters</i> , 2009, 451, 175-180.	2.1	112
82	Low-frequency tuning in the human vestibularâ€™ocular projection is determined by both peripheral and central mechanisms. <i>Neuroscience Letters</i> , 2009, 458, 43-47.	2.1	34
83	Galvanic ocular vestibular evoked myogenic potentials provide new insight into vestibulo-ocular reflexes and unilateral vestibular loss. <i>Clinical Neurophysiology</i> , 2009, 120, 569-580.	1.5	34
84	The effect of gaze direction on the ocular vestibular evoked myogenic potential produced by air-conducted sound. <i>Clinical Neurophysiology</i> , 2009, 120, 1386-1391.	1.5	97
85	Ocular vestibular evoked myogenic potentials (OVEMPs) produced by impulsive transmastoid accelerations. <i>Clinical Neurophysiology</i> , 2008, 119, 1638-1651.	1.5	85
86	Vestibular hypersensitivity to sound in superior canal dehiscence: Large evoked responses in the legs produce little postural sway. <i>Clinical Neurophysiology</i> , 2008, 119, 1674-1682.	1.5	8
87	A source analysis of short-latency vestibular evoked potentials produced by air- and bone-conducted sound. <i>Clinical Neurophysiology</i> , 2008, 119, 1881-1894.	1.5	46
88	Tuning and sensitivity of the human vestibular system to low-frequency vibration. <i>Neuroscience Letters</i> , 2008, 444, 36-41.	2.1	90
89	Ocular vestibular evoked myogenic potentials (OVEMPs) produced by air- and bone-conducted sound. <i>Clinical Neurophysiology</i> , 2007, 118, 381-390.	1.5	314
90	Delayed vestibular evoked responses to the eyes and neck in a patient with an isolated brainstem lesion. <i>Clinical Neurophysiology</i> , 2007, 118, 2112-2116.	1.5	27

#	ARTICLE	IF	CITATIONS
91	Bereitschaftspotential and movement-related potentials: Origin, significance, and application in disorders of human movement. <i>Movement Disorders</i> , 2007, 22, 601-610.	3.9	142
92	Vestibular evoked potentials (VsEPs) in patients with severe to profound bilateral hearing loss. <i>Clinical Neurophysiology</i> , 2006, 117, 1145-1153.	1.5	35
93	Cervical dystonia responsive to acoustic and galvanic vestibular stimulation. <i>Movement Disorders</i> , 2006, 21, 1495-1499.	3.9	10
94	Sway patterns in orthostatic tremor: Impairment of postural control mechanisms. <i>Movement Disorders</i> , 2005, 20, 1469-1475.	3.9	19
95	Evidence for reflex and perceptual vestibular contributions to postural control. <i>Experimental Brain Research</i> , 2005, 160, 22-28.	1.5	78
96	Movement related potentials in acutely induced weakness and stroke. <i>Experimental Brain Research</i> , 2005, 161, 104-113.	1.5	19
97	Characteristics and clinical applications of vestibular-evoked myogenic potentials. <i>Neurology</i> , 2005, 64, 1682-1688.	1.1	365
98	Hypokalemic weakness in hyperaldosteronism: Activity-dependent conduction block. <i>Neurology</i> , 2005, 65, 1309-1312.	1.1	16
99	Vestibular-evoked extraocular potentials produced by stimulation with bone-conducted sound. <i>Clinical Neurophysiology</i> , 2005, 116, 1938-1948.	1.5	382
100	Sway patterns in a case of orthostatic tremor responsive to alcohol. <i>Movement Disorders</i> , 2004, 19, 1459-1463.	3.9	2
101	Galvanic evoked vestibulospinal and vestibulocollic reflexes in stroke. <i>Clinical Neurophysiology</i> , 2004, 115, 1796-1801.	1.5	8
102	Motor unit excitability changes mediating vestibulocollic reflexes in the sternocleidomastoid muscle. <i>Clinical Neurophysiology</i> , 2004, 115, 2567-2573.	1.5	140
103	Anodal vestibular stimulation does not suppress vestibular reflexes in human subjects. <i>Experimental Brain Research</i> , 2003, 150, 525-528.	1.5	5
104	Galvanic and acoustic vestibular stimulation activate different populations of vestibular afferents. <i>Clinical Neurophysiology</i> , 2003, 114, 359-365.	1.5	13
105	EMG responses evoked by the termination of galvanic (DC) vestibular stimulation: "off-responses". <i>Clinical Neurophysiology</i> , 2003, 114, 1456-1461.	1.5	13
106	A short latency vestibular evoked potential (VsEP) produced by bone-conducted acoustic stimulation. <i>Journal of the Acoustical Society of America</i> , 2003, 114, 3264-3272.	1.1	64
107	Chapter 73 Click activation of the vestibular system. <i>Supplements To Clinical Neurophysiology</i> , 2002, 54, 499-502.	2.1	0
108	Selective effects of ageing on vestibular-dependent lower limb responses following galvanic stimulation. <i>Clinical Neurophysiology</i> , 2002, 113, 528-534.	1.5	47
