

Todd M Palmer

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/340213/todd-m-palmer-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
91	Ecological consequences of large herbivore exclusion in an African savanna: 12 years of data from the UHURU experiment.. <i>Ecology</i> , 2022 , e3649	4.6	0
90	Demographic consequences of mutualism disruption: Browsing and big-headed ant invasion drive acacia population declines.. <i>Ecology</i> , 2022 , e3655	4.6	0
89	Mutualism disruption by an invasive ant reduces carbon fixation for a foundational East African ant-plant. <i>Ecology Letters</i> , 2021 , 24, 1052-1062	10	3
88	Mussels drive polychlorinated biphenyl (PCB) biomagnification in a coastal food web. <i>Scientific Reports</i> , 2021 , 11, 9180	4.9	0
87	Experimental evidence that effects of megaherbivores on mesoherbivore space use are influenced by species traits. <i>Journal of Animal Ecology</i> , 2021 , 90, 2510-2522	4.7	1
86	Frenemy at the gate: Invasion by <i>Pheidole megacephala</i> facilitates a competitively subordinate plant ant in Kenya. <i>Ecology</i> , 2021 , 102, e03230	4.6	0
85	Density dependence and the spread of invasive big-headed ants (<i>Pheidole megacephala</i>) in an East African savanna. <i>Oecologia</i> , 2021 , 195, 667-676	2.9	3
84	Large herbivores transform plant-pollinator networks in an African savanna. <i>Current Biology</i> , 2021 , 31, 2964-2971.e5	6.3	3
83	Large herbivores suppress liana infestation in an African savanna. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2021 , 118,	11.5	2
82	Using photography to estimate above-ground biomass of small trees. <i>Journal of Tropical Ecology</i> , 2020 , 36, 213-219	1.3	1
81	Predator-induced collapse of niche structure and species coexistence. <i>Nature</i> , 2019 , 570, 58-64	50.4	61
80	Large mammals generate both top-down effects and extended trophic cascades on floral-visitor assemblages. <i>Journal of Tropical Ecology</i> , 2019 , 35, 185-198	1.3	3
79	Left out in the cold: temperature-dependence of defense in an African ant-plant mutualism. <i>Ecology</i> , 2019 , 100, e02712	4.6	2
78	Strong but opposing effects of associational resistance and susceptibility on defense phenotype in an African savanna plant. <i>Oikos</i> , 2019 , 128, 1772-1782	4	0
77	Aridity weakens population-level effects of multiple species interactions on. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018 , 115, 543-548	11.5	20
76	Economy of scale: third partner strengthens a keystone ant-plant mutualism. <i>Ecology</i> , 2018 , 99, 335-346	4.6	6
75	Promises and challenges in insect-plant interactions. <i>Entomologia Experimentalis Et Applicata</i> , 2018 , 166, 319-343	2.1	42

74	Change in dominance determines herbivore effects on plant biodiversity. <i>Nature Ecology and Evolution</i> , 2018 , 2, 1925-1932	12.3	77
73	Conservation lessons from large-mammal manipulations in East African savannas: the KLEE, UHURU, and GLADE experiments. <i>Annals of the New York Academy of Sciences</i> , 2018 , 1429, 31-49	6.5	30
72	Good neighbors make good defenses: associational refuges reduce defense investment in African savanna plants. <i>Ecology</i> , 2018 , 99, 1724-1736	4.6	15
71	Habitat-specific AMF symbioses enhance drought tolerance of a native Kenyan grass. <i>Acta Oecologica</i> , 2017 , 78, 71-78	1.7	14
70	Interacting effects of land use and climate on rodent-borne pathogens in central Kenya. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2017 , 372,	5.8	28
69	Climatic variation modulates the indirect effects of large herbivores on small-mammal habitat use. <i>Journal of Animal Ecology</i> , 2017 , 86, 739-748	4.7	13
68	Impacts of worker density in colony-level aggression, expansion, and survival of the acacia-ant <i>Crematogaster mimosae</i> . <i>Ecological Monographs</i> , 2017 , 87, 246-259	9	3
67	Influence of neighboring plants on the dynamics of an ant-acacia protection mutualism. <i>Ecology</i> , 2017 , 98, 3034-3043	4.6	7
66	Interacting effects of wildlife loss and climate on ticks and tick-borne disease. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017 , 284,	4.4	19
65	Elephants in the understory: opposing direct and indirect effects of consumption and ecosystem engineering by megaherbivores. <i>Ecology</i> , 2016 , 97, 3219-3230	4.6	45
64	Large herbivores promote habitat specialization and beta diversity of African savanna trees. <i>Ecology</i> , 2016 , 97, 2640-2657	4.6	42
63	Effects of entomopathogenic fungus <i>Metarhizium anisopliae</i> on non-target ants associated with <i>Odontotermes</i> spp. (Isoptera: Termitidae) termite mounds in Kenya. <i>International Journal of Tropical Insect Science</i> , 2016 , 36, 128-134	1	5
62	Leveraging nature's backup plans to incorporate interspecific interactions and resilience into restoration. <i>Restoration Ecology</i> , 2016 , 24, 434-440	3.1	8
61	An invasive ant reduces diversity but does not disrupt a key ecosystem function in an African savanna. <i>Ecosphere</i> , 2016 , 7, e01502	3.1	3
60	Context-dependent effects of large-wildlife declines on small-mammal communities in central Kenya 2015 , 25, 348-60		33
59	Plant ecology. Worldwide evidence of a unimodal relationship between productivity and plant species richness. <i>Science</i> , 2015 , 349, 302-5	33.3	228
58	Accelerated modern human-induced species losses: Entering the sixth mass extinction. <i>Science Advances</i> , 2015 , 1, e1400253	14.3	1603
57	Recovery of African wild dogs suppresses prey but does not trigger a trophic cascade. <i>Ecology</i> , 2015 , 96, 2705-14	4.6	36

56	Disruption of a protective ant-plant mutualism by an invasive ant increases elephant damage to savanna trees. <i>Ecology</i> , 2015 , 96, 654-61	4.6	29
55	Synergistic effects of fire and elephants on arboreal animals in an African savanna. <i>Journal of Animal Ecology</i> , 2015 , 84, 1637-45	4.7	39
54	Mutualism in a community context 2015 , 159-180		16
53	Large carnivores make savanna tree communities less thorny. <i>Science</i> , 2014 , 346, 346-9	33.3	139
52	Low functional redundancy among mammalian browsers in regulating an encroaching shrub (<i>Solanum campylacanthum</i>) in African savannah. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2014 , 281, 20140390	4.4	47
51	Seasonal patterns in decomposition and nutrient release from East African savanna grasses grown under contrasting nutrient conditions. <i>Agriculture, Ecosystems and Environment</i> , 2014 , 188, 12-19	5.7	11
50	Mechanisms of plant-plant interactions: concealment from herbivores is more important than abiotic-stress mediation in an African savannah. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2014 , 281, 20132647	4.4	31
49	Colonisation and competition dynamics can explain incomplete sterilisation parasitism in ant-plant symbioses. <i>Ecology Letters</i> , 2014 , 17, 1290-8	10	6
48	Plant and small-mammal responses to large-herbivore exclusion in an African savanna: five years of the UHURU experiment. <i>Ecology</i> , 2014 , 95, 787-787	4.6	16
47	Polygyny in the nest-site limited acacia-ant <i>Crematogaster mimosae</i> . <i>Insectes Sociaux</i> , 2013 , 60, 231-241	1.5	6
46	A role for indirect facilitation in maintaining diversity in a guild of African acacia ants. <i>Ecology</i> , 2013 , 94, 1531-9	4.6	12
45	Enough is enough: the effects of symbiotic ant abundance on herbivory, growth, and reproduction in an African acacia. <i>Ecology</i> , 2013 , 94, 683-91	4.6	30
44	Ecological erosion of an Afrotropical forest and potential consequences for tree recruitment and forest biomass. <i>Biological Conservation</i> , 2013 , 163, 122-130	6.2	59
43	Effects of mammalian herbivore declines on plant communities: observations and experiments in an African savanna. <i>Journal of Ecology</i> , 2013 , 101, 1030-1041	6	74
42	Climatic stress mediates the impacts of herbivory on plant population structure and components of individual fitness. <i>Journal of Ecology</i> , 2013 , 101, 1074-1083	6	23
41	Carbohydrate as Fuel for Foraging, Resource Defense and Colony Growth  Long-term Experiment with the Plant-ant <i>Crematogaster nigriceps</i> . <i>Biotropica</i> , 2013 , 45, 620-627	2.3	10
40	Piecewise disassembly of a large-herbivore community across a rainfall gradient: the UHURU experiment. <i>PLoS ONE</i> , 2013 , 8, e55192	3.7	70
39	Skin shedding and tissue regeneration in African spiny mice (<i>Acomys</i>). <i>Nature</i> , 2012 , 489, 561-5	50.4	320

38	The high cost of mutualism: effects of four species of East African ant symbionts on their myrmecophyte host tree. <i>Ecology</i> , 2011 , 92, 1073-82	4.6	50
37	Reciprocal rewards stabilize cooperation in the mycorrhizal symbiosis. <i>Science</i> , 2011 , 333, 880-2	33.3	1058
36	Cryptic herbivores mediate the strength and form of ungulate impacts on a long-lived savanna tree. <i>Ecology</i> , 2011 , 92, 1626-36	4.6	48
35	The high cost of mutualism: effects of four species of East African ant symbionts on their myrmecophyte host tree 2011 , 92, 1073		12
34	Ecological Importance of Large Herbivores in the Ewaso Ecosystem. <i>Smithsonian Contributions To Zoology</i> , 2011 , 43-53		18
33	Large herbivores facilitate savanna tree establishment via diverse and indirect pathways. <i>Journal of Animal Ecology</i> , 2010 , 79, 372-82	4.7	101
32	Mutualisms in a changing world: an evolutionary perspective. <i>Ecology Letters</i> , 2010 , 13, 1459-74	10	349
31	Termites create spatial structure and govern ecosystem function by affecting N ₂ fixation in an East African savanna. <i>Ecology</i> , 2010 , 91, 1296-307	4.6	74
30	Termites, vertebrate herbivores, and the fruiting success of <i>Acacia drepanolobium</i> . <i>Ecology</i> , 2010 , 91, 399-407	4.6	55
29	Synergy of multiple partners, including freeloaders, increases host fitness in a multispecies mutualism. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2010 , 107, 17234-9	11.5	175
28	Spatial pattern enhances ecosystem functioning in an African savanna. <i>PLoS Biology</i> , 2010 , 8, e1000377	9.7	175
27	A Comparison of two Sampling Methods for Surveying Mammalian Herbivore Impacts on Beetle Communities in the Canopy of <i>Acacia drepanolobium</i> in Kenya. <i>African Entomology</i> , 2010 , 18, 87-98	0.5	12
26	Defensive plant-ants stabilize megaherbivore-driven landscape change in an African savanna. <i>Current Biology</i> , 2010 , 20, 1768-72	6.3	82
25	Breakdown of an ant-plant mutualism follows the loss of large herbivores from an African savanna. <i>Science</i> , 2008 , 319, 192-5	33.3	211
24	Consequences of herbivory by native ungulates for the reproduction of a savanna tree. <i>Journal of Ecology</i> , 2007 , 95, 129-138	6	79
23	Mutualism as reciprocal exploitation: African plant-ants defend foliar but not reproductive structures. <i>Ecology</i> , 2007 , 88, 3004-11	4.6	58
22	Volatiles in the mandibular gland of <i>Tetraoponera penzigi</i> : A plant ant of the whistling thorn acacia. <i>Biochemical Systematics and Ecology</i> , 2006 , 34, 536-538	1.4	3
21	Effects of fire on bird diversity and abundance in an East African savanna. <i>African Journal of Ecology</i> , 2006 , 44, 165-170	0.8	15

20	Competition and compensation among cattle, zebras, and elephants in a semi-arid savanna in Laikipia, Kenya. <i>Biological Conservation</i> , 2005 , 122, 351-359	6.2	137
19	Ecological barriers to early colony establishment in three coexisting acacia-ant species in Kenya. <i>Insectes Sociaux</i> , 2005 , 52, 393-401	1.5	12
18	RELAXATION OF INDUCED INDIRECT DEFENSES OF ACACIAS FOLLOWING EXCLUSION OF MAMMALIAN HERBIVORES. <i>Ecology</i> , 2004 , 85, 609-614	4.6	47
17	Wars of attrition: colony size determines competitive outcomes in a guild of African acacia ants. <i>Animal Behaviour</i> , 2004 , 68, 993-1004	2.8	83
16	SPATIAL HABITAT HETEROGENEITY INFLUENCES COMPETITION AND COEXISTENCE IN AN AFRICAN ACACIA ANT GUILD. <i>Ecology</i> , 2003 , 84, 2843-2855	4.6	108
15	Competition and coexistence: exploring mechanisms that restrict and maintain diversity within mutualist guilds. <i>American Naturalist</i> , 2003 , 162, S63-79	3.7	139
14	A comparison of volatiles in mandibular glands from three <i>Crematogaster</i> ant symbionts of the whistling thorn acacia. <i>Biochemical Systematics and Ecology</i> , 2002 , 30, 217-222	1.4	25
13	Burning bridges: priority effects and the persistence of a competitively subordinate acacia-ant in Laikipia, Kenya. <i>Oecologia</i> , 2002 , 133, 372-379	2.9	59
12	The influences of patch shape and boundary contrast on insect response to fragmentation in California grasslands. <i>Landscape Ecology</i> , 2002 , 17, 647-656	4.3	119
11	COMPETITION COLONIZATION TRADE-OFFS IN A GUILD OF AFRICAN ACACIA-ANTS. <i>Ecological Monographs</i> , 2002 , 72, 347-363	9	72
10	Effects of simulated shoot and leaf herbivory on vegetative growth and plant defense in <i>Acacia drepanolobium</i> . <i>Oikos</i> , 2001 , 92, 515-521	4	64
9	Short-term dynamics of an acacia ant community in Laikipia, Kenya. <i>Oecologia</i> , 2000 , 123, 425-435	2.9	88
8	Sterilization and canopy modification of a swollen thorn acacia tree by a plant-ant. <i>Nature</i> , 1999 , 401, 578-581	50.4	104
7	KLEE: A long-term multi-species herbivore exclusion experiment in Laikipia, Kenya. <i>African Journal of Range and Forage Science</i> , 1997 , 14, 94-102	1.5	108
6	Bottle or Big-Scale Studies: How do we do Ecology?. <i>Ecology</i> , 1996 , 77, 681-685	4.6	26
5	The influence of spatial heterogeneity on the behavior and growth of two herbivorous stream insects. <i>Oecologia</i> , 1995 , 104, 476-486	2.9	25
4	OBSERVATIONS ON THE DIETARY CHOICE OF FREE-RANGING JUVENILE OSTRICHES. <i>Ostrich</i> , 1994 , 65, 251-255	0.9	7
3	Pollen Competition and Sporophyte Fitness in <i>Brassica campestris</i> : Does Intense Pollen Competition Result in Individuals with Better Pollen?. <i>Oikos</i> , 1994 , 69, 80	4	26

2	Integrating Ecological Complexity into Our Understanding of Ant-Plant Mutualism: Ant-Acacia Interactions in African Savannas200-222	1
1	A soil-nesting invasive ant disrupts carbon dynamics in saplings of a foundational ant-plant. <i>Journal of Ecology</i> ,	6 2
