#	Article	IF	CITATIONS
1	Systemic Inflammation Contributes to the Association Between Childhood Socioeconomic Disadvantage and Midlife Cardiometabolic Risk. Annals of Behavioral Medicine, 2023, 57, 26-37.	1.7	1
2	Conscientiousness and Cardiometabolic Risk: A Test of the Health Behavior Model of Personality Using Structural Equation Modeling. Annals of Behavioral Medicine, 2022, 56, 100-111.	1.7	5
3	Randomized feasibility trial of a digital intervention for hypertension self-management. Journal of Human Hypertension, 2022, 36, 718-725.	1.0	8
4	Maternal Vascular Lesions in the Placenta Predict Vascular Impairments a Decade After Delivery. Hypertension, 2022, 79, 424-434.	1.3	22
5	The Personality Metaâ€ŧrait of Stability and Carotid Artery Atherosclerosis. Journal of Personality, 2022, , .	1.8	Ο
6	Cerebrovascular function in hypertension: Does high blood pressure make you old?. Psychophysiology, 2021, 58, e13654.	1.2	21
7	ls stressorâ€evoked cardiovascular reactivity a pathway linking positive and negative emotionality to preclinical cardiovascular disease risk?. Psychophysiology, 2021, 58, e13741.	1.2	5
8	Matchmaking and the Future of Hypertension Management. Circulation: Cardiovascular Quality and Outcomes, 2021, 14, e007062.	0.9	3
9	Evaluation of a collaborative VA network initiative to reduce racial disparities in blood pressure control among veterans with severe hypertension. Healthcare, 2021, 8, 100485.	0.6	4
10	Effect of Reducing Sedentary Behavior on Blood Pressure (RESET BP): Rationale, design, and methods. Contemporary Clinical Trials, 2021, 106, 106428.	0.8	14
11	Efficacy of Blended Collaborative Care for Patients With Heart Failure and Comorbid Depression. JAMA Internal Medicine, 2021, 181, 1369.	2.6	30
12	Cortisol activity partially accounts for a relationship between community socioeconomic position and atherosclerosis. Psychoneuroendocrinology, 2021, 131, 105292.	1.3	2
13	Imaging the influence of red blood cell docosahexaenoic acid status on the expression of the 18KDa translocator protein in the brain: a [11C]PBR28 PET study in young healthy males. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2021, , .	1.1	2
14	The prospective relationship between prehypertension, race, and whole-brain white matter microstructure. Journal of Human Hypertension, 2020, 34, 82-89.	1.0	1
15	The effects of omega-3 fatty acids on neuropsychological functioning and brain morphology in mid-life adults: a randomized clinical trial. Psychological Medicine, 2020, 50, 2425-2434.	2.7	8
16	Mediation analysis for estimating cardioprotection of longitudinal RAS inhibition beyond lowering blood pressure and albuminuria in type 1 diabetes. Annals of Epidemiology, 2020, 41, 7-13.e1.	0.9	4
17	Relationship between Dispositional Mindfulness, Psychological Health, and Diet Quality among Healthy Midlife Adults. Nutrients, 2020, 12, 3414.	1.7	8
18	Association of sedentary time with blood pressure in women of reproductive age. Preventive Medicine Reports, 2020, 20, 101219.	0.8	3

#	Article	IF	CITATIONS
19	Is the Brain an Early or Late Component of Essential Hypertension?. American Journal of Hypertension, 2020, 33, 482-490.	1.0	4
20	SMS-facilitated home blood pressure monitoring: A qualitative analysis of resultant health behavior change. Patient Education and Counseling, 2019, 102, 2246-2253.	1.0	14
21	Optimal Blood Pressure Thresholds for Minimal Coronary Artery Disease Risk in Type 1 Diabetes. Diabetes Care, 2019, 42, 1692-1699.	4.3	17
22	Neurobiological Functioning and the Personality-Trait Hierarchy: Central Serotonergic Responsivity and the Stability Metatrait. Psychological Science, 2019, 30, 1413-1423.	1.8	57
23	Prognostic Significance of Pulse Pressure and Other Blood Pressure Components for Coronary Artery Disease in Type 1 Diabetes. American Journal of Hypertension, 2019, 32, 1075-1081.	1.0	6
24	Development and Preliminary Feasibility of an Automated Hypertension Self-Management System. American Journal of Medicine, 2018, 131, 1125.e1-1125.e8.	0.6	7
25	Of Signal and Noise. Circulation: Cardiovascular Quality and Outcomes, 2018, 11, e004543.	0.9	7
26	Associations of immunometabolic risk factors with symptoms of depression and anxiety: The role of cardiac vagal activity. Brain, Behavior, and Immunity, 2018, 73, 493-503.	2.0	13
27	Not all texts are created equal: Design considerations for text message interventions to improve antihypertensive medication adherence. Journal of Clinical Hypertension, 2017, 19, 1285-1287.	1.0	3
28	Omega-3 Supplementation and the Neural Correlates of Negative Affect and Impulsivity: A Double-Blind, Randomized, Placebo-Controlled Trial in Midlife Adults. Psychosomatic Medicine, 2017, 79, 549-556.	1.3	15
29	Personality Correlates of Midlife Cardiometabolic Risk: The Explanatory Role of Higherâ€Order Factors of the Fiveâ€Factor Model. Journal of Personality, 2016, 84, 765-776.	1.8	22
30	Trait positive and negative emotionality differentially associate with diurnal cortisol activity. Psychoneuroendocrinology, 2016, 68, 177-185.	1.3	32
31	Participantâ€Reported Health Status Predicts Cardiovascular and Allâ€Cause Mortality Independent of Established and Nontraditional Biomarkers: Evidence From a Representative US Sample. Journal of the American Heart Association, 2016, 5, .	1.6	40
32	Early Life Family Conflict, Social Interactions, and Carotid Artery Intima-Media Thickness in Adulthood. Psychosomatic Medicine, 2016, 78, 319-326.	1.3	12
33	Blood pressure interacts with APOE ε4 to predict memory performance in a midlife sample Neuropsychology, 2015, 29, 693-702.	1.0	14
34	Social Jetlag, Chronotype, and Cardiometabolic Risk. Journal of Clinical Endocrinology and Metabolism, 2015, 100, 4612-4620.	1.8	315
35	Long-Chain Omega-3 Fatty Acids and Optimization of Cognitive Performance. Military Medicine, 2014, 179, 95-105.	0.4	25
36	Daily Marital Interaction Quality and Carotid Artery Intima-Medial Thickness in Healthy Middle-Aged Adults. Psychosomatic Medicine, 2014, 76, 347-354.	1.3	58

#	Article	IF	CITATIONS
37	Omega-3 fatty acids moderate effects of physical activity on cognitive function. Neuropsychologia, 2014, 59, 103-111.	0.7	21
38	Basal ganglia morphology links the metabolic syndrome and depressive symptoms. Physiology and Behavior, 2014, 123, 214-222.	1.0	18
39	Generation and Dietary Modulation of Anti-Inflammatory Electrophilic Omega-3 Fatty Acid Derivatives. PLoS ONE, 2014, 9, e94836.	1.1	48
40	Long-chain, n-3 fatty acids and physical activity — Independent and interactive associations with cardiac autonomic control. International Journal of Cardiology, 2013, 167, 2102-2107.	0.8	7
41	Concurrent Physical Activity Modifies the Association between n3 Long-Chain Fatty Acids and Cardiometabolic Risk in Midlife Adults. Journal of Nutrition, 2013, 143, 1414-1420.	1.3	8
42	Association of Total Marine Fatty Acids, Eicosapentaenoic and Docosahexaenoic Acids, With Aortic Stiffness in Koreans, Whites, and Japanese Americans. American Journal of Hypertension, 2013, 26, 1321-1327.	1.0	10
43	Use of Total Cerebral Blood Flow as an Imaging Biomarker of Known Cardiovascular Risks. Stroke, 2013, 44, 2480-2485.	1.0	62
44	Discerning Whether and How Long-Chain, n-3 Fatty Acids Lower Blood Pressure: A Comment on Skulas-Ray et al Annals of Behavioral Medicine, 2012, 44, 295-296.	1.7	0
45	Improved Working Memory but No Effect on Striatal Vesicular Monoamine Transporter Type 2 after Omega-3 Polyunsaturated Fatty Acid Supplementation. PLoS ONE, 2012, 7, e46832.	1.1	28
46	Application of a single-objective, hybrid genetic algorithm approach to pharmacokinetic model building. Journal of Pharmacokinetics and Pharmacodynamics, 2012, 39, 393-414.	0.8	17
47	Citalopram improves metabolic risk factors among high hostile adults: Results of a placebo-controlled intervention. Psychoneuroendocrinology, 2011, 36, 1070-1079.	1.3	17
48	Long-Chain Omega-3 Fatty Acids and Blood Pressure. American Journal of Hypertension, 2011, 24, 1121-1126.	1.0	53
49	Brain Function, Cognition, and the Blood Pressure Response to Pharmacological Treatment. Psychosomatic Medicine, 2010, 72, 702-711.	1.3	10
50	Serum Phospholipid Docosahexaenonic Acid Is Associated with Cognitive Functioning during Middle Adulthood. Journal of Nutrition, 2010, 140, 848-853.	1.3	76
51	Preclinical Atherosclerosis Covaries with Individual Differences in Reactivity and Functional Connectivity of the Amygdala. Biological Psychiatry, 2009, 65, 943-950.	0.7	70
52	Citalopram intervention for hostility: Results of a randomized clinical trial Journal of Consulting and Clinical Psychology, 2009, 77, 174-188.	1.6	39
53	Lipid-Lowering Medication Use and Aggression Scores in Women: A Report from the NHLBI-Sponsored WISE Study. Journal of Women's Health, 2008, 17, 187-194.	1.5	29
54	Ambulatory Blood Pressure and the Metabolic Syndrome in Normotensive and Untreated Hypertensive Men. Metabolic Syndrome and Related Disorders, 2007, 5, 34-44.	0.5	7

#	Article	IF	CITATIONS
55	Lower Central Serotonergic Responsivity Is Associated With Preclinical Carotid Artery Atherosclerosis. Stroke, 2007, 38, 2228-2233.	1.0	38
56	Serotonin Receptor 2A (<i>HTR2A</i>) Gene Polymorphisms Are Associated with Blood Pressure, Central Adiposity, and the Metabolic Syndrome. Metabolic Syndrome and Related Disorders, 2007, 5, 323-330.	0.5	44
57	High ω-6 and Low ω-3 Fatty Acids are Associated With Depressive Symptoms and Neuroticism. Psychosomatic Medicine, 2007, 69, 932-934.	1.3	88
58	Serum ω-3 fatty acids are associated with variation in mood, personality and behavior in hypercholesterolemic community volunteers. Psychiatry Research, 2007, 152, 1-10.	1.7	79
59	Long-chain omega-3 fatty acid intake is associated positively with corticolimbic gray matter volume in healthy adults. Neuroscience Letters, 2007, 421, 209-212.	1.0	138
60	The Metabolic Syndrome Is Associated with Reduced Central Serotonergic Responsivity in Healthy Community Volunteers. Journal of Clinical Endocrinology and Metabolism, 2006, 91, 718-721.	1.8	93
61	Community Socioeconomic Status Is Associated With Carotid Artery Atherosclerosis in Untreated, Hypertensive Men. American Journal of Hypertension, 2006, 19, 560-566.	1.0	22
62	Cognitive performance is associated with macronutrient intake in healthy young and middle-aged adults. Nutritional Neuroscience, 2006, 9, 179-187.	1.5	38
63	Neuroendocrine response to intravenous citalopram in healthy control subjects: pharmacokinetic influences. Psychopharmacology, 2005, 178, 268-275.	1.5	27
64	Dietary Fat Intake Is Associated with Psychosocial and Cognitive Functioning of School-Aged Children in the United States. Journal of Nutrition, 2005, 135, 1967-1973.	1.3	66
65	Socio-economic status covaries with central nervous system serotonergic responsivity as a function of allelic variation in the serotonin transporter gene-linked polymorphic region. Psychoneuroendocrinology, 2004, 29, 651-668.	1.3	105
66	A comparison of d,l-fenfluramine and citalopram challenges in healthy adults. Psychopharmacology, 2004, 174, 376-80.	1.5	20
67	Low Central Nervous System Serotonergic Responsivity Is Associated with the Metabolic Syndrome and Physical Inactivity. Journal of Clinical Endocrinology and Metabolism, 2004, 89, 266-271.	1.8	109
68	Statin treatment alters serum n-3 and n-6 fatty acids in hypercholesterolemic patients. Prostaglandins Leukotrienes and Essential Fatty Acids, 2004, 71, 263-269.	1.0	73
69	Randomized trial of the effects of simvastatin on cognitive functioning in hypercholesterolemic adults. American Journal of Medicine, 2004, 117, 823-829.	0.6	216
70	Blunted Fenfluramine-Evoked Prolactin Secretion in Hypertensive Rats. Hypertension, 2003, 42, 719-724.	1.3	11
71	Effects of six anti-hypertensive medications on cognitive performance. Journal of Hypertension, 2002, 20, 1643-1652.	0.3	52
72	Central nervous system serotonergic responsivity and aggressive disposition in men. Physiology and Behavior, 2002, 77, 705-709.	1.0	61

#	Article	IF	CITATIONS
73	Retest Reliability of Prolactin Response to dl-Fenfluramine Challenge in Adults. Neuropsychopharmacology, 2002, 26, 269-272.	2.8	11
74	Cholesterol reduction and non-illness mortality: meta-analysis of randomised clinical trials. BMJ: British Medical Journal, 2001, 322, 11-15.	2.4	158
75	White-Coat Hypertension and Carotid Artery Atherosclerosis. Archives of Internal Medicine, 2000, 160, 1507.	4.3	76
76	Memory performance and the apolipoprotein E polymorphism in a community sample of middle-aged adults. American Journal of Medical Genetics Part A, 2000, 96, 707-711.	2.4	112
77	Effects of lovastatin on cognitive function and psychological well-beingâ^—â^—Access the "Journal Club― discussion of this paper at http://www.elsevier.com/locate/ajmselect/. American Journal of Medicine, 2000, 108, 538-546.	0.6	279
78	A regulatory polymorphism of the monoamine oxidase-A gene may be associated with variability in aggression, impulsivity, and central nervous system serotonergic responsivity. Psychiatry Research, 2000, 95, 9-23.	1.7	423
79	Recovery from Major Depression Is Not Associated with Normalization of Serotonergic Function. Biological Psychiatry, 1998, 43, 320-326.	0.7	57
80	Acute hemoconcentration during psychological stress: Assessment of hemorheologic factors. International Journal of Behavioral Medicine, 1998, 5, 204-212.	0.8	25
81	Inverse Relationship Between Fenfluramine-Induced Prolactin Release and Blood Pressure in Humans. Hypertension, 1998, 32, 972-975.	1.3	23
82	Cerebral Blood Flow in Hypertensive Patients. Hypertension, 1998, 31, 1216-1222.	1.3	64
83	What are quality of life measurements measuring?. BMJ: British Medical Journal, 1998, 316, 542-545.	2.4	347
84	Serum Cholesterol and Intellectual Performance. Psychosomatic Medicine, 1997, 59, 382-387.	1.3	71
85	Assessing the Observed Relationship between Low Cholesterol and Violence-related Mortality Annals of the New York Academy of Sciences, 1997, 836, 57-80.	1.8	74
86	d,l-fenfluramine challenge test: Experience in nonpatient sample. Biological Psychiatry, 1996, 39, 761-768.	0.7	34
87	Hypertension and neuropsychological performance in men: Interactive effects of age Health Psychology, 1996, 15, 102-109.	1.3	81
88	Serum Total Antioxidant Activity in Relative Hypo- and Hypercholesterolemia. Free Radical Research, 1996, 25, 239-245.	1.5	32
89	Neuropsychological consequences of antihypertensive medication use. Experimental Aging Research, 1995, 21, 353-368.	0.6	33
90	Individual Differences in Cellular Immune Response to Stress. Psychological Science, 1991, 2, 111-115.	1.8	218
