| #  | ARTICLE                                                                                                                                                                                                                | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Benefits of deep learning for delineation of organs at risk in head and neck cancer. <i>Radiotherapy and Oncology</i> , 2019, 138, 68-74.                                                                              | 0.3 | 79        |
| 2  | Randomized clinical trial on reduction of radiotherapy dose to the elective neck in head and neck squamous cell carcinoma; update of the long-term tumor outcome. <i>Radiotherapy and Oncology</i> , 2020, 143, 24-29. | 0.3 | 26        |
| 3  | Patient Selection in Human Papillomavirus Related Oropharyngeal Cancer: The Added Value of Prognostic Models in the New TNM 8th Edition Era. <i>Frontiers in Oncology</i> , 2018, 8, 273.                              | 1.3 | 21        |
| 4  | Toxicity Reduction in the Treatment of HPV Positive Oropharyngeal Cancer: Emerging Combined Modality Approaches. <i>Frontiers in Oncology</i> , 2018, 8, 439.                                                          | 1.3 | 20        |
| 5  | Study protocol for a randomized controlled trial: prophylactic swallowing exercises in head-and-neck cancer patients treated with (chemo)radiotherapy (PRESTO trial). <i>Trials</i> , 2020, 21, 237.                   | 0.7 | 20        |
| 6  | Prognostic value of a 15-gene hypoxia classifier in oropharyngeal cancer treated with accelerated chemoradiotherapy. <i>Strahlentherapie Und Onkologie</i> , 2020, 196, 552-560.                                       | 1.0 | 6         |
| 7  | Validation of the total dysphagia risk score (TDRS) in head and neck cancer patients in a conventional and a partially accelerated radiotherapy scheme. <i>Radiotherapy and Oncology</i> , 2016, 118, 293-297.         | 0.3 | 4         |
| 8  | Clinical factors impacting on late dysphagia following radiotherapy in patients with head and neck cancer. <i>British Journal of Radiology</i> , 2018, 91, 20180155.                                                   | 1.0 | 4         |
| 9  | Randomized Clinical Trial on Reduction of Radiotherapy Dose to the Elective Neck in Head and Neck Squamous Cell Carcinoma: Results on the Quality of Life. <i>Quality of Life Research</i> , 2021, 30, 117-127.        | 1.5 | 3         |
| 10 | Use of Imaging in Radiotherapy for Head and Neck Cancer. <i>Medical Radiology</i> , 2020, , 495-517.                                                                                                                   | 0.0 | 1         |
| 11 | Radiologic Differences between Human Papillomavirus-Related and Human Papillomavirus-Unrelated Oropharyngeal Carcinoma on Diffusion-Weighted Imaging. <i>Orl</i> , 2017, 79, 164-165.                                  | 0.6 | 0         |
| 12 | Validation of the clinical AJCC/UICC TNM 8th edition for human papillomavirus related oropharyngeal squamous cell carcinoma. <i>Annals of Oncology</i> , 2018, 29, viii389.                                            | 0.6 | 0         |
